This bulletin is archived in PDF format at www.vcu.edu/bulletins.
It is my pleasure to welcome you to Virginia Commonwealth University.

VCU is a new kind of research university — one that puts learning at the center of all that it does. We strive to focus all activities of the university directly on the creation of learning.

With nearly 32,000 undergraduate, master’s, doctoral and professional students pursuing 205 degree and certificate programs, VCU offers a curriculum that engages students in a course of study designed to explore the nature of human reasoning, the physical and natural sciences, morality and ethics, individual and group responsibility, and the meaning and purposes of human existence. Courses in literature, mathematics, languages, the humanities, the social sciences, fine arts and the sciences are core elements of the educational experience at VCU. Sixty-five of the university’s programs are unique in Virginia. Twenty-one graduate and first-professional programs have been ranked by U.S. News & World Report as among the best of their kind in the nation, with two ranked No. 1 in their disciplines.

We are dedicated to excellence in education in an atmosphere of free inquiry and scholarship so that our students may realize their full potential as informed, productive citizens with a lifelong commitment to learning and service. We recognize that all the activities of the university — teaching, research, service and patient care — provide opportunities to learn. This approach allows us to prepare students to thrive in a complex, interdependent, diverse and constantly changing world.

As part of a long-range strategic plan, VCU has been enhancing its stature as one of the nation’s leading research universities. With more than $225 million in annual research funding, VCU is designated as a Research University with high research activity by the Carnegie Foundation. Strategic projects have included establishing a School of Engineering, which has been an important factor in attracting the microelectronics industry to the state, and VCU Life Sciences, a comprehensive undergraduate and graduate program involving the academic and medical faculty.

The VCU Medical Center is one of the most comprehensive in the nation. Its physician-faculty, facilities and medical-care programs receive annual recognition from local, regional and national guides and reports on the best health care.

VCU is an extraordinary institution, and we are proud that you are part of the excitement here. Best wishes with your program of study.

Sincerely,

Eugene P. Trani
President
With more than $225 million in annual research funding, Virginia Commonwealth University is designated as a Research University with high research activity by the Carnegie Foundation. VCU’s teaching, research, public service and patient care mission supports full-time and part-time students and faculty of diverse backgrounds. The university also contributes to the local, state, national and international communities through its scholarly activities, its diverse educational programs, and its public service and patient care initiatives.

Located in Richmond, the capital of Virginia, VCU is composed of two campuses. The 88.2-acre Monroe Park Campus is situated in Richmond’s historic Fan District. The 52.4-acre VCU Medical Center, which includes the VCU Health System, is located two miles east in the financial, commercial and governmental district of downtown Richmond. Of the university’s 186 buildings, 40 were built before 1900. Fifty-four buildings are national historic landmarks or lie within a historic district.

VCU was established in 1968 by an act of the Virginia General Assembly, which merged the Medical College of Virginia with Richmond Professional Institute to form the new university.

MCV was founded in 1838 as the medical department of Hampden-Sydney College. It became an independent institution in 1854. In 1860, when Virginia appropriated $30,000 for MCV’s first hospital, it became a state-supported institution.

RPI was established in 1917 as the Richmond School of Social Work and Public Health. In 1925, it became the Richmond Division of The College of William and Mary. Its name was changed to RPI in 1939; in 1962, it separated from The College of William and Mary, becoming an independent state institution.

VCU is governed by a 16-member board of visitors appointed by the governor of Virginia. Board members, who come from the business, professional, civic and health care communities of Virginia, serve four-year terms. Members may be appointed for an additional four-year term at the governor’s discretion.

VCU is organized into the divisions of Academic Affairs (which includes the Provost’s Office and the Graduate School), Advancement, External Relations, Governmental Relations and Health Policy, Finance and Administration, Health Sciences, and Research. The university offers 205 baccalaureate, master’s, professional, doctoral and certificate programs through VCU Life Sciences, the College of Humanities and Sciences (which includes the L. Douglas Wilder School of Government and Public Affairs, and the schools of Mass Communications and World Studies), the University College, and the schools of Allied Health Professions, the Arts, Business, Dentistry, Education, Engineering, Medicine, Nursing, Pharmacy and Social Work, as well as the Graduate School. Sixty-five of the university’s programs are unique in Virginia. In addition, 21 graduate and professional programs have been ranked by U.S. News & World Report as among the best of their kind in the nation.

VCU also offers Bachelor of Interdisciplinary Studies degrees through the University College and the College of Humanities and Sciences, and the Master of Interdisciplinary Studies through the Graduate School. Several additional programs provide off-campus students with the opportunity to earn degrees through telecommunications and instructional technology. Nearly 32,000 students attend VCU; each year the university awards more than 5,500 degrees. Twenty-nine percent of VCU’s students represent minority groups and four percent are international students, while 50 percent are women and 29 percent are part-time students. The student body represents 49 states, and 107 different countries. VCU students also come from Washington, D.C., Guam, Puerto Rico and the Virgin Islands.

With an annual budget of approximately $1.5 billion, VCU and its affiliate organizations constitute a significant economic enterprise in the Richmond area. Nearly 17,500 faculty, staff and hourly employees, including 1,888 full-time faculty and 8,196 classified staff, make the university and the health system the city’s single largest employer. Employees and students together spend approximately $307 million a year in the city of Richmond. The VCU Health System provides more than $100 million worth of indigent health care services annually. More than 60 percent of VCU’s alumni live and work in Virginia.

VCU’s economic impact includes a master-site plan that calls for capital expansion into underused sections near the campuses. The plan has established architectural guidelines for future construction, which were developed in collaboration with the surrounding community. Current projects under construction represent more than $336 million. Since 1981, VCU has invested $1.165 billion in facilities.

As part of a long-range strategic plan, VCU has enhanced its stature as one of the nation’s leading research universities as well as continued its contribution to community and individual development, particularly through collaborative initiatives and partnerships.

One of the university’s strategic collaborations is the School of Engineering, which has been an important factor in attracting the microelectronics industry to Virginia. The university continues to develop the Virginia BioTechnology Research Park in collaboration with business, civic and government leaders. When it is fully developed, the research park will cover 34 acres in downtown Richmond and employ an estimated 3,000 professional and technical personnel.

VCU also has established VCU Life Sciences, a comprehensive undergraduate and graduate program involving the university’s academic and medical faculty.

The VCU Health System supports a Level-I trauma center; the Massey Cancer Center, a National Cancer Institute-designated center; the Ambulatory Care Center; and a number of partnerships within the greater health care community. It is one of the most comprehensive teaching health centers in the country. It also has been ranked locally, regionally and nationally for providing the highest quality and most cost-efficient health care.

Administration

VCU administration provides leadership and organizational structure for the university, overseeing its goals and mission. Refer to each unit’s Web site for a current listing of administrators.

Deans

Deans provide leadership for their respective school or college. Refer to each unit’s Web site for a current listing of its deans, departmental chairs and program heads.

Accreditation

Virginia Commonwealth University is accredited by the Commission on Colleges of the Southern Association of Colleges and Schools to award baccalaureate, master’s, doctoral and first professional degrees. SACS is located at 1866 Southern Lane, Decatur, GA 30033; telephone: (404) 679-4500.

Mission of VCU

VCU is a public, metropolitan, research university, supported by Virginia to serve the people of the state and the nation. The university provides a fertile and stimulating environment for learning, teaching, research, creative expression and public service. Essential to the life of the university is the faculty — actively engaged in scholarship and creative exploration activities that increase knowledge and understanding of the world and inspire and enrich teaching.

The university is dedicated to educating full-time and part-time students of all ages and backgrounds in an atmosphere of free inquiry and scholarship so they may realize their full potential as informed, productive citizens with a lifelong commitment to learning and service.
The university serves the local, state, national and international communities through its scholarly activities, its diverse educational programs and its public service activities. As an institution of higher learning in a metropolitan center that also is the state capital, the university enjoys unique resources that enrich its programs. The university also contributes its intellectual and creative expertise in the development of innovative approaches to meet the changing needs of our society.

The goals of VCU in carrying out its mission are:

- To provide undergraduate education that includes a broad and rigorous foundation in the arts, sciences and humanities, and explores the ideas and values of humankind.
- To offer nationally and internationally recognized professional and graduate programs leading to doctoral, master’s, and other terminal and advanced degrees in the professions, sciences, humanities and arts.
- To foster a scholarly climate that inspires creativity, a free and open exchange of ideas, critical thinking, intellectual curiosity, freedom of expression and intellectual integrity.
- To expand the boundaries of knowledge and understanding through research, scholarship and creative expression in the sciences, arts, humanities and professional disciplines.
- To value and promote racial and cultural diversity in its student body, faculty, administration and staff to enhance and enrich the university.
- To develop and sustain a faculty of the highest quality by providing an environment conducive to their achieving and maintaining national and international stature and by continuing to attract both recognized scholars and other outstanding individuals with a high potential for scholarly achievement and excellence in teaching.
- To provide an optimal environment for educating and training health care professionals, for conducting research to improve health care and delivery, and for meeting the needs of patients and the community in a comprehensive health care setting.
- To use the urban environment as a laboratory for studying and developing new approaches to problems pertaining to the public and private sectors.
- To support (through its commitment to public exhibitions, performances and other cultural activities) the imaginative power of the liberal, visual and performing arts to express the problems and aspirations of humanity and to enrich the lives of individuals.
- To develop innovative programs for continuing education that establish permanent intellectual connections between the university and its constituents, enhance professional competence and promote dialogue on public issues.
- To offer diverse opportunities for individuals to benefit from higher education through a variety of avenues including flexible scheduling for part-time undergraduate and graduate students, open admission for nondegree-seeking students with appropriate preparation, advanced-degree programs for working professionals, selected programs in diverse locales, admission of graduates with appropriate associate degrees in arts or sciences and support programs for specially admitted students.
- To promote interdisciplinary studies within the university to bring new perspectives to bear on complex problems and mobilize creative energies and expertise in meeting the needs of society and individuals through its unique role as Virginia’s major urban university.

VCU Medical Center Mission

The VCU Medical Center is an integral part of VCU. The five academic schools and teaching hospital of the VCU Medical Center serve the needs of the citizens of Virginia for:

- Transmission of knowledge related to health services.
- Continuity in the supply of health care professionals.
- Accessibility to comprehensive and quality health care services.
- Development and dissemination of new knowledge for the advancement of the health sciences.

The VCU Medical Center is committed to educational programs directed toward meeting the state’s health needs. Programs are dedicated to maintaining and updating the competency of health professionals as well as preparing graduates to enter the health professions. Educational programs are supported by several academic disciplines, the teaching hospital, carefully selected off-campus health facilities and an institutional commitment to effective teaching.

The VCU Medical Center also is committed to a comprehensive program of patient care: to demonstrate excellence in practice as a model for students, to provide a base of study designed to improve patient care, to meet the needs of patients in its hospital’s service area and to offer highly specialized services in clinical areas of demonstrated expertise.

The VCU Medical Center’s research programs are designed to develop new knowledge in areas ranging from the molecular level through clinical procedures to health care delivery and outcomes. Their goal is to serve as a model for students in the spirit of inquiry and the application of the scientific process to patient care and to focus interdisciplinary effort on problems amenable to the scientific approach.

Oak Ridge Associated Universities Consortium

Since 1963, students and faculty have benefited from VCU’s membership in Oak Ridge Associated Universities (ORAU), a consortium of 87 colleges and universities and a contractor for the U.S. Department of Energy. ORAU works with its member institutions to help students and faculty gain access to federal research facilities, to keep its members informed about opportunities for scholarship and research appointments and to organize research alliances among its members.

Faculty, graduate students and undergraduate students may access a wide range of opportunities for study and research, including the Lindau-Nobel Laureates and Powe Junior Faculty programs. Many of these programs are designed to increase the numbers of underrepresented minority students pursuing degrees in science- and engineering-related disciplines.

For more information about ORAU and its programs, contact:

Dr. Francis L. Macrina, ORAU Councilor for VCU
(804) 827-2262

Ms. Monnie E. Champion, ORAU Corporate Secretary
(865) 576-2206

Or you may visit the ORAU Web site at www.orau.org.

VCU Health System Authority

In April 1996, Gov. George Allen signed legislation that established the Medical College of Virginia Hospitals Authority. Effective July 1, 1997, the operations, employees and obligations of MCV Hospitals (formerly a division of VCU) were transferred to the Authority. Three years later, in connection with legislation signed by Gov. James Gilmore, the MCV Hospitals Authority became the Virginia Commonwealth University Health System Authority. The clinical activities of MCV Hospitals, MCV Physicians and the VCU School of Medicine are now coordinated and integrated by and through the VCU Health System.

The VCU Health System Authority is charged by statute with the missions of operating MCV Hospitals as teaching hospitals for the benefit of the schools of the Health Sciences Division of VCU, providing high quality patient care and providing a site for medical and biomedical research, all of which missions are required to be performed in close affiliation with the Health Sciences Division.

The VCU Vice President for Health Sciences also serves as the Chief Executive Officer of the VCU Health System Authority, and five VCU faculty physicians serve as members of the Health System Board of Directors.
Board of Visitors
The Board of Visitors is the voting body of Virginia Commonwealth University. Each year, the governor of Virginia appoints members. Refer to Office of the President’s Web site for a current listing of board members.

Determination of student classification for in-state tuition purposes
Tuition is determined by the number of credit hours a student is taking, the student’s residency classification, course of study and classification level. For in-state tuition benefits, the student must comply with Section 23-7.4 of the Code of Virginia.

All applicants to VCU who wish to be considered for in-state tuition rates as Virginia residents must submit the Application for Virginia In-state Tuition Rates. The residency determination of the applicant is conveyed at the time of admission.

New and continuing students initially classified as non-Virginians for tuition purposes may request a review of the initial residency determination by contacting the residency officer in the Office of Records and Registration. This office will request that the applicant complete an Application for Change of Domicile for Virginia In-state Tuition Rates and submit documents for additional clarification. Requests and applications for a second review should be submitted to the residency officer no later than 30 days prior to the beginning of any semester.

Students approved for a change to in-state status for tuition purposes are notified by mail with copies of their approval letters sent to the Office of Financial Aid and the Student Accounting Department. Students denied this status also are notified by mail. The denial letter informs the student of procedures for appeal of this decision.

Effective July 1, 2006, a student with in-state status for tuition purposes who exceeds 125 percent of the credit hours needed to complete his program will be assessed a tuition surcharge.

Rights of students under the Family Educational Rights and Privacy Act
Pursuant to a federal statute enacted to protect the privacy rights of students (Family Educational Rights and Privacy Act of 1974 [FERPA], as amended, enacted as Section 438 of the General Education Provisions Act), eligible students of Virginia Commonwealth University are permitted to inspect and review education records of which the student is the subject. A statement of university policy concerning inspection and disclosure of education records has been formulated in compliance with the federal statute. Copies of the policy also are available from the Office of Records and Registration or on the Web at www.vcu.edu/enroll/ssc/rights.html.

Generally, the act provides that no personally identifiable information will be disclosed without the student’s consent, except for directory information and information to other school officials with a legitimate educational interest. When personally identifiable information, other than directory information, is disclosed, a record will be maintained of these disclosures. This record also is available for inspection and review by the student.

If an eligible student feels that his or her education record is inaccurate, misleading or otherwise in violation of the student’s privacy or other rights, the student may request an amendment to the record. Should the university fail to comply with the requirements of the act, the student has the right to file a complaint with the Family Policy Compliance Office, U.S. Department of Education, 400 Maryland Ave., S.W., Washington, D.C. 20202-5901.

Parental Notification Amendment
Amendments to FERPA signed into federal law in fall 1998 specifically allow notification to the parents or guardians of students under the age of 21 who violate any law or university rule regarding use or possession of alcohol or other controlled substance. The Virginia Attorney General’s Task Force on Drinking by College Students also recommended such notification in its 1998 report.

In accordance with these documents, a parental notification procedure has been included in the VCU Drug Free Schools and Workplace Policy.
Consumer information

The federal Higher Education Act of 1965, as amended, requires that institutions of higher education disclose certain consumer information to current students, prospective students, current employees and/or prospective employees. This consumer information can be found online at www.consumerinfo.vcu.edu.
The faculty and staff of the College of Humanities and Sciences are dedicated to excellence in teaching, research and public service. The mission of Virginia Commonwealth University provides the framework for this pursuit of excellence.

Teaching and learning are central to the college, and the college is central to educational and intellectual life at VCU. The college meets the educational needs of a diverse student body, provides general education for all undergraduate students of the university, preparatory programs for the health sciences, engineering and law, and educates future teachers in the liberal arts and sciences. The college offers comprehensive undergraduate, graduate and professional programs of study that link a foundation of understanding and knowledge with skills on which students can build careers, become responsible citizens and continue lifelong learning.

Scholarship, creative work and professional accomplishment are essential to teaching and learning. The college is responsible for advancing understanding and increasing knowledge for its own sake, for the educational benefit of its students, and for the good of the larger community.

In both teaching and research, the College of Humanities and Sciences seriously upholds the responsibilities of being part of a public, metropolitan university. Through service and public teaching, the college meets the challenges and opportunities afforded by VCU’s urban environment and by its location in the capital of the commonwealth.

The college achieves national and international recognition through the success of its students, the advancement of the disciplines and professions represented by its programs, and through the individual and collaborative research of its faculty.

### History

The College of Humanities and Sciences was organized in 1966 (then the School of Arts and Sciences) as a combination of several existing departments at Richmond Professional Institute: Biology, Chemistry, English, Foreign Languages, and History and Political Science. The departments of Philosophy and Religious Studies, Mathematical Sciences, Physics, Psychology, Sociology and Anthropology, and Political Science were developed or added subsequently. Arts and Sciences began its first graduate programs in 1969 with master’s programs in psychology and sociology. Master’s programs in biology and mathematical sciences and a doctoral program in clinical psychology were soon to follow in 1971. In 1974, English/English education began a master’s program offered cooperatively by the Department of English and the Division of Teacher Education of the School of Education. In that same year the graduate program in chemistry, a cooperative venture between the departments of Chemistry on the Monroe Park Campus and Pharmaceutical Chemistry on the MCV Campus, was transferred administratively to the School of Arts and Sciences. Beginning in 1976, a master’s degree was created in mass communications, while in 1978, a doctoral program in social policy and social work started in cooperation between the Department of Sociology and Anthropology and the School of Social Work.

In July 1981, the School of Arts and Sciences and the Department of Mass Communications were organized into the College of Humanities and Sciences and the School of Mass Communications. The Master of Fine Arts in Creative Writing commenced in 1983 followed by the M.S. in Physics in 1984. Three years later, the Department of Mathematical Sciences established the M.S. in Computer Science program, and finally, a master’s degree in history was initiated in 1994 through the Department of History.

Effective July 1, 1994, the departments of Criminal Justice, Public Administration and Urban Studies joined the college from the dissolved School of Community and Public Affairs. Each department brought to the college both master’s and post-baccalaureate certificate programs within their disciplines. The Public Administration program was merged with the Political Science program to form the Department of Political Science and Public Administration. The Ph.D. in Public Administration program was initially incorporated into the newly merged department and now resides in the Center for Public Policy.

### Accreditation

- Chemistry (bachelor’s degree)
  - The American Chemical Society
- Psychology (doctoral degrees: clinical, counseling)
  - American Psychological Association
- Public Administration (master’s degree)
  - National Association of Schools of Public Affairs and Administration
- Urban and Regional Planning (master’s degree)
  - Planning Accreditation Board

### Graduate information

### Graduate programs

The College of Humanities and Sciences offers the following graduate degree programs:

- Biology, M.S.
- Chemistry, M.S. and Ph.D.
- Clinical Psychology, M.S. and Ph.D.
- Counseling Psychology, M.S. and Ph.D.
- Creative Writing, M.F.A.
- Criminal Justice, M.S.
- English, M.A.
- Forensic Science, M.S.
- History, M.A.
- Homeland Security and Emergency Preparedness, M.A.
- Mass Communications, M.S.
  - advertising
  - creative brand management
  - scholastic journalism
  - strategic public relations
- Mathematical Sciences, M.S.
  - applied mathematics
  - mathematics
  - operations research
  - statistics
- Media, Text and Art, Ph.D.
- Medical Physics, Ph.D.
- Physics, M.S.
- Psychology, M.S. and Ph.D.
- Public Administration, M.P.A.
- Sociology, M.S.
- Urban and Regional Planning, M.U.R.P.

**Post-baccalaureate graduate certificates**

- Applied Social Research
- Criminal Justice
- Gender Violence intervention
- Geographic Information Systems
- Historic Preservation Planning
- Homeland Security and Emergency Preparedness
- Nonprofit Management
- Planning Information Systems
- Public Management (Graduate)
- Statistics (Undergraduate)
- Urban Revitalization
In addition to these degree programs, the College of Humanities and Sciences offers selected graduate courses in the Department of Philosophy and the School of World Studies (Foreign Languages and Religious Studies), but does not offer graduate degree programs in these areas.

**Graduate admission requirements**

In addition to the general requirements for admission to graduate studies as stated in the Graduate Studies at VCU chapter of this bulletin, persons seeking admission to any of the graduate programs in humanities and sciences should:

- Have a bachelor’s degree in the discipline in which application for graduate study is made or, in some programs as noted, a bachelor’s degree in some other appropriate area.
- Submit Graduate Record Examination (GRE) scores (some departments require the scores on the advanced GRE within the discipline; some departments accept LSAT and MAT scores in lieu of GREs).
- Have submitted letters of recommendation that comment on the applicant’s ability to undertake graduate study in the specified area.

All applications will be considered in terms of the specific requirements for admission noted in the description of the individual programs and of the applicant’s ability to perform satisfactorily in the program for which he/she has applied. The judgment of that ability will be based on the supporting material submitted with the application. Some graduate programs must limit enrollment to a fixed number of the best-qualified applicants. Final action on admission is taken by the dean of the Graduate School in consultation with the College of Humanities and Sciences and the program concerned.

Applicants whose applications reach the university after July 1 for the fall semester and after Nov. 15 for the spring semester may not have their applications processed in time for registration. The applicant whose application arrives late may be considered for admission as a special student, but there is no guarantee that the special student later will be accepted into a degree program. Refer to the programs section of the Graduate School Web site for specific deadlines for all graduate programs.

**Graduate registration**

Although most students register for the first semester, which begins in August, they may arrange to begin graduate work during the spring semester with the exception of the programs in clinical and counseling psychology.

**Scholarships, assistantships, fellowships and other financial assistance for graduate students**

The College of Humanities and Sciences seeks to attract and support graduate students of the highest caliber and to prepare them, through research and instruction, to meet local and national needs for highly trained men and women. Recognizing that financial limitations may inhibit some qualified students from applying, the college attempts to inform students of the options of various loans, grants and work-study opportunities that are available to them as well as assist them in financing their education by offering various forms of financial aid and facilitating the process of seeking financial assistance from external sources. Additionally, the college believes that the experience of being a teaching or research assistant reinforces the learning that takes place in the classroom. The value of teaching assistants also is recognized as being beneficial to the college’s undergraduate programs.

Types of financial aid that are available to graduate students fall into three basic categories: aid that does not have to be repaid (grants, scholarships and tuition waivers), aid that does have to be repaid (loans) and aid that enables students to earn a portion of their school costs (work-study, graduate teaching assistantships and graduate research assistantships).

Offers of financial aid are based on financial need and/or skill and competency. Financial need is determined by information contained in the Federal Application for Student Aid (FAFSA) completed by the student. Not all financial aid is based on financial need. To ascertain your eligibility for the different types of financial aid, contact the VCU Office of Financial Aid at 901 W. Franklin St., P.O. Box 843026, Richmond, VA 23284-3026, (804) 828-6669, and the department to which you will be applying. The university library has reference books listing other types of scholarships and grants. International students should contact: Office of International Education at 916 W. Franklin St., P.O. Box 843043, Richmond, VA 23284-3043, (804) 828-6016.

Graduate teaching assistantships and graduate research assistantships are forms of financial aid that provide teaching and research positions for graduate students within their field of study. These are not loans and do not have to be repaid because the student is actually earning income for services rendered. Usually graduate assistants must work the equivalent of 20 hours per week. Assistantships are awarded to students who have demonstrated academic excellence. Individual departments award the assistantships, which usually include payment of tuition; the teaching and/or research duties of graduate assistants vary among departments. Graduate students interested in seeking these teaching and research positions are advised to contact the departments to which they will apply for admission.

Graduate students applying for financial assistance should remember the following tips:

- Apply early.
- Use federal tax forms to complete the FAFSA.
- Save copies of all forms completed, including tax returns.
- Check with the specific department for application requirements and deadlines.

**Students should assume they are eligible, not ineligible.**

- Also see departmental listings.

**The student adviser and the graduate committee**

All departments offering graduate degrees in the College of Humanities and Sciences provide graduate students with advising either through a single adviser, the student’s graduate committee or a departmental graduate committee. For details, students should consult the departmental director of graduate studies or the department chair.

**Graduate degree requirements**

- Full-time graduate status shall consist of a minimum of nine and a maximum of 15 credits per semester. No more than 12 semester credits may be earned in a summer session. See the Graduate Studies at VCU chapter of this bulletin for course load requirements for students awarded graduate assistantships.
- Graduate students are required to maintain an overall GPA of 3.0 (“B”). Students who do not maintain a “B” average during the course of their program may be dropped from the program at any time on recommendation of the appropriate department committee to the dean of the Graduate School.
- If students earn less than a “B” on 20 percent or more of all attempted credits, their graduate status must be reviewed for continuation by the appropriate department committee.
- At least half of the credits required in the student’s program must be those designated as exclusively for graduate students; that is, those at the 600 level or above.
- Graduate students must have earned an overall GPA of 3.0 (“B”) in order to receive a degree.

In addition to these requirements and those set forth in the Graduate Studies at VCU chapter of this bulletin, students must meet the requirements for specific degrees set forth in the departmental listings. Students also should consult the Continuous Enrollment Policy stated in the Graduate Studies at VCU section of this bulletin.

VCU requires registration for a defined credit-hour level during both the didactic and research phases of advanced degree training. For programs requiring the preparation of a thesis or dissertation, there is no obligatory linkage between the accumulation of credit hours and an expectation that a degree be awarded.

As a guide to monitoring the timely completion of the degree requiring a thesis or dissertation within the present enrollment framework, the accumulation of 80 credit hours for a master’s degree and 180 credit hours for a doctoral degree can be taken to be reasonable credit maxima. Unless stated otherwise, these figures apply only to programs offered by the College of Humanities and Sciences.

Students are required to submit in advance of the date when they expect to receive a degree a Graduation Application Form to the dean of the College of Humanities and Sciences. Deadlines for the submission of the Graduation Application Form are listed in the academic calendars online at http://www.vcu.edu/ academiccalendars; for departmental deadlines the student should consult the departmental adviser. Individual departments may require additional forms.
Appeal procedures
Graduate students in the College of Humanities and Sciences have the right to appeal course grades or other academic actions on the grounds of a breach of due process. See the Graduate Studies at VCU section of this bulletin for a summary of the Grade Review Procedure. An appeal of an academic action other than a grade review is governed by the Graduate Student Academic Appeal Procedure. A copy of this document can be obtained from department offices.

L. Douglas Wilder School of Government and Public Affairs
The L. Douglas Wilder School of Government and Public Affairs is a creative, interdisciplinary grouping of programs in the social sciences and professional arenas that provides students with the knowledge, skills and experience necessary for success in public service.

The Wilder School brings together faculty from multiple disciplines that share a common interest in public affairs. The faculty includes individuals with strong research and analytical skills and with substantive expertise in such fields as criminal justice, economics, homeland security, political science, public administration, sociology, urban planning and community development. These faculty members are committed to producing cutting-edge research and public service that can bridge the gap between theory and practice and to providing high quality, innovative and nationally competitive degree programs for our students.

To achieve this mission, the Wilder School actively fosters and promotes a wide range of endeavors, including the establishment of interdisciplinary undergraduate and graduate programs, and develops close ties with other related university programs. The Wilder School is an intellectually exciting place committed to having a genuine impact on public policy and providing an intellectually stimulating education for future public affairs professionals who share in our commitment.

Program offerings
The school offers a variety of educational opportunities. Students may pursue five undergraduate programs and an additional seven minors. Graduate programs provide options for full-time students and for practicing professionals interested in enhancing their skills or engaging in graduate-level work on a part-time basis. Current graduate offerings include nationally recognized master’s programs and 11 graduate-level certificates, as well as a doctoral degree program administered by the Center for Public Policy. Wilder School programs include:

Baccalaureate degrees
Bachelor of Science in Criminal Justice
Bachelor of Science in Economics (with the Department of Economics in the School of Business)
Bachelor of Arts in Homeland Security and Emergency Preparedness
Bachelor of Arts in Political Science
Bachelor of Science in Sociology
Bachelor of Science in Urban Studies and Geography

Minors
Criminal justice
Economics
Homeland security and emergency preparedness

Nonprofit management and administration
Political science
Public management
Sociology
Urban studies

Post-baccalaureate graduate certificates
Certificate in Applied Social Research
Certificate in Criminal Justice
Certificate in Gender Violence Intervention
Certificate in Geographic Information Systems
Certificate in Historic Preservation Planning
Certificate in Homeland Security and Emergency Preparedness
Certificate in Nonprofit Management
Certificate in Planning Information Systems
Certificate in Public Management
Certificate in Public Safety
Certificate in Urban Revitalization

Master’s degrees
Master of Arts in Homeland Security and Emergency Preparedness
Master of Science in Criminal Justice
Master of Public Administration
Master of Urban and Regional Planning

Doctoral degree
Ph.D. in Public Policy and Administration (through the Center for Public Policy)
The school also offers two dual degree programs with the University of Richmond’s T.C. Williams Law School. Through these programs students can simultaneously obtain a law degree (J.D.) and either the Master of Public Administration or the Master of Urban and Regional Planning.

Graduate information
Admission
Admission to programs of the L. Douglas Wilder School of Government and Public Affairs is available to qualified students on a rolling admissions basis. Since the demand for admission to some programs is high and space availability is limited, students are encouraged to apply well in advance of their proposed admission dates.

As outlined below, admission requirements vary by academic program. No application packet will be considered by the relevant program admissions committee until all the required materials have been submitted by the applicant. Application forms and instructions for applying to all graduate programs are available on the Graduate School Web site at www.graduate.vcu.edu.

Admission to a master’s program from the certificate programs
The Graduate Certificate in Public Management and the Graduate Certificate in Nonprofit Management are designed for persons in professional positions who require a limited number of courses in contemporary management theory and skills. However, if a student later decides to pursue the M.P.A. degree, successfully completed certificate courses may be applied toward the degree. Successful completion of either certificate does not guarantee admission into the M.P.A. degree program.

The courses in the Postbaccalaureate Certificate in Criminal Justice program are the same as the master’s courses and, with grades of “B” or better and upon acceptance into the master’s degree program, are fully transferable to the Master of Science in Criminal Justice program.

All courses in the Certificate in Urban Revitalization may be applied to meet the requirement of the Master of Urban and Regional Planning degree. However, successful completion of the certificate program does not guarantee admission into the M.U.R.P. Degree program.

Provisional admission
• In rare cases, applicants who do not meet the requirements for full admission may be accepted provisionally upon recommendation of the program’s admissions committee. The conditions for earning full admission are stated in the provisional acceptance letter sent by the dean of the Graduate School. Conditions usually include the requirement that the student complete the first...
nine hours of departmental graduate courses with a grade of “B” or better in each course.

• Provisional admission does not constitute a waiver of the requirement to submit a GRE or other standardized test score.

Continuous enrollment requirements and expectations
To remain in good standing, students must maintain continuous registration for each fall and spring semester (except for approved leaves of absence) until they have completed all requirements. Students who fail to register for two consecutive semesters (summer sessions included) will be dropped automatically from the program and must reapply for admission in order to continue. Exceptions to this policy will be made on an individual basis by petition. Students who reapply after having been dropped for failure to register continuously will be evaluated under the bulletin requirements in effect at the time of readmittance.

A minimum GPA of 3.0 on a 4.0 scale must be maintained. Compliance with other university regulations also is required.

Part-time students
Since the school schedules many of its courses in the late afternoon or evening, its programs accommodate both full- and part-time students. Students also may take advantage of courses offered in the summer. Thus it is possible for a part-time student taking six credit hours per semester to finish the master’s degree in four years or less.

Nondegree-seeking students
Nondegree-seeking students must have an undergraduate degree from an accredited institution and the written approval of the instructor prior to registering for any graduate-level course. Nondegree-seeking students can take no more than six credit hours without authorization from the appropriate program coordinator.

Financial aid information
Information and application forms for financial aid may be secured from the VCU Office of Financial Aid, 901 W. Franklin St., Room 107, Richmond, VA 23284-3026, (804) 828-6669.

The L. Douglas Wilder School of Government and Public Affairs also offers a limited amount of financial assistance. Individuals interested in such assistance are urged to apply by March 30. Financial assistance available through the school includes:

Graduate teaching assistant positions – Duties involve helping with the instruction of courses. The level of support varies according to the work level, financial need and scholarship.

Research assistant positions – The stipend and number of positions depend upon the level of sponsored research carried out by the school each year.

Tuition fellowships – There are a limited number of tuition fellowships for full-time students within the three master’s degree programs.

T. Edward Temple Memorial Scholarship Award – This award of approximately $500 per year is given to an outstanding graduate student in the Master of Urban and Regional Planning program each year.

The Senator Edward E. Willey Scholarship, the Virginia City Management Association/University Dr. T. Edward Temple Scholarship and the Leigh E. Grosenick Scholarship – These scholarships are available to outstanding students in the Master of Public Administration program. Preference for these three scholarships is given to those who plan public careers in Virginia.

Internships – Paid, on-the-job internships are widely available in the Richmond area and elsewhere and are encouraged. VCU graduates also have been successful in obtaining presidential management internships in the federal government, state-government professional positions and local government positions.

Transfer credit
With the consent of the admission committee or program coordinator, a maximum of six semester hours of appropriate graduate credit may be transferred and applied toward the Master of Science in Criminal Justice, the Master of Public Administration or the Master of Urban and Regional Planning. These hours will not have been credited toward another degree.

School wide master’s-level requirements
In addition to the program specific requirements of the Master of Public Administration, the Master of Science in Criminal Justice, and the Master of Urban and Regional Planning as outlined elsewhere in this bulletin, the Wilder School requires all master’s-level graduate degree-seeking students to acquire competence in four broad areas:

1. Research methods
2. Planning and/or policy analysis
3. Public administration
4. Ethics

Competence can be demonstrated by completion of the following:

Research methods
GVPA/PADM/URSP/CRJS 623 Research Methods for Government and Public Affairs

Planning/policy analysis
GVPA/URSP 632 Planning Theory and Processes or
GVPA/PADM 625 Public Policy Analysis

Public administration
GVPA/PADM 601 Principles of Public Administration

Ethics
GVPA/PADM 683 Administrative Ethics or
A program specific course through which ethical issues are imbedded and discussed within a public sector context. Such courses would include: CRJS 550, PADM 661, PADM 689, URSP 632 and URSP 635.

Selection of courses to meet these competency requirements will be made by the student in consultation with his/her academic adviser. While each graduate of the Wilder School must demonstrate competence in each of the areas outlined above, substitutions for the specific courses may be made with the written approval of the appropriate graduate program coordinator.

Wilder School courses
Descriptions for all courses offered by the university may be accessed through the online courses database at www.pubapps.vcu.edu/veucourses. You may search by unit, subject or keyword, as well as by degree level.

<tr>
<td>Certificate</td>
</tr>
</tbody>
</table>

The certificate program is designed (1) to enable practitioners to acquire additional knowledge and skills in applied social research without necessarily pursuing a
graduated degree and (2) provide marketable job/career skills for graduate degree-seeking students in sociology as well as other graduate programs. Because the certificate program involves a limited number of credit hours and coordinates with the type of statistics and methods courses offered in a number of graduate degree programs, it may be pursued simultaneously with such programs as sociology, social work, public administration, social policy and urban services. At the same time, individuals seeking more limited, specialized training may pursue the certificate independently.

**Admission and matriculation requirements**

Students possessing a B.A. or B.S. degree and beginning level skills in statistics/research methods are eligible for admission into the certificate program. Relevant course or research experience will be considered in evaluating admission and substitution of courses. Equivalency tests are available for required courses in statistics and methods. No more than six hours of substitution or equivalency credit will be granted. An overall GPA of 3.0 is required for award of the certificate, and no more than one grade of "C" may be earned in the certificate program curriculum.

**Curriculum**

A total of 19 hours is required to earn the applied social research certificate. Four courses (12 credits) in statistics and research methods are required. In addition, two internship courses (four credits), which offer the opportunity for involvement in all phases of ongoing research projects, are required. One course (three credits) may be elected to develop more specialized types of research skills.

The Post-baccalaureate Certificate in Criminal Justice program offers an abbreviated graduate-level course sequence of 15 credit hours for individuals with an academic and/or professional background in criminal justice.

This certificate program offers specialization for individuals interested or involved in law enforcement, corrections, juvenile justice or the courts. It combines survey and theory courses with research, management and policy courses on the justice system. The courses in the Postbaccalaureate Certificate in Criminal Justice program are the same as the master’s courses and, with grades of B or better and upon acceptance into the master’s degree program, are fully transferable to the Master of Science program.

**Curriculum**

Five courses are required for the certificate, as specified in the chart that follows. To receive the certificate the student must achieve a B average in the five courses with no more than one C grade and complete the 15-hour certificate program within three years.

*These deadlines are designed to allow sufficient time for application review and admission processing. Applications may be submitted after the deadline; however, we cannot guarantee sufficient time for processing. Any application submitted too late for current semester processing will be considered for the following semester. Please contact the program coordinator with specific application questions.

The graduate program in criminal justice is designed to provide advanced educational preparation for students and criminal justice professionals pursuing careers in the field of criminal justice. Such preparation includes understanding the range of theory, research and policy in criminal justice. The curriculum is directed especially toward assisting students in developing the advanced knowledge, skills and abilities required by criminal justice professionals.

The Master of Science in Criminal Justice requires 36 semester hours of course work, with an overall grade-point average of 3.0 or above. Students who do not have at least one year of professional-level experience are encouraged to take a three-credit internship as part of their 36 semester hours.

A maximum of nine semester hours of graduate credit from an accredited institution may be applied toward the master’s degree with the approval of the graduate program coordinator. However, these hours will not have been credited toward another degree.

CRJS 693 Internship (see Wilder School web page for listing)
FRSC 670 Forensic Evidence and Criminal Procedure
HSEP 501 Institutional Challenges of Security Preparedness
HSEP 502 Survey of Terrorism
HSEP 603 Risk Assessment
PADM/GVPA 601 Principles of Public Administration
PADM/GVPA 625 Public Policy Analysis
SOCY 510 Domestic and Sexual Violence in Social Context
SOCY 631 Battered Women in the Criminal Justice System
SOCY 656 Social Network Analysis

Other course(s) may be selected with permission of the criminal justice graduate director.

To complete the M.S. curriculum, students must submit a portfolio of their work before they graduate. Contact the program director for format and submission details.

**Admission requirements**

Beyond the general Graduate School standards listed in Graduate Studies at VCU section of this bulletin, admission to the Master of Science in Criminal Justice also will be based on:

- An undergraduate GPA that exceeds 2.7 overall.
- A satisfactory score on the GRE. Call (800) GRE-CALL for exam information.
- Previous evidence of ability to perform graduate-level work (where applicable).

Professional experience in criminal justice (where applicable).

**Gender Violence Intervention, Certificate in (Post-baccalaureate graduate certificate)**

The certificate program is designed to:

1. enable current practitioners in community agencies to acquire additional knowledge and skills in sexual and domestic violence intervention, prevention and service management/administration without necessarily pursuing a graduate degree and
2. provide marketable job/career skills specific to this areas for graduate degree-seeking students in sociology or other graduate programs.

The certificate program may be pursued simultaneously with such programs as sociology, social work, criminal justice, public administration, social policy and urban services. At the same time, individuals seeking more limited, specialized training may pursue the certificate independently.

**Admission and matriculation requirements**

Students possessing a B.A. or B.S. degree are eligible for admission into the certificate program. Relevant course or practical experience will be considered in evaluating admission and substitution of courses. No more than six hours of substitution or equivalency credit will be granted. An overall GPA of 3.0 is required for award of the certificate, and no more than one grade of “C” may be earned in the certificate program curriculum.

**Curriculum**

A total of 18 hours is required to earn the certificate in gender violence intervention. Four courses (12 credits) are required. In addition, an internship course (three credits), which offers the opportunity for involvement in all phases of work in this field is required. For the remaining three credits, students may choose one of several elective options.

**Combined Master of Social Work (M.S.W.) and Certificate in Gender Violence Intervention (Post-baccalaureate graduate certificate)**

See the individual program pages for admission requirements specific to the separate degrees.

The certificate in Gender Violence Intervention is a collaborative effort between the Department of Sociology and other departments and programs at VCU, as well as community advocates working in the area of sexual and domestic violence. The certificate requires a total of 18 credit hours comprised of five required courses in the Department of Sociology and one elective.

Through a cooperative arrangement with VCU’s Department of Sociology, M.S.W. students may simultaneously earn this graduate certificate by completing two certificate-specific courses that also satisfy the elective requirements in the M.S.W. program: SOCY 510 Sexual and Domestic Violence in Social Context and SOCY 635 Theorizing Gender Violence. M.S.W. courses satisfy the other certificate requirements as follows:

<table>
<thead>
<tr>
<th>Certificate requirement</th>
<th>Satisfied by M.S.W. requirement</th>

Richmond, Virginia 23284-2027
Attention: M.S.W.-Gender Violence Intervention Certificate Adviser

**Geographic Information Systems, Certificate in (Post-baccalaureate graduate certificate)**

The Post-baccalaureate Graduate Certificate in Geographic Information Systems emphasizes the core functions and applications of GIS. It provides specialized training in the operations and techniques related to the creation, analysis, modeling, visualization, interpretation and management of geographic information.

**Admission requirements**
Admission requirements include an official application; three letters of reference; a letter of intent describing objectives in applying for the certificate; an official transcript showing successful completion of baccalaureate degree or its equivalent from an accredited college or university with a minimum GPA of 2.7 (out of 4.0) in the last 60 hours of undergraduate study.

**Curriculum**

This GIS certificate program can be completed in one academic year. To receive the GIS Certificate, students must complete 12 graduate credits of GIS course work that includes three required and one elective courses with a grade-point average of 3.0 or higher (out of 4.0). The following schedule is suggested as a means of completing the certificate program:

**Fall semester (6 credits)**
URSP 621 Introduction to Geographic Information Systems (required)
URSP 622 Community Socioeconomic Analysis Using GIS (required)

**Spring semester (6 credits)**
URSP 625 Spatial Database Management and GIS Modeling (required)
Plus one elective course from the following cluster:
URSP 627 GIS Applications in Decision Analysis
Other GIS-related courses approved by the certificate program coordinator.

All credits earned in the GIS certificate program are transferrable to the Master of Science in Criminal Justice program, the Master of Public Administration program, or the Master of Urban and Regional Planning program. Also, students may use courses from the GIS certificate to simultaneously satisfy requirements in any graduate degree at the university with the respective department’s approval, including the Master of Science in Criminal Justice, the Master of Public Administration, or the Master of Urban and Regional Planning programs. However, students must apply to the certificate and graduate degree programs separately.

**Homeland Security and Emergency Preparedness, Certificate in (Post-baccalaureate graduate certificate)**

The certificate in historic preservation planning provides specialized training in the techniques and processes of historic preservation and planning. This graduate-level program includes courses in historic preservation, architectural history, preservation analysis and methods, building reuse, and the role of the public and private sectors in implementing proposals. The program is useful for mid-career professionals in planning, historic preservation, architecture and those in allied fields who wish to learn new skills to expand their career options. It also is useful for recent college graduates who want advanced training in the application of historic preservation in urban development.

**Admission requirements**

Students must meet the following admission requirements:

- completion of an official application form,
- letter of intent describing interest in applying to the certificate in historic preservation planning,
- an official transcript showing successful completion of an appropriate undergraduate degree,
- three letters of recommendation and
- a minimum grade-point average of 3.0 (out of 4.0) in the last 60 hours of undergraduate study.

**Curriculum**

The certificate consists of nine credits in architectural history and nine credits in urban planning.

**Urban planning**: After discussing the program with an adviser, students should choose three of the following courses:
URSP 517 Historic Preservation in Planning
URSP 610 Introduction to Planning
URSP 611 Principles of Urban Design
URSP 635 Legal and Legislative Foundations of Planning
URSP 647 Adaptive Reuse of Buildings

**Architectural history**: After discussing the program with an adviser, students should choose three courses from among the offerings in architectural history at the 500 or 700 level. Examples of courses are:
ARTH 502 Historic Preservation and Architectural History
ARTH 789 Palladianism and Its Alternatives
ARTH 789 The World of Jefferson and Letrobe
ARTH 789 From Neoclassicism to World War I
ARTH 789 The Arts and Crafts Movement

**Historic Preservation Planning, Certificate in (Post-baccalaureate graduate certificate)**

The Post-baccalaureate Graduate Certificate in Homeland Security and Emergency Preparedness was developed for current and prospective homeland security and emergency preparedness practitioners to develop managerial competencies supporting these evolving professions. The graduate certificate program requires 15 credit hours, comprised of five three-credit courses delivered through a combination of online technology, and one on-campus session (three days) as described below. The courses offered in the certificate program are the same as those taken by students in the master’s program and, with grades of “B” or better and upon acceptance into the master’s program, are fully transferable to the Master of Arts in Homeland Security and Emergency Preparedness program.

**Online study**

Web-based course delivery in an asynchronous format is designed around each course’s own Blackboard site.

**On-campus study**

During the final week of the semester, the class will have a three-day in-class session from Thursday to Saturday. It will feature presentations and discussion of student projects/papers, as well as lectures, seminar sessions and exercises. (Exceptions will be made for students who are unable to attend these sessions, such as active-duty military personnel or emergency managers involved in ongoing operations).

**Curriculum**

HSEP 501 Institutional Challenges of Security Preparedness
HSEP 502 Survey of Terrorism
HSEP 601 Emergency Management: Response Planning and Incident Command
HSEP 602 Government, Private Industry and Community Strategic Planning
HSEP 603 Risk Assessment
All courses are required for the program.
Admission requirements summary

| Homeland Security and Emergency Preparedness, Master of Arts (M.A.) |
|-----------------|-----------------|-----------------|
| Degree          | Semester(s)     | Deadline        | Test requirements: |
| M.A.            | Fall            | Jul 15* (Mar 1 for financial aid) | GRE, GMAT, MAT or LSAT |
|                 | Spring          | Nov 30*         |                  |

*These deadlines are designed to allow sufficient time for application review and admission processing. Applications may be submitted after the deadline; however, we cannot guarantee sufficient time for processing. Any application submitted too late for current semester processing will be considered for the following semester. Please contact the program coordinator with specific application questions. The Master of Arts in Homeland Security and Emergency Preparedness offered by Virginia Commonwealth University provides for the scholarly and professional needs of several groups who have accepted the challenges of this new environment of homeland security and emergency preparedness: 1) professionals who already work in the public sector at the federal, state and local level in emergency management and security; 2) the public health and private sector workforce that focuses on security and emergency preparedness issues; and 3) students who wish to research these issues in hopes of developing and refining the scholarly study of homeland security and emergency preparedness. The master’s degree is primarily an off-campus, online, distance-learning program. It has both off-campus (online) and on-campus (at VCU) components.

VCU’s program takes a broad interdisciplinary approach to preparedness that will give students the ability to see the larger organizational, social, political, ethical and economic aspects of disaster studies, in addition to the policy-making and implementation aspects. The scholarly study of homeland security and emergency preparedness rests at the intersection of national defense, emergency management, law enforcement and policy management. With expertise in criminal justice, geography, government (local, state, federal and foreign), international affairs, policy planning and public administration, the L. Douglas Wilder School of Government and Public Affairs at VCU is particularly well-suited for such a program. Its location — in the state capital and situated just 90 minutes from the nation’s capital — also provides easy access to homeland security institutions and practitioners.

The nature of terrorist, natural and technological disaster threats is such that the business community, the public health system, and the scientific community are key components in the theoretical study, policy design, and policy analysis aspects of security and preparedness. The program is designed to approach the study of homeland security and emergency preparedness from multiple perspectives and takes full advantages of the resources in VCU’s schools of Business and Engineering plus the VCU Medical Center.

Curriculum (36 credits)

All courses are required
HSEP 501 Institutional Challenges of Security Preparedness
HSEP 502 Survey of Terrorism
HSEP 601 Emergency Management: Response Planning and Incident Command
HSEP 602 Government, Private Industry and Community Strategic Planning
HSEP 603 Risk Assessment
HSEP 610 Law Enforcement Policy and Judicial Precedent
HSEP 620 Private Sector Issues in Security and Preparedness
ENGR 630 Technology, Security, and Preparedness
INFO 644 Principles of Information System Security
HSEP 650 Public Health System Preparedness
HSEP 690 Capstone Seminar

Admission requirements

In addition to the general requirements of the university, selection is made on the basis of prior academic performance, professional accomplishments and other indicators of the ability to pursue graduate studies and a professional career in a field related to homeland security and emergency preparedness. The application for admission requires:

- A transcript documenting the completion of a bachelor’s degree.
- Three letters of reference (including both academic and professional references if possible).
- A current resume.
- Satisfactory standardized test score (GRE, GMAT, MAT, LSAT).
- A minimum of a 2.7 GPA (on a 4.0 scale) in their last 60 semester hours of undergraduate work.

Students not meeting these requirements who have demonstrated advanced competency on a professional basis may be admitted to the program provisionally. The provisional period shall consist of the first nine hours of designated graduate work in which all grades must be no less than “B.” Provisional admission does not constitute a waiver of the requirement related to a standardized test.

Program structure

Off-campus study
Web-based course delivery is designed around each course’s own web-based site utilizing the Blackboard education system, which provides the following:

- Course syllabus.
- Course reference materials and links to supporting Web sites.
- Course lectures.
- Faculty-student and student-student communications via weekly discussion topics.
- Student writing assignments.

Participation in online discussions is mandatory and will count for a significant percentage of each student’s grades. Written work is submitted, evaluated and returned to students via the Blackboard education system assignment function.

On-campus study
During the final week of the semester, each class will have a three-day in-class session from Thursday to Saturday. It features presentations and discussion of student projects/papers, as well as lectures, seminar sessions and exercises. These sessions will include the formation of working groups of students from a number of classes in the program. (Exceptions will be made for students who are unable to attend these sessions, such as active-duty military personnel or emergency managers involved in ongoing operations with provisions for maximum possible inclusion via electronic means and/or the substitution of additional student assignments equivalent to the on-campus study requirements).

Nonprofit Management, Certificate in (Post-baccalaureate graduate certificate)

Admission requirements summary

| Nonprofit Management, Certificate in (Post-baccalaureate graduate certificate) |
|-----------------|-----------------|-----------------|
| Degree          | Semester(s)     | Deadline        | Test requirements: |
| Certificate     | All semesters   | No deadlines    | No test requirements |

The graduate certificate in nonprofit management is a post-baccalaureate program designed to enable practitioners principally in the nonprofit sector to acquire knowledge and skills in managing nonprofit organizations without pursuing a full master’s degree.

Admission requirements

Admission to the certificate program requires the same procedure used in applying to the M.P.A., except that a standardized examination is not required.

Curriculum

The certificate requires a total of 15 graduate credit hours that is comprised of four courses in the graduate public administration program and one elective that may be public administration, or from elsewhere within the school or university. The following courses are required:
A student must complete a minimum of 36 semester hours, as approved, with All students who are required to take the practicum will usually do so during The certificate in planning information systems is a program to provide Admission requirements summary Admissions requirements Admission requirements are the same as for the Master of Urban and Regional Planning. Curriculum The program consists of nine hours of courses in information systems and nine hours in urban studies and planning. Public Administration, Master of (M.P.A.) Admission requirements summary Degree: Semester(s) Deadline Test of entry: dates: requirements: M.P.A. Fall Jul 15* (Mar 1 for financial aid) GRE, GMAT or LSAT Spring Nov 30* Special requirements: Applicants who submit LSAT scores must have received a grade of C or better in an undergraduate math course. *These deadlines are designed to allow sufficient time for application review and admission processing. Applications may be submitted after the deadline; however, we cannot guarantee sufficient time for processing. Please contact the program coordinator with specific application questions. The Master of Public Administration program is designed to meet the graduate educational needs of pre-service and in-service professionals for careers in public management and analysis in the public and nonprofit sectors. The program is accredited by the National Association of Schools of Public Affairs and Administration. M.S.W. clinical concentration students must complete 15 course credits in nonprofit management. Six of the PADM nonprofit credits will satisfy the M.S.W. elective requirement for either concentration. Application process To earn the Certificate in Nonprofit Management simultaneously with the M.S.W., it is necessary to complete a graduate school application for the certificate program; however, no supporting documents are required for students who are already enrolled in good standing in the social work master’s degree program. Additional information may be obtained from the School of Social Work Web site at: www.vcu.edu/slwweb or by writing: School of Social Work Virginia Commonwealth University 1001 West Franklin Street Richmond, Virginia 23284-2027 Attention: Certificate in Nonprofit Management Adviser Detailed information about the Certificate in Nonprofit Management can be obtained from Dr. Janet Hutchinson, associate professor and director of the Master of Public Administration program, (804) 828-8041 or e-mail: jhutch@vcu.edu. agency and the student. A written student project is required to complete the internship.

- All students are required to complete the courses in the core curriculum unless competence in the subject matter can be demonstrated on the basis of previous experience or course work.

Advising

The program coordinator is also the student adviser. All new students are required to contact the coordinator for advice in developing their curriculum plan. Current students are strongly encouraged to consult with the program coordinator prior to registering for courses.

Concentration possibilities

Students may develop a concentration in one of several areas from among the elective courses offered by the department or in combination with courses elsewhere in the university. Possibilities include the following concentrations:

- environmental policy
- human resource management
- public financial management
- executive leadership
- public policy analysis and evaluation
- local government management
- nonprofit management

Other concentrations may be developed including concentrations in other fields. These concentrations may require agreement with other degree programs such as criminal justice, economics, gerontology, social work, urban and regional planning, business, and health administration.

Accelerated Bachelor of Arts (B.A.) in Political Science and Master of Public Administration (M.P.A.)

This program permits selected students to earn the B.A. and M.P.A. in a minimum of five years, by taking certain master’s-level courses during the senior year of their undergraduate program. The program is restricted to students with strong credentials and a clear interest in a career in the public or nonprofit sector. To be eligible, a student must have completed 90 credits of course work and have an overall GPA of 3.0, with a GPA of 3.3 in political science courses. The accelerated program is limited to students majoring in political science who have a minimum of nine credit hours in political science courses.

To be considered for acceptance into the program and before enrolling in 600-level Master of Public Administration courses, a student must complete the graduate school application, submit standardized test scores and supply the supporting information required for admission. Upon being accepted into the accelerated program, a student must meet the same standards of performance as a graduate student that are described in detail in the “Satisfactory Progress” section of the Graduate Bulletin, must maintain a 3.0 GPA and must satisfactorily complete all of the requirements for the degree, as stated in this bulletin. Guidance to students admitted to the accelerated program is given by the public administration program director. Students should contact the M.P.A. graduate director for more information about admission procedures.

To graduate with a bachelor’s degree, a student must complete 120 hours of course work. Of these credits, 33 must be in political science. Of the 33 political science credits, 15 are required (POLI 103 U.S. Government, POLI/INTL 105 International Relations, POLI 107 Political Theory, POLI 109 Comparative Politics and POLI 490 Senior Seminar). Students enrolled in the accelerated program may take up to six credits of graduate public administration courses in each of the final two semesters of their undergraduate course work. These courses are shared credits with the graduate program, meaning that they will be applied toward the undergraduate degree requirement and the graduate degree requirement. A maximum of 12 credits may be taken prior to the completion of the baccalaureate degree. The Bachelor of Arts degree will be awarded when the student has completed all the requirements for the undergraduate degree, which may include the 12 graduate public administration credits.

The graduate courses that may be taken in the public administration program once a student is admitted to the accelerated program are as follows:

- PADM/GVPA 601 Principles of Public Administration (may be used to meet the undergraduate major distribution requirement for U.S. politics and is a required course in the graduate program)
- PADM 602 Public Administration Theory (may be used to meet the undergraduate major distribution requirement for political theory and methodology, and is a required course in the graduate program)
- PADM 607 Public Human Resource Management (core requirement for the M.P.A.; elective for the undergraduate major)
- PADM 609 Financial Management in Government (core requirement for the M.P.A.; elective for the undergraduate major)
- PADM/GVPA/CRJS/URSP 623 Research Methods for Public Administration (may be used to meet the undergraduate major distribution requirement for political theory and methodology, and is a required course in the graduate program)
- PADM 624 Quantitative Methods for Public Administration (core requirement for the public administration degree; elective for the undergraduate major) or a PADM elective course (elective requirement for the M.P.A. and elective for the undergraduate major)
- PADM 650 Principles of Nonprofit Management (required for the concentration in nonprofit management and is an elective for the M.P.A. degree, and may fulfill an elective requirement in the undergraduate major)

All accelerated program students must have their course schedules approved by the graduate public administration program director prior to registration.

Combined Master of Public Administration (M.P.A.) and Juris Doctor (J.D.)

The dual degree program is designed to provide its graduates with two degrees — Master of Public Administration and Juris Doctor — attesting to competency in both public administration and law. This competency is applicable to areas of practice drawing upon knowledge and skills from each of these fields. The program brings together persons interested in both the broader aspects of public policy and government affairs, and the law. It also brings together two fields that require complementary knowledge and skills, which may be directed toward solving problems that are associated with the affairs of the government and nonprofit sectors. This integration of education in public administration and law
draws on the contributions that each discipline can make to a professional knowledge base for practice in both fields.

Students who are accepted into the dual degree program are permitted to apply 12 credit hours of work in the M.P.A. toward meeting the graduation requirements in the T.C. Williams School of Law, and up to 12 credit hours of work in the T.C. Williams School of Law toward meeting the graduation requirements for the M.P.A. This credit application enables participants in the dual degree program to complete the requirements for the J.D. and the M.P.A. in an estimated four years of full-time course work. Applicants for this program are required to meet admission standards of both the T.C. Williams Law School of the University of Richmond and the Graduate School and the M.P.A. program of VCU.

The graduate certificate in public management is a program designed to enable practitioners in government and nonprofit organizations to acquire knowledge and skills in public administration without pursuing a full master’s degree. Further details are available from the program office.

The graduate certificate in public management is offered in at least two locations off campus: Chesterfield County and Henrico County.

**Admission requirements**

Admission to the certificate program requires the same application materials as the M.P.A. except a standardized examination is not required.

**Curriculum**

The certificate requires a total of 18 hours of graduate credits involving a mix of required and elective courses. The courses are the same as those offered to M.P.A. students.

*These deadlines are designed to allow sufficient time for application review and admission processing. Applications may be submitted after the deadline; however, we cannot guarantee sufficient time for processing. Any application submitted too late for current semester processing will be considered for the following semester. Please contact the program coordinator with specific application questions.

The Sociology Program offers programs leading to the Master of Science in Sociology and the Post-baccalaureate Certificate in Gender Violence Intervention. The goal of the graduate program in sociology is to facilitate the development of theoretical, methodological and substantive competence appropriate for students’ interests and career goals. In keeping with VCU’s role as an urban institution, the program focuses on the study of urban social problems, policy alternatives and strategies for change.

**Admission requirements**

In addition to the general requirements for admission to graduate programs in the Graduate School and in the College of Humanities and Sciences, the following requirements represent the minimum acceptable standards for admission:

- Applicants must submit a transcript of their undergraduate course work and the results of their GRE in general aptitude (quantitative, analytical and verbal).
- Admission priority is given to students with an undergraduate GPA of 3.0 or higher on a 4.0 scale. Students with GPA below 3.0 will be evaluated by the director of graduate studies and members of the graduate faculty on the basis of the GRE scores, recommendations from references and other data submitted by applicants.
- To be admitted as a regular graduate student, applicants should have completed 24 semester hours in the social sciences (including history), with at least 12 credits in sociology. Undergraduate work in sociology should include a survey of sociological theory, research methods and statistics. Students who otherwise are qualified for admission but lack this background may be admitted provisionally, with the stipulation that they may be requested to make up any deficiencies specified by the director of graduate studies. Nondegree or “special” students must apply for regular student status after completing six sociology graduate credits.

Because of the diversity in different institutions of higher education, students trained abroad may be judged on an individual basis. Criteria on which this judgment is based include the reputation of the foreign university, the student’s academic record, proficiency in English and recommendations from professors.

VCU requires that foreign students demonstrate guarantees of financial support. A limited number of assistantships are available for qualified applicants. Individuals not applying for assistantships should file their applications for graduate study as early as possible to permit adequate review and to ensure consideration. Applications that reach VCU after July 1 for the fall semester and after Nov. 15 for the spring semester may not be processed in time for registration.

**Degree requirements**

Two options are available for students pursuing a master’s degree in sociology. Students must receive approval from the director of graduate studies before choosing either option.

**Thesis option**

Thirty-six hours of graduate course work must be completed including the following core courses: SOCY 502 Contemporary Sociological Theory, SOCY/STAT 608 Statistics for Social Research, SOCY 623 Research Methods and SOCY 626 Applications of Advanced Research Methods. A master’s thesis will be developed under the guidance of the thesis committee (three faculty members including a thesis adviser) and must be defended publicly. The student may present up to six thesis credits for graduation. Up to six credits of independent study may be presented, as well as six credits outside the department.

**Applied sociology option**

Thirty-six hours of graduate course work must be completed including the following core courses: SOCY 502 Contemporary Sociological Theory, SOCY/STAT 508 Introduction to Social Statistics or SOCY/STAT 608 Statistics for Social Research, SOCY 623 Research Methods, SOCY 626 Applications of Advanced Research Methods and six credit hours of GVPA 693 Internship. Up to six credits of independent study may be presented, as well as six credits outside
sociology. Students are strongly encouraged to take one to two courses from other
graduate programs within the Wilder School.
For all candidates, an overall GPA of at least 3.0 (B) must be maintained in order to
receive a degree. A student who does not maintain a 3.0 average may be
dropped from the master’s program at any time by the graduate program director. A
review of all first-year graduate students will be conducted at the end of their
second semester by the graduate program director and three appointed faculty
members. The purpose of this review will be to assess all first-year students on
their satisfactory/unsatisfactory progress toward the master’s degree.

Applying for an option
Students are required to apply for either the thesis or applied sociology track. The
application is due by May 15, at the end of the second semester in the program.
Applications will be submitted to and reviewed by the graduate committee.
Decisions will be announced by June 1 in order for students to be prepared to register
for the appropriate fall course (SOCY 626 or GVPA 693).

Accelerated Bachelor of Science (B.S.) and Master of Science
(M.S.) in Sociology
The accelerated B.S. and M.S. program allows qualified students, with a major in
sociology, to earn both degrees in a minimum of five years by completing
approved graduate courses during the senior year of their undergraduate program.
The program will provide students with the opportunity to expand and deepen
their knowledge of sociology, enhance their credentials for the job market and/or
to prepare for further professional education. Students in the program may count
up to 12 hours of graduate courses toward both the B.S. and M.S. degrees. Thus,
the two degrees may be earned with a minimum of 144 hours instead of the 156
required if the degrees are pursued separately.
The program is restricted to students who have demonstrated a clear interest in
sociology. Minimum qualifications for admittance to the program include
completion of 90 undergraduate credit hours with an overall GPA of 3.0, and a
minimum of nine credit hours in sociology with a GPA of 3.3. Prior to being
formally considered for admittance and before enrolling in graduate courses, the
student must complete the graduate school application, submit GRE general
aptitude scores and supply supporting information required for admission. All
persons admitted to the program must meet the graduate student standards of
performance, e.g., maintain a 3.0 GPA, and satisfactorily complete all
requirements for the degree.
The director of graduate studies will provide guidance of students in this program.
Students who are interested in this program should consult with the director of
graduate studies or the director of undergraduate studies before they have
completed 90 credits. Both directors may be contacted for more information about
admission procedures.
Requirements for the Bachelor of Science in Sociology include the completion of
a minimum of 120 credits. Students in the accelerated program may take up to six
graduate sociology credits in each of the final two semesters of their
undergraduate course work. These courses are shared credits with the graduate
program, meaning that they will be applied to both undergraduate and graduate
degree requirements. A maximum of 12 graduate credits may be taken prior to
completion of the baccalaureate degree.
The Bachelor of Science degree will be awarded when the student has completed
all requirements for the undergraduate degree, which may include the 12 graduate
sociology credits. The graduate sociology courses that may be taken, once a
student is admitted to the program, are:
• SOCY 502 Contemporary Sociological Theory (may be used to meet the
undergraduate major requirement for SOCY 402 Sociological Theory and is a
required course in the graduate program)
• SOCY/STAT 508 Introduction to Social Statistics (recommended and may
fulfill elective requirement in the undergraduate major)
• SOCY/STAT 608 Statistics for Social Research (a required course in the
graduate program and may fulfill elective requirement in the undergraduate
major)
• SOCY 623 Research Methods – Prerequisite SOCY/POLI 320 (a required
course in the graduate program and may fulfill elective requirement in the
undergraduate major)
• Other SOCY graduate courses, with the approval of the director of graduate
studies, may serve as an elective requirement for the M.S. degree and an
elective for the undergraduate major.
All accelerated program students must have their schedules approved by the
director of graduate studies prior to registration.

*These deadlines are designed to allow sufficient time for application review and admission processing. Applications may be submitted after the deadline; however, we cannot guarantee sufficient time for processing. Any application submitted too late for current semester processing will be considered for the following semester. Please contact the program coordinator with specific application questions.

The graduate program in urban and regional planning is accredited by the Planning Accreditation Board and provides professional grounding in the theory and methodologies of planning through a curriculum that balances classroom and field experience.

The M.U.R.P. is a two-year degree program requiring 48 semester hours of class work. Each student must complete an internship with a planning agency or organization, as well as school and programmatic required courses totaling 30 semester hours. Core requirements for students within the Master of Urban and Regional Planning program will be met through the following courses:
• Introduction to Planning
• Community Socioeconomic Analysis using GIS
• Foundations for Development Planning
• Research Methods in Government and Public Affairs
• Planning Theories and Processes
• Legal and Legislative Foundations of Planning
• Principles of Public Administration
• Planning Studio I
• Planning Studio II or Thesis

In selecting their elective courses, students may (1) opt for exposure to a wide array of planning-related subject matter (the generalist or comprehensive approach), (2) select one of the areas of specialization defined by the department’s faculty (see the list that follows), or (3) develop an individualized program, focusing on one or more self-defined topics. Regardless of the approach selected, students are expected to meet regularly with their faculty advisers for discussion of their courses of study in relation to their career plans.

The following faculty-defined areas of specialization are offered by the department:
• community revitalization planning
• metropolitan planning
• environmental planning
• international development planning

Admission requirements
Beyond the general Graduate School admissions standards, the following specifications apply:
• Students must have a minimum of a 2.7 GPA (on a 4.0 scale) in their last 60 semester hours of undergraduate work. In addition, a GPA of not less than 3.0 must have been maintained in their undergraduate majors. Finally,
Students not meeting these requirements may be admitted to the program on a provisional basis. The provisional period shall consist of the first nine to 12 hours of designated graduate work in which all grades must be no less than "B." Provisional admission does not constitute a waiver of the requirement related to a standardized test.

• Generally, at least two of the three letters of reference should come from former faculty.

**Degree requirements**

1. Students must complete a minimum of 48 graduate credits plus an internship. A core of required courses accounts for 30 of these credits; the remaining 18 are electives. An overall GPA of at least 3.0 (on a 4.0 scale) is required for receipt of the M.U.R.P. degree.

2. Students within the M.U.R.P. program are required to complete either a thesis (URSP 764) or to prepare a professional quality plan through the Planning Studio II course (URSP 762). Program administrators request permission to utilize the grade of PR, in addition to normal letter grades ("A," "B," "C," "D," "F") in URSP 762 Planning Studio II. This will allow students the ability to work on their plans over a more extended period of time, if necessary.

**Internship and placement**

The internship is designed to give students practical experience in planning-related activities in an institutional context. Normally, the internship is taken during the summer between the first and second year. Many opportunities for internship positions, as well as part- and full-time jobs in planning at all levels of government, exist within the Richmond area. Upon request, the internship requirement may be waived for students with substantial professional experience.

**Curriculum**

### First year, first semester

- URSP 610 Introduction to Planning... 3
- URSP/GVPA 622 Community Socioeconomic Analysis using GIS... 3
- URSP 662 Foundations for Development Planning... 3
- Elective... 3

### First year, second semester

- URSP/GVPA 623 Research Methods in Government and Public Affairs... 3
- URSP/GVPA 632 Planning Theory and Processes... 3
- URSP 635 Legal and Legislative Foundations of Planning... 3
- Elective... 3

### Internship

Normally taken between the first and second year of course work, but other options are available.

### Second year, first semester

- URSP 761 Planning Studio I... 3
- GVPA 601 Principles of Public Administration... 3
- Electives... 6

### Second year, second semester

- URSP 762 Planning Studio II... 6
- Electives... 6

---

**Combined Master of Urban and Regional Planning (M.U.R.P.) and Juris Doctor (J.D.)**

A cooperative arrangement with the T.C. Williams School of Law makes it possible for students to receive a law degree (J.D.) and an urban and regional planning degree (M.U.R.P.) in four years rather than the five years ordinarily required.

The purpose of the program is to integrate the two professional curricula and to provide the expertise necessary to apply legal analytical skills and planning methods and analysis to urban and regional policy issues and problems. The dual degree program is designed to equip graduates for a variety of professional positions, including staff for legislative committees and government agencies and commissions, government legal staff, private consulting, neighborhood advocacy, directorships of planning and related agencies, and executive aides to elected officials.

Interested students must apply separately for and be admitted to the T.C. Williams School of Law, University of Richmond, and the Master of Urban Studies and Planning program, VCU. Students will spend their entire first year in either the T.C. Williams School of Law or the L. Douglas Wilder School of Government and Public Affairs, and their second year in the program not selected in the first year. Twelve credit hours of the planning program will be applied toward meeting the graduation requirements of the law school, and 12 credit hours in the law school will be applied toward meeting requirements of the M.U.R.P. program.

Upon admission to the dual degree program, every student will be assigned an adviser in each program who will assist in planning the course of studies that will include all of the required courses in each program plus such elective courses as will best serve the interests of the individual student.

Students deciding not to complete the dual degree program must meet all of the regular requirements of either the J.D. or M.U.R.P. to receive the degree of their choice.

### Urban Revitalization, Certificate in (Post-baccalaureate graduate certificate)

The urban revitalization certificate program requires 18 semester hours of course work and can be completed in one academic year. A sequence of introductory courses exposes students to the planning process, housing policy, historic preservation, commercial revitalization, adaptive reuse of buildings and urban design. Course work in the area of urban revitalization is a blend of instruction in planning, urban design, business and economics.

**Admission requirements**

Admission requirements include an official application; a letter of intent describing objectives in applying for the certificate; three letters of recommendation; two copies of an official transcript from an accredited institution showing undergraduate work and successful completion of an appropriate degree program with a minimum GPA of 2.7 (out of 4.0) in the last 60 semester hours of undergraduate study; demonstration of professional experience in planning or work related to the certificate program. The experience requirement may be waived for candidates who demonstrate professional promise. All credits earned are transferable to the Master of Urban and Regional Planning program.

**Center for Public Policy**

The Center for Public Policy focuses the university’s multidisciplinary efforts in public policy. As a comprehensive, university-wide center, the center has responsibilities in each area of the university’s broader missions: teaching,
research and public service. The center houses and administers the Ph.D in Public Policy and Administration.

The center conducts basic and applied research on a number of public policy matters, with special attention to health policy, urban and metropolitan development, and state and local government and politics. And, the center engages in significant service through its training programs, conferences, publications and other contributions to public discourse.

Michael D. Pratt
Director, Center for Public Policy

Public Policy and Administration, Doctor of Philosophy (Ph.D.)

Michael D. Pratt
Interim Director, Ph.D. in Public Policy and Administration

The purpose of the Ph.D. in Public Policy and Administration program is to prepare students for scholarly and leadership roles in government, universities, research organizations and other settings where knowledge and research skills in public policy and administration are needed. The doctoral program is committed to accomplishing this mission by creating an intellectually vibrant atmosphere for scholarship involving an active faculty from a broad spectrum of academic disciplines and substantial interaction with government agencies and community groups.

The Ph.D. in Public Policy and Administration is a degree program of the university’s Center for Public Policy. The center was established to serve as the focus of the university’s interdisciplinary efforts in teaching, research and service related to public policy. The center, as well as the doctoral program, is designed to involve faculty and academic units from across the university.

Faculty
Faculty for the doctoral program are drawn from graduate faculty across the university. A list of participating faculty and academic units is available from the program office.

Admission requirements
Admission is open to qualified persons without regard to age, physical disability, national origin, race, religion or gender. Admission is competitive since it is limited by the number of places available. The admission process is intended to assure a reasonable fit between the student’s professional and research interests and faculty expertise. Consequently, otherwise qualified applicants may be denied admission.

Applicants to the program must hold a master’s degree or a recognized postbaccalaureate degree in one of the professions such as law or medicine from an accredited institution of higher education. A standardized test score, fewer than five years old, is required. Accepted examinations include the Graduate Record Examination (GRE), the Graduate Management Admissions Test (GMAT) and the Law School Admissions Test (LSAT). Professional experience is not required, but is considered desirable.

In order to apply for admission to the Ph.D. in Public Policy and Administration program, prospective students must submit:

• a VCU Application for Graduate Study,
• transcripts from all previous colleges or universities,
• scores from a standardized examination (GRE, GMAT or LSAT),
• three letters of reference,
• a personal statement describing reasons for applying to the program and
• a current professional resume.

International applicants must submit the International Application and TOEFL scores. All students admitted to the program must have completed prior to admission, or are required to complete during their first year, the following graduate-level courses (or their equivalent):

• research methods (equivalent of PADM 623),
• statistics (equivalent of PADM 624) and
• public policy, economics or administration/management.

The primary admissions deadline is March 15 for enrollment to begin the following fall semester. However, for those students wishing to be considered for a limited number of fellowships, materials must be received no later than Jan. 15. A small number of special admissions may be made in the fall (Oct. 15 application deadline) for entry the following spring semester. Applicants who wish to be considered for the Oct. 15 deadline must include a letter requesting and justifying early admission. If the request for early consideration is not accepted, the application will be held over to the March 15 application date.

While university rules allow up to six credit hours of course work to be taken as a special student prior to formal admission, taking such courses in no way guarantees admission to the program. Graduate courses designated “doctoral students only” may not be taken prior to formal admission, although they may be taken by fully admitted doctoral students in other programs.

Application packets may be obtained from the program office or the Graduate School. International applicant materials are available from the International Admissions Office.

Degree requirements
The doctoral program is structured around a core curriculum and several areas of concentration. The curriculum is designed to provide a sound intellectual foundation for the pursuit of theoretical and applied research in administrative and policy studies. The program includes courses in public policy and administration, research methods, public policy economics, political and organizational process, and law and public policy.

In addition to the core, the program offers three concentration areas including health policy, public management in state and local government and nonprofits, and urban policy.

These concentrations offer students the opportunity to build a tailored program of study within a broad area of scholarship. The range of core and affiliate faculty expertise, from both campuses at VCU, gives doctoral students considerable flexibility in designing their studies and research.

Students take a minimum of 36 credits, or 12 courses, in addition to any prerequisites that might be necessary. Seven of these courses are part of the core and five are concentration courses. Required courses generally will be available on an evening or weekend schedule.

Course work in the Ph.D. program has a strong orientation toward research, both applied and theoretical. Where appropriate, course work may be linked to funded university projects or to external agency-based analytical work. Courses emphasize research, writing and presentation skills.

Core curriculum
PPAD 711 Seminar in Public Policy and Administration I
PPAD 712 Seminar in Public Policy and Administration II
PPAD 791 Law and Public Policy
PPAD 715 U.S. Political Processes and Institutions
PPAD 716 Public Policy Economics
PPAD 721 Survey of Applied Research Methods in Public Policy and Administration
PPAD 722 Survey of Data Analysis Techniques for Public Policy and Administration

Concentrations
In addition to the core, all students will take five courses in their selected area of concentration. Each concentration features a required seminar as one of these courses.

• Health policy: PPAD 730 Seminar in Health Policy
• Public management in state and local government: PPAD 740 Seminar in Public Management
• Urban policy: PPAD 750 Seminar in Urban Policy
The remaining four courses will be selected from a list designated by the concentration committee for each area. At least one of these must be a methodologically oriented course relevant to the student’s area. The concentration committee will approve the program of study for each student in the concentration.

Qualifying examinations

After completing all of the core courses in the Ph.D. program, each student takes a comprehensive qualifying examination on the core. The examination is designed to evaluate the mastery students have achieved over the body of knowledge represented by the core. It is intended to measure the ability of students to organize, integrate and creatively apply the knowledge in the field to important problems. Although organized around the courses in the core, the examination is not restricted to material covered in those courses. It is expected that doctoral students will read well beyond the confines of individual courses.

In order to continue in the program, students must attempt the qualifying examination no later than the next regular semester following their completion of the core course requirements, and they must pass the exam by the end of the second regular semester after completing the core course requirements. A student may attempt the examination twice. Examinations are offered twice per year.

A student also must take a comprehensive examination in the concentration. Each student, under the direction of the adviser, will prepare a reading list on the concentration or on a significant portion thereof. The student will then take an oral examination with his or her adviser based upon the reading list. A student may attempt the examination twice. Exams are scheduled at the convenience of the student and the adviser. Each student must pass this second examination before defending a dissertation proposal.

Dissertation

After completing the qualifying examination and course work for the concentration, students must prepare a dissertation involving original research that contributes to the body of knowledge in the field. A committee approved by the director of the program supervises the dissertation work. The chair of the committee must be a core or affiliate faculty member of the Ph.D. program.

The first formal step in the dissertation process is the development and defense of a dissertation prospectus that frames the problem to be studied, provides background on the problem, presents a review of relevant literature and justifies the methodology to be used. The defense of the prospectus as well as the completed dissertation must be done orally to the dissertation committee. The dissertation defense is conducted in a forum open to other students and to faculty.

Continuous enrollment requirements and expectations

To remain in good standing, students must maintain continuous registration for each fall and spring semester (except for official leaves of absence) until they have completed all requirements, including the dissertation. Students are required to enroll for a minimum of nine semester hours each calendar year. Once a student has completed all course requirements and passed the comprehensive examinations, he/she may maintain continuous enrollment of three credits of dissertation research per year. A minimum GPA of 3.0 on a 4.0 scale must be maintained. VCU currently requires registration for a defined credit hour level during both the didactic and research phases of advanced degree training. There is no obligatory linkage between the accumulation of credit hours and an expectation that a degree be awarded. As a guide to monitoring the timely completion of the degree within the present enrollment framework, the accumulation of 180 credits for a doctor of philosophy degree can be taken as a reasonable measure. Compliance with other relevant university regulations also is required.

While the university provides an array of computing facilities, most students find it desirable to have personal access to computing capacity, including Internet connection. The primary mode of communication between the program office and students is through the Internet and e-mail. Several classes use computer-based interactive technology such as newsgroups.

The School of Mass Communications prepares students for careers in the mass media and related fields and encourages high standards of ethical and journalistic performance. The programs administered by the school provide a broad educational base and instruct students in the techniques of mass communications. The school offers a Bachelor of Science in Mass Communications with specialization in one of three sequences: advertising, journalism and public relations. The school also awards the Master of Science in Mass Communications, with concentrations in the areas of advertising, scholastic journalism and strategic public relations. The advertising program is offered through the VCU Brandcenter.

Graduate information

Admission requirements for graduate study

All areas are open to graduates of accredited colleges and universities. Applicants must satisfy the general requirements for admission to graduate programs in the Graduate School and the College of Humanities and Sciences (see the College of Humanities and Sciences guidelines in this bulletin). In addition, they should hold a baccalaureate degree in an area appropriate to the program to which they are applying and a GPA that indicates the ability to pursue graduate work. Although the type of undergraduate degree is not critical to admission, the programs require approved undergraduate curricula or the equivalent in order to grant full admission.

This program offers graduate studies in advertising at the VCU Brandcenter. The program provides advanced preparation with concentrations in creative and strategic advertising development. The curriculum is divided into five tracks:

- Art direction.
- Communication strategy.
- Copywriting.
- Creative brand management.
- Creative technology.

The working environment at the Brandcenter is similar to an advertising agency: teams of student art directors, writers, communication strategists and brand managers work together to develop campaigns.

After the first year, qualified students are offered internships where they experience ad agency life and foster industry relationships. In their second year, students are given the opportunity to network through a mentoring program in which students are matched with agency professionals who offer advice and assistance.

**Admission requirements**

In addition to the M.S. in Mass Communications general admission requirements, applicants to the advertising programs must submit:

- Three recommendations from persons who are qualified to give information concerning the applicant’s probable success in graduate school and in the field of advertising.
- 10 samples of nonreturnable work.
- A personal profile.
- Other materials specified by the intended curricular track within the advertising program.

A full description of all Brandcenter requirements is included in the VCU Brandcenter application kit, available on the Web at www.brandcenter.vcu.edu or by calling the VCU Brandcenter toll free at (800) 311-3341. Applications must be postmarked no later than June 1 prior to the fall semester for which admission is sought.

**General degree requirements**

The master’s program in advertising requires a minimum of 42 to 54 hours beyond the baccalaureate degree. Students devote two years of full-time study to complete the degree requirements. To graduate, students must present a final major project, in portfolio form, before a committee review panel.

All students in the advertising program must complete the following set of core courses:

Mass Communications, Master of Science (M.S.) – multimedia journalism

The M.S. in Mass Communications with a concentration in multimedia journalism will prepare students for the practice of professional journalism in a highly competitive and multiple-platform (print, broadcast, online/digital) news environment. The program is designed primarily for recent graduates who have an undergraduate degree in journalism or a related field, or for professional journalists with several or more years of experience who want to upgrade their professional skills. The program will prepare students to function at a high level in contemporary newsrooms.

This professionally oriented graduate program focuses on building multimedia skills. The degree requires 36 credit hours, 30 of which are in the journalism discipline. Students take an additional six credit hours in a collateral area outside of mass communications. Students in this program learn the theory and practice of journalism in an immersion news environment, and can further specialize through graduate electives, projects and stories in any number of "beat" areas. For example, students can focus on coverage of health or the environment or concentrate on learning about international media coverage.

Classes will meet during intensive Friday evening and Saturday sessions over 12 months. Students who have not completed journalism baccalaureate course work or who have not had the appropriate professional experience in journalism will be required to attend an intensive three-week orientation session beginning around May 15 of each year. Students who enter the program in summer could graduate the following summer.

Curriculum

**Summer one**

**Note:** Students who have not completed baccalaureate course work or who have not had the appropriate professional experience are required to attend an intensive three-week orientation session beginning around May 15 each year.

MASC 611 Research Methods in Mass Communication (3)
MASC 642 Online Journalism I (3)

**Fall one**

MASC 643 Online Journalism II (3)
MASC 644 Computer-assisted Reporting (3)
MASC 645 Visual Journalism (3)
MASC 646 Convergence Law and Ethics (3)

**Spring one**

MASC 684 Multiplatform Storytelling (3)
MASC 685 The Business of Media (3)
MASC 686 International Journalism (3)
Graduate elective (3)

**Summer two**

MASC 688 Converged Media Applications (3)
Graduate elective (3)

Admission requirements

- Applicants must meet all requirements for admission to graduate programs in the Graduate School and College of Humanities and Sciences.
- Applicants should have at least two years of professional experience in print, broadcast or online journalism, or an undergraduate degree in journalism or a related field with clearly demonstrated professional skills.
- Students who have not completed the minimum baccalaureate course work or who have not had the appropriate professional experience must demonstrate through a portfolio of work that they have the appropriate foundation for advanced study in journalism.

These students will be required to attend an intensive orientation in the summer before beginning the multimedia journalism graduate program. This three-week orientation would begin around May 15. This intensive orientation would provide an introduction to basic and advanced multimedia journalism skills. The orientation would include immersion instruction in print writing and reporting, broadcast writing and reporting, audio and video gathering and editing, and online writing and presentation.

- Applicants must present a GRE (general test) score that indicates ability to pursue graduate work.

In addition, applicants must:

- Provide a detailed CV showing work experience in journalism or appropriate educational credentials.
- Provide transcripts of all previous work.
- Provide three recommendations from persons who are qualified to give information concerning the applicant’s ability for the specific program of
study proposed (including both academic and professional recommendations). At least one professional recommendation must come from someone in the field of journalism.

- Submit a letter detailing specific journalism career goals.
- For international applicants (without a university degree with English as the language), TOEFL (or comparable) scores.

### Mass Communications, Master of Science (M.S.) – scholastic journalism

#### Admission requirements summary

<table>
<thead>
<tr>
<th>Mass Communications, Master of Science (M.S.) – scholastic journalism</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Degree:</strong> M.S., Mass Communications</td>
</tr>
<tr>
<td><strong>Semester(s) of entry:</strong> Fall, Spring, Summer</td>
</tr>
<tr>
<td><strong>Deadline dates:</strong> Jul 1, Nov 1, Mar 1</td>
</tr>
<tr>
<td><strong>Test requirements:</strong> GRE-General</td>
</tr>
</tbody>
</table>

Special requirements:
- Three recommendations. If endorsement or recertification for teaching journalism in a secondary school is sought, one recommendation must be from a school principal.
- A letter detailing career goals and how the M.S. program in scholastic journalism applies to those goals.

The program in scholastic journalism is designed for secondary school teachers of journalism to prepare them for their role of training high school students and managing student publications, as well obtaining journalism endorsement and/or maintaining certification. This program consists of at least 35 credits, 17 of which are required courses in the School of Mass Communications. Two additional courses (six credits) are taken from sets of mass communications electives. The remaining nine credits are taken in courses external to the School of Mass Communications.

#### Admission requirements

In addition to the M.S. in Mass Communications general admission requirements, applicants to the scholastic journalism program must submit:

- Three recommendations from persons who are qualified to give information concerning the applicant’s probable success in graduate school. If the applicant seeks endorsement or recertification for teaching journalism in a secondary school, one of these recommendation letters must be from a school principal.
- A letter detailing career goals and how the M.S. degree program in scholastic journalism applies to those goals.
- Acceptable scores on the GRE.

Provisional admission may be granted under certain circumstances.

#### Degree requirements

The concentration in scholastic journalism requires a minimum of 35 credit hours beyond the baccalaureate degree. The hours are divided as follows:

<table>
<thead>
<tr>
<th>Core curriculum</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>MASC 501 Journalistic Writing</td>
<td>4</td>
</tr>
<tr>
<td>MASC 502 Editing the News</td>
<td>4</td>

<tr>
<td>MASC 624 Basic Photojournalism</td>
<td>3</td>
</tr>
<tr>
<td>MASC 607 Student Press Law Rights and Responsibilities</td>
<td>3</td>
</tr>
<tr>
<td>MASC 613 Mass Media and Society</td>
<td>3</td>
</tr>
</tbody>
</table>

**Total:** 17 credit hours

<table>
<thead>
<tr>
<th>One of the following two courses</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>MASC 519 Journalism in the Schools</td>
<td>3</td>
</tr>
<tr>
<td>MASC 520 Advising Scholastic Publications</td>
<td></td>
</tr>
</tbody>
</table>

**Total:** 3 credit hours

### Six credits from the following courses

- MASC 603 Scholastic Yearbooks
- MASC 604 Broadcasting in High Schools
- MASC 605 Technology in the Classroom
- MASC 606 Contemporary Newspaper Design
- MASC 611 Research Methods in Mass Communications
- MASC 612 Mass Communications Theory
- MASC 691 Topics in Mass Communications

### Nine credits from courses outside of the School of Mass Communications

- Thesis in lieu of required standardized comprehensive exams only by permission of the Graduate Committee

**Total:** 0-3 credits

All candidates must establish a three-member examination/thesis committee by the third full-time semester or equivalent. The candidate must nominate a chair and a second member from the School of Mass Communications graduate faculty along with a third member from the graduate faculty outside of the School of Mass Communications.

---

### Mass Communications, Master of Science (M.S.) – strategic public relations

This fast-track immersion program in strategic public relations is designed for experienced public relations practitioners to prepare them to function at the highest levels of communications management and apply sophisticated strategic thinking to the accomplishment of organizational objectives. This program consists of at least 30 credits, 24 of which are required courses in the School of Mass Communications. Two additional courses (six credits) are taken in a collateral area. Classes are scheduled on Friday evenings and all day Saturdays. Continued full-time employment in public relations is encouraged during the program.

#### Admission requirements

In addition to the M.S. in Mass Communications general admission requirements, applicants to the strategic public relations program must submit:

- Three recommendations from persons who are qualified to give information concerning the applicant’s ability for the specific program of study proposed (including both academic and professional references). At least one professional recommendation must be from someone in the field of public relations.
- Transcripts of all previous college work. Applicants must have appropriate baccalaureate background in public relations or related area. Applicants who have not completed the minimum baccalaureate course work will be required to take 12 additional undergraduate hours before starting the program.
- Recognized professional accreditation (e.g. APR, ABC) may be accepted in lieu of baccalaureate public relations coursework.
- A detailed resume showing work experience in public relations. Applicants should have at least two years of appropriate professional level experience. Students who do not have at least two years of appropriate experience are required to earn three additional hours of credit in a professional level practicum for a total of 33 semester hours of credit for the degree. The practicum will be a minimum of 300 hours.
- A letter detailing strategic public relations career goals.
- Acceptable scores on the GRE General Test.
- TOEFL (or comparable) scores for international applicants without a degree from an English-language university.
Degree requirements
The concentration in strategic public relations requires a minimum of 30 credit hours beyond the baccalaureate degree. The hours are divided as follows:

Degree requirements
Candidates for degrees are eligible for graduation upon completion of all academic requirements in effect at the time of their first registration, provided the students are continuously enrolled and provided the requirements are met within the specified time frame.

Credit requirements
Students are required to complete 42-credit hours in core and elective courses and to conduct research or produce significant work within the participating disciplines. The core course work will be completed with courses offered through Media, Art, and Text, but the additional elective courses may draw from both seminars offered through Media, Art, and Text, and approved seminars offered in participating units.

Grade requirements
To graduate, degree applicants must achieve an overall grade-point average of 3.0 ("B") on a 4.0 scale with a grade of "C" in no more than two courses. The GPA for graduation will be based on all graduate courses attempted after acceptance into the program.

Admission to candidacy for Ph.D. degree
Before admission to candidacy for the Ph.D., students must have completed all required course work, successfully completed a comprehensive examination and fulfilled the requirement for demonstrated competencies.

Requirement for demonstrated competencies
In addition to the core courses and electives selected from the curricular offerings, students must also demonstrate competencies in two areas:

1. All students must achieve competency by demonstrating mastery in computer-based media, leading to the creation and maintenance of an e-portfolio. This portfolio will be a component of the core courses in the program. When presented to demonstrate competency, the e-portfolio will be accompanied by a theoretical argument or justification.

2. Students and their dissertation committees will determine a second area of competency and the manner in which it will be fulfilled. This second competency will be integral to the interdisciplinarity of the student’s course of study. Such areas might include but not be limited to foreign language (recommended for students with art history focus), rhetoric, socio-linguistics, statistics, research methods in ethnography or other specializations, or arts administration/management.

These requirements must be met by the time of the qualifying exam (e.g., not later than the end of the third semester of the program).

Qualifying examination
Upon completion of all required course work, student will take a written qualifying examination. Exams have two components: one that covers material from the core curriculum and a second related to the candidate’s specific focus area. The exam will be written by the Graduate Studies Committee. The first portion of the exam, based on the core curriculum, will be the same for all students. The second portion will be based on a bibliography compiled by the candidate and his or her project adviser. The second portion of the exam is integral to the candidate’s project proposal discussed in the section entitled “dissertation research.”

School of World Studies
On May 16, 2003, the Board of Visitors of Virginia Commonwealth University approved the creation of the School of World Studies within the College of Humanities and Sciences. The school is a creative, interdisciplinary grouping of
subject areas in the humanities and the social sciences that provides its students with the knowledge, skills and experience necessary for success in an increasingly interdependent, globalized 21st century. Sensitivity to the values, beliefs and structures of other cultures is a necessary characteristic of community and business leaders of the next century. The ability to live and work alongside those who are perceived as different from oneself and to recognize similarities among all humans will become an increasingly essential attribute of an educated citizen.

To achieve its mission, the School of World Studies actively fosters and promotes a wide range of endeavors, including the establishment of interdisciplinary undergraduate and graduate programs with an international focus across the campuses, and develops close ties with such programs as African American studies, women's studies, English, history, life sciences and other units throughout the university. In addition there are collateral requirements such as experiential learning through an approved internship, service-learning course or study-abroad program, the fulfillment of a World Passport, and advanced language skills.

Although the programs currently encompassed by the school are primarily at the undergraduate level, the new school will actively foster and promote a wide range of endeavors, including the establishment of interdisciplinary graduate programs. At the current time, the participating programs offer a select number of graduate courses.

Languages

The School of World Studies offers students significant opportunities to broaden their knowledge of diverse cultures through language study, including:

- Arabic (through international studies major and minor)
- Biblical Hebrew
- Chinese (through international studies major and minor)
- French (major and minor)
- German (major and minor)
- Hindi
- Italian (minor)
- Latin (through Latin and Roman studies minor)
- Portuguese
- Russian (through international studies major and minor)
- Spanish (major and minor)
- Zulu

In cases where the appropriate level of instruction is unavailable, faculty advisers will assist the student in identifying language study options at other U.S. institutions or abroad.

School of World Studies courses

Descriptions for all courses offered by the university may be accessed through the online courses database at www.pubapps.vcu.edu/vcucourses. You may search by unit, subject or keyword, as well as by degree level. The World School offers courses in the following areas:

- Use this link to see anthropology (ANTH) courses.
- Follow these links to geography (GEOG) courses or the (GEOZ) laboratories.
- Use this link to see international studies (INTL) courses.
- Use this link to see religious studies (RELS) courses.
- Use this link to see world studies (WRLD) courses.

Foreign language courses

Descriptions for all courses offered by the university may be accessed through the online courses database at www.pubapps.vcu.edu/vcucourses. You may search by unit, subject or keyword, as well as by degree level. Non-foreign language majors who wish to complete a language through the intermediate level or who wish to take one or two upper-level courses may select 202, 205 or the equivalent.

The School of World Studies offers courses in the following languages:

- Use this link to see Arabic (ARBC) courses.
- Use this link to see Chinese (CHIN) courses.
- Use this link to see foreign languages (FRLG) courses.
- Use this link to see French (FREN) courses.
- Use this link to see German (GRMN) courses.
- Use this link to see Italian (ITAL) courses.
- Use this link to see Latin (LATN) courses.
- Use this link to see Portuguese (PORT) courses.
- Use this link to see Russian (RUSS) courses.
- Use this link to see Spanish (SPAN) courses.

The Department of Biology offers programs leading to baccalaureate, master’s and doctoral degrees; the doctoral degree is offered through the Integrative Life Sciences program. Students may specialize within many areas, such as molecular and cellular biology, genetics, aquatic and terrestrial ecology, systematics, physiology, neurobiology, and developmental biology. Students also may develop an interdisciplinary focus to their degree program, for example within areas such as bioinformatics, cancer biology, forensic science and environmental science.

In addition to the courses offered by the Department of Biology, graduate students may enroll in graduate courses offered through VCU Life Sciences and these departments at the VCU Medical Center: Anatomy and Neurobiology, Biochemistry, Biostatistics, Human and Molecular Genetics, Microbiology and Immunology, Pathology, Pharmacology and Toxicology, and Physiology and Biophysics. Visit the Department of Biology’s Web site: www.has.vcu.edu/bio.

African American Studies Courses

Descriptions for all courses offered by the university may be accessed through the online courses database at www.pubapps.vcu.edu/vcucourses. You may search by unit, subject or keyword, as well as by degree level. Follow this link to African American studies (AFAM) courses.

The Department of African American Studies at Virginia Commonwealth University provides an educationally rich environment in which students and scholars research, learn and teach about the past and present realities of people of African descent. Employing a wide range of theories, perspectives, methods and tools, African American Studies faculty explore social, political, economic and cultural realities and connections between the experiences of persons in Africa and throughout the African Diaspora. The department emphasizes experiential learning, offers study abroad opportunities and internships.

**Biology courses**

Descriptions for all courses offered by the university may be accessed through the online courses database at www.pubapps.vcu.edu/vcucourses. You may search by unit, subject or keyword, as well as by degree level.

The following courses do not apply toward the major in biology: BIOL 101, BIOL/ENVS 103, BIOL 201, BIOZ 201L, BIOL 205, BIOZ 205L, BIOL/PHIS 206, BIOZ/PHIZ 206L, BIOL 209, BIOZ 209L, BIOL 217, BIOL 315 and BIOL 332. A “C” grade or better in each prerequisite course is required for enrollment in all biology courses BIOL 205 or higher that have prerequisites listed in their course descriptions.

Follow these links to biology (BIOL) courses or the (BIOZ) laboratories.

The Department of Biology offers programs leading to a Master of Science degree. Areas of specialization include molecular and cellular biology, terrestrial and aquatic ecology, systems, and physiology and developmental biology. In addition to the courses offered by the department, graduate students may request departmental permission to enroll in graduate courses offered at the VCU Medical Center in the departments of Anatomy, Biochemistry and Molecular Biophysics, Biostatistics, Human and Molecular Genetics, Microbiology and Immunology, Pathology, Pharmacology and Toxicology, and Physiology and Biophysics.

**Admission requirements**

In addition to the general requirements for admission to the Graduate School, the following requirements of the Department of Biology represent the minimum acceptable standards for admission:

- bachelor’s degree in biological or related science or equivalent
- appropriate college-level background in mathematics, chemistry and physics
- three letters of recommendation pertaining to the student’s potential ability as a graduate student in biology
- student’s written statement concerning career and research interests
- transcripts of all previous college work
- satisfactory scores on the GRE (general test)

Most entering graduate students in the Department of Biology have a 3.0 GPA or above on undergraduate work and a combined score of 1,000 or more on the verbal and quantitative sections of the GRE. Students who do not meet the minimum entrance requirements, but nevertheless wish to pursue an advanced degree in biology, are encouraged to contact the director of the graduate program in biology to discuss their interests and concerns. Admission on a provisional basis may be possible for students lacking the necessary requirements for full admission. Deficiencies must be removed by the end of the first year of residence. Courses that are remedial or designed to remove deficiencies will not be accepted toward the fulfillment of the course requirements for the master’s degree.

**Degree requirements**

Master of Science degree candidates are required to take a minimum of 30 semester credits, which shall include the following specifications:

- nineteen credits must be courses designated exclusively for graduate students
- a minimum of two and a maximum of four credits must be BIOL 693 Current Topics in Biology
- a minimum of six and a maximum of nine credits must be BIOL 698 Thesis
- at least five lecture or lecture laboratory courses must be taken from at least three different instructors (excluding Thesis, Research Seminar and Independent Study)

All graduate students are required to write a thesis proposal and a formal thesis following a prescribed format. The thesis proposal must be approved by the student’s graduate committee and the chair of the department to initiate thesis research. At the earliest possible opportunity, students must take STAT 543 or an equivalent statistics course approved by the student’s graduate committee. Students entering the program with a statistics background equivalent to STAT 543 may petition the Biology Department Graduate Academic Committee to have this requirement waived.

A maximum of six semester hour credits from graduate work taken at other institutions may be transferred if they meet approval of the department.

Receipt of a grade of “C” or lower in two courses constitutes automatic dismissal from the graduate program in biology. Courses with a grade of “C” or lower cannot be applied to satisfying the degree requirements.

Each student will be required to pass a final examination, which will be primarily a defense of the thesis.

Continuous enrollment in the graduate program is required. Interruption in continuous enrollment for any reason without a leave of absence approved by the director of the graduate program in biology will require that students reapply to the Department of Biology Graduate Academic Committee.

---

**Integrative Life Sciences, Doctor of Philosophy (Ph.D.)**

**Admission requirements summary**

**Special requirements:**

See program Web site

The Ph.D. in Integrative Life Sciences is designed for students who want to conduct research that is integrative across multiple disciplines and that takes a systems approach to emerging research questions across the many fields that comprise the life sciences. Students may opt to work with faculty members from departments on both campuses. The program provides the opportunity to conduct interdisciplinary research at multiple scales of study from the molecular to ecosystem levels with an emphasis on the concepts of systems biology and biological complexity.

**Admission requirements, procedures and financial aid**

The purpose of the admission requirements for the Ph.D. program is to ensure selection of outstanding students whose motivation, ability and education prepare them for interdisciplinary graduate study in the life sciences. The following requirements and procedures incorporate those of the VCU Graduate School.

1. Admission requirements

   a. Graduation from an accredited college or university or its equivalent, with a degree in a discipline, a spectrum of course work, and/or professional experience that provides an appropriate background for graduate-level study in the life sciences.

   b. An undergraduate or graduate record indicating superior performance. Applicants must have a minimum GPA of 3.0 on a 4.0 scale for at least the last 60 credits of undergraduate work or for a completed graduate degree. In very unusual cases, this requirement may be waived by approval of the dean of the Graduate School.

   c. Satisfactory scores on the Graduate Record Examination. Scores for appropriate advanced tests, in particular biology, chemistry or molecular biology/biochemistry, are recommended.
d. For applicants whose native language is not English, satisfactory scores from a standardized test commonly used and deemed appropriate for evaluation of English language proficiency, such as the TOEFL.
e. Letters of recommendation from three present or former instructors or other individuals qualified to evaluate the applicant’s ability to engage in graduate study in the life sciences.
f. A written statement describing the applicant’s interests, motivation, education and goals for pursuing graduate study in the life sciences.

2. Admission procedure
   a. The above material must be sent along with a completed application form and the required application fee to the Graduate School, Virginia Commonwealth University, Richmond, VA 23284-3051. Application forms and further information can be found on the Graduate School’s Web page at www.graduated.vcu.edu.
   b. Applicants may apply for admission to begin studies any semester of the year, but fall admission is recommended. Admission to graduate study in integrative life sciences requires majority approval and recommendation by the Graduate Program Committee and acceptance by the vice provost for Life Sciences and the dean of the Graduate School.

3. Types of admission
   a. Degree-seeking student: An applicant who meets all requirements for admission to the program.
   b. Provisional student: An applicant who has not fully met the requirements of the program but shows exceptional promise. Applicants with outstanding potential but who lack courses or training in specific areas deemed necessary for success in the program may be required to complete specific course work. Provisionally accepted students must remove all conditions of the provisional admission within one year of enrollment. Failure to meet these conditions will result in the student being dismissed from the program. No prerequisite courses taken as a provisional student may be applied toward the graduate degree.

4. Financial aid. In addition to need-based financial aid awarded through the Office of Financial Aid, students may be eligible to be considered for a variety of scholarships, fellowships, and teaching and research assistantships. Information regarding available financial support will accompany an offer of acceptance.

---

**Degree requirements**

Students are required to complete course work in core and elective courses and to conduct significant research. All work toward the degree must be completed within seven years of the first enrollment.

1. **Credit requirements.** Students in the program are required to earn a minimum of 64 hours of graduate-level credits. At least one-half of the credit hours presented for graduation must be at the 600 level or higher.

2. **Grade requirement.** Degree applicants must achieve an overall GPA of 3.0 ("B") with a grade of "C" in no more than two courses. The GPA for graduation is based on all graduate courses attempted after acceptance into the program.

3. **Transfer and M.S. credits.** Graduate-level course work taken in another program at VCU or at another institution, shall be evaluated to determine whether it can be used to fulfill degree requirements of this program. There is no limit to the number of credits that can be transferred from another program at VCU as long as they have not been previously applied toward another degree. A maximum of six credits earned at another institution can be accepted for transfer into the program if not previously applied toward another degree. A minimum grade of "B" is required for credits transferred.

4. **Research adviser and committee.** New students entering the program may be initially advised by an advisory committee of faculty members to assist students with initial course selection and to provide advice concerning the program. Students should select a research adviser prior to their third semester of study. The research adviser may be chosen from among the many graduate faculty members associated with this program from either campus. Students are required to form a research advisory committee that is headed by the research adviser and consists of a minimum of five members of the VCU graduate faculty. Individuals who are not graduate faculty members (i.e., individuals from another institution or industry) must apply to the dean of the Graduate School for temporary membership. The significant areas of the student’s research focus should be represented by the members of the research advisory committee. At least two members of the committee shall be from departments other than that of the research adviser, with one of those members being integrally associated with the student’s research to foster the interdisciplinary intent of this degree program. Students should form their committee no later than the end of their third semester of study.

5. **Written and oral examinations.** Before admission to candidacy for the Ph.D. degree, students must successfully complete a comprehensive written examination and oral examination. The student’s research advisory committee will administer both exams. Students should take the written exam upon completion of all required didactic course work. It will focus on material covered in core and selected elective courses as well as fundamental knowledge relevant to the student’s research field. Upon successful completion of the written examination and submission and acceptance of a research proposal, students should take an oral examination that includes a defense of the proposed research project and other subject areas deemed appropriate by the committee. Students may retake the written and oral examinations only once.

6. **Dissertation research.** The dissertation research project should represent a significant contribution to the body of knowledge in its field and should be deemed suitable for publication in refereed journals. The emphasis of the research conducted by students in this program should be on interdisciplinary research, incorporating two or more disciplines and with a systems approach. Research projects may take advantage of the many research opportunities across the life sciences on both campuses. Projects may encompass multiple scales of study from molecular to ecosystem levels. Students shall prepare a written dissertation describing the completed research using the format approved by the Graduate School. An oral defense of the dissertation, under the direction of the research advisory committee and open to all faculty members, also is required. Upon successful completion of all degree requirements, students will graduate with the Ph.D. in Integrative Life Sciences.

---

**Curriculum requirements**

A minimum total of 64 credits is required and is distributed as follows:

- 12 credits in core courses
  - LFSC 510/BIOL 545 Biological Complexity
  - LFSC 520/BIOL 548 Bioinformatic Technologies
  - LFSC 630 Integrative Life Sciences Research
  - LFSC 690 Research Seminar in Integrative Life Sciences
  - MICR 510 Scientific Integrity
- a minimum of three credits in an advanced statistics, advanced mathematics or experimental design course depending on the students area of research*
  - BIOL 606 Quantitative Ecology
  - BIOS/STAT 523 Nonparametric Statistical Methods
  - BIOS 524 Biostatistical Computing
  - BIOS 572 Statistical Analysis of Biomedical Data
  - BNFO/BIOL 601 Integrated Bioinformatics
  - ENVS 603 Environmental Research Methods
  - LFSC 610 Analytical Methods in Biocomplexity Analysis
  - MATH 591 Topics in Mathematics: Mathematical Biology
  - MATH 617 Applied Mathematics I
  - STAT/BIOS 544 Statistical Methods II
  - STAT 623 Discrete Multivariate Analysis
  - STAT 643 Applied Linear Regression
- Other courses based on approval of research advisory committee
- a minimum of nine credits in elective courses based on research interest and approved by research advisory committee
- a minimum of 40 credits in directed research (LFSC 697)

* Students are expected to enter the program with a proficiency in statistics at the introductory level, as exemplified by STAT/BIO 543 Statistical Methods. Students not at this level, as evidenced by prior course work, will be required to take STAT/BIO 543 or an equivalent course.
Department of Chemistry

The Department of Chemistry offers programs leading to the Bachelor of Science, Master of Science and Doctor of Philosophy degrees. The programs provide opportunities for concentrated study in analytical, inorganic, organic, polymer or physical chemistry, or chemical physics. A plan of study is worked out for each student to ensure a sound basis for research. In keeping with the university’s commitment as an urban institution, the department also offers part-time programs leading to these degrees. Refer to the department’s Web site for more information: www.has.vcu.edu/che.

Admission

Nicholas P. Farrell
Professor and Department Chair

Sally S. Hunnicutt
Associate Professor and Assistant Department Chair

www.has.vcu.edu/che

Admission requirements for graduate study

In addition to the general requirements for admission to graduate programs in the Graduate School and the College of Humanities and Sciences, students are expected to have a bachelor’s degree from an accredited college or university with 30 semester credits in chemistry. Admission on a provisional basis is possible for a student temporarily lacking this expected chemistry background. Acceptance is based upon undergraduate performance, satisfactory scores on the GRE and letters of recommendation.

Graduate students in the Department of Chemistry may receive financial support via teaching or research assistantships or fellowships. Application forms and instructions for applying to all graduate programs are available on the Graduate School Web site at www.gsu.edu.

General degree requirements for graduate programs

Entering graduate students are required to take proficiency examinations in analytical, inorganic, organic and physical chemistry. These examinations are at the level of sound undergraduate courses and are offered preceding the start of the school’s fall semester, the start of the spring semester and after the spring semester ends. These tests are used to evaluate the student’s strengths and weaknesses, and the student’s program is planned accordingly.

Chemistry courses

Descriptions for all courses offered by the university may be accessed through the online courses database at www.pubapps.vcu.edu/vcucourses. You may search by unit, subject or keyword, as well as by degree level.

A grade of “C” or higher is required in each prerequisite course: CHEM 100 (if required through placement qualifiers), CHEM 101, CHEM 102, CHEM 301 and CHEM 302.

In chemistry laboratories each student is charged for breakage incurred. Approved safety glasses are required. Failure to check out of laboratory, upon withdrawal or for other reasons, will incur a charge, billed from the Student Accounting Department.

Follow these links to chemistry (CHEM) courses or the (CHEZ) laboratories.

Chemistry, Doctor of Philosophy (Ph.D.)

Admission requirements summary

<table>

</tbody>
</table>

Students seeking the Doctor of Philosophy degree must demonstrate competency in analytical, inorganic, organic and physical chemistry. Students who do exceptionally well in the proficiency examinations may, by decision of the chemistry faculty, be considered to have demonstrated the necessary competency. The proficiency examinations may be repeated and must be completed by the end of the second semester of study.

Students preparing for the Doctor of Philosophy degree must have a minimum of 18 credits in eight graduate courses, not including credit for seminar or research. Credits must include three of the core courses (9 credits) selected from the four areas listed in the master's requirements. Other graduate courses to be taken will be determined in consultation with the faculty research adviser and the faculty of the Department of Chemistry. Students are expected to participate in the department’s seminar program and present at least two formal talks in the seminar program. In addition to course work and seminar, the doctorate requires a minimum of 30 credits in CHEM 697 (directed research), and the total of all credits must be at least 60.

The student is required to complete written and oral examinations in his/her major field to become a doctoral candidate. The oral examination includes the presentation and defense of the proposed dissertation research. The student must conduct a substantial original investigation under the supervision of his/her adviser and must prepare a dissertation reporting the results of the research and analyzing its significance in relation to existing scientific knowledge. An oral defense of the dissertation will be held. Full-time students should complete the degree requirements in four to five years.

Chemical physics track

Students entering the chemical physics program must pass proficiency examinations in two areas of chemistry and two areas of physics (mechanics, electricity and magnetism). Students entering with a bachelor’s or master’s degree in chemistry who have not taken the courses previously may satisfy the physics requirement with an “A” or “B” in PHYS 301, 302 and 376. Students entering with a bachelor’s or master’s degree in physics who have not taken the courses previously may satisfy the chemistry requirement with an “A” or “B” in two of the three courses, CHEM 301-302, CHEM 406 and CHEM 409.

Students in the chemical physics program are required to complete CHEM 510, CHEM 511, PHYS 576, PHYS 580 and PHYS 641 plus three courses from the following list: CHEM 504, 532, 550, 610, 611, 615, 661, 620; PHYS 550, 571, 573, 661; MATH 517, 518. A minimum of four graduate courses must be in chemistry. All graduate students seeking the Ph.D. degree must complete 30 hours of CHEM 697 (research) as part of fulfilling the requirements for the degree. However, students entering the chemical physics option may substitute 15 credits of PHYS 697 for 15 credits of CHEM 697.

All other requirements are the same as those stated for the Ph.D. in Chemistry.

Additional information and a more detailed description of the graduate program may be obtained from the Department of Chemistry.

Chemistry, Master of Science (M.S.)

Students preparing for the Master of Science degree must demonstrate competency in analytical, inorganic, organic and physical chemistry. New students who do well on the proficiency examinations may, by decision of the chemistry faculty, be considered to have demonstrated the necessary competency. The proficiency examinations may be repeated and must be completed by the end of the second semester of study. The Master of Science student is expected to earn a minimum of 15 semester credits in six graduate courses in chemistry, not including credit for seminar, and at least 12 semester credits in research. The credit hours must include three of the following core courses (9 credits) selected from the following four areas. The total of all credits must be at least 30.

Analytical

CHEM 532 Advanced Analytical Chemistry
The purpose of the Department of English is to teach students to see their worlds with clarity and respond to them with sensitivity, through reading and writing. Students are invited to read and explore a diversity of texts created in different times and voices and then to respond to these texts variously and critically, situating them within their contexts and discerning their important aesthetic features, rhetorical elements and social functions.

Students in this department also are encouraged to express themselves in expository or imaginative works that engage thought and feeling, evince purpose clearly, marshal appropriate evidence and observe principles of rhetorical decorum.

The Department of English offers a Bachelor of Arts in English, as well as minors in American studies (in conjunction with the Department of History), British studies, English (for non-English majors), writing and creative writing, the Master of Arts in English and the Master of Fine Arts in Creative Writing, and a doctoral program leading to a Ph.D. in Media, Art, and Text. Use the program search navigation to view individual program descriptions and curricula, or visit the department’s Web site at www.has.vcu.edu/eng for additional information.

Admission requirements summary

**Creative Writing, Master of Fine Arts (M.F.A.)**

<table>

<th>Test requirements: GRE-General</th>
</tr>
</thead>
<tbody>
<tr>
<td>Special requirements: Portfolio</td>
<td></td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

The Master of Fine Arts in Creative Writing is designed to attract students from diverse undergraduate backgrounds who are writers of promise. The program is suited particularly to those interested primarily in the writing of fiction and poetry; however, some emphasis also is placed on the writing of nonfiction, playwriting and screenwriting.

Graduate students in creative writing are encouraged to develop a strong personal sense of aesthetics and ethics and to pursue excellence in writing and scholarship, as well as in teaching, if they are pursuing that career option. Through the workshop experience, as well as personal conferences with the writing faculty, the program aims to help students significantly advance the quality of their writing, to enable them to become expert critics of their own and others’ work, and to advise them as they seek to publish their writing.

**Admission requirements**

Admission to the Master of Fine Arts Program is based most importantly on the candidate’s submitted creative writing portfolio (thus students who have produced little or no creative writing prior to their application would not be eligible. The deadline for application to the Master of Fine Arts Program is Feb. 1. In addition to the general requirements for admission to graduate programs in the Graduate School and the College of Humanities and Sciences, the following requirements, established by the Creative Writing Master of Fine Arts Committee, represent the minimum acceptable standards for admission:

- A portfolio of promising fiction or poetry, possibly with drama (as a minimum, approximately eight to 10 poems, or 20 or more pages of fiction, or one act from a play, or some combination of these; in all cases, applicants should submit only their strongest creative writing samples) to be submitted to the M.F.A. program director.
- Three recommendations from persons who are qualified to give information concerning the applicant’s probable success in graduate school, especially in a creative writing program.
- A scholastic record that is indicative of the applicant’s ability to pursue a graduate degree successfully.
- A baccalaureate degree or its equivalent.
- Completion of the GRE (the subject test in literature is not required for M.F.A. applicants).

**Degree requirements**

A total of 48 semester hours is required to complete the degree. The basic course of study required in the program includes: 12 semester hours of graduate creative writing workshops (required), 12 hours of graduate literature courses (required), and six to 12 hours of thesis work (required); the remaining 12 to 18 hours are electives, taken in literature, workshops or other graduate courses. Beyond the required courses, the student is free to work out a total program of 48 hours, with the advice of the program director or the student’s thesis adviser, which is appropriate to the individual student’s aims and interests. The thesis work gives students the opportunity to produce a manuscript of publishable quality. Course work also is available in the techniques of teaching creative writing, and the program is flexible enough to include studies undertaken in other departments of the university as well, including Art History, Theatre, Philosophy and the School of Mass Communications.

**English, Master of Arts (M.A.)**

Descriptions for all courses offered by the university may be accessed through the online courses database at www.pubapps.vcu.edu/veucourses. You may search by unit, subject or keyword, as well as by degree level.

Follow this link to English (ENGL) courses.

The Department of English offers a program leading to a Master of Arts in English with two areas of emphasis or concentration.

The program provides maximum flexibility by allowing each student, in consultation with the student’s graduate committee, to select the concentration that will best develop the student’s competence in those areas most relevant to scholarly and professional objectives.

Programs leading to the Master of Arts in English are:
- **Writing and rhetoric.** Designed for the candidate who is seeking intensive work in both writing and teaching expository prose or for the candidate who plans to pursue the doctor of philosophy degree.
- **Literature.** Designed for the candidate who desires intensive work in English or American literature beyond the bachelor’s level or for the candidate who plans to pursue the doctor of philosophy degree.

**Admission requirements**

In addition to the general requirements for admission to graduate programs in the Graduate School and the College of Humanities and Sciences, the following requirements, established by the English Graduate Studies Committee, represent the minimum acceptable standards for admission:

- a baccalaureate degree in an area appropriate to the study of literature or writing,
- a GPA that indicates the applicant can pursue successfully a graduate degree,
- three letters of recommendation from former instructors, and
- completion of the GRE. (Applicants for the literature track may, but are not required to, submit scores for the GRE subject test in literature.)

**Degree requirements**

The English program consists of a minimum of 30 semester credits. After these credits have been attained, students shall be examined over their courses and research as the Graduate Committee recommends. Students also may wish to present a thesis or project, credit for which shall be determined by the Master of Arts Committee.

**Media, Art, and Text, Doctor of Philosophy (Ph.D.)**

</tbody>
</table>

Special requirements:
Writing sample reflecting multimedia interests for all applicants. Portfolio for students wanting to take studio courses at graduate level.

This interdisciplinary Ph.D., a collaboration between the Department of English, the School of the Arts and the School of Mass Communications, is a 42-credit program of core and elective courses, seminar experiences and creative work, and a strong research component in the form of a dissertation project and defense.

The MATX Ph.D. theoretically and practically addresses a range of media, focusing on the production, dissemination and employment of literary texts, works of art and other types of texts, and, in turn, on how these texts function within specific settings informed by gender, ethnicity, class, race and other cultural factors. The course of study in the Ph.D. program also extends its reach to film and new media, television, and advertising, responding to the growing need for the study of visual and virtual texts. The program is not limited to one department or discipline within the participating units. Rather, it breaks down disciplinary walls, encouraging students to fashion new intellectual areas for the study, creation and dissemination of knowledge.

**Curriculum**

The 42-hour curriculum of the Ph.D. program in Media, Art, and Text is designed to foster an intellectual, creative and artistic environment in which students from different disciplines can work collaboratively and independently to develop and disseminate knowledge in this emerging field.

**Core curriculum**

The first year has 12 hours of shared course work that is required of all candidates and six hours of core electives. The courses include:

- **First year credits**
  - **Fall**
    - MATX 601 Texts and Textuality 3
    - MATX 602 History of Media, Art, and Text 3
    - Elective (research methods or theory course from approved list below) within the core 3
  - **Spring**
    - MATX 603 History of Multimedia and Interdisciplinarity 3
    - MATX 604 Production and Application Workshop 3
    - Elective (research methods or theory course from approved list below) within the core 3

- **Approved electives in the first year**
  - **Theory courses**
    - ARTH 571 Advanced Studies in Film Theory
    - ARTH 555 Advanced Studies in Aesthetics and Art Theory
    - ENGL 531 Literary Theory
    - ENGL 637 Theories of Rhetoric and Composition
    - MASC 612 Mass Communications Theory
    - MASC 613 Mass Media and Society
    - PAPR 527, 528 Art and Critical Theory
    - THEA 510 Theatre Historiography
    - THEA 603 Dramatic Literature and Theory
    - THEA 604 Modern Theatre: Theory and Practice

- **Research methods courses**
  - ARTE 690 Issues and Methods of Inquiry in Art Education
  - ARTH 690 Historiography and Methodology of Art History
  - ENGL 530 Introduction to Scholarship in English Studies
  - MASC 611 Research Methods in Mass Communications
  - THEA 510 Theatre Historiography

**Second year**

- **Fall**
  - 9 hours of graduate electives 9
- **Spring**
  - 9 hours of electives and study credits to prepare for spring exams and to write a project proposal. By the end of the spring semester, candidates should have completed their
Students will be required to take 18 hours in elective courses. In addition to MATX 690, the following 500- and 600-level seminars also may be used for elective credits. Students are advised to choose courses that directly relate to their research and creative work. Students must meet the prerequisites for these courses either through their previous course work, previously earned degrees or comparable demonstration of mastery needed for the course.

Approved electives in the second year
ARTE 501-502 Concepts in Art Education
ARTE 520 Teaching Concepts Through the Arts
ARTE 553 Art and Perceptual Communication
ARTE 592, 692 Independent Study in Art Education
ARTE 600 Seminar: Issues in Art Education
ARTE 611, 612 Literature in Art Education
ARTE 665 Curriculum Development and Evaluation
ARTE 670 Technology in Art Education
ARTE 680 Teaching Laboratory
ARTE 691 Topics in Art Education
ARTH 555 Advanced Studies in Aesthetics and Art Theory
ARTH 556 Advanced Studies in Ideas and Criticism in Art
ARTH 571 Advanced Studies in Film Theory
ARTH 574 Advanced Studies in Film
ARTH 699 Advanced Studies in Museum Methods
ARTH 759 Seminar in Aesthetics, Theory and Criticism of Art and Architecture
ARTH 761 Seminar in Latin American Renaissance Art and Architecture
ARTH 762 Seminar in Latin American 17th- and 18th-century Art and Architecture
ARTH 789 Problems in Advanced Art and Architectural History
ARTH 791 Topics in Early Modern Art
CRAF 690 Graduate Seminar
ENGL 532 Applied English Linguistics
ENGL 553 Studies in Linguistics
ENGL 611 The Writer in His Own Time
ENGL 614 Major Works of Literature
ENGL 617 Major Literary Modes
ENGL 620 Patterns in Literary Thought
ENGL 624 Literature in Society
ENGL 627 Literary Genre
ENGL 652 Studies in Writing and Rhetoric
ENGL 661 Themes in Interdisciplinary Studies
ENGL 670 Literary Editing and Publishing
ENGL 672 Writing Nonfiction
GDES 621 Visual Communications Seminar
PAPR 690 Graduate Seminar
PHTO 690 Seminar in Photography and Film

Degree requirements
Candidates for degrees are eligible for graduation upon completion of all academic requirements in effect at the time of their first registration, provided the students are continuously enrolled and provided the requirements are met within the specified time frame.

Credit requirements
Students are required to complete 42-credit hours in core and elective courses and to conduct research or produce significant work within the participating disciplines. The core course work will be completed with courses offered through Media, Art, and Text, but the additional elective courses may draw from both seminars offered through Media, Art, and Text, and approved seminars offered in participating units.

Grade requirements
To graduate, degree applicants must achieve an overall grade-point average of 3.0 (“B”) on a 4.0 scale with a grade of “C” in no more than two courses. The GPA for graduation will be based on all graduate courses attempted after acceptance into the program.

Admission to candidacy for Ph.D. degree
Before admission to candidacy for the Ph.D., students must have completed all required course work, successfully completed a comprehensive examination and fulfilled the requirement for demonstrated competencies.

Requirement for demonstrated competencies
In addition to the core courses and electives selected from the curricular offerings, students must also demonstrate competencies in two areas:

1. All students must achieve competency by demonstrating mastery in computer-based media, leading to the creation and maintenance of an e-portfolio. This portfolio will be a component of the core courses in the program. When presented to demonstrate competency, the e-portfolio will be accompanied by a theoretical argument or justification.

2. Students and their dissertation committees will determine a second area of competency and the manner in which it will be fulfilled. This second competency will be integral to the interdisciplinarity of the student’s course of study. Such areas might include but not be limited to foreign language (recommended for students with art history focus), rhetoric, socio-linguistics, statistics, research methods in ethnography or other specializations, or arts administration/management.
These requirements must be met by the time of the qualifying exam (e.g., not later than the end of the third semester of the program).

Qualifying examination
Upon completion of all required course work, student will take a written qualifying examination. Exams have two components: one that covers material from the core curriculum and a second related to the candidate’s specific focus area. The exam will be written by the Graduate Studies Committee. The first portion of the exam, based on the core curriculum, will be the same for all students. The second portion will be based on a bibliography compiled by the candidate and his or her project adviser. The second portion of the exam is integral to the candidate’s project proposal discussed in the section entitled “dissertation research.”

Department of Forensic Science
The Department of Forensic Science offers programs leading to bachelor’s and master’s degrees.

The Bachelor of Science is for students who plan a career or graduate study in the forensic sciences. This specialization features a prescribed curriculum with academic emphasis in biology, chemistry and criminal justice. The B.S. in Forensic Science provides students with a solid education preparing them for effective professional careers in forensic laboratories, public and private, basic research laboratories, clinical laboratories, and/or to pursue graduate studies. Students also will be prepared to pursue advanced degrees in the physical sciences, biological sciences, forensic science, law, allied health and medicine, to name a few.

The Master of Science in Forensic Science prepares students for careers as forensic scientists in government and private laboratories. Students receive in-depth exposure to specializations within the field, including drug analysis, DNA analysis, trace evidence, criminalistics and legal issues.

Admission requirements summary

<table>
<thead>
<tr>
<th>Forensic Science, Master of Science (M.S.)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Degree: Forensic Science, Master of Science (M.S.)</td>
</tr>
<tr>
<td>Semester(s) of entry: Fall only</td>
</tr>
<tr>
<td>Deadline: Mar 1</td>
</tr>
<tr>
<td>Test requirements: GRE</td>
</tr>
</tbody>
</table>

Special requirements:
- Undergraduate degree in natural sciences or degree with equivalent course work; completion of two semesters or equivalent of organic chemistry with two laboratories and two semesters or equivalent of general biology with laboratories; three letters of recommendation; GPA that exceeds 2.9 on a 4.0 scale; prior graduate course work and/or relevant laboratory experience will be assessed where applicable.

Most students entering the Forensic Science graduate program have a 3.0 GPA or above on undergraduate work and a combined score of 1,000 or more on the verbal and quantitative sections of the GRE. Review of applications and offers of admission will begin January 15 and proceed until enrollment openings are filled. All application materials must be received by March 1. All applicants will be notified of a decision. There are no spring admissions in the program. The program may request a phone or in-person interview for admission. Upon acceptance of an offer of admission, a nonrefundable deposit is required.

Degree requirements
The following requirements are in addition to those described for graduate programs in the School of Graduate Studies and the College of Humanities and Sciences.

- Students must complete a minimum of 36 graduate semester credits as outlined in the accompanying list of core and track requirements, including electives.
- Maintenance of an ongoing, cumulative GPA of 3.0 or above is required while enrolled.
- Courses below the 500 level will not count toward degree requirements.
- Receipt of a grade of “C” in two or more courses will constitute an automatic dismissal from the graduate program in forensic science.
• Receipt of a grade of "D" or lower in any one course will constitute an automatic dismissal from the graduate program in forensic science.

• Continuous, full-time enrollment in the graduate program is required. Interruption in continuous enrollment or full-time status for any reason without a leave of absence approved by the Forensic Science Graduate Committee will require that students reapply to the program.

• Request for credit for graduate course work taken at other institutions must be submitted to the director of graduate studies in Forensic Science and will be considered on a case-by-case basis by the Forensic Graduate Committee.

• If course work deficiencies are identified, students may be required to take additional foundational courses beyond those listed below.

The Master of Arts in History program allows maximum flexibility by permitting each student, in consultation with the department’s director of graduate studies, to select those courses most appropriate to their interests, in order to develop competence in pursuit of his or her scholarly and professional objectives.

Admission requirements

In addition to the general requirements for admission to graduate programs in the Graduate School and the College of Humanities and Sciences, the following requirements, established by the History Graduate Affairs Committee, represent the minimum acceptable standards for admission:

• 30 hours of undergraduate history courses, of which 18 should be at the upper-division level
• a GPA that is indicative of the applicant’s ability to successfully pursue a graduate degree
• three recommendations from persons who are qualified to give information concerning the applicant’s probable success in graduate school
• completion of the GRE
• submission of a 500-word written statement of intent, indicating why the applicant wishes to pursue a graduate degree in history

A personal interview is not required, but may be requested by either the applicant or the department’s Graduate Affairs Committee.

Degree requirements

The Master of Arts in History may be achieved through one of two options. The thesis option requires 30 semester credits, including six credits of HIST 698; or the non-thesis option requires 36 semester credits. Those in the non-thesis track must take HIST 601 as a prerequisite or corequisite for all research courses; students entering in January must take HIST 601 the next time it is offered.

Elective courses

Students may take up to six semester credits of non-history electives from an approved list. The department’s Graduate Affairs Committee maintains the list of approved courses, and students may use these courses for credit with the approval of the graduate director. In addition, students who wish to pursue specific areas of study may, with the approval of the graduate director, substitute other courses when appropriate, but in no case shall be able to count more than six semester hours of non-history courses.

Mathematics and applied mathematics courses

Descriptions for all courses offered by the university may be accessed through the online courses database at www.pubapps.vcu.edu/vcucourses. You may search by unit, subject or keyword, as well as by degree level.

Students registering for CMSC 201 or 255, MATH 131, 141, 151, 200, 211 or 300, or STAT 208 or 210 must place into these courses either from receiving VCU credit for stated prerequisite courses (for instance, MATH 151 is a stated prerequisite course for MATH 200) or from a satisfactory score (within a 39-month period immediately preceding the beginning of the course) on the VCU Mathematics Placement Test. Placement into MATH 141 also may be achieved (by students entering VCU after July 1, 2005) with a satisfactory combination of high school grade-point average and mathematics SAT score.

Follow this link to mathematics and applied mathematics (MATH) courses.

A personal interview is not required, but may be requested by either the applicant or the department’s Graduate Affairs Committee.

Degree requirements

The Master of Science in Mathematical Sciences is offered jointly by the Department of Mathematics and Applied Mathematics and the Department of Statistical Sciences and Operations Research. The Master of Science in Mathematical Sciences offers specializations in several possible areas, including applied mathematics, mathematics, operations research, statistics, discrete structures and others.

Admission requirements

In addition to the general requirements for admission to graduate programs listed in the Graduate Studies at VCU section and the College of Humanities and Sciences section of this bulletin, the following requirements represent the minimum acceptable standards for admission:

• Thirty credits in undergraduate mathematical sciences, computer science or related areas of which at least 18 semester credits must represent upper-level courses.
• Three letters of recommendation pertaining to the student’s potential ability as a graduate student in mathematical sciences.
• General GRE scores required.

 Provisional admission may be granted when deficiencies exist. These deficiencies must be removed by the end of the first year of residence, or its part-time equivalent, when the student’s application will be re-examined. Courses that are remedial or designed to remove deficiencies will not be accepted for credit toward the fulfillment of the course requirements for the master’s degree.

Degree requirements

The program offers maximum flexibility by allowing students, in consultation with their graduate committees, to design a course of study that will best develop secondary mathematics teacher preparation. The department administers the Master of Science in Mathematical Sciences concentrations in applied mathematics or mathematics. The curricula of both programs are run jointly with additional concentrations offered by the Department of Statistical Sciences and Operations Research.

Administration

Andrew M. Lewis
Associate Professor and Department Chair
www.math.vcu.edu

The Department of Mathematics and Applied Mathematics offers an undergraduate program leading to a Bachelor of Science in Mathematical Sciences with concentrations in applied mathematics, biomathematics, mathematics and secondary mathematics teacher preparation. The department administers the Master of Science in Mathematical Sciences concentrations in applied mathematics or mathematics. The curricula of both programs are run jointly with additional concentrations offered by the Department of Statistical Sciences and Operations Research.
competence in those areas most relevant to their scholarly and professional objectives. This program consists of a minimum of 30 semester credits of which at least 15 must be at the 600 level.

Students may obtain a designation on their transcripts indicating that their graduate study has emphasized one of the following graduate concentrations by completing the requirements that are listed here for that concentration. A student who has not satisfied the requirements for one of these concentrations, but who has otherwise fulfilled all the requirements for a master’s degree, will be awarded a degree of Master of Science in Mathematical Sciences without any specialization.

* applied mathematics  
* mathematics  
* operations research  
* statistics

Note that the following courses cannot be applied to the credit requirements for the M.S. in Mathematical Sciences: STAT/SOCY 508, STAT/BIOS/EPID 543 and STAT/SOCY 608.

Curricula

Mathematics and applied mathematics concentrations

Each student will select either the thesis or non-thesis option. If a student chooses the non-thesis option, they must complete a directed research project and a comprehensive examination. If a student elects to write a thesis, the student’s adviser determines the number of credits completed in MATH 698.

Non-thesis option

| Mathematical sciences (including both semesters of a 600-level sequence) | 21 |
| Mathematical sciences or allied field* | 6-9 |
| Research Seminar credits** | 2-5 |
| Directed research credits** | 0-3 |
| ** The student who chooses the non-thesis option may receive a maximum total of four credits for MATH 690 Research Seminar and MATH 697 Directed Research. The student who chooses the thesis option usually will not take directed research, but he or she is not prohibited from doing so. In the thesis option, a total of seven credits for thesis, research seminar and directed research is the maximum credit permitted. |

Thesis option

| Mathematical sciences (including both semesters of a 600-level sequence) | 18 |
| Mathematical sciences or allied field* | 6-9 |
| Thesis credits | 3 or 6 |
| Research seminar credits** | 1-3 |
| Directed research credits** | 0-3 |

* If a student previously received credit for one or both of these courses or their equivalent, then one or two of the other courses mentioned for this concentration must be taken as substitute(s) to satisfy the minimum requirement of 15 credits of course work in the concentration.

Mathematics concentration

Master of Science in Mathematical Sciences with a concentration in mathematics

MATH 507, 508*; a six-credit sequence selected from 601-602, 603-604, 607-608, 711-712, and at least three credits from MATH 505, 509, 510, 521, 525 or any otherwise uncounted 600-level course for this concentration. Also, at least one seminar and the thesis (if chosen) must concern topics of pure mathematics.

* If a student previously received credit for one or both of these courses or their equivalent, then one or two of the other courses mentioned for this concentration must be taken as substitute(s) to satisfy the minimum requirement of 15 credits of course work in the concentration.

Department of Philosophy

Anthony Ellis  
Professor and Department Chair  
www.has.vcu.edu/phi/philos/phi_home.htm

Philosophy aims at a deeper understanding of matters that should most concern the human race. Philosophical questions crop up in science, religion, art, morality, politics, medicine and in everyday life. Students enrolled in philosophy are encouraged to think seriously about fundamental issues in all these domains and to formulate coherent and well-grounded points of view. Because of its extensive use of critical and analytical reasoning, philosophy equips students for careers in medicine, law, business and other fields that require careful thought and the clear expression of ideas.

The Department of Philosophy offers a Bachelor of Arts in Philosophy. The department offers courses for students in other programs, as well as for those majoring in philosophy or religious studies.

Philosophy courses

Descriptions for all courses offered by the university may be accessed through the online courses database at www.pubapps.vcu.edu/vcucourses. You may search by unit, subject or keyword, as well as by degree level.

Follow this link to philosophy (PHIL) courses.

Department of Physics

The Department of Physics offers programs leading to the Bachelor of Science in Physics, Master of Science in Physics, the Master of Science in Medical Physics and the Ph.D. in Medical Physics. The department also offers an accelerated B.S.-M.S. program that allows students in the baccalaureate program to take graduate courses that will count toward the M.S. in Physics degree.

Administration

Alison Baski  
Associate Professor and Department Chair

Medical Physics, Doctor of Philosophy (Ph.D.)

Admission requirements summary

<table>
<thead>
<tr>
<th>Medical Physics, Doctor of Philosophy (Ph.D.)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Degree: Ph.D.</td>
</tr>
<tr>
<td>Semester(s) of entry: Fall</td>
</tr>
<tr>
<td>Deadline dates: Mar 1</td>
</tr>
<tr>
<td>Test requirements: GRE</td>
</tr>
</tbody>
</table>

The Ph.D. in Medical Physics offers students course work and research training in physics as it is applied to the diagnosis and treatment of human diseases. Research interests include functional imaging using PET and NMR, CT image artifact removal and deformation, intensity-modulated radiation therapy, radiation therapy dose calculations, 4D radiation therapy, and brachytherapy dose calculations.

Admission requirements

In addition to the general requirements for admission to graduate programs in the Graduate School and the College of Humanities and Sciences, students are expected to satisfy the following minimum standards for admission:

- Students must have a minimum of 30 semester credits in undergraduate physics, physical science or engineering, of which at least 18 credits must be at the upper level.
- Satisfactory GRE scores.
- Provisional admission may be granted where deficiencies exist. These deficiencies must be removed by the end of the first year of residence or its part-time equivalent, when the student’s application will be re-examined. Courses that are designed to remove deficiencies will not be accepted for credit toward the graduate degree.

Degree requirements

Students entering the program with an undergraduate degree are required to earn a minimum of 30 credits in didactic or laboratory course work. Students entering with a master’s degree in medical physics, physics or an appropriate related field, are required to earn a minimum of 18 course credits. In addition to course work, the Ph.D. requires a minimum of 12 credits in PHYS 697 (directed research). At least half of the course work must be earned at the 600 level or higher. Detailed degree requirements are listed in the Medical Physics graduate handbook.

All new students entering the program initially will be advised by the Medical Physics Graduate Advisory Committee, until they have selected a research adviser and formed a graduate dissertation committee. Each student should select a research adviser and area of research before the end of his/her third semester. A graduate dissertation committee will direct the student in his/her research and subsequent course selection, will report annually to the program director on the academic progress of the student and will administer the oral candidacy and dissertation defense examinations.

The student is required to complete written and oral examinations to be admitted as a Ph.D. candidate. The comprehensive written examination covers core knowledge and applications in medical physics course work, as well as basic concepts in physics, chemistry and biology. The oral examination, administered by the student’s graduate dissertation committee, is based upon a written prospectus describing the proposed dissertation research project. Examiners evaluate the adequacy of the proposed project, the student’s level of understanding of the project and the likelihood that the dissertation can be completed successfully.

After becoming a Ph.D. candidate, the student must conduct a substantial original investigation under the supervision of his/her adviser and must prepare a dissertation reporting the results of the research in the context of existing scientific knowledge. After the dissertation has been completed and unanimously accepted for defense by the student’s graduate dissertation committee, the candidate will appear before the committee for an oral defense. The oral dissertation defense examines the candidate’s research, dissertation documentation, and underlying fundamental knowledge. Upon successful completion of the defense and dissertation, the student may apply for graduation with a Ph.D. in Medical Physics.

Medical Physics, Master of Science (M.S.)

</tbody>
</table>

The Master of Science in Medical Physics offers students course work and practical clinical training in physics as it is applied to the diagnosis and treatment of human diseases. Required course work provides theoretical and practical training in radiation dosimetry, radiation biology, radiation therapy, imaging and health physics.

Admission requirements

In addition to the general requirements for admission to graduate programs in the Graduate School and the College of Humanities and Sciences, students are expected to satisfy the following minimum standards for admission:

- Students must have a minimum of 30 semester credits in undergraduate physics, physical science or engineering, of which at least 18 semester credits must be at the upper level.
- Satisfactory GRE scores.
- Provisional admission may be granted where deficiencies exist. These deficiencies must be removed by the end of the first year of residence or its part-time equivalent, when the student’s application will be re-examined. Courses that are designed to remove deficiencies will not be accepted for credit toward the graduate degree.

Degree requirements

Students entering the program with an undergraduate degree are required to earn a minimum of 30 credits in didactic or laboratory course work. At least 15 credits must be earned at the 600 level or higher. Detailed degree requirements are listed in the Medical Physics graduate handbook.

Students are required to complete the 20 credits of the core graduate medical physics course work (PHYS 563, 567, 601, 630, 635, 636), one credit of PHYS 689 and six credits of PHYS 682. Additionally, students also must demonstrate competence in anatomy through completion of an undergraduate or graduate anatomy course approved by the graduate curriculum committee.

Following completion of course work, students will be required to pass a comprehensive examination administered by the Medical Physics Comprehensive Examination Committee. The comprehensive examination will cover materials from the core medical physics courses and clinical rotations.

Physics, Master of Science (M.S.)

</tbody>
</table>

The Master of Science program offers traditional core physics courses and a variety of specialized electives emphasizing the department’s strengths in theoretical and experimental physics. Research interests include theoretical and experimental condensed matter physics, general relativity and cosmology, and physics education. This degree is designed to be completed in two years (four semesters).

Admission requirements

In addition to the general requirements for admission to graduate programs in the Graduate School and the College of Humanities and Sciences, students are expected to satisfy the following minimum standards for admission:

- Students must have a minimum of 30 semester credits in undergraduate physics or engineering, of which at least 18 semester credits must be at the upper level in physics.
- Satisfactory GRE scores.
- Provisional admission may be granted where deficiencies exist. These deficiencies must be removed by the end of the first year of residence or its part-time equivalent, when the student’s application will be re-examined. Courses that are designed to remove deficiencies will not be accepted for credit toward the graduate degree.
part-time equivalent, when the student’s application will be re-examined. Courses that are designed to remove deficiencies will not be accepted for credit toward the graduate degree.

Degree requirements
Each student is required to take 30 semester credits of approved graduate courses (see M.S. plan of study) with at least 15 semester credits at the 600 level. PHYS 690 and PHYS 697 may not exceed 15 of the required 30 credit hours.

M.S. plan of study
Each student will choose a primary adviser during the first semester of study. At the end of the first semester, the student and adviser will propose an M.S. plan of study to the Graduate Curriculum Committee. This plan will include the graduate courses and research subject matter to fulfill the student’s individual career goals. Normally, each student will select courses for their individual M.S. plan of study from the list of graduate courses in physics. The courses selected will include no fewer than nine credits of traditional physics core courses, such as PHYS 576 and PHYS 580, to provide a solid foundation in fundamental physics. However, students also may select graduate courses in chemistry, mathematics, computer science and engineering, as well as from the schools of Medicine and Education, when such courses are consistent with the student’s career goals.

The M.S. plan of study must be approved by the Physics Graduate Curriculum Committee. Courses taken outside this plan will not count toward the above general course requirements.

Thesis or non-thesis option
Each student must select either the thesis option or non-thesis option. Students selecting the thesis option must take at least nine credit hours of PHYS 697 Directed Research. No more than nine semester credits of Directed Research may be counted toward the 15 credit 600-level requirement.

Students selecting the non-thesis option may take no more than three hours of PHYS 697. A student who elects the non-thesis option must pass a written comprehensive exam. This exam will be administered by the Physics Graduate Curriculum Committee.

Accelerated Bachelor of Science (B.S.) and Master of Science (M.S.) in Physics
Students who are enrolled in the Bachelor of Science in Physics program may elect to take graduate courses that will count toward the Master of Science in Physics degree. Up to six hours of graduate credit may be earned in this way without any special provision. In order to offer more than six hours of pre-admission graduate credit toward the graduate degree, a student must apply to the physics department Graduate Admission Committee for admission to the Accelerated B.S.-M.S. program. Persons applying for admission to this program (1) should submit a curricular plan for completing the bachelor’s degree within two years or its part-time equivalent; (2) should indicate which graduate courses they intend to offer toward the physics master’s degree; (3) should have a “B” average or better.

The M.S. Degree Completion Form should be accompanied by a memo from the Department of Physics Graduate Admission Committee to indicate which graduate courses were taken under the Accelerated B.S.-M.S. Program.

Department of Psychology
In addition to the Bachelor of Science in Psychology, the Department of Psychology offers instruction in clinical, counseling and general psychology leading to the Doctor of Philosophy degree. Students in all three degree programs are educated first as psychologists and then helped to develop competence in a more specialized area relevant to their scholarly and professional objectives. In addition, special training and experience in college teaching is available.

Administration

Professor and Director of Graduate Studies

Linda E. Zyzniewski
Assistant Professor and Director of Undergraduate Studies

Dorothy E. Fillmore
Assistant Director of Undergraduate Studies and Director of Center of Information and Advising

Admission requirements for doctoral programs
In addition to the general requirements for admission to the graduate programs in the Graduate School (in the Graduate study section of this bulletin), the following requirements represent the minimum acceptable standards for admission:

• Graduation with a bachelor’s degree from an accredited college or university, but not necessarily with a major in psychology.

• 18 semester hours of undergraduate course work in psychology is the minimal, but not optimal, number of hours for an applicant to be considered for admission. Included must be each of the following courses: general psychology, statistics and experimental psychology. Exceptionally well-qualified applicants with less than a major in psychology, or applicants whose undergraduate work is considered outdated by the admissions committee, may be advised to complete some additional undergraduate courses at the beginning of their graduate study program.

• An undergraduate record indicating superior academic potential.

• Satisfactory performance on the GRE.

• Three letters of recommendation from previous instructors.

• A personal interview may be required at the discretion of the department.

The number of students who can be admitted is limited by the facilities and staff available. All applicants will be notified of the decision made. The screening process may begin as early as Jan. 1. First offers of admission are made by April 1. By June 1, after other offers to alternates have been made and final acceptances by students have been received, admissions may be closed. The application deadline is Dec. 1 (preferred) and Dec. 10 (required) for the clinical and counseling programs, and Jan. 10 for the general (developmental, social and biopsychology) and health programs.

Applicants to the general psychology program should specify to which of the three divisions they are applying (i.e., biopsychology, developmental or social). Transfer credits for graduate work at other institutions will be evaluated after the completion of nine semester hours in the department.

Degree requirements for doctoral programs
The following requirements are in addition to those described for the graduate programs in the Graduate School (the Graduate study section of this bulletin) and the College of Humanities and Sciences section of this bulletin.

All students are required to complete a core curriculum of 15 credits (or its equivalent for students entering with a master’s degree).

Students who receive grades of “B” or better in each of the department core courses are considered to have fulfilled the university requirements of a master’s level comprehensive examination and will then be officially considered candidates for the Master of Science degree. Students who receive grades of “C” or lower in one of the department core courses must either (a) satisfactorily complete a re-examination of the material covered in the course within one semester following the receipt of the grade (this re-examination is to be arranged and evaluated by the course instructor), or (b) repeat the course for credit the next time it is offered and receive a grade of “B” or better. Regardless of which of these approaches is chosen, the students will be given only one opportunity to demonstrate that they have mastered the course material. Students who either fail the re-examination or repeat the course and receive a grade of “C” or lower will have failed the comprehensive examination and will be dismissed from the program.

Additional courses and training experiences will be determined in consultation with and subject to the approval of the student’s faculty adviser and graduate program committee.
Receipt of a grade of “C” or lower in two courses, or grades of “C” or lower in more than six credits of psychology courses, constitutes automatic dismissal of a student from the program.

All students are required to complete a master’s thesis and to defend it successfully in an oral examination. Ideally, the thesis should be publishable as a piece of research and make a contribution to the field of psychology. Students who have previously completed a master’s thesis in psychology at another university may have the thesis requirement waived if the thesis is accepted by their graduate program committee.

The residence requirement for the master’s degree is 18 hours, nine in each of two consecutive semesters. Completion of the degree usually requires four semesters. At least six semester credits in PSYC 798 Master’s Thesis must be completed, and no more than six can be counted toward the M.S. degree.

Students are obligated to request, in writing from their program committees, continuation of study beyond the master’s degree and approval of their doctoral plan of study. Application from a student for continuation beyond the master’s level will be evaluated by the appropriate program committee after completion of all requirements for the master’s degree. The program committee reviews the student’s request and approves or disapproves the request.

The student must pass a written preliminary examination to become a doctoral candidate. Students are required to complete this requirement prior to defense of their dissertations and prior to leaving on internships for students in the clinical and counseling psychology programs.

With the consent of the program committee, doctoral students may design a minor consisting of courses in departments other than psychology or courses in an area of psychology other than the major.

Both the clinical and counseling psychology programs require completion of applied practica and a one-year predoctoral internship approved by the program committee. Research practica are required by all programs. Practicum credit will vary depending on the program. Internship will be one-half credit per semester.

A dissertation requiring the planning, completion, and oral defense of an original research project is an integral part of the doctoral program. At least 12 semester credits in PSYC 898 Doctoral Dissertation must be completed, and no more than 12 can be counted toward the Ph.D. degree.

Completion of the entire program usually requires four to six years (including the internship year for students in the clinical and counseling programs). Candidates must complete all requirements for the Ph.D. degree within a seven-year period from the date of admission to the graduate program unless permission is granted for an extension. In some cases, specific programs and divisions may have requirements in addition to those stated here.

A more detailed description of the requirements for each of the graduate programs is included in the Department of Psychology’s Graduate Student Handbook, which is provided to each incoming graduate student. Visit the Web site for more information: www.has.vcu.edu/psy.

### Psychology courses

Descriptions for all courses offered by the university may be accessed through the online course database at www.pubapps.vcu.edu/veucourses. You may search by unit, subject or keyword, as well as by degree level.

Follow this link to psychology (PSYC) courses.

### Special requirements:

- Applicants should apply to the Ph.D. program only, but will earn a master’s degree during their course of study. Applicants who are interested in only the terminal master’s degree are not admitted.
- Personal interview may be required for the clinical program.

The Doctor of Philosophy in Clinical Psychology offered by Virginia Commonwealth University is accredited by the American Psychological Association. The program emphasizes the scientist-practitioner model and prepares students for research and service in professional psychology, including positions in university academic and medical school departments, counseling centers, mental health agencies and hospitals, physical health facilities, and other organizational settings. The clinical psychology program offers tracks in child and adolescent psychology and behavioral medicine psychology.

The Center for Psychological Services and Development, a campus-based community service agency operated by the department, provides training opportunities for graduate students in all departmental programs, including practicum and research training for graduate students in the clinical psychology program. A wide variety of other on- and off-campus practicum placements also are available.

The department maintains laboratory facilities for research in the areas of behavioral assessment, behavioral medicine, developmental, learning, behavioral pharmacology, psychophysiology, psychotherapy process, social perception, social influence and group dynamics. Opportunities for field research also are available in a variety of settings. A collection of current journals and books in psychology is housed in the James Branch Cabell Library on the Monroe Park Campus and in the Tompkins-McCaw Library on the MCV Campus.

Teaching assistantships, research assistantships and paid practicum placements are available.

#### Curriculum requirements

### Department core

- PSYC 617 Sensation and Perception or PSYC 629 Biological Basis of Behavior
- PSYC 619 Learning and Cognition
- PSYC 675 Ethical Principles of Psychology (two credits)
- PSYC 680 Statistics in Psychological Research I
- PSYC 681 Statistics in Psychological Research II

### Clinical psychology curriculum

Successful completion of clinical psychology program core courses (PSYC 616, 627, 643, 644, 645 or 649, 650, 652 or 667).

Successful completion of 22 credit hours of clinical practicum (PSYC 694) and one credit hour of research practicum (PSYC 690). Up to six credit hours may be waived depending on experience and ability.

Successful completion of one three-credit assessment elective (e.g., PSYC 626, 641, 645, 646, 647, 648, 649).

Successful completion of one three-credit therapy/intervention elective (e.g., PSYC 623, 624, 652, 653, 654, 655, 660, 666, 667, 668, 669, 670).

Students need to meet a social aspects of behavior breadth requirement by successfully completing PSYC 630, PSYC 633 or another graduate course in social aspects of behavior approved by the clinical faculty.

Students need to meet a cultural/individual diversity breadth requirement by successfully passing PSYC 677 or another graduate course in cultural/individual diversity approved by the clinical faculty.

Successful completion of three one-half credit consecutive semesters of an approved predoctoral internship, PSYC 696.
A minimum of 87.5 semester hours of approved courses beyond the baccalaureate degree.

Students should, if planning to practice clinical psychology, attend to the current licensure requirements of the state in which they plan to practice.

**Special requirements:**
- Please submit a curriculum vitae or resume.
- Personal interview may be required for the counseling program.

The Doctor of Philosophy in Counseling Psychology offered at Virginia Commonwealth University is accredited by the American Psychological Association. The program emphasize the scientist-practitioner model and prepare students for research and service in professional psychology, including positions in university academic and medical school departments, counseling centers, mental health agencies and hospitals, physical health facilities, and other organizational settings.

The counseling psychology program emphasizes the enhancement of life skills and personal competence. Typical subspecializations include disease prevention and health promotion, career and life planning, work with medical populations, college students, community outreach, interpersonal processes, group counseling, marriage and family counseling, multiculturalism and sport psychology.

The Center for Psychological Services and Development, a campus-based community service agency operated by the department, provides training opportunities for graduate students in all departmental programs, including practicum and research training for graduate students in the counseling psychology program. A wide variety of other on- and off-campus practicum placements also are available.

The department maintains laboratory facilities for research in the areas of behavioral assessment, behavioral medicine, developmental, learning, behavioral pharmacology, psychophysiology, psychotherapy process, social perception, social influence and group dynamics. Opportunities for field research also are available in a variety of settings. **Special requirements:**
- Applicants should apply to the Ph.D. program only, but will earn a master’s degree during their course of study. Applicants who are interested in only the terminal master’s degree are not admitted.
- Personal interview may be required.

The Doctor of Philosophy in Health Psychology offered by Virginia Commonwealth University is an experientially oriented program that is designed to train students to contribute to our knowledge of psychological contributions to health and illness via training in basic and clinical research. Students completing the Ph.D. in Health Psychology will not be eligible for licensure. Research in health psychology examines the causes and development of illness, methods to help individuals develop healthy lifestyles to promote good health and prevent illness, the treatment individuals receive for their medical problems, the effectiveness with which individuals cope with and reduce stress and pain, biopsychosocial connections with immune functioning, and factors in the recovery, rehabilitation and psychosocial adjustment of patients with serious health problems. Thus, graduates from the Ph.D. program in Health Psychology are prepared for work in a range of settings including colleges and universities, medical centers, research centers, nonprofit agencies, and local, state and national government.

The Center for Psychological Services and Development, a campus-based community service agency operated by the department, provides training opportunities for graduate students in all departmental programs. A wide variety of other on- and off-campus practicum placements also are available.

The department maintains laboratory facilities for research in the areas of behavioral assessment, behavioral medicine, developmental, learning, behavioral pharmacology, psychophysiology, psychotherapy process, social perception, social influence and group dynamics. PSYC 675 Ethical Principles of Psychology (two credits)
PSYC 680 Statistics in Psychological Research I
PSYC 681 Statistics in Psychological Research II

##### Health psychology curriculum

Counseling psychology program core curriculum successfully completed (PSYC 608, 611, 616, 623, 625, 643, 644, 645, 651, 655, 660/or approved health psychology elective, 676, and 695).

Successful completion of 12 credit hours of counseling practicum (PSYC 693) and three credit hours of research practicum (PSYC 690).

Successful completion of other required courses, including PSYC 603 or 633 or other approved developmental course.

Students need to meet a social aspects of behavior breadth requirement by successfully completing PSYC 630 or another graduate course in social aspects of behavior approved by the counseling faculty.

Successful completion of three one-half credit consecutive semesters of an approved predoctoral internship (PSYC 696).

A minimum of 88 credit hours of approved courses beyond the baccalaureate degree. The current recommended curriculum totals 97.5 credit hours.

Counseling psychology program core curriculum successfully completed (PSYC 608, 611, 616, 623, 625, 643, 644, 645, 651, 655, 660/or approved health psychology elective, 676, and 695).

Students should, if planning to practice clinical psychology, attend to the current licensure requirements of the state in which they plan to practice.
Required health courses: PSYC 660 Health Psychology, PSYC 691 Special Topics: Research Methods in Health Psychology (other methods courses may be substituted on approval of the faculty), PSYC 691 Special Topics: Culture, Ethnicity and Health, PSYC 691 Special Topics: Brown Bag Research Colloquium (required each semester in the program).

Two (or more) of the following courses: PSYC 622 Physiological Correlates of Emotion, PSYC 635 Psychology of Health and Health Care in the Elderly, PSYC 666 Crisis Intervention: Theory, Research and Practice, PSYC 691 Special Topics: Child Health Psychology, PSYC 691 Special Topics: Cancer Prevention and Control, PSYC 691 Special Topics: Occupational Health, or PHTX 548 Drug Dependence.

Independent readings and research: At least three credits of either PSYC 671 or 690 are required for the master’s degree. Both are required for the Ph.D. These courses may be repeated for credit.

A minimum of 40 credit hours are required to complete the master’s degree. Consistent with the other Ph.D. programs offered in the Department of Psychology, the master’s degree earned will be in general psychology. Students who do not enter the program with a master’s degree earn a master’s degree while working toward the Ph.D.

Additional course work for the Ph.D. includes: PSYC 603 Developmental Processes (or another approved course in developmental psychology), PSYC 630 Social Psychology (or another approved course in social psychology), PSYC 700 Grant Writing or ALHP 716 Grant Writing and Project Management in Health Related Sciences, and PSYC 795 Practicum in the Teaching of College Psychology.

Students must take at least one course in methodology or statistics in addition to the core requirements. Options include: BIOS 531, BIOS 571, BIOS 572, BIOS 647, EPID 606, HADM 762, MGMT 643, MGMT 691 Topics in Management (CARMAR), NURS 772, PSYC 702, SOCY 605, STAT 644 or other relevant courses as approved by program faculty.

Dissertation credits: Students must declare 12 units of PSYC 898 but may take additional credit hours.

In addition to the above requirements, students, working with faculty, should choose additional elective courses as needed for their career goals. Possible elective course include, but are not limited to: ALHP 701, EPID 533, EPID 605, GRTY 601, GRTY 627, HADM 615, HADM 626 or PHTX 614.

Students awarded the health psychology Ph.D. are required to complete a minimum of 80 semester hours, broken down as follows: department core courses, 13-15 credits; master’s thesis, six credits; health psychology core courses, 17 credits; applied research, three credits; electives for master’s, six credits; readings and research, three credits; research practicum, three credits; post-master’s electives, 15 credits; and dissertation, 12 credits. Students also must pass a comprehensive examination.

**Psychology, Doctor of Philosophy (Ph.D.)**

**Admission requirements summary**

<table>
<thead>
<tr>
<th>Degree:</th>
<th>Semester(s) of entry:</th>
<th>Deadline</th>
<th>Test requirements:</th>
</tr>
</thead>
<tbody>
<tr>
<td>Ph.D.</td>
<td>Fall only</td>
<td>Jan 10</td>
<td>GRE-General</td>
</tr>
</tbody>
</table>

Special requirements:

Applicants should apply to the Ph.D. program only, but will earn a master’s degree during their course of study. Applicants who are interested in only the terminal master’s degree are not admitted.

Please indicate your interest in biopsychology, developmental psychology or social psychology in your application.

Personal interview may be required.

The Doctor of Philosophy in Psychology offered by Virginia Commonwealth University prepares students for basic or applied research and includes three specialty areas: biopsychology, developmental and social psychology. The concentration in developmental trains students for work in either college or university academic departments or applied settings. Applied developmentalists work in a variety of settings and programs (violence prevention, community intervention, schools, family service agencies, nonprofit agencies, health care settings, disability agencies) with a variety of human populations (infants and young children, school-age children, adolescents, at-risk youth, incarcerated youth and adults, parents, older adults, persons with disabilities); they do not offer counseling/therapy services.

The Center for Psychological Services and Development, a campus-based community service agency operated by the department, provides training opportunities for graduate students in all departmental programs. A wide variety of other on- and off-campus practicum placements also are available.

The department maintains laboratory facilities for research in the areas of behavioral assessment, behavioral medicine, developmental, learning, behavioral pharmacology, psychophysiology, psychotherapy process, social perception, social influence and group dynamics. Opportunities for field research also are available in a variety of settings. A collection of current journals and books in psychology is housed in the James Branch Cabell Library on the Monroe Park Campus and in the Tompkins-McCaw Library on the MCV Campus.

Teaching assistantships, research assistantships and paid practicum placements are available.

**Curriculum requirements**

**Department core**

- PSYC 617 Sensation and Perception or PSYC 629 Biological Basis of Behavior
- PSYC 619 Learning and Cognition
- PSYC 675 Ethical Principles of Psychology (two credits)
- PSYC 680 Statistics in Psychological Research I
- PSYC 681 Statistics in Psychological Research II

**Psychology curriculum**

General psychology program doctoral courses completed (PSYC 638; three hours of 671 and/or 690; and 602 or 603 or 605).

Successful completion of one of the following specialized division curricula:

**Biopsychology division curriculum**

PSYC 629, PSYC 617, PSYC 639 and three courses from the following list: PSYC 612, PSYC 622, PHTX 632, PHIS 501, PHTX 633 and approved special topics courses (PSYC 691).

**Developmental division curriculum**

PSYC 603, PSYC 636, and PSYC 671 or PSYC 690

- Three or more “age-stage” courses chosen from: PSYC 691 Infant Behavior and Development, PSYC 691 Early and Middle Childhood, PSYC 628 Psychology of Adolescent Development and PSCY 602 Psychology of Aging.
- One course in diversity (most often PSYC 677 Minority Mental Health).
- Two applied courses chosen from PSYC 691 Program evaluation, PSYC 700 Grant-writing, PSYC 795 Teaching of Psychology, PSYC/GRTY 642 Practicum in Clinical Geropsychology, PSYC/IDDS 600 Interdisciplinary Studies in Developmental Disabilities: Teamwork, PSYC/IDDS 692 Directed Studies in Developmental Disabilities, IDDS 691 Special Topics or other courses approved by adviser.
- Students will take one or more courses in psychopathology or disabilities, choosing from PSYC/GRTY 615 Aging and Mental Disorders, PSYC 616 Psychopathology, PSYC 650 Advanced Child Psychopathology, PSYC/IDDS 600 Interdisciplinary studies in Developmental Disabilities: Teamwork, PSYC/IDDS 692 Directed Studies in Developmental Disabilities, IDDS 691 Special Topics or other relevant classes as approved by adviser.
- Additional training in methodology or statistics: one or more courses selected from NURS 772 Advanced Qualitative Research, MGMT 643 Applied Multivariate Methods, MGMT/PSYC 702 Causal Analysis for Organizational Studies, SOC 605 Survey Research Methods, HADM 762 Health Services Research Methods II, BIOS 544 or other relevant courses as approved by adviser.
- One graduate course in social psychology is required.
Students specializing in life span development and gerontology must take the following set of gerontology courses in addition to other developmental and core requirements — these courses will result in a Certificate in Aging from the Department of Gerontology:

- GRTY 601 Biological and Physiological Aging
- GRTY 602 Psychology of Aging
- GRTY 605 Social Gerontology
- GRTY 692 Independent Study (two credits)

Six additional hours of gerontology electives, chosen with adviser

Electives

Students, working with faculty, should choose additional courses as needed for their career goals; the number of electives taken is optional, and other courses not on this list may qualify, provided students work in consultation with faculty advisers:

- GRTY 601 Biological and Physiological Aging
- GRTY 602 Psychology of Aging
- GRTY 605 Social Gerontology
- HGEN 620 Introduction to Principles of Human Behavioral Genetics
- PSYC 613 Cognitive Development
- PSYC/GRTY 635 Psychology of Health and Health Care in the Elderly
- PSYC 638 Evolution of Psychological Systems
- PSYC 644 Individual Tests of Intelligence
- PSYC 645 Clinical Assessment of Child Disorders
- PSYC/GRTY 641 Survey of Psychological Assessment and Treatment of the Older Adult
- PSYC 655 Community Interventions: Development, Implementation and Evaluation
- PSYC 659 Seminar in Consultation Psychology
- PSYC 660 Health Psychology
- PSYC 691 Parenting or other special topics courses as available

Social division curriculum

PSYC 630, PSYC 632 and three courses from the following list: PSYC 604, PSYC 610, PSYC 633 and PSYC 634.

- A minimum of 72 semester hours of approved courses beyond the baccalaureate degree

Follow this link to statistical sciences (STAT) courses.

Use this link to see operations research (OPER) courses.

### Mathematical Sciences, Master of Science (M.S.)

</tbody>
</table>

A Master of Science in Mathematical Sciences is offered jointly by the Department of Mathematics and Applied Mathematics and the Department of Statistical Sciences and Operations Research. The Master of Science in Mathematical Sciences offers specializations in several possible areas, including applied mathematics, mathematics, operations research, statistics, discrete structures and others.

#### Admission requirements

In addition to the general requirements for admission to graduate programs listed in the Graduate Studies at VCU section and the College of Humanities and Sciences section of this bulletin, the following requirements represent the minimum acceptable standards for admission:

- Thirty credits in undergraduate mathematical sciences, computer science or related areas of which at least 18 semester credits must represent upper-level courses.
- Three letters of recommendation pertaining to the student’s potential ability as a graduate student in mathematical sciences.
- General GRE scores required.

Provisional admission may be granted when deficiencies exist. These deficiencies must be removed by the end of the first year of residence, or its part-time equivalent, when the student’s application will be re-examined. Courses that are remedial or designed to remove deficiencies will not be accepted for credit toward the fulfillment of the course requirements for the master’s degree.

#### Degree requirements

The program offers maximum flexibility by allowing students, in consultation with their graduate committees, to design a course of study that will best develop competence in those areas most relevant to their scholarly and professional objectives. This program consists of a minimum of 30 semester credits of which at least 15 must be at the 600 level.

Students may obtain a designation on their transcripts indicating that their graduate study has emphasized one of the following graduate concentrations by completing the requirements that are listed here for that concentration. A student who has not satisfied the requirements for one of these concentrations, but who has otherwise fulfilled all the requirements for a master’s degree, will be awarded a degree of Master of Science in Mathematical Sciences without any specialization.

- applied mathematics
- mathematics
- operations research
- statistics

Note that the following courses cannot be applied to the credit requirements for the M.S. in Mathematical Sciences: STAT/SOCY 508, STAT/BIOS/EPID 543 and STAT/SOCY 608.

#### Curricula

**Statistics and operations research concentrations**

Each student will complete either a thesis or an applied project. A student who
chooses the thesis option has a choice of writing a research thesis or an expository thesis. A research thesis is one that, in the opinion of the student’s thesis adviser and thesis committee, contains significant original research. For this thesis, the student may count six credits of STAT 698 or OPER 698. Otherwise, a student may write an expository thesis. For this type of thesis, the student may count three credits of STAT 698 or OPER 698.

The student who elects the applied project must prepare a written report of the project and make an oral presentation; these students may count three credits of STAT 698 or OPER 698. Students cannot receive credit for both STAT/OPER 696 and STAT/OPER 698.

Mathematical sciences (including both semesters of a 600-level sequence) 18
Mathematical sciences or allied field* 6-9
Thesis or applied project credits 3 or 6
Directed research credits** 0-3

* Courses selected from an allied field must be approved by the department’s Graduate Affairs Committee.

** A student can receive a maximum of six credits in thesis/applied project and directed research. Hence a student who writes a six-credit thesis cannot receive any directed research credits. A student who completes a three-credit thesis or the applied project, however, may receive up to three directed research credits.

### Operations research concentration

**Master of Science in Mathematical Sciences with a concentration in operations research**

OPER 527-528; STAT 541; OPER 690; OPER 696 or 698; and at least six additional credits selected from OPER 627, 635, 641, 643, 645, 647, 648, 649, and approved 691*. The applied project or thesis must concern topics of operations research.

* Use of OPER 691 to meet this requirement must be approved by the Department of Statistical Sciences and Operations Research and the Graduate Affairs Committee of the department at the time the course is scheduled.

### Statistics concentration

**Master of Science in Mathematical Sciences with a concentration in statistics**

STAT 513-514*; STAT 690; STAT 696 or 698; and at least nine additional credits selected from STAT 623, 642, 643, 645, 648, 649, approved 691** and 744. The applied project or thesis must concern topics of statistics.

* If a student previously received credit for one or both of these courses or their equivalent, then one or two of the other courses mentioned for this concentration must be taken as substitute(s) to satisfy the minimum requirement of 15 credits of course work in the concentration.

** Use of STAT 691 to meet this requirement must be approved by the Department of Statistical Sciences and Operations Research and the Graduate Affairs Committee of the department at the time the course is scheduled.

Graduate and Professional Programs Bulletin

School of Allied Health Professions
The School of Allied Health Professions was established on Jan. 1, 1969, to provide an administrative structure for existing educational programs in allied health disciplines and to direct the development of new programs in response to the growing need for allied health manpower. At the outset, the school incorporated existing educational programs for hospital administration, medical technology, physical therapy and radiologic technology and X-ray technicians.

In the years since its establishment, the school has grown significantly — developing unique, cutting-edge curricula and degree offerings in both traditional and nontraditional formats — to meet the increasing demand for allied health teachers, researchers and practitioners. Considered a leader in distance education, VCU’s School of Allied Health Professions offers the only interdisciplinary, Internet-based doctoral program in allied health in the country: the Ph.D. in Health Related Sciences. The school currently incorporates nine departments and offers programs at the baccalaureate, certificate, master’s, doctoral and professional levels.

Jessica F. Gurganus  
Assistant Dean for Advancement

Jeffrey R. Lodge  
Director of Information Systems

Monica White  
Director of Student Services

**Philosophy**

The faculty of the school is committed to offering, through the establishment and maintenance of rigorous standards of excellence, educational programs that will prepare students for professional careers in the allied health disciplines. Development of professional attitudes, emotional maturity and ethical behavior of students is a vital component of the educational process. It is essential that students gain a deep respect for the dignity of human beings and the inherent rights of patients and others who receive services. The programs are designed to include not only the development of skills to assure excellence in quality of health care, but also factual knowledge and experiences that will provide the basis for continuing intellectual and professional growth.

Community services of the school and faculty include continuing education, consultative resources and participation in all pertinent areas of health care. An integral part of these efforts is to stimulate and sponsor research activities in the allied health disciplines represented within the school and to encourage interdisciplinary research.

**Accreditation**

The School of Allied Health Professions is an institutional member of the American Society of Allied Health Professions and the Virginia Association of Allied Health Professions. All of its programs are approved or accredited by the appropriate national professional or educational organizations.

Clinical Laboratory Sciences (bachelor’s degree)  
National Accrediting Agency for Clinical Laboratory Sciences  
8410 W. Bryn Mawr Ave., Suite 670, Chicago, IL 60631-3415; (773) 714-8880.

Health Administration (master’s and executive master’s degrees)  
Commission on Accreditation of Healthcare Management Education

Nuclear Medicine Technology (bachelor’s degree)  
Joint Review Committee on Educational Programs in Nuclear Medicine Technology

Nurse Anesthesia (master’s, doctorate)  
Council on Accreditation of Nurse Anesthesia Educational Programs (COA, 222 South Prospect Avenue, Park Ridge, Illinois, 847-692-7050).

The COA is recognized by the U.S. Department of Education and the Council on Higher Education Accreditation to accredit programs of nurse anesthesia at the master’s, post-master’s and doctoral levels.

Graduates of the master’s program are eligible to take the examination for certification conducted by the Council on Certification of Nurse Anesthetists.

Occupational Therapy (master’s degree)  
Accreditation Council for Occupational Therapy Education

Patient Counseling (certificate)  
Association for Clinical Pastoral Education

Physical Therapy (D.P.T.)  
Commission on Accreditation in Physical Therapy Education, American Physical Therapy Association

Radiation Therapy Technology (bachelor’s degree)  
Joint Review Committee on Education in Radiologic Technology

Radiography (bachelor’s degree)  
Joint Review Committee on Education in Radiologic Technology

Rehabilitation Counseling (master’s degree)  
Council on Rehabilitation Education

**Programs**

Both entry- and advanced-level undergraduate, graduate, professional and certificate programs are offered by the School of Allied Health Professions. University and accreditation requirements for the individual programs guide the establishment of general admission prerequisites and course and degree requirements. Regulations and procedures for each program are outlined in these bulletins and are intended to ensure the selection of applicants whose motivation, ability, character and health status qualify them to pursue their program of study successfully.

Programs currently offered by this school and the degrees conferred on their graduates are:

**School of Allied Health Professions**

- Ph.D. in Health Related Sciences

**Department of Clinical Laboratory Sciences**

- Bachelor of Science
- Master of Science

**Department of Gerontology**

- Post-baccalaureate graduate certificate in aging studies
- Post-baccalaureate graduate certificate in aging studies and Master of Social Work offered jointly with the VCU School of Social Work
- Master of Science

**Department of Health Administration**

- Master of Health Administration
- Master of Health Administration and Doctor of Medicine (offered jointly with the VCU School of Medicine)
- Master of Health Administration and Juris Doctor (offered jointly by the T. C. Williams School of Law at the University of Richmond and the Washington and Lee University School of Law)
- Master of Science in Health Administration (Professional M.S.H.A. Program – Online)
- Ph.D. in Health Services Organization and Research

**Department of Nurse Anesthesia**

- Doctor of Nurse Anesthesia Practice
• Master of Science in Nurse Anesthesia

Department of Occupational Therapy
• Master of Science in Occupational Therapy
• Master of Science
• Occupational Therapy Doctorate

Program in Patient Counseling
• Post-baccalaureate graduate certificate in patient counseling
• Master of Science
• Master of Science and Master of Divinity (offered jointly by the School of Theology at Virginia Union University and the Baptist Theological Seminary)

Department of Physical Therapy
• Doctor of Physical Therapy
• Tracks in physical therapy in the Ph.D. programs offered in Anatomy and Neurobiology or Physiology in the VCU School of Medicine
• Ph.D. in Rehabilitation and Movement Science

Department of Radiation Sciences
• Bachelor of Science

Department of Rehabilitation Counseling
• Master of Science
• Master of Science in Rehabilitation Counseling and certificate in aging studies
• Post-baccalaureate graduate certificate in professional counseling

Licensure/certification
Graduates of most of the programs offered in the School of Allied Health Professions are required or eligible to take national and/or state certification or licensure examinations. Requirements of licensing and certifying agencies vary. Some licensure and certification agencies consider individuals convicted of a felony ineligible for licensure or certification. For information, prospective students should contact the licensure or certification agency for the specific allied health discipline.

Attendance regulations
The faculty considers attendance at lectures, laboratories and other functions a requisite to the successful acquisition of the knowledge and skills required of the professional. Hence, the faculty cannot condone absence without good reason from any regularly scheduled educational experience. At the beginning of each course, instructors relate to their classes the policy of the department concerning the attendance regulations for that semester. The nature of make-up work in the event of absence will be the prerogative of the instructor.

Student performance and behavior
The goals and objectives of the School of Allied Health Professions and its component departments and programs relate to the education of persons preparing for professional careers in the allied health disciplines. An integral requisite of students and practitioners is an undeviating acceptance of a professional attitude and pride that will motivate them to adhere to a code of professional ethics and to develop fully their competencies for practice.

The suitability of student performance and behavior relating to these professions and to the consumers of health care is a paramount concern of the administration and faculty of this school. To assure a quality of educational and clinical preparation for its graduates, the following statement is promulgated:

If, in the judgment of the faculty and administration of the School of Allied Health Professions, a student is not considered suitable for emotional, professional or related reasons, the student’s academic status may be appropriately altered.

If any questions arise regarding the standards of performance or behavior, it is the responsibility of students to apprise themselves of acceptable character and conduct requirements prior to matriculation in the designated department or program.

Financial aid
Financial aid is available for all students meeting the criteria for financial assistance. For details of the programs available contact the Financial Aid Office, P.O. Box 980244, Richmond, VA 23298-0244 or telephone (804) 828-9800.

The school and departments also offer financial awards, honors and scholarships. Details may be found on the school’s and individual departments’ Web sites at www.sahp.vcu.edu.

Contact School of Allied Health Professions Dean’s Office for specific admission requirements

J. James Cotter
Associate Professor and Assistant Dean, School of Allied Health Professions

The Doctor of Philosophy Program in Health Related Sciences in the School of Allied Health Professions was designed as a distance learning program with the cooperation and commitment of the nine departments of the school: Clinical Laboratory Sciences, Gerontology, Health Administration, Nurse Anesthesia, Occupational Therapy, Patient Counseling, Physical Therapy, Radiation Sciences and Rehabilitation Counseling.

The mission of the School of Allied Health Professions is to serve as an international leader in the education of excellent, innovative and responsible allied health professionals. Educational formats that are technologically advanced and accessible to students through on-campus and distance learning are emphasized throughout all programs in the school. In addition, the school promotes excellence in health care service and encourages collaborative research that generates state-of-the-art and specialized knowledge.

This doctoral program involves a four-year course of study. It is designed to meet the critical need for doctoralally prepared allied health professionals across the nation, specifically in the areas of teaching, research and administration. The departments of the School of Allied Health Professions offer a doctoral curriculum with a common interdisciplinary core of courses and nine specialty tracks germane to the disciplines of the participating departments.

Program instructional goals
The goal of the doctoral program in health related sciences is to provide experienced health professionals with advanced knowledge and skills so that they may assume positions in teaching, research and administration upon graduation. This doctoral program emphasizes both an interdisciplinary and multimedia focus, drawing from resources across the university. The overall objectives of this doctoral program are to produce scholars who have:

• the ability to understand, analyze, design, execute and evaluate research and practice in the allied health sciences, with particular in-depth understanding in the chosen area of specialization,
• the ability to translate research knowledge and principles into applied practice perspectives and skills,
• the ability to teach the current principles and content of the allied health sciences,
• the ability to do research, practice and teach in the area of interdisciplinary health care practice,
• the ability to continually examine current and future changes in the allied health disciplines from an interdisciplinary perspective,
• a demonstrated knowledge and understanding of professional and ethical responsibility and conduct in the allied health professions, and
• a demonstrated knowledge and understanding of ethnic issues and cultural diversity in health care delivery and health policy.

Facilities
The administrative offices for the program are located on the MCV Campus, at 1200 E. Broad St. (West Hospital, First Floor, East Wing).

Admission

Admission criteria
Admission to the program, which is open to students with clear career goals in the health related sciences, is limited and competitive. Therefore, work experience in a health-related field is encouraged.

Applicants to the program must meet the following admission criteria:
• Have an earned master’s degree in an academic or allied health-related field from an accredited college or university. (The master’s degree should be in one of our departmental areas of choice of specialty track.).
• Have a minimum cumulative GPA of 3.3 on their master’s level work.
• Have completed a graduate course in statistics with a grade of “B” or better.
• Have earned a minimum cumulative score of 1100 on the verbal and quantitative sections of the Graduate Record Exam (GRE) or a minimum score of 425 on the Miller’s Analogies Test (MAT). Tests must have been taken within the past five years.
• When applicable, have a minimum Test of English as a Foreign Language (TOEFL) score of 600.
• Demonstrate a record of professional competency and success.
• Articulate clear professional and educational goals and written communication skills through the submission of a written essay.

Enrollment in the program is open to qualified persons without regard to age, race, sex, religion, disability or national origin. Admission requirements are in compliance with all applicable federal and state statutes, orders and regulations, and university guidelines.

Admission procedures
Prior to reviewing an application for admission, the program must receive:
• A completed application form from the applicant, including:
  ◦ Three letters of recommendation, two of which preferably are from sources qualified to assess the candidate’s academic potential.
  ◦ A written essay that discusses career goals and the manner in which this doctoral program will enhance those goals, and what the applicant expects to contribute to this program.
  ◦ A curriculum vitae.
• Official transcripts indicating completion of baccalaureate and master’s degrees (or equivalent) from an accredited college or university.
• GRE or MAT scores.

Incomplete packages may not be reviewed. Materials are sent to the Graduate School for processing and then forwarded to the School of Allied Health Professions. Once received in the school, the application is reviewed for completeness. Applicants with incomplete files will be contacted regarding the missing materials. Incomplete files will be held in the director’s office until all materials are received.

Completed folders will be sent to the respective departmental representative of the School of Allied Health Professions Doctoral Program Advisory Committee (D-PAC). Departments will then rank qualified applicants and, based on a review of the file, a personal interview will be scheduled at the department’s discretion for their top candidates. Following the departmental ranking, all files will be returned to the director’s office.

The D-PAC will meet to select and recommend the incoming class. The director and the dean of the School of Allied Health Professions are responsible for the final decision.

Applicants will be notified by the dean of the Graduate School regarding the admission decision and of the deadline for their acceptance of the offer and holding fee.

Advising
Upon admission to the program, students will be assigned an interim adviser to guide them through the core courses and assist them as they consider their area of research. All program advisers will have an earned doctorate and be a member of the university’s graduate faculty.

Students may change their interim adviser as their programs of study and interests evolve, if approved by the program director. Although discouraged, some students may wish to switch their area of specialization (changing from the department through which they were initially admitted to the program.) Students who want to change specialization areas must petition the doctoral program director. The petition must be approved by the program director, the D-PAC and the appropriate department chair. There is no guarantee that the applicant will be accepted into the new specialization area.

After successful completion of the comprehensive examinations, students will choose a dissertation chair who will serve as adviser and guide them through their research/dissertation process.

Program continuation and completion requirements

Continuation requirements
After admission to the Ph.D. program, the student must maintain a minimum cumulative GPA of 3.0 in all course work completed at VCU. A student who falls below that minimum will have one semester to remedy the deficiency. Even with an overall GPA of 3.0 or better, a student may earn no more than two (six credit hours) grades of “C.” A student who receives a grade of “D” or “F” will be reviewed for continuation in the program by the department of their specialization.

Students are expected to maintain continuous enrollment while in the program. Following the completion of the core course work, students must register for at least one credit hour each fall and spring semester for continuation in the program. A student who fails to register must have advance approval to do so or will be dropped automatically from the program and must reapply for reinstatement. The maximum time to complete all of the requirements for the degree is eight calendar years from the date of entry into the program.

Course transfer or waiver
A maximum of 25 percent of the course work other than research may be transferred from another VCU program or outside institution and applied toward the Ph.D. course requirements. Transfer and waiver credit is given at the discretion of the program director after consultation with appropriate faculty members, subject to university approval. Courses taken as requirements for other degrees are not transferable. A waiver may be warranted if an equivalent course was taken. However, another course must be substituted for the waived course in order to fulfill the requisite 51 credit hours needed for degree completion.

Comprehensive examination
The purpose of the comprehensive examination is to provide a vehicle through which students can demonstrate the ability to integrate their educational experience by adequately addressing complex questions pertinent to the current and developing knowledge of the allied health fields. Students are eligible to take each of the two comprehensive examinations upon successful completion of the appropriate core course work. The core exam must be taken within six months of completing the methods exam.

Two written examinations will be administered, one for the common interdisciplinary core and one for the research methods core. A three-member graduate faculty committee will develop and administer each exam. This committee will be made up of two members of the Core Advisory Committee and one member appointed by the program director. Each exam will be offered once in the fall semester, and once in the spring semester. Prior to completion of the semester in which the student becomes eligible to take each exam, he/she must submit a formal statement of intent to the program coordinator.

Students who receive a failing grade on their initial attempt will have one opportunity to repeat each comprehensive examination. Failure to pass an exam on the second attempt will result in termination from the program.
Program completion requirements
The doctor of philosophy degree is awarded after (1) the minimum 51 credit hours of course work are completed; (2) comprehensive exams are passed; and (3) either a dissertation is written and defended orally, or three first-author articles of publishable quality on research undertaken by the doctoral candidate once enrolled in the program are written and defended orally. The journal articles will be scrutinized for quality of scholarship by an internal research committee headed by the student’s research adviser. All three articles must be approved by the internal research committee prior to submission.

Curriculum structure
The proposed curriculum is designed to take four years to complete. Students spend the first two and one-half years (six-month-long semesters) completing course work. The final year and one-half is spent developing the doctoral dissertation. Research components are present in each year of the program and a research emphasis is present throughout the entire curriculum. The student is required to designate the area of intended research in her/his specialization area in the first year.

Each of the five course-work semesters is composed of both on- and off-campus components. On-campus sessions, scheduled during the end of June and beginning of July, and the end of December and beginning of January, will employ a rather traditional mix of educational technologies (e.g., lectures, seminars and assigned reading). During the off-campus component of each semester, students pursue their studies employing a wide variety of innovative educational technologies (e.g., computer conferencing, computer-aided instruction, videotape packages and programmed instructional material), in addition to assigned readings and the completion of various assignments and projects. Upon completion of the five semesters of course work, students are required to return to campus each semester until a research proposal has been developed and successfully defended.

The program curriculum consists of a total of 51 credit hours (18 credits of common interdisciplinary core courses, 12 credits of research methods core courses, nine hours of specialty track courses and 12 hours of dissertation research). The courses, arranged by focal area are:

<table>
<thead>
<tr>

Note: All three of the specialty track courses and the dissertation research courses are taken in one of the following areas, and each of the departments have curricular section numbers for each of the respective courses (ALHP 781, ALHP 792, ALHP 793 and ALHP 899):

- Section 001 Clinical Laboratory Sciences
- Section 002 Gerontology
- Section 003 Health Administration
- Section 004 Nurse Anesthesia
- Section 005 Occupational Therapy
- Section 006 Physical Therapy
- Section 007 Radiation Sciences
- Section 008 Rehabilitation Counseling
- Section 009 Patient Counseling

Dissertation and published research requirements
Admission to candidacy
Students are eligible to begin their dissertation upon written certification by the program director and associate dean of the Graduate School that all predissertation/research requirements, including the comprehensive examinations, have been satisfied and that the student is prepared to proceed with the dissertation/research project. Copies of the certification will be forwarded to the student, the student’s formal program adviser and the dean of the School of Allied Health Professions. After admission to candidacy, students will proceed to propose, complete and defend their dissertation or three journal articles research requirement.

Enrollment requirement
Students are required to maintain continuous enrollment in ALHP 899 Dissertation Research until completion of the requirements, including the defense process.

Dissertation/research committee
After successful completion of the comprehensive exam, the student nominates a dissertation/research committee and the dissertation/research director submits the nominations in writing to the program director. Such committees will consist of a minimum of four graduate faculty members, one of whom will be outside the student’s specialty track. The program director will provide written approval of the dissertation/research committee and clear such appointments with the appropriate administrative officials.

Dissertation/research standards
The dissertation or publishable research articles must represent independent research and should be based on an original research question or hypothesis. Generally, dissertations or publishable research articles will demonstrate the student’s ability with empirical research, adhering to canons of (1) logic in conceptualization and design, (2) valid and reliable measurement, (3) appropriate analytic technique and (4) appropriate interpretation of results. Studies should be based on a formal theoretical or conceptually explicit framework for investigating a question or testing a hypothesis relevant to the allied health field.

Tuition and fees
Graduate tuition and fees will be assessed in accordance with rates approved annually by the VCU Board of Visitors. In addition to tuition, a program-specific fee is assessed for this distance-learning program. Tuition and fees include all direct program costs and the use of the university’s computing systems. An additional fee may be charged for learning materials distributed during a course.
Computer requirements

All students admitted to the program must have access to a personal computer (no older than two years) and a DSL or cable modem. Once admitted to the program it is recommended that students who do not feel proficient in computer skills enroll in a basic computer course to become comfortable with use of the Internet and with the basics of document processing software.

Financial aid

Students must apply directly to the financial aid office for consideration. In addition, when other support is available to students, all will be notified of the eligibility criteria and application procedures.

Dive process

All appeals to decisions based on this document are made to the program director. In the event that satisfactory resolution is not attained, the next level of appeal is the dean of the School of Allied Health Professions. Students in the program are governed by the School of Allied Health Professions Student Academic Appeal Policy and Procedures document, which was developed in compliance with university guidelines. Exception to any of the policies and procedures identified in this document require the written consent of the program director and, when necessary, the dean of the school.

Department of Clinical Laboratory Sciences

The Department of Clinical Laboratory Sciences supports the philosophy and mission of the university and the School of Allied Health Professions, and provides an environment that nurtures excellence in education, research and service. The programs offered by the department are dedicated to enhancing and promoting clinical laboratory science. The department fosters fair and equitable educational experiences for students of all ages and diverse backgrounds. Strong affiliations with clinical educators and the integration of innovative technology in the academic setting facilitate both the education and research goals of the department.

The department provides students with superior studies in clinical laboratory science, including both theoretical and applied clinical education, and develops problem-solving expertise, leadership capabilities and communication skills. By providing advanced theoretical and technical education, the graduate program serves to maintain and update the competency of laboratory professionals and to prepare students to assume roles as laboratory supervisors, university educators and researchers. A mature, responsible approach to the acquisition of knowledge is cultivated in order to establish continuing intellectual growth and an enthusiasm for the profession.

The department meets the growing health care needs of the community by providing highly competent and professional clinical laboratory scientists who will be able to function effectively upon entrance into the field and be prepared to explore future scientific and technological advances in laboratory science. And the department promotes continued professional development and personal growth for the faculty and staff to fulfill and balance the individual’s abilities and aspirations with the departmental, school and institutional mission and needs. Members of the department conduct themselves in a forthright, ethical manner and practice the highest standard of quality performance.

The objectives of the Department of Clinical Laboratory Sciences are:

- To provide an educational program that prepares students to accurately perform and evaluate analytical tests on body fluids, cells and products.
- To foster the development of professional conduct, interpersonal communication skills and ethical principles.
- To develop and promote strategies for lifelong learning and to encourage continued professional growth through research, continued education and active participation in professional societies.

History

Clinical laboratory scientists have been trained on the MCV Campus since 1927. However, the Department (formerly school) of Medical Technology was not formally established until 1952, at which time the curriculum included six months of didactic experience with lectures and laboratory sessions held in the department, followed by a six-month rotation through the clinical laboratories. The school offered a certificate and/or bachelor’s degree program; the certificate program was discontinued during the 1961-62 school year.

In 1974 the curriculum was expanded to the current two-plus-two year program in which students complete 60 semester hours of prerequisites followed by two years of professional course work. The graduate program in clinical laboratory sciences was started in 1967 to provide advanced education for certified medical technologists/clinical laboratory scientists. In 1985 the program was modified to allow candidates holding a degree in another area of science to obtain graduate education in clinical laboratory sciences.

In 1994, the department name was changed to the Department of Clinical Laboratory Sciences. In 2003, an accelerated track was initiated to integrate the undergraduate and graduate programs, which requires completion of two years of prerequisites and three years of full-time professional course work, and leads to the simultaneous awarding of both the bachelor’s and master’s degrees.

Facilities

The Department of Clinical Laboratory Sciences is located in the Randolph Minor Hall on the MCV Campus. All faculty and clerical offices are located in this facility, as well as student classrooms, general teaching laboratory, computer facilities and a student lounge/reading room.

Clinical laboratory sciences courses

Descriptions for all courses offered by the university may be accessed through the online courses database at www.pubapps.vcu.edu/vcucourses. You may search by unit, subject or keyword, as well as by degree level. Follow this link to clinical laboratory sciences (CLLS) courses.

Clinical Laboratory Sciences, Master of Science (M.S.)

Admission requirements summary

Clinical Laboratory Sciences, Master of Science (M.S.)

Indicate specialization:

Objectives

The objectives of the Department of Clinical Laboratory Sciences master’s program are to:

- Provide the student with a superior, yet flexible, course of advanced study in clinical laboratory sciences.
- Prepare the student to critically evaluate the literature related to laboratory issues and to produce future advances within laboratory sciences.
- Foster the continued development of interpersonal communication skills and ethical principles.
- Develop and promote strategies for lifelong learning and encourage continued professional growth through research, education and active participation in professional societies.
- Provide society and the commonwealth of Virginia with a source of highly competent professional laboratory technicians capable of functioning effectively in leadership roles within the field of clinical laboratory sciences.

Financial aid

Students must apply through the financial aid office for assistance. Refer to the general section on financial aid in this bulletin for details of the programs available. In addition, there are limited funds from departmental and professional sources. When this support is available, all students will be notified of the eligibility criteria and application procedures.

Admission requirements

In order to meet the needs of all individuals interested in continuing their education in the field, the Department of Clinical Laboratory Sciences has modified its graduate curriculum to accommodate a diverse group of candidates, including full- and part-time students. The program is highly flexible, allowing
students to select course work that meets their specific needs once the basic program requirements have been met.

The general entrance requirements for the Master of Science in Clinical Laboratory Sciences (for the Advanced and Categorical tracks) are:

- Baccalaureate degree from an accredited college or university with a major in: clinical laboratory sciences (medical technology) for the advanced track; biology or chemistry for the categorical track.
- Minimum undergraduate GPA of 2.7 on a 4.0 scale for at least the last two years of undergraduate work.
- Minimum TOEFL of 600 (paper), 250 (computer) or 100 (iBT) for international students whose native language is not exclusively English.
- Satisfactory scores on the GRE.
- Three letters of recommendation from employers or recent instructors addressing academic potential.

The entrance requirements for the Master of Science in Clinical Laboratory Sciences — accelerated track are:

- Acceptance into the B.S. degree program in clinical laboratory sciences.
- Completion of 52.5 hours of CLLS professional courses with a minimum GPA of 2.7.
- Satisfactory GRE scores.

Guaranteed admission

VCU students participating in the Honors College may apply for guaranteed admission to the Master of Science in Clinical Laboratory Sciences program. Refer to the Guaranteed Admission Program in this bulletin for details of the program. The Department of Clinical Laboratory Sciences also has agreements for guaranteed admission into the Master of Science program with the following institutions: Averett University, Eastern Mennonite University, Ferrum College, George Mason University, Hollins University, Mary Baldwin College, Radford University and Roanoke College in Virginia, and Meredith College in North Carolina. The requirements for guaranteed admission are:

- Baccalaureate degree from an accredited college or university with a major in clinical laboratory sciences (medical technology), biology or chemistry.
- Minimum overall undergraduate GPA of 3.25 and a minimum undergraduate science GPA of 3.0 on a 4.0 scale.
- Minimum TOEFL of 600 (paper), 250 (computer) or 100 (iBT) for international students whose native language is not exclusively English.
- Three letters of recommendation from employers or recent instructors addressing academic potential.

GRE is waived for admission decisions. The GRE must be taken within the first enrolled year, but the results are to be used for record keeping purposes only.

Transfer credit

Students who have earned graduate credit before entering the Department of Clinical Laboratory Sciences' master’s program may be permitted, at the discretion of the faculty, to transfer a maximum of six semester hours of credit toward the Master of Science degree. Transfer credit may be allowed when, in the judgment of the faculty, the applicants have satisfactorily completed course work equivalent to requirements of the graduate curriculum in this department.

Program options

The department offers three tracks in the master’s degree program in clinical laboratory sciences:

- Accelerated master’s track
- Advanced master’s track
- Categorical master’s track

Application forms and instructions for applying to all graduate programs are available on the Graduate School Web site.

Accelerated master’s track

<table>
<thead>
<tr>
<th>Degree: M.S.</th>
<th>Semester(s)</th>
<th>Deadline dates:</th>
<th>Test requirements:</th>

</thead>
<tbody>
<tr>
<td></td>
<td>Fall</td>
<td>Jul 1</td>
<td>GRE</td>
</tr>
<tr>
<td></td>
<td>Spring</td>
<td>Nov 1</td>
<td></td>
</tr>
</tbody>
</table>

The accelerated master’s track integrates graduate and undergraduate course work and leads to the awarding of a B.S. and M.S. degree simultaneously. The student must complete a minimum of 112.5 undergraduate credit hours including 60 prerequisite credit hours (see admission requirements for the baccalaureate degree program in Clinical Laboratory Sciences in the Undergraduate Bulletin for a list of the specific courses) and 52.5 credit hours of professional coursework in clinical laboratory sciences. A minimum cumulative GPA on CLLS courses of 2.7, completion of the GRE and an interview are required for admission into the graduate portion of the program. The candidate must complete at least 40 additional hours of graduate-level course work. Upon completion of the curriculum students are eligible to take the national certification examinations for a CLS/MT generalist. Students pursuing the accelerated master’s track must initially qualify for admission to the Bachelor of Science in Clinical Laboratory Sciences program. Application materials may be obtained by writing to the Office of Undergraduate Admissions, Virginia Commonwealth University, P.O. Box 980632, Richmond, VA 23298-0632, or the Department of Clinical Laboratory Sciences, Virginia Commonwealth University, P.O. Box 980583, Richmond, VA 23298-0583, or from the Web at www.sahp.vcu.edu/cls.

Curriculum for the accelerated master’s track

Specific courses will depend on the individual candidate’s choice of specialty. The basic science requirement may be distributed among approved courses listed in this bulletin.

Department of Gerontology

The mission of the Department of Gerontology is to improve elder care through education.

The basic philosophy of the department is to improve the overall well-being of elders through the development of educational programs that are responsive to the changing psychological, physical, social and political needs of our elderly population. Research, community service and continuing education in gerontology and geriatrics are integral parts of this educational effort.

Administration

E. Ayn Welleford
Associate Professor and Department Chair

History

The Department of Gerontology was founded in 1976. The Master of Science in Gerontology, as well as a postgraduate Certificate in Aging Studies, is offered. The Department of Gerontology became a part of the School of Allied Health Professions in January 1985. As part of the department, the Geriatric Education Center was established Oct. 1, 1985. This center is a multidisciplinary effort.
involving cooperation of all the health-related professional schools and the College of Humanities and Sciences; the major focus is to promote education in geriatrics and gerontological health care.

Objectives
The purpose of this program is threefold: (1) to train qualified professionals to work in administrative, planning, service delivery and instructional and staff development positions in programs and services for the elderly at the national, state and local levels, (2) to provide an opportunity for those studying in other disciplines, and whose work will encompass service to the aged, to integrate their own training with a comprehensive knowledge and understanding of the aging process and (3) to stimulate the design and execution of gerontological research across the multiple disciplines.

Facilities
Offices of the Department of Gerontology are located in the Randolph Minor Annex, 301 College St. The Virginia Geriatric Education Center is housed in West Hospital, 1200 E. Broad St., 4th Floor, West Wing.

Virginia Center on Aging
The Virginia Center on Aging, established at VCU by the Virginia General Assembly in 1978, is a statewide resource for aging-related research, education, service, training and technical assistance. It serves as a focal point for the collection, assessment and maintenance of data on elders in the commonwealth; designs and tests innovative demonstration projects in education and service delivery; and assists public and private organizations in meeting the needs of older citizens.

The Virginia Center on Aging and the Department of Gerontology maintain the Information Resources Center, a broad collection of print and audiovisual materials on aging that is available on loan. Short reports and training manuals may be obtained at cost. The Virginia Center on Aging also administers the Alzheimer’s and Related Diseases Research Award Fund that provides seed grants of $25,000 each to researchers in Virginia in order to investigate biomedical, psychosocial, clinical, public policy and other aspects of dementia.

The Virginia Center on Aging regularly partners with other units of VCU in developing, conducting and evaluating research and training projects related to aging, disabilities, lifelong learning and health problems.

Honors and awards

A. D. Williams Award
An annual award is made to a student who demonstrates by virtue of high scholastic attainment and professional competence unusual promise and ability in the field of gerontology.

Gerontology student of the year
Each year the faculty chooses a graduating student who has exhibited outstanding scholastic achievement and demonstrated service in gerontology.

Distinguished Alumni Award
Each year the departmental faculty chooses an alumna/alumnus who best exemplifies the standards of the profession.

Iris A. Parham Award and Scholarship
The Iris A. Parham Scholarship was created by alumni in honor of Dr. Iris A. Parham and the Department of Gerontology’s 25th anniversary. This award is given to a candidate who has demonstrated distinguished academic performance, outstanding achievement in and dedication to the field of gerontology, and has overcome obstacles or met significant challenges to pursue a career in aging studies.

Programs
Seven courses of study are offered:

- A Master of Science in Gerontology degree with a concentration in one of the following six tracks: education, health care organization and planning, psychogeriatrics, public administration, social services, or research.
- A Certificate in Aging Studies program to meet the needs of persons working with the elderly, but who have no academic training in gerontology.
- A combination of the Certificate in Aging Studies program and the Doctor of Physical Therapy degree, offered jointly with the Department of Physical Therapy.
- A combination of the Certificate in Aging Studies program and a Master of Social Work degree, offered jointly with the School of Social Work.
- A combination of the Certificate in Aging Studies with the Doctor of Pharmacy degree, offered with the School of Pharmacy.
- A combination of the Certificate in Aging Studies and a Master of Science in Rehabilitation Counseling, offered jointly with the Department of Rehabilitation Counseling.
- A combination of the Certificate in Aging Studies and either the Post-professional Master of Science in Occupational Therapy (M.S.), the Master of Science in Occupational Therapy (M.S.O.T.) or the Post-professional Occupational Therapy Doctorate (O.T.D.).

Gerontology courses
Descriptions for all courses offered by the university may be accessed through the online courses database at www.pubapps.vcu.edu/vcucourses. You may search by unit, subject or keyword, as well as by degree level.

Follow this link to gerontology (GRTY) courses.

Aging Studies, Certificate in (Post-baccalaureate graduate certificate)

Admission requirements summary

| Aging Studies, Certificate in (Post-baccalaureate graduate certificate) |
|--------------------------|-----------------|--------------------------|
| Degree:                  | Semester(s)     | Deadline dates:          |
| Certificate              | of entry:       | Test requirements:       |
| All semesters            |                 |                          |

The Certificate in Aging Studies program is designed to meet the needs of those individuals who want graduate training in gerontology but who do not want to complete the full master’s program. This program is complementary to the Master of Science program. Certificate students who wish to enter the Master of Science program must make formal application and abide by the admission requirements outlined in this bulletin.

In addition to the Certificate in Aging Studies, there are jointly presented specialty certificates: M.S. in Occupational Therapy and Certificate in Aging Studies; M.S.W. and Certificate in Aging Studies; Certificate in Aging Studies with the Department of Rehabilitation Counseling; Certificate in Aging Studies with the School of Pharmacy. Courses for the certificate also are available in a distance format. Contact the Department of Gerontology directly for information on the distance courses at (804) 828-1565.

Admission requirements

The Certificate in Aging Studies Program is open to qualified students who have earned a baccalaureate degree from an accredited college or university or the equivalent.

Curriculum

General Certificate in Aging Studies Program

The certificate program of studies requires successful completion of 21 credit hours of work comprised of the following courses now offered in the gerontology graduate curriculum:

- The biology of aging, psychology of aging, social gerontology, and research methods form the basic core of the certificate program.
- Following the completion of these gerontology courses, students may choose two elective gerontology courses after consultation with their faculty advisers. Advisers counsel students as to the courses that would best suit their educational training needs. Students may choose from aging and human values; topical seminar; independent studies, problems, issues and trends in gerontology; recreation, leisure and aging; and other elective courses.
- In addition to the completion of these prescribed courses, each candidate for a Certificate of Aging Studies would be required to satisfactorily complete a
project in gerontology on a subject approved by the faculty. This project may be a comprehensive literature review, a research project, or a training or demonstration project. Students would register for a three-credit course in independent studies (GRTY 692).

**Awarding of the certificate**

Upon successful completion of the total program described here, as well as maintaining a 3.0 GPA, students are awarded a Certificate in Aging Studies.

**Combined Certificate in Aging Studies (Post-baccalaureate graduate certificate) and Doctor of Pharmacy (Pharm.D.)**

The Department of Gerontology in cooperation with the School of Pharmacy provides an opportunity for students in the Doctor of Pharmacy program to complete the certificate. This 21-credit program is designed to integrate the required independent study project in gerontology into the Pharm.D. curriculum’s clerkship assignment.

Contact the respective departments for additional curriculum information.

**Combined Certificate in Aging Studies (Post-baccalaureate graduate certificate) and Master of Science in Rehabilitation Counseling (M.S.)**

The Department of Rehabilitation Counseling, in cooperation with the Department of Gerontology, provides its degree-seeking students with the opportunity to earn the Certificate in Aging Studies while concurrently completing the requirements for the Master of Science in Rehabilitation Counseling. Students must meet admission requirements for both the rehabilitation degree and the gerontology certificate program, and admission into one is independent of the other. Additional information, including the specific program of study for the counseling program, may be obtained in the Department of Rehabilitation Counseling. Information on the curriculum presented by the Department of Gerontology can be obtained by contacting the chair of the Department of Gerontology.

**Admission requirements**

See the individual program pages for admission requirements specific to the separate degrees.

**Curriculum**

In addition to the requirements for the Master of Science in Rehabilitation Counseling, the certificate program requires the completion of 15 credits in gerontology and six credits in rehabilitation counseling.

**Combined Master of Social Work (M.S.W.) and Certificate in Aging Studies (Post-baccalaureate graduate certificate)**

The combined Master of Social Work (M.S.W.) and Certificate in Aging Studies (Post-baccalaureate graduate certificate) is intended to prepare students to provide direct services to older adults. The program is designed for students who wish to become therapists or counselors who specialize in working with older adults. The program provides students with the knowledge and skills necessary to work in a variety of settings, including hospitals, nursing homes, community centers, and private practice. The program also provides students with the opportunity to gain hands-on experience through clinical placements in agencies that serve older adults.

The gerontology curriculum is a multidisciplinary program established in 1976 which offers the Master of Science degree. The program benefits from professional collaboration with departments throughout the university.

There are six concentration areas in gerontology:
- Education track
- Health care organization and planning track
- Psychogeriatrics track

Elective courses in gerontology, which integrates research and practicum courses.

Field experiences, with the supervision arranged by the director and program.

The comprehensive examination will be scheduled three times a year (early in the first, second, and third years). A written comprehensive examination is required after completion of all required course work to meet the requirements of the M.S.W. degree and the Certificate in Aging Studies Program.

Students may elect either a six-credit thesis or six hours of graduate course work to meet the 42-hour requirement. Students may also apply for waivers of specific requirements in a similar manner.

Admission policy

The program is open to qualified students who have earned a baccalaureate degree from an accredited college or university or the equivalent, maintained a minimum GPA of 3.0 and have satisfactory scores on the GRE or MAT. A successful work experience may strengthen the admission credentials of applicants with marginal records.

Because of the diversity of undergraduate majors, candidates for the gerontology major must present evidence of successful completion of undergraduate courses in the following areas:
- biological science – minimum of six semester hours.
- psychology – minimum of three semester hours.
- sociology, anthropology or social work – minimum of three semester hours.
- statistics, research methods or equivalent – minimum of three semester hours.

(Topics covered in this gerontology program should be equivalent to those outlined for STAT 214 in the Undergraduate Bulletin.)

Candidates for admission who do not meet these requirements will be expected to complete the required undergraduate course work or to pass challenge examinations by the end of the first year. See Graduate Studies at VCU in this bulletin for admission requirements and procedures.

Transfer and waiver of course credits

Students who have completed graduate work in other graduate departments, whether at VCU or another university, may transfer no more than 12 credit hours of work at “B” level if such work is considered relevant by the departmental admissions committee. Also, a maximum of six hours of graduate credits accrued at a “B” level as a “special student” at VCU may be applied to the Master of Science degree or three hours to the certificate program, with approval of the departmental Admissions Committee.

Transfer credits for graduate work at other institutions will be evaluated at the time of full admission to the program. To have credits transferred, students are required to prepare a synopsis of each graduate course that is to be transferred for review by the faculty. Each synopsis will include the name of texts used in the course and a specific listing of topics and material covered. Students may also apply for waivers of specific requirements in a similar manner.

Master’s thesis

- The master’s thesis is an option for students entering with a bachelor’s degree. Students may elect either a six-credit thesis or six hours of graduate course work to meet the 42-hour requirement.
- Each student shall arrange for a member of the gerontology program to serve as the chair of the thesis committee. With the chair’s approval, at least two additional committee members will be selected. At least two of the members must be from the Department of Gerontology.

The thesis chair will monitor and advise during thesis development. The student will take the major role in actual data collection. The thesis should be a publishable piece of research that makes some contribution to the field of gerontology.

Written comprehensive examination

A written comprehensive examination is required after completion of all required course work and before the student begins a practicum (field experience). The comprehensive examination will be scheduled three times a year (early in the fall and spring semesters and once in the summer).

Practicum

Field experiences, with the supervision arranged by the director and program faculty, constitute an additional requirement. These experiences are intended to
develop practical understanding, skills, attitudes and values essential for working with the aged in a variety of settings.

The practicum will involve a 600-hour placement (one semester full time or two semesters half time). Each student must submit a practicum proposal (prepared with the assistance of the adviser) that must be approved prior to beginning the practicum.

For those already employed in the field of gerontology, an approved special project may be substituted for the field experience placement. Those students who are working full time in a job outside the field of aging also may submit a proposal for review that may allow for their continued employment, while fulfilling this important requirement. All students must register for GRTY 607 Field Study in Gerontology.

**Education track**

This area of concentration is designed for students interested in teaching or training careers in gerontology. Students electing this track will be prepared to provide instruction to university or community college students, the lay public, professional service providers, and older people.

**Health care organization and planning track**

(In conjunction with the Department of Health Administration.) Upon completing this track, students will have a foundation of knowledge in health care organization, health planning, health policy and a macro perspective on the financing of health care. In addition, students will have developed skills in policy analysis and the use of economic tools. Finally, students will broaden their understanding of the political, legal and ethical issues involved in health care organization and planning.

**Psychogeriatrics track**

This area of concentration, developed jointly with the Department of Psychology, is designed for students interested in working with those older adults and their families who are experiencing psychological difficulty. Students electing this track will be prepared to provide assistance directly to the elderly and their families as well as to consult and train professionals and paraprofessionals to provide more effective mental health services. Training is provided through a combination of specialized didactic instruction and structured field experience in providing direct services, consultation and education.

**Public administration track**

Students who elect to pursue courses in the public administration track, developed jointly with the L. Douglas Wilder School of Government and Public Affairs, will, after completion of course work, be able to plan, organize, report and budget for public programs in aging. Grant writing and program evaluation skills will be developed as well. Students choosing the public administration track may wish to complete the Certificate in Public Management program (CPM) or the Certificate in Nonprofit Management program (NPC).

**Research track**

This track is designed for students who would ultimately like to pursue a Doctor of Philosophy in the social or behavioral sciences or a Doctor of Philosophy in Health Related Sciences (School of Allied Health Professions). Students who elect the research track must complete a thesis or a paper of publishable quality. Students will obtain a strong background in experimental psychology research design and methodology and a broad background in life-span developmental theory.

**Social services track**

This track concentrates on developing specialized knowledge and skills in the provision of services to the elderly, basic understanding and skills in at least one method of social work practice, commitment and ability to participate in the development of strategies and policies relevant to amelioration of social problems of the elderly, and the ability to integrate and use in practice knowledge of individual behavior and social structure with particular reference to the needs of the elderly.

---

**Department of Health Administration**

Education in health administration at the university began in 1949 with the establishment of a graduate curriculum in hospital administration. Early graduates received a certificate; the master’s degree was awarded beginning in 1955. These early efforts grew and developed into the Department of Health Administration, which was established in 1972. The department now includes three major programs: (1) Master of Health Administration, (2) Doctor of Philosophy in Health Services Organization and Research, and (3) Professional Master of Science in Health Administration – Online. The department also cooperates with the schools of law of the University of Richmond and Washington and Lee University in offering dual degree programs in health administration and law. In 2001, the dual degree M.D./M.H.A. program was established with the VCU School of Medicine. Both master’s programs are fully accredited by the Commission on Accreditation of Healthcare Management Education (CAHME). In addition to these educational programs, the Department of Health Administration has a major research program and is involved in a wide range of public service activities, including continuing studies for health services administrators and other health professionals.

The overall purpose of the Department of Health Administration is to provide educational programs and services related to the organization and administration of health services. In achieving that purpose, the department’s principal functions are to provide high-quality education leading to careers in the administration of health care institutions, agencies and systems and to provide advanced training and education for persons who will teach, plan, evaluate and investigate health care policies and medical care systems. Corollary functions are to provide assistance and other services for community organizations and to conduct health services and health policy research.

**Administration**

**Stephen S. Mick**  
Arthur Graham Glasgow Professor and Department Chair

**Kenneth R. White**  
Charles P. Cardwell Jr., Professor and Director, Master of Health Administration Program

**Dolores G. Clement**  
Professor and Director, Professional Master of Science in Health Administration Program

**Michael J. McCue**  
Professor and Director, Health Services Organization and Research Doctoral Program

**Facilities**

The department is located in the William Grant House, formerly the Sheltering Arms Hospital, at 1008 E. Clay St., Richmond, VA. The chair’s office and the professional graduate programs offices are located on the second floor. The doctor of philosophy program office and the Williamson Institute are located on the third floor of the building.

MCV Hospitals, one of the largest teaching hospitals in the nation, and other clinical facilities of the VCU Medical Center are readily accessible to the department’s students and faculty. In addition, the department has clinical affiliations and close working relationships with a large number of health care organizations and agencies in Virginia and throughout the United States. The organizations and agencies are used extensively as clinical facilities in the department’s educational programs.

**Endowed awards, lectureships and professorships**

**Earl Bullard Scholarship Fund**

The Bullard Scholarship Fund was established through the generosity of Charles H. Keaton (M.S.H.A., ’90) and many other graduates of the M.S.H.A. Program. Scholarships generated by this fund are used to support students in the M.S.H.A. Program.
Robert Hudgens Memorial Award
The Robert Hudgens Memorial Award was established and endowed by the department’s alumni association in cooperation with the American College of Healthcare Executives. The Hudgens Award is presented annually to the person selected by a special ACHE committee as the most outstanding young health care executive in the United States. It is a major, nationally recognized award presented at the annual ACHE Congress on Administration.

Arthur Graham Glasgow Professorship of Hospital Administration
The endowed Arthur Graham Glasgow Professorship of Hospital Administration was established in 1957 in honor of Glasgow, who had demonstrated a vital interest in hospitals and hospital administration.

Herman L. Mullins Award
The Herman L. Mullins Award is presented annually for the most outstanding management study completed by a graduate student in health services administration. This award was established by the Master of Health Administration Class of 1976 through the Health Administration Alumni Association as a lasting recognition for the contributions of Herman L. “Moon” Mullins as a teacher, adviser and friend of the student.

Thomas C. Barker Preceptor Award
The Thomas C. Barker Preceptor Award was established by the Master of Health Administration Class of 1996 in honor of the first dean of the School of Allied Health Professions, who was affiliated with the Department of Health Administration. Barker had served as chair of the Department of Health Administration and Master of Health Administration program director prior to becoming dean. The graduating class nominates and elects the preceptor who has demonstrated outstanding mentorship during the year of residency. Dedication to the Master of Health Administration program should be a consideration in the nomination.

Stuart D. Ogren Scholarship Fund
The Stuart D. Ogren Scholarship Fund was established by institutional members of the Virginia Hospital and Health Care Association, and Ogren’s friends and colleagues in 1990. The fund honors Ogren, a former president of the Virginia Hospital Association. During his distinguished career, Ogren made significant contributions to the effective provision of medical care services in the commonwealth and the formulation of health care policy in the commonwealth and the nation. These scholarships, supported through an endowment, are available to students who have been admitted to the department’s graduate program in health services administration (M.H.A. degree). Funds are employed to attract exceptionally well-qualified students (as defined by previous academic performance, work experience and leadership roles). The awardees are recognized each year at the Virginia Hospital and Health Care Association’s annual meeting.

HCA Scholarship for Emerging Healthcare Leaders
HCA Healthcare established the HCA Scholarship for Emerging Healthcare Leaders in order to formalize a partnership with the Department of Health Administration in recruiting emerging health care leaders. These scholarships, supported through an endowment, are available to students who have been admitted to the M.H.A. program. Funds are employed to attract exceptionally well-qualified students (as defined by previous academic performance, work experience and leadership roles).

Jerry L. Norville Award
The Jerry L. Norville Award is presented annually to the faculty member who, through example, demonstrates exceptional dedication and genuine concern for the welfare of students in the Master of Health Administration program. This award was established by the M.H.A. Class of 1989 in honor of Professor Jerry L. Norville who served on the faculty for 20 years and, during that time, served as director of the M.H.A. program and as department chair.

Dolores G. Clement Award for Outstanding Advising
The Dolores G. Clement Award for Outstanding Advising was established by the Master of Health Administration Class of 1998 in honor of Clement. The award recognizes a faculty member for counsel and support outside of the classroom. More specifically, the award is in recognition of faculty who have demonstrated extraordinary dedication to the academic, professional and personal growth of students. This award has been established to honor Clement for her years of devotion to the Department of Health Administration.

Paul A. Gross Distinguished Leadership Speaker Series
The Paul A. Gross Distinguished Leadership Speaker Series is a program to bring to VCU the nation’s leading scholars and health care executives to discuss topics on the cutting edge of research, scholarship and management expertise in the U.S. health care system. Its overarching goal is to increase the awareness of VCU students, faculty and alumni about current issues in the administrative world of the health care system.

Carl Fischer Fund
The friends and associates of Carl Fischer, former chief executive officer of the Medical College of Virginia Hospitals, established this endowment to honor the excellent leadership Fischer provided to the hospital. This fund supports students with an interest in health care administration.

Department of Health Administration Award in Managerial Ethics
Established through a gift from anonymous donors, this award is conferred to a professional student in the Department of Health Administration to recognize his or her inquiry into the ethical challenges facing those who manage health care organizations. The intent of this award is to foster the development of a sense of duty to humanity in health care managers, as exhibited by the morality needed in the administration of the health care enterprise in working with and for people.

Department of Health Administration Alumni/ae Scholarship Fund
Through the generous donations of departmental alumni and alumnae, this fund is available for scholarship support to attract and maintain professional students who exemplify the highest standards of academic performance and leadership capability.

Ham Flannagan Scholarship Fund
This fund was founded through the generosity of the friends of Paul F. “Ham” Flannagan (M.H.A., ’54), a long-time supporter of the Department of Health Administration and mentor to literally dozens of departmental graduates. The fund’s objective is to support students making a firm commitment to excellence in health care administration.

James Fleetwood Memorial Scholarship Fund
The Fleetwood Scholarship Fund is a memorial to James M. Fleetwood Jr., an honorary alumnus, preceptor and long-time friend of the Department of Health Administration. The fund’s purpose is to honor his memory with scholarships to support M.H.A. students needing financial aid.

Health Services Organization and Research Endowment Fund
This endowment was established to promote excellence in scholarship by a doctoral student or students enrolled in the Ph.D. program in Health Services Organization and Research in the Department of Health Administration. The goal is to create opportunities for doctoral students to advance their education and research capabilities.

James W. Begun Award for Excellence in Doctoral Studies
To commemorate the 50th anniversary of the founding of the Department of Health Administration in 1999, the doctoral alumni/ae established the James W. Begun Award for Excellence in Doctoral Studies. Once the final doctoral dissertation has been defended, faculty members may nominate doctoral students for this award. Selection criteria include: dissertation quality, advancement of organizational theory and health service research and the applicability of the research findings.
The Dennis D. Pointer Award is presented annually to the faculty member who best exemplifies teaching excellence in the professional Master of Science in Health Administration online program. Established in 2006, the award is named to honor Pointer, the founder of the M.S.H.A. program.

The Richard M. Bracken Leadership Award

Established by Richard M. Bracken (M.H.A., ’77) in 2006, this award is given annually to the M.H.A. student whose classmates regard as having the greatest expression and potential of leadership in the profession of health administration.

The Donald J. Romano Endowed Prize

Donald J. Romano (M.H.A., ’73) founded this award to be conferred to the M.H.A. student who, after the first two years of didactic study, has the highest academic performance in his or her class.

The Charles P. Cardwell Jr. Professorship of Health Administration

This endowed professorship was funded through the contributions of departmental alumni to honor Charles P. Cardwell, the founder, in 1949, of the School of Hospital Administration, now the Department of Health Administration. The incumbent must show exceptional scholarship in the area of health care administration and be the director of the Master of Health Administration program.

The Bon Secours Professorship of Health Administration

The Bon Secours Health System funded this endowed professorship to be filled by an academic who has exceptional research accomplishments in not-for-profit (including religious-affiliated) health care organizations.

The Sentara Professorship of Health Administration

Sentara Healthcare established this endowed professorship for a faculty member who has exceptional research accomplishments in the general area of patient safety and quality.

The M.H.A. Class of 2006 Scholarship

Established by the fundraising efforts of the M.H.A. Class of 2006, this award is conferred biennially to recruit and sponsor graduate education in health administration for promising leaders. Students must have a minimum overall undergraduate G.P.A. of 3.3 and display some financial need.

The Sherry Kohlenberg Scholarship

The Sherry Kohlenberg Scholarship was established in 1994 to recognize and encourage leadership of graduate students in the field of risk management within health services administration. In 2004, the scholarship was endowed to recognize and encourage leadership of women graduate students in the field. This is a merit scholarship providing financial assistance to exceptional female graduate students who are in their second year in the M.H.A. Program.

The Sentara Healthcare Professorship of Health Administration

Sentara Healthcare established this endowed professorship for a faculty member who has exceptional research accomplishments in not-for-profit (including religious-affiliated) health care organizations.

The Don J. Romano Endowed Prize

Donald J. Romano (M.H.A., ’73) founded this award to be conferred to the M.H.A. student who, after the first two years of didactic study, has the highest academic performance in his or her class.

The Bon Secours Professorship of Health Administration

The Bon Secours Professorship of Health Administration was endowed in 1994 to recognize and encourage leadership of graduate students in the field of risk management within health services administration. In 2004, the scholarship was endowed to recognize and encourage leadership of women graduate students in the field. This is a merit scholarship providing financial assistance to exceptional female graduate students who are in their second year in the M.H.A. Program.

The Donald J. Romano Endowed Prize

Established by the fundraising efforts of the M.H.A. Class of 2006, this award is conferred biennially to recruit and sponsor graduate education in health administration for promising leaders. Students must have a minimum overall undergraduate G.P.A. of 3.3 and display some financial need.

The Sherry Kohlenberg Scholarship

The Sherry Kohlenberg Scholarship was established in 1994 to recognize and encourage leadership of graduate students in the field of risk management within health services administration. In 2004, the scholarship was endowed to recognize and encourage leadership of women graduate students in the field. This is a merit scholarship providing financial assistance to exceptional female graduate students who are in their second year in the M.H.A. Program.

The Sentara Professorship of Health Administration

Sentara Healthcare established this endowed professorship for a faculty member who has exceptional research accomplishments in the general area of patient safety and quality.

The M.H.A. Class of 2006 Scholarship

Established by the fundraising efforts of the M.H.A. Class of 2006, this award is conferred biennially to recruit and sponsor graduate education in health administration for promising leaders. Students must have a minimum overall undergraduate G.P.A. of 3.3 and display some financial need.

In 2004, the scholarship was endowed to recognize and encourage leadership of women graduate students in the field. This is a merit scholarship providing financial assistance to exceptional female graduate students who are in their second year in the M.H.A. Program.

Admission requirements

Application procedures and admission requirements for the M.S.H.A. program are different than other courses of study offered by the university, so interested individuals should contact the department. The material can be obtained through the department Web site. Applications are accepted beginning in September for admission to the program in July of the following year. The application deadline is March 1.

The M.S.H.A. program admits individuals with diverse educational, work and life experiences who have the demonstrated capacity to pursue a rigorous course of professional graduate study.

To be considered for admission, applicants must, at a minimum:

- Possess a baccalaureate degree from an institution of higher learning recognized by VCU and have a 2.75 GPA for all undergraduate work completed.
- Have five years of professional health care work experience.
- Submit scores on a standardized aptitude test for graduate studies (GRE or GMAT).
- Submit a resume and personal statement.
- Show acceptable professional experience as documented in a professional resume. The specific experience profile deemed appropriate for admission to the professional program depends upon one’s particular profession or occupation. The resume is a very important element of the application materials.

Requests for further information regarding admission requirements may be directed to the director, M.S.H.A. Program by calling (804) 828-7799.

Previous educational experience

Applicants with less than a 2.75 undergraduate GPA who have exceptional professional experience will be considered for admission on provisional status. Provisional status will be removed after satisfactory completion of the first semester of the program. If an applicant has completed any graduate studies (whether or not a degree was awarded), performance in such course work will be considered in the admission decision.

Professional work experience

Applicants are expected to be employed in the health care field and have at least five years of professional health care work experience as documented in a professional resume. The specific experience profile deemed appropriate for admission to the professional program depends upon one’s particular profession or occupation. The resume is a very important element of the application materials. Applicants are encouraged to prepare the resume in such a way that it accurately and completely describes their accomplishments.

Graduate studies aptitude tests

VCU requires that all applicants for graduate study submit standardized aptitude test scores. The professional program will accept scores on either the GMAT or the GRE. Applicants who have taken the GMAT or GRE in the last five years may...
submit previous scores. Those applicants holding certain graduate or professional doctoral degrees (for example, M.D., D.D.S., J.D., Pharm.D., Ph.D.) may have GMAT or GRE requirements waived upon petition to the graduate dean. Applicants should make arrangements to take the examination of their choice at the earliest possible date.

Prerequisites
No specific previous course work is required for application to the program. Upon formal acceptance, students will be provided, at cost, independent-study modules in three areas: microeconomics, accounting and statistics. These modules include books, articles, programmed instruction handbooks and computer-aided instructional material. These must be completed prior to beginning the program. Completing these independent-study modules precludes the need for taking prerequisite course work prior to instruction. Applicants having acceptable previous course work in accounting, microeconomics and/or statistics will not be required to complete these independent-study modules. Generally, these courses must be completed within five years of starting the program.

Curriculum
Students are required to complete a total of 42 semester hours (including transfer credit, if any) to qualify for the Master of Science in Health Administration degree. The curriculum consists of 15 courses listed below that must be completed by all degree candidates. The sequence of courses is as follows:

<table>

The program’s courses are designed to meet the distinctive needs of the experienced health care professional. Courses develop business skills for the unique health care environment so that students are prepared to meet the challenges of the health care marketplace. Classes draw upon the knowledge of the faculty and the diverse group of experienced professionals enrolled.

Each semester is composed both of on-campus and off-campus sessions. During the six one-week on-campus sessions, students attend professional program classes on the MCV Campus. During the off-campus session of each semester, students continue studies at their home or work site, employing a carefully planned array of distance-learning technologies.

During the 22-month curriculum, students spend six one-week sessions on the MCV Campus. On-campus sessions are held during July/August, December and May. Dates for on-campus sessions for the current academic year are on the department Web site.

During on-campus sessions, students attend lectures, participate in seminars, and use the department’s computer facilities and the VCU library. Ample opportunity is provided to interact with other colleagues, faculty and visiting scholars and practitioners. Courses meet during the day and may, on occasion, extend to evenings. Sessions do extend and meet over weekends. Most evenings are reserved for study, group project work, informal interaction, relaxation and planned social events.

All courses are designed carefully to facilitate effective and efficient learning. Detailed outlines of lectures, handouts and comprehensive learning/study guides are provided as appropriate for each course.

While in residence at the university, students stay in conveniently located hotels. Meals can be obtained for reasonable prices in the hotel or at a wide variety of restaurants in the immediate area. Students are encouraged to take advantage of the university’s recreational facilities and the cultural and entertainment opportunities of Richmond and the surrounding area.

Off-campus study
During the off-campus session, students continue course work at their places of residence and/or employment. Full-time students are expected to devote a minimum of 15 to 20 hours per week to study during the off-campus period of each semester. They employ a variety of distance learning technologies in their studies.

Internet-based courses
The Department of Health Administration was a leader in developing online course software. Each course has its own electronic classroom. Faculty members distribute announcements and assignments, and conduct seminars and forums. Students can chat online, take practice quizzes and listen to recorded messages from faculty. Use of system capabilities varies by course.

The Web site and the Web-based technology are designed with the computer novice in mind. Students are trained to use the software and can receive support from our computer instructor as well as faculty.

Equipment requirements
All those admitted to the M.S.H.A. program must have access to a multimedia personal computer. Specific hardware and software requirements are available from the department. In addition, students must be able to access the Internet from their personal computer. Access is usually obtained through a local Internet service provider by purchasing an Internet subscription.

Program faculty members strongly recommend having access to a personal computer at home, not just at the office.

Academic policies and regulations
Academic policies and regulations are set forth in separate documents published by the Department of Health Administration. These documents are reviewed during orientation sessions. The university-wide policies and regulations are available online. They are reviewed during orientation sessions.

Financial considerations
Interested students should contact the department for current tuition and fee information. In addition to tuition and fees, students will need to budget for the following expenses:

- Computer equipment and online connections.
- Textbooks and reading packets.
- Travel, meals, lodging and personal expenses associated with attending the on-campus sessions in Richmond.

Applicants are encouraged to consult a tax adviser regarding the rules and procedures governing educational deductions for income taxes.

If accepted to the professional program, students will be required to forward a nonrefundable payment of $500 to hold a place in the class. This payment is
The graduate program in health services administration is designed to prepare persons for administrative roles ultimately leading to top-level executive positions in complex health services organizations. The curriculum emphasizes strategic and operational management, thus orienting students toward the broad spectrum of managerial problems and functions likely to be encountered by health services organizations.

The program’s educational objectives and content are based upon the premise that a large number of students who select this curriculum aspire to become senior executives of health care organizations at some point in their careers. The graduate program in health services administration is designed for full-time students.

The graduate program was accredited initially in 1968, one of the first programs in the United States to achieve that status. It has continuously maintained its national accreditation status, and in 2002 the program was awarded a seven-year accreditation.

</tr>
</tbody>
</table>

Special requirements:

Refer to the Web for recent changes in admissions policies, including preferred score of 5.0 on GRE analytical writing section, minimum computer-based TOEFL score of 250 and minimum 3.0 GPA http://www.had.vcu.edu/programs/mha

The program director for final approval and communication to the Graduate School.

Graduates are required to complete a total of 60 semester hours (including transfer credit, if any) to qualify for the Master of Health Administration degree. This credit must be applied to first semester tuition and fees. Full payment for tuition and fees is due approximately 30 days prior to the beginning of each semester.

Admission requirements for VCU Honors students

VCU Honors Students are eligible to apply for admission to the M.H.A. Program during their junior or senior years of undergraduate study. The application process is the same as for other applicants with the following exceptions: (1) requirements for the GRE or GMAT are waived; (2) application fee is waived; and (3) official transcript is not needed (as grades can be accessed in the VCU system). The admission decision will be made by the M.H.A. Admissions Committee, at which time a place will be reserved for the student, provided the student graduates with honors and completes the prerequisite course work.

Academic policies and regulations

Academic policies and regulations for the graduate program in health services administration are set forth in separate documents published by the Department of Health Administration. These departmental documents, as well as publications that state university-wide policies and regulations, may be obtained by applicants at the time of their interviews.

Transfer credit

Applicants who have earned graduate credit elsewhere or at VCU that has not been previously applied to another earned degree may, at the discretion of the faculty, be permitted to transfer a maximum of one third the didactic semester hours to apply toward the degree credit requirements. Transfer credit may be allowed when, in the judgment of the faculty, the applicant has satisfactorily completed graduate course work elsewhere that is equivalent to courses in the graduate curriculum.

Petitions to transfer credit are to be prepared by the applicant and submitted to the program director prior to entering the program. It is the applicant’s responsibility to establish: (1) that the institution has at least regional accreditation, (2) that the course was completed with a grade of “B” or better within the last five years and was not previously applied to an earned degree, and (3) that the course is equivalent to a required or elective course appropriate to the M.H.A. curriculum. (A course syllabus or detailed letter from the instructor, which describes the purpose, objectives, content and course readings will ordinarily be required.) The program director ensures that the petition is sufficiently documented and refers it to the primary instructor of the related course or courses. The primary course instructor reviews and notes a recommendation on the petition and forwards it to the program director for final approval and communication to the Graduate School.

Curriculum

Students are required to complete a total of 60 semester hours (including transfer credit, if any) to qualify for the Master of Health Administration degree. This requirement includes 49 hours of core course work plus at least three semester hours of personal achievement, scholarship, intellectual ability and professional promise, providing other evidence of competency acceptable to the admissions committee. Meeting the minimum qualification above is not generally sufficient for admission to the graduate program, completed course work must include basic preparation in microeconomics, financial accounting and business statistics. In addition, a working knowledge of college-level algebra is necessary preparation for the graduate program’s courses.

The prerequisite requirements may be met by the following specifications:

- completing specified prerequisite courses with a grade of “C” or better within the past five years at any accredited college or university or
- providing other evidence of competency acceptable to the admissions committee.

Any or all of the three prerequisite courses may be taken in VCU’s School of Business during the summer session immediately before the fall semester when the student enrolls in the graduate program in health administration. The courses provide an excellent opportunity for students without a strong background in business to fulfill the course work requirements for entrance into the graduate program.

To be considered for admission into the graduate program in full status, the applicant must meet the following minimum qualifications: (1) present evidence of personal achievement, scholarship, intellectual ability and professional promise, (2) hold a baccalaureate or graduate degree from a college or university that is fully accredited by the Association of American Universities or by a regional accrediting agency, (3) have an overall GPA of 3.0 or higher on a 4.0 scale in undergraduate work or provide evidence of high achievement in a substantial amount of graduate-level course work, (4) attain a satisfactory score (at least 50th percentile in each category) on the Graduate Record Examination or the Graduate Management Aptitude Test, and (5) other factors such as personal interview and prior work experience. Enrollment in the program is limited and competition is strong. Meeting the minimum qualification above is not generally sufficient for admission.

Applicants who have completed the prerequisite course work and meet the other requirements may be admitted into the graduate program in full status. Full status is maintained as long as the student achieves a GPA of 3.0 in all course work each semester.

If an applicant presents qualifications that approximate the admissions requirements and standards, that applicant may (at the discretion of the Admissions Committee) be admitted into the graduate program on provisional status. Advancement to full status may be approved by the faculty when the student has satisfactorily completed one or more semesters of graduate study.

Students admitted on provisional status who do not meet GRE/GPA standards will be reviewed by the faculty for dismissal from the program or continuation on probationary status at the end of their first semester of graduate studies if they have not earned at least a 3.0 GPA for all courses attempted or if they have earned a grade of less than “C” in any course. Complete information regarding academic requirements and standards is set forth in Academic Policies and Regulations for the Graduate Programs in Health Administration (M.H.A. and M.S.H.A.).

VCU is a state-aided institution, and preference is given to applicants with equal qualifications who are Virginia residents. International applicants must meet all the regular admission requirements, score a minimum of 600 on the Test of English as a Foreign Language, submit evidence of a preapproved residency site in the home country and submit evidence of financial responsibility as stated in the Graduate Studies at VCU section of this bulletin.

Application forms and instructions for applying to all graduate programs are available on the Graduate School Web site. Requests for further information regarding admission requirements, standards and procedures may be directed to the Director, M.H.A. Program, Department of Health Administration, Virginia Commonwealth University, P.O. Box 980203, Richmond, VA 23298-0203.

Requests for further information regarding admission requirements as set forth in separate documents published by the Department of Health Administration. These departmental documents, as well as publications that state university-wide policies and regulations, may be obtained by applicants at the time of their interviews.
hours of elective studies in health administration and related disciplines, such as business administration, public health, urban and regional planning, and gerontology. In addition, eight semester hours of practicum course work are required as a part of the administrative residency. The graduate program is designed to provide a balanced combination of academic studies and field experience to enable students to achieve the program’s educational goals and become well-prepared to enter the field of health administration.

The core curriculum of the graduate program in health administration consists of 19 courses totaling 49 semester hours that must be completed by all degree candidates. These courses represent an integrated series of learning experiences designed to provide students with a common body of knowledge and skills which are considered to be essential.

As part of the core curriculum and elective course, students in the Master of Health Administration program complete a series of executive skills seminars. These seminars are designed to focus on individual development of personal skills essential to success in health administration.

Students in dual-degree programs (M.H.A./M.D. or M.H.A./J.D.) shall follow the curriculum plan as outlined in the respective section.

Administrative residency

Purpose of the residency

The administrative residency is an integral part of VCU’s graduate program in health services administration. The basic purpose of the residency is to provide students opportunities to apply and further develop their administrative knowledge and skills through a period of applied experience in an operational setting. The administrative residency is supervised directly by experienced executives who serve as the students’ preceptors.

Through a carefully selected and organized residency experience, students strengthen the foundation of general knowledge and skills gained through the core curriculum and develop further insight and expertise in their selected concentrations. Students serve their residency in the type of health care organization in which they wish to gain specialized knowledge, skills and experience. Overall policies and guidance for the administrative residency are established by the Department of Health Administration and are included in Handbook for the Administrative Residency of the Graduate Program in Health Administration.

Appointment to the residency

Students become eligible for entrance into the administrative residency after completing 52 semester hours of specified course work and achieving an overall GPA of 3.0. Students on academic probation or with any incomplete grades during their final on-campus semester prior to their residency may, at the discretion of the faculty, be prevented from entering their residency although their overall GPA is 3.0 or higher.

In addition to meeting the above academic requirements, the student must, in the judgment of the faculty, present evidence of readiness for a clinical experience by demonstrating sufficient academic proficiency in the core areas of the curriculum and by demonstrating professional maturity.

The director of the M.H.A. program or his/her designee has the responsibility to coordinate residency placements. In making these assignments, the director will consider the preferences of the students, the preferences of the preceptors and the recommendations of faculty advisers. Students’ preferences may not always be met. Administrative residents are paid a salary by the organization in which they are being sponsored.

On-campus commitments during the residency

During the residency phase of the graduate program, students must attend scheduled on-campus seminars and must participate in a series of distance-learning seminars on topics related to the residency experience. During the on-campus seminar, students will participate actively in other educational activities associated with course work HADM 693, 694 and 695 taken during the residency year.

Residency policies and procedures

A complete statement of academic policies and procedures relating to the administrative residency phase of the graduate program is set forth in Administrative Residency Policies and Procedures, in the Handbook for the Administrative Residency of the Graduate Program in Health Administration.

Length of the program

Students ordinarily will begin their studies during the fall semester and complete their course work requirements within 21 months. For most students, this portion of the graduate program will be followed by an administrative residency of 12 months. The M.H.A./J.D. dual-degree program normally requires four years of study, and the M.H.A./M.D. dual-degree program normally requires five years of study.

Requirements for graduation

To qualify for the Master of Health Administration degree, students must meet the following requirements: (1) achieve an overall GPA of 3.0 on a 4.0 scale for all graduate curriculum course work, (2) satisfactorily complete all requirements of the administrative residency including required course work taken during the period, (3) satisfactorily complete an oral seminar administered near the end of the graduate program and, (4) in the judgment of the faculty, demonstrate sufficient maturity, development and abilities in health services administration to constitute readiness to enter the profession of health administration.

Degrees are conferred at commencement exercises of the university in December and May.

Combined Doctor of Medicine (M.D.) and Master of Health Administration (M.H.A.)

Students may indicate their interest in the combined program prior to matriculation or during the first three years of the M.D. program.

Advanced study in health administration and medicine is available through a dual degree program co-sponsored by the department of Health Administration and the VCU School of Medicine. The program leads to the awarding of the Doctor of Medicine and Master of Health Administration degrees. The objective of the
M.D./M.H.A. program is to provide highly motivated medical students the expertise for management and leadership competency in complex health care organizations. The joint program may be completed in five years. Applicants for this program are required to meet the admission requirements of each program. For information regarding the dual degree program, contact the director of the program.

For the combined degree program, course work for the M.H.A. is initiated following completion of the first two or three years of the M.D. program, occupies a full academic year (fall, spring and summer) and extends into a second year and is taken during a hiatus from the third or fourth year of the M.D. program.

Students interested in the program may contact the School of Medicine Office of Curriculum or the Director of the M.H.A. Program, Department of Health Administration (School of Allied Health Professions).

For additional information refer to the School of Medicine handbook available on the school’s Web site at www.medschool.vcu.edu.

**Combined Master of Health Administration (M.H.A.) and Juris Doctor (J.D.)**

Advanced study in health administration and law is available through dual degree programs co-sponsored by the department and the schools of law at the University of Richmond and at Washington and Lee University. The program leads to the awarding of the Master of Health Administration and Juris Doctor degrees. Participants are provided the necessary expertise either to represent clients within the health care industry or to function as legal policy-makers or administrators who fully appreciate the legal environment of the health care field. Applicants for this program are required to meet the admission requirements of each program. For information regarding the dual degree program, contact the director of the program.

Health Services Organization and Research, Doctor of Philosophy (Ph.D.)

**Admission requirements summary**

| Health Services Organization and Research, Doctor of Philosophy (Ph.D.) |
| Degree: Ph.D. | Semester(s) of entry: Fall only | Deadline dates: Apr 15 | Test requirements: GRE or GMAT |
| Special requirements: Visit www.had.vcu.edu, select prospective students, doctoral program |

The Ph.D. in Health Services Organization and Research program is a challenging 57-credit program that prepares individuals for positions as faculty, researchers, policy analysts and top-level staff in complex health organizations. Students learn to apply research methods and scientific knowledge drawn from the behavioral and managerial sciences to the study of health organizations, services and systems. The program is designed to meet the distinctive professional development needs of (1) clinical professionals who want to prepare for positions as faculty and independent researchers, (2) administrative professionals who want to prepare for positions as faculty, researchers or consultants, and (3) researchers and policy analysts who want to create depth through specialization in health services organization and research.
Courses are distributed across four areas: foundations of health services organization and research (nine credit hours), health services organization theory (12 credit hours), health services research methods (18 credit hours), and an area of specialization (nine credit hours). Students take two written comprehensive examinations, covering health services organization theory and health services research methods. Areas of specialization are drawn from elective courses and from independent study with faculty members in their areas of expertise, such as long-term care, mental health services, managed care, quality management or international health. The course work is sequenced so that it can be completed in two years of full-time study (exclusive of dissertation credits). In addition, nine credit hours of dissertation credit are required. Students orally defend a written dissertation proposal before their dissertation committee. Subsequently they write and orally defend the completed dissertation.

Admission procedures and requirements
The program admits students with diverse educational, work and life experiences who have demonstrated a capacity to pursue a rigorous course of doctoral study. Admission is limited, competitive and open to students with clear career goals in health services administration and research.

Admission requirements include (l) a graduate degree in an academic or professional field with a GPA of B or higher, (2) working knowledge of college-level algebra, especially matrix algebra, (3) advanced courses in statistics and economics, (4) a minimum score of 550 on verbal and 600 on quantitative sections of the GRE, (5) for international students, scores from the Test of English as a Foreign Language, (6) transcripts and application forms, (7) three letters of recommendation, and (8) personal interviews with members of the Admissions Committee. The department recommends that candidates have at least one to two years experience in the health care industry before beginning the program. The application deadline is April 15, however applications are reviewed throughout the year.

Department of Nurse Anesthesia

The program was first organized in 1969 as the School of Nurse Anesthetists, thus becoming the first academic program to be implemented in the newly organized School of Allied Health Professions on the MCV Campus.

A letter of intent for a proposed Master of Science in Nurse Anesthesia program was submitted to the commonwealth’s Council on Higher Education in 1977. When approved in May 1978, the graduate degree in nurse anesthesia became the first such offering within the profession of nurse anesthesia. While of major importance to the university, it marked a significant milestone for the profession of nurse anesthesia. The first class of graduate students was admitted in the fall of 1979 and graduated in the fall of 1981. A second hallmark was achieved in 2007 with approval of the Doctor of Nurse Anesthesia Practice program. The DNAP program is the first post-master’s practice doctorate for Certified Registered Nurse Anesthetists. A separate combined-degree track is available for students enrolled in the Master of Science in Nurse Anesthesia program. The first students matriculated in the combined degree MSNA-DNAP program in 2007 and the first CRNAs entered the post-master’s DNAP program in January 2008.

Administration
Michael D. Fallacaro
Professor and Department Chair

Philosophy
The philosophy of the department reflects the beliefs of the faculty and provides the foundation for the curriculum in the program. The department’s philosophy is synergistic with the mission and goals of the School of Allied Health Professions and VCU. The department is a social agency dedicated to the education and development of health care professionals in the field of nurse anesthesia. Consequently, the faculty recognizes and accepts the responsibility entrusted to it for the learning experiences of its students. The philosophical orientation of the faculty subscribes to the belief that learning is a developmental process through which cognitive, affective and psychomotor behaviors are developed and/or modified. This process includes the acquisition of information, the transferal of knowledge, the evaluation of new skills and the development of a professional attitude and bearing.

The faculty subscribes to the belief that the learning experience is both positive and rewarding. It is a transactional experience between the student and teacher through formal and informal processes. The program’s objective is the production of knowledgeable and skillful CRNAs. Hence, learning is a lifelong process that results in a change in thinking, values and behavior. The teaching-learning process includes teacher-learner interaction in: setting goals, assessing and selecting learning experiences, determining instructional methods, and evaluating the learner’s progress. Learning experiences are planned in manageable segments and provide for integration and continuity in the attainment of knowledge, skills and attitudes consistent with the educational objectives and the individual needs of students. Each student is a unique human being possessing dignity, worth and the right to equal educational opportunities. Faculty and students share the responsibility for creating an educational climate that reflects democratic values, fosters intellectual inquiry and creativity, and encourages the maximum development of each individual’s potential.

The American health care system is becoming progressively complex. Technological advances and changing economic patterns foster competition for scarce resources while the patient population is becoming quite diverse. As a result, the role of the CRNA is becoming increasingly collaborative and complementary with other health professionals. In this environment, CRNAs have more responsibility and authority for coordination, decision-making and leadership of the multidisciplinary team, as well as for research, planning and development of health resources.

Graduate education in nurse anesthesia at the master’s level builds upon baccalaureate education with a nursing focus. It is designed to allow graduates the opportunity to become leaders and make significant contributions with the intended outcome of improving health care and advancing nurse anesthesia theory and practice through research. Consequently, the program prepares CRNAs through a team concept of a joint practice of anesthesia care composed of both nursing and medical components to meet the current and emerging health needs of society.

Nurse anesthesia courses
Descriptions for all courses offered by the university may be accessed through the online courses database at www.pubapps.vcu.edu/vcucourses. You may search by unit, subject or keyword, as well as by degree level.

Follow these links to nurse anesthesia (NRSA) courses or the (NRSZ) laboratory.

Special requirements:
See the department’s Web site for specific admission requirements

The objective of the program is to prepare certified registered nurse anesthetists to meet patient needs for high quality, safe anesthesia care in increasingly complex health environments, and to develop insightful, visionary leaders and educators in the specialty of nurse anesthesia.

Graduates of the program will be able to:

- Apply physiological, safety and organizational theories to promote patient safety, enhance quality care and improve nurse anesthesia practice.
- Analyze and synthesize relevant scientific literature and apply results to improve nurse anesthesia practice and patient care outcomes in a culturally sensitive manner.
- Communicate effectively with patients, families, the public and other health professionals.
- Develop effective strategies for managing ethical dilemmas inherent in anesthesia patient care and the workplace.
- Employ teaching and learning principles in educating and counseling individuals, families, students-in-training and groups.
• Demonstrate leadership skills to meet the challenges of complex health care and educational environments.
• Demonstrate scholarship through presentations, publications, leadership activities and collaboration with other disciplines.
• Utilize technology and information systems to analyze, manage and present data.

Accreditation
Programs administered by the Department of Nurse Anesthesia are accredited by the Council on Accreditation of Nurse Anesthesia Educational Programs (COA, 222 South Prospect Avenue, Park Ridge, Illinois, 847-692-7050). The COA is recognized by the U.S. Department of Education and the Council on Higher Education Accreditation to accredit programs of nurse anesthesia at the master’s, post-master’s and doctoral levels. The DNAP was approved in May 2007.

Admission requirements
In addition to the general Graduate School admission requirements, the requirements for admission to the Doctor of Nurse Anesthesia Practice are:

• A graduate degree from a regionally accredited university.*
• Graduation from a nurse anesthesia educational program accredited by the Council on Accreditation of Nurse Anesthesia Educational Programs.*
• Certification by the Council on Certification of Nurse Anesthetists.*
• Recertification by the Council on Recertification of Nurse Anesthetists (if past initial certification period).*
• Current licensure as a registered nurse.
• Cumulative graduate GPA of 3.0 or higher on a 4.0 scale.
• Graduate Record Examination within five years of application.
• Resume.
• Personal statement including:
  • Reasons for seeking this educational opportunity.
  • Career goals and how having this degree will help you attain them.
  • Prior life/work experience that will be useful in your educational experience.
  • Potential areas of study for capstone project.
  • Completed Graduate School application form.
• Three professional references.
• Personal interview (by invitation)
*Not required in dual-degree option.

The overall objective of the program is to prepare registered professional nurses for practice in the art and science of the specialty of nurse anesthesia. Given a patient or patient-care situation in the practice of nurse anesthesia, the graduate will:

• Formulate and discuss a patient’s anesthesia care plan (ASA Classification I-V).
• Implement and evaluate anesthesia management plans.
• Perform and utilize appropriate procedures during the anesthetic management of a patient.
• Evaluate the postoperative course of a patient.
• Perform, within medically established guidelines, resuscitation of the newborn infant, child or adult.
• Function, within medically established guidelines, as a team leader for cardiovascular and/or pulmonary emergencies.
• Provide first echelon care and maintenance of all anesthesia equipment.
• Develop interpersonal behaviors consistent with that of a health care professional.

Accreditation
The nurse anesthesia program is fully accredited by the Council on Accreditation of Nurse Anesthesia Educational Programs. Graduates are eligible to take the examination for certification conducted by the Council on Certification of Nurse Anesthetists.

Admission requirements
In addition to the general university requirements, the requirements for admission to the Master of Science in Nurse Anesthesia Program are:

• Baccalaureate degree in nursing/related sciences.
• Current licensure as a registered professional nurse in Virginia (by completion of the first semester).
• Cumulative undergraduate GPA of 3.0 or higher on a 4.0 scale (preferred).
• Upper-division undergraduate organic chemistry course or a web-based medicinal chemistry prep course offered through VCU’s Department of Chemistry (contact (804) 828-9808).
• Completion of the GRE within five years of application.
• A minimum of one year’s experience in an area of acute/critical care nursing (recent).
• Personal interview with members of the Admission Committee (by invitation).
• Three professional references (one must be from an immediate supervisor with contact phone number attached).

Further inquiries should be made to the Graduate School, Virginia Commonwealth University, P.O. Box 843051, Richmond, VA 23284-3051, (804) 828-6916. See the Department of Nurse Anesthesia Web site for more information.
### Combined Master of Science in Nurse Anesthesia (M.S.N.A.) and Doctor of Nurse Anesthesia Practice (D.N.A.P.)

See the individual program pages for admission requirements specific to the separate degrees.

The combined M.S.N.A./D.N.A.P. program integrates master’s- and doctoral-level courses and awards a D.N.A.P. following successful completion of the M.S.N.A. The objective of the combined degree program is to prepare registered nurses with a baccalaureate degree for careers in nurse anesthesia that encompass professional practice, leadership and education. Students in the combined program can earn the doctorate in as little as one additional semester beyond the time required for the master’s program. Students are eligible to sit for the national certification exam following completion of the M.S.N.A., allowing the opportunity to seek professional employment while completing the D.N.A.P.

Students who wish to enter into the combined degree option must first be admitted to the M.S.N.A. program. Matriculated M.S.N.A. students who wish to enter combined program may apply to the D.N.A.P. program in the second semester of the master’s program. Applicants to the combined degree program must be enrolled in the M.S.N.A. program, have demonstrated good academic and clinical performance and be in good standing. Upon admission into the dual-degree program, students will enroll in courses applicable to both programs beginning in the fourth semester.

Graduates of the combined program will meet the objectives of both the M.S.N.A. and D.N.A.P. programs, which are outlined on the individual program pages in this bulletin. Accreditation information is also available on the program pages, as well as in the School of Allied Health Professions section of this bulletin.

#### Admission requirements

Students applying to the combined degree program must first obtain admission into the M.S.N.A. program. Requirements for admission to the combined program are:

- A baccalaureate degree from a regionally accredited university.
- Acceptance into the VCU graduate program in nurse anesthesia.
- Current licensure as a registered nurse.
- Cumulative graduate GPA of 3.0 or higher on a 4.0 scale.
- Graduate Record Examination within five years of application.
- Resume.
- Personal statement including:
  - Reasons for seeking this educational opportunity.
  - Career goals and how having this degree will help you attain them.
  - Prior life/work experience that will be useful in your educational experience.
  - Potential areas of study for capstone project.
- Completed Graduate School application form.
- Three professional references.
- Personal interview (by invitation).

</table>
The philosophy of the Department of Occupational Therapy embraces the philosophical base of occupational therapy stated by the American Occupational Therapy Association (1979):

Man is an active being whose development is influenced by the use of purposeful activity. Human beings are able to influence their physical and mental health and their social and physical environment through purposeful activity. Human life is a process of continuous adaptation. Adaptation is a change in function that promotes survival and self-actualization. Biological, psychological and environmental factors may interrupt the adaptation process at any time throughout the life cycle, causing dysfunction. Purposeful activity facilitates the adaptive process. Purposeful activity (occupation), including its interpersonal and environmental components, may be used to prevent and mediate dysfunction and to elicit maximum function. Activity as used by occupational therapists includes both an intrinsic and a therapeutic purpose. (AOTA. [1979]. The philosophical base of occupational therapy. AJOT, 33, 785.)

Mission

The primary mission of the Department of Occupational Therapy is the preparation of excellent, innovative, adaptable and responsible occupational therapists as professional leaders for the state and the nation.

In pursuit of this mission, the department:

- Fosters student commitment to scientific inquiry and professional competence, and promotes personal growth, balance and dedication to lifelong learning.
- Promotes faculty excellence and collaboration in teaching, scholarship and research that models integrity and competence.
- Collaborates with the community through education, consultation and the development of strong linkages with clinical educators and the community.
- Interacts dynamically with the occupational therapy profession and stakeholders, contributing proactively to the evolution of the profession.

Facilities

The educational facilities of the Department of Occupational Therapy are located in the Virginia Mechanics Institute Building at the northeast corner of 10th and Marshall streets. During the professional master’s degree program, fieldwork assignments are made for students in a wide range of clinics and agencies in the Richmond metropolitan area. A 24-week extended fieldwork requirement will be arranged in approved clinical education facilities throughout the United States.

Honors and awards

A. D. Williams Award

An annual award presented to second-year students with cumulative 4.0 GPAs for the entire curriculum.

Commonwealth of Virginia Graduate Fellowship Award

These awards are presented to graduate student(s) with high academic and professional potential. Preference is given to residents of Virginia, and financial need is considered.

Patti Ann Maurer Scholarship

This award is given to the top-ranked applicant for the professional master’s program.

Gudger-Garris Scholarship Award

This award is a bequest from Lucille Gudger. It is awarded each year to students in the occupational therapy program in good academic standing with financial need.

C.A. Kooiman Memorial Award

This award is given in memory of C.A. Kooiman, director of the occupational therapy curricula from 1961 to 1976. The award recipient is chosen by the Department of Occupational Therapy

The program in occupational therapy was initiated at Richmond Professional Institute in 1942. In 1965, the graduate program leading to a Master of Science degree in basic professional education in occupational therapy was initiated. The School of Occupational Therapy became a department in the School of Allied Health Professions in 1970.

Administration

Shelly J. Lane
Professor and Department Chair

Philosophy
Programs

Three courses of study are offered:
1. A Master of Science in Occupational Therapy, a professional entry-level degree program, is designed for students who wish to become occupational therapists.
2. A post-professional Master of Science is available for registered occupational therapists.
3. A post-professional Occupational Therapy Doctorate also is available for registered occupational therapists.

Academic regulations

Students are admitted to the occupational therapy programs with the expectation that they will direct maximum time and effort to the learning process. Outside activities must be scheduled by students for such dates and hours as permit full compliance with the time requirements for course work. Tardiness, lack of regular attendance or failure to meet deadlines for course assignments will not be excused because of employment or other outside activities.

To continue in the graduate curriculum, students are expected to maintain a cumulative GPA of 3.0 based on course work following matriculation.

- Graduate students who fail to maintain a 3.0 cumulative GPA or receive a grade of “D” (regardless of the cumulative GPA) will automatically be placed on probation and will be notified of probationary status.
- Conditions of probation: students must earn a quality point average during the semester of probation sufficient to result in a cumulative GPA of 3.0 in order to be removed from probationary status.

Students who are on probation due to receiving a “D” grade must retake that course, achieving a grade of “C” or better while also meeting all other academic standards.

Conditions of probation also may include recommendations for academic counseling, assignments by individual instructors and other requirements identified by the Committee on Academic Standing and Student Progress. Conditions of probation will be detailed in a letter of notification of probation prepared by this committee.

Only one semester of academic probation is permitted in the program. If probationary students fail to meet academic standards (GPA of 3.0) in a second semester or do not successfully complete deficient courses, they will be considered for dismissal.

- As courses usually are offered only once a year and because early courses serve as prerequisites for later courses, students retaking a course or taking a reduced course load will have to continue under an adjusted curriculum plan. This will result in extending the student's time in the program.
- Students who receive an “F” grade in any required course will be considered for dismissal by the committee.
- University standards require that a graduate student must not have more than six semester hours or 20 percent of semester hours attempted, whichever is greater, with a grade of “C” or more. Students who receive a grade of “C” on more than the allowable number of semester hours will be reviewed for possible academic termination by the Committee on Academic Standing and Student Progress. Students who are not terminated for this criterion will be placed on automatic probation.

- If a student withdraws or is terminated by the clinical faculty before the completion of the Level II Fieldwork course, the student will receive an “U” grade for the course.

If the student withdraws, is terminated or fails a fieldwork experience, the course may be repeated only upon approval by the Committee on Academic Standing and Student Progress in consultation with the department chair and the fieldwork coordinator. Students may be dismissed from the program or be allowed to continue contingent upon fulfilling remedial activities based on a plan prepared by the fieldwork coordinator and ratified by the committee. No more than one additional fieldwork experience will be rescheduled. The opportunity to reregister and repeat the fieldwork course is contingent upon the fieldwork coordinator’s ability to locate another facility willing to offer a fieldwork experience to the student and upon the support of the committee. Level II Fieldwork must be completed no later than 24 months subsequent to the completion of the academic phase.

- To continue in good standing, students also are expected to:
  - Pay all fees.
  - Maintain personal attributes and ethical behaviors consistent with professional practice as defined in the Occupational Therapy Department Student Handbook.
  - Complete fieldwork requirements to the satisfaction of clinical and academic faculty.
- Although arrangements are made in advance, each student is reviewed prior to placement in the Level II Fieldwork education. Students must have satisfactorily completed courses prerequisite to that fieldwork experience and be recommended by the faculty. They must demonstrate professional behavior as specified in the ethical behaviors listed in the Occupational Therapy Department Student Handbook. Medical problems may delay or prevent fieldwork placement.

Occupational therapy courses

Descriptions for all courses offered by the university may be accessed through the online courses database at www.pubapps.vcu.edu/vcucourses. You may search by unit, subject or keyword, as well as by degree level.

Follow this link to occupational therapy (OCCT) courses.

### Occupational Therapy, Master of Science in (M.S.O.T.)

</tbody>
</table>

Special requirements:
Contact department for specific admission requirements.

Entry level masters supplemental application link: Supplemental application materials are available on the Web at http://www.sahp.vcu.edu/occu/programs/entrylevel.htm.

The Department of Occupational Therapy offers a Master of Science in Occupational Therapy, a professional degree program designed for students who wish to become occupational therapists. This program may be completed in seven consecutive semesters. Applications will be accepted from students who have completed at least three year’s of bachelor’s degree course work (90 semester credits). The professional master’s degree program includes academic courses, research activities and a minimum of 24 weeks of full-time fieldwork.

#### Accreditation

The professional master’s degree program to become an occupational therapist is accredited by the Accreditation Council for Occupational Therapy Education, 4720 Montgomery Lane, P.O. Box 31220, Bethesda, MD 20824-1220; telephone (301) 652-2682.

#### Admission requirements

Applicants for the professional master’s degree program must complete the following prerequisites with a grade of “C” or better (credits are listed in semester credit hours) with a minimum overall prerequisite GPA of 3.00:

| credits | English | 6 |
| 6 | Human anatomy and physiology (laboratory courses) | 6 |
| 15 | Social sciences | 15 |
Must include:
  Life-span development course(s) sufficient to cover entire life span (3-6)
  Abnormal psychology (3)
  Other social sciences courses (psychology, sociology, social psychology, anthropology) (6-9)

Statistics 3

Computer competence — the ability to use a personal computer for word processing, e-mail, online bibliographic searches and Internet listserv discussion — is required. It is helpful to be familiar with graphics software for preparing presentations. A course on medical terminology is strongly recommended.

These are considered minimal prerequisites, and applicants are encouraged to pursue additional study in liberal arts and science courses that develop intellectual competence, enrich interest areas and promote an awareness of the breadth of social and cultural values. To fulfill the human development prerequisite, it is important to read course descriptions carefully, as many courses say they cover the life span but primarily focus on a single area (e.g., childhood). To meet this requirement, students will need courses that prepare across the life span. To fulfill the psychology prerequisite, a course in theories of personality is highly recommended.

A total of 60 hours experience in at least two occupational therapy settings (one with adults and one with children) is required. Criteria for admission include GPA (overall and prerequisite GPA will be calculated), scores on the GRE and professional criteria, including experience, references, professional attributes and statement of professional goals.

Graduates of occupational therapy programs are required to take the national certification examination to become an Occupational Therapist Registered. The national certifying organization for occupational therapy is the National Board for Certification in Occupational Therapy (NBCOT). Other licensure or certification requirements may be established by state organizations. Some licensure or certification agencies consider individuals convicted of a felony ineligible for licensure or certification. For specific information, prospective students should contact the licensure or certification agency for occupational therapy.

Application forms and instructions for applying to all graduate programs are available on the Graduate School Web site. University tuition and fees apply. Additional departmental course fees are calculated each semester to cover materials and supplies. Semester course fees vary but rarely exceed $75 per semester. Fees will not exceed $100 each semester, per departmental policy.

Curriculum

The total program is planned for completion in seven semesters of full-time study and encompasses academic and fieldwork education as well as a research experience.

The Department of Occupational Therapy offers a post-professional Master of Science program that is available for registered occupational therapists. It is a distance education program combining Internet-based course work with optional on-site instructional periods. A minimum of 33 semester hours, including a thesis, is required.

The Post-professional Master of Science in provides bachelor’s-degree, registered occupational therapists with opportunities to develop advanced clinical problem-solving skills and abstract reasoning. Upon program completion, the student should have increased ability to:

- provide theory and evidence-based practice,
- engage in advanced clinical program solving,
- use research skills to assist in developing new clinical knowledge and in program evaluation, and
- fulfill expanded roles, and seek out and create roles in new settings.

**Admission requirements**

Applicants must have earned a bachelor’s degree from an accredited college or university and be certified by the National Board of Certification in Occupational Therapy, Inc. An official report of scores on the GRE is required.

Application forms and instructions for applying to all graduate programs are available on the Graduate School Web site.

**Curriculum**

The program is primarily a Web-based distance education program, with optional on-campus course work for some courses. This program follows the traditional fall, spring and summer semester schedule. It consists of theory and research core courses, electives for concentrated study, and at least six credits of thesis research.

Students should enter the program with a concentration and research interest identified. Concentration areas currently available include gerontology and pediatrics. Up to six credits of electives may be taken at other institutions and transferred in, with permission of adviser. The curriculum includes the following 33 credit hours of courses:

| Theory core |  |
| OCCT 671 Advanced Theory in Occupational Therapy | 3 |
| OCCT 672 Dimensions of Occupation | 3 |
| OCCT 673 Health Care Delivery and Occupational Therapy Practice Models | 3 |

| Research core |  |
| OCCT 710 Research Process in Occupational Therapy | 3 |
| OCCT 711 Research Process in Occupational Therapy: Qualitative Methods | 3 |
| Statistics (taken outside the department) | 3 |

| Thesis |  |
| OCCT 798 Thesis | 3 |
| OCCT 799 Thesis | 3 |

| Concentration course options |  |
| (additional courses may be taken, with approval) | 9 |
| OCCT 654 Advanced Assistive Technology Applications in Occupational Therapy: Children and Young Adult (3) |  |
| OCCT 655 Older Adult Advanced Assistive Technology Application in Occupational Therapy (3) |  |
| OCCT 656 Advanced Neuroscience Applications in Occupational Therapy (3) |  |
| OCCT 661 School-based Therapy (3) |  |
| OCCT 662 Neuroscience Review and Sensory Integration Theory (3) |  |
| OCCT 663 Beyond the Basics: Advanced Evaluation and Intervention in Pediatric Occupational Therapy (3) |  |
| OCCT 690 Occupational Therapy Seminar (1-3) |  |
| OCCT 691 Special Topics in Occupational Therapy (3) |  |
| OCCT 697 Independent Study (3) |  |
| OCCT 793 Clinical Specialty Practicum (3) Gerontology courses | 9 |

The program is designed to permit part- or full-time study. Courses are generally taught once yearly.

For additional information, visit the Department of Occupational Therapy Web site.

**Combined Certificate in Aging Studies (Post-baccalaureate graduate certificate) and Post-professional Master of Science in Occupational Therapy (M.S.)**

The departments of Occupational Therapy and Gerontology have developed a specialized version of the Certificate in Aging Studies program for students completing the post-professional Master of Science in Occupational Therapy. Students must meet admission requirements for the occupational therapy degree and the gerontology certificate program. The student is required to complete the following courses:
Develop and evaluate advanced clinical problem solving.
Critique the research processes inherent in literature related to practice and apply knowledge of leadership theory.
Identify areas for lifelong learning and professional development.
Organize, plan and prepare a proposal addressing a clinical issue.
Design, conduct and appraise self-knowledge of evidence-based practice.
Examine changes in the health care arena and judge the impact of change on clinical practice.
Apply knowledge of leadership theory.
Develop, plan, implement and assess leadership activities leading to enhancement of individual leadership skills and knowledge.
Analyze strengths and needs in all areas.
Identify areas for lifelong learning and professional development.

Curriculum
The program is a part-time distance education post-professional program for students with an occupational therapy degree. It combines Web-based instruction with on-campus meetings twice a year, in August and January. This program follows the traditional fall and spring semester schedule; summer courses are required for students entering with a bachelor's degree and are optional for students entering with a master's degree. The curriculum consists of leadership, research/scientific foundation and theory/practice foundation core courses, along with electives for concentrated study.

The curriculum for an occupational therapist entering with a baccalaureate degree includes the following 55 credit hours of courses:

### Leadership core
- OCCT 736 Developing Fundable Projects
- OCCT 739 Program Development and Evaluation
- OCCT 740 Concepts in Disability Leadership for Occupational Therapists
- OCCT 741 Disability Leadership Applications for Occupational Therapists
- OCCT 742 Practicum in Leadership for Occupational Therapists
- OCCT 743 Synthesis and Evaluation of Capstone Leadership Project

### Research/scientific foundation core
- OCCT 656 Advanced Neuroscience Applications in Occupational Therapy
- OCCT 710 Quantitative Research Processes
- OCCT 735 Evidence Bases for Occupational Therapy Practice

### Theory/practice foundation core
- OCCT 671 Advanced Theory in Occupational Therapy
- OCCT 672 Dimensions of Occupation
- OCCT 673 Health-care Delivery and Occupational Therapy Practice Models
- OCCT 685 Advanced Clinical Reasoning: Asking the Right Questions
- OCCT 686 Advanced Clinical Reasoning Applications

### Electives
The curriculum for an occupational therapist entering with a master's degree includes the following 43 credit hours of courses:

### Leadership core
- OCCT 736 Developing Fundable Projects
- OCCT 739 Program Development and Evaluation
- OCCT 740 Concepts in Disability Leadership for Occupational Therapists
- OCCT 741 Disability Leadership Applications for Occupational Therapists
- OCCT 742 Practicum in Leadership for Occupational Therapists

Contact the respective departments for additional curriculum information.

**OTD supplemental application link:**
Supplemental application materials are available on the Web at www.sahp.vcu.edu/occu/programs/otd/applicationotd.htm.

The Department of Occupational Therapy offers a post-professional Occupational Therapy Doctorate (O.T.D.) program that is available for registered occupational therapists. It is an on-campus distance education program combining Web-based course work on on-site instructional periods. A minimum of 43 semester hours is required for students entering with an M.S. in Occupational Therapy; 55 semester hours are required for students entering with a B.S. in Occupational Therapy. Students entering with a bachelor's degree in occupational therapy will receive a dual degree: M.S./O.T.D. Students who have received their occupational therapy degree within the past five years may have some courses waived; please contact the department for more information.

The post-professional OTD provides opportunities to develop advanced clinical leadership skills. Upon program completion, the student should have increased ability to:

- Articulate and appraise the complexity of occupation, disability and the rehabilitation process.
- Develop and evaluate advanced clinical problem solving.
- Synthesize up-to-date health care theoretical foundations and evaluate their application to clinical practice and leadership experiences.
- Engage in critical analysis of practice and leadership issues.
- Critique the research processes inherent in literature related to practice and implement critical analysis of published research.
- Organize, plan and prepare a proposal addressing a clinical issue.
- Design, conduct and appraise self-knowledge of evidence-based practice.
- Examine changes in the health care arena and judge the impact of change on clinical practice.
- Apply knowledge of leadership theory.
- Develop, plan, implement and assess leadership activities leading to enhancement of individual leadership skills and knowledge.
- Analyze strengths and needs in all areas.
- Identify areas for lifelong learning and professional development.

Contribute to interdisciplinary post-professional doctoral programs that Provide an atmosphere that fosters critical thinking, intellectual curiosity and Provide an entry-level postbaccalaureate educational program for full-time education in Virginia gave its final approval for the proposal on June 20, 2001. The VCU Board of Visitors approved a proposal to offer a Doctor of Physical Therapy as the entry-level professional degree. The State Council of Higher Education at the Ph.D. level is a highly independent adventure. The curricula

### Philosophy

Physical therapy is an integral part of the health care system. Expanding knowledge in the basic and clinical sciences, and changes in the needs and mandates of society, continually place new demands on the physical therapy profession. The faculty of the Department of Physical Therapy is committed to providing educational programs responsive to expanding knowledge and the needs of society.

The primary principle directing the activities of the department is the faculty’s commitment to optimal patient care through physical therapy education, research and practice. The faculty strongly believes that physical therapists must have a thorough understanding of the theoretical bases for treatment and skills in problem solving, evaluation and communication.

The faculty also believes that physical therapists have a responsibility to develop skills for lifelong learning (e.g., the ability to find information and to critically analyze that information).

The faculty also is committed to the development and sharing of new knowledge in the field of physical therapy through scholarship and research.

### Objectives

The objectives of the Department of Physical Therapy, in concert with the mission of the university and the School of Allied Health Professions, are to:

- Provide an entry-level postbaccalaureate educational program for full-time students with diverse backgrounds and experiences.
- Contribute to interdisciplinary post-professional doctoral programs that prepare physical therapists to contribute to the understanding and application of therapeutic procedures through basic and applied research and to teach both clinical and didactic physical therapy on all academic levels.
- Provide an atmosphere that fosters critical thinking, intellectual curiosity and integrity, freedom of expression, personal growth and professional competence, and a commitment to learning for faculty and students.
- Provide an environment that facilitates research and scholarship directed toward optimizing patient care.
- Provide services to the public and professional communities.

### Facilities

The educational facilities for the Department of Physical Therapy are located on the basement floor of A.D. Williams/West Hospital. These buildings, located on the northeast corner of 12th and Broad streets, house administrative and faculty offices, classrooms, physical therapy instructional, computer and research laboratories, and student locker rooms. Classrooms in other buildings on the MCV Campus are used as needed.

Clinical education experiences for professional students are offered in physical therapy clinics throughout Virginia and the country.

### Graduate (postprofessional) programs in physical therapy

The Department of Physical Therapy is committed to improving physical therapy services through graduate education and research. The department participates in several cooperative and interdisciplinary doctoral programs. Physical therapy tracks are offered in the Ph.D. programs of the Department of Anatomy and Neurobiology and the Department of Physiology and Biophysics. An interdisciplinary Ph.D. in Rehabilitation and Movement Science is offered in conjunction with two other departments at VCU: Department of Exercise Science in the School of Education and the Department of Physical Medicine and Rehabilitation in the School of Medicine. Also, the department participates in the School of Allied Health Professions’ Ph.D. in Health Related Sciences.

Education at the Ph.D. level is a highly independent adventure. The curricula offered by the Department of Physical Therapy through joint ventures with other departments allow students the opportunity to focus on highly divergent aspects of research related to physical therapy. Each of the programs also offers students opportunity to hone teaching skills in preparation for a well-rounded academic career.

Regardless of the chosen program or track, each Ph.D. student conducts a substantial original research project. Individuals interested in doctoral education

### Department of Physical Therapy

The Department of Physical Therapy was established in 1945 to provide basic preparation for the practice of physical therapy. Between 1945 and 1954, the program consisted of a 12-month professional course designed to train students for entry into the profession. This program was based upon at least three years of college work or the possession of a registered nurse certificate. A two-year professional program after two years of preparatory college work was initiated in 1954. This program led to the degree of Bachelor of Science in Physical Therapy. In 1968, the Department of Physical Therapy became part of the School of Allied Health Professions. The two-year professional program leading to the Bachelor of Science degree continued through the 1988-89 academic year.

In August 1989, the Department of Physical Therapy, School of Allied Health Professions, began a three-year professional program based on three years of previous college work that leads to a Master of Science degree. On Feb. 8, 2001 the VCU Board of Visitors approved a proposal to offer a Doctor of Physical Therapy as the entry-level professional degree. The State Council of Higher Education in Virginia gave its final approval for the proposal on June 20, 2001. The first class to study the professional program began in July 2002.

In addition to the professional program, the department participates in four collaborative and interdisciplinary Ph.D. programs.

### Administration

**Thomas Mayhew**  
Associate Professor and Department Chair

### Mission

The Department of Physical Therapy serves the people of the commonwealth of Virginia and the nation by providing educational programs related to physical therapy. The department provides an environment that encourages education through problem solving, free inquiry, professional behavior and scholarship. The department’s primary focus is to prepare individuals for general physical therapy practice. These practitioners are educated to serve as an entry point into the health care system for consumers. Post-professional programs provide quality education leading to careers in teaching and research. The department also provides assistance and services to the community and engages in research and scholarly activities related to the practice of physical therapy.

### Electives

For additional information, visit the Department of Occupational Therapy Web site at www.sahp.vcu.edu/occu.
are encouraged to examine the research interest areas of faculty in each of the participating departments and to consult with the program directors before submitting their application to a specific program.

**Admission requirements**

Applications are encouraged from individuals who are practicing physical therapists. Applicants must have graduated from a physical therapy educational program approved by the American Physical Therapy Association. International students must have an equivalent level of education as determined by the Office of International Admissions. Individuals who are not physical therapists are not accepted into the advanced degree programs.

Additional admission requirements for graduate study in the Department of Physical Therapy are as follows:

1. A minimum GPA of 2.7 on a 4.0 scale for entry-level professional education.
2. Satisfactory score on the general test of the GRE (taken no more than five years prior to admission).
3. Three satisfactory letters of recommendation.
4. Applicant’s written statement of intent for pursuing graduate studies in a particular program.
5. Such additional requirements as established for each specific program.

International students also must score a 600 or above on the Test of English as a Foreign Language (TOEFL)250 on computer-based test).

**Financial assistance**

Some teaching and research assistantships are available from the Department of Physical Therapy. These assistantships are competitive. Part-time employment as a physical therapy clinician is available in Richmond and surrounding areas. Doctoral students receiving stipends must receive approval of outside employment.

VCU provides three types of student assistance: scholarships, loans, and work study. For information on these types of financial assistance, write to the Office of Financial Aid, Virginia Commonwealth University, MCV Campus, Richmond, VA 23298-0244.

Priority consideration is given to applications received by Jan. 7.

**Physical therapy courses**

Descriptions for all courses offered by the university may be accessed through the online courses database at www.pubapps.vcu.edu/vcucourses. You may search by unit, subject or keyword, as well as by degree level.

Follow this link to physical therapy (PHTY) courses.

The Department of Anatomy and Neurobiology and the Department of Physiology and Biophysics of the School of Medicine, together with the Department of Physical Therapy of the School of Allied Health Professions offers Ph.D. programs in anatomy and neurobiology and physiology with physical therapy tracks. The goals of the doctoral programs are to train students in research and educational skills in preparation for students to function as physical therapy faculty members. Application is made to either the Department of Anatomy and Neurobiology or the Department of Physiology and Biophysics. Acceptance into either of the programs requires approval by the admission committees of the cooperating departments. Graduates receive either the Ph.D. in Anatomy and Neurobiology or the Ph.D. in Physiology.

Students in the physical therapy track of the anatomy and neurobiology doctoral program take required courses within the departments of Anatomy and Neurobiology and Physical Therapy. Students in the physical therapy track of the physiology program take required courses within the departments of Physiology and Biophysics and Physical Therapy. (Other courses may be required by the students dissertation committee.) In both programs, the student plans and conducts a research study generally under the direction of a faculty member of the Department of Physical Therapy; however, the dissertation adviser may be from either of the two primary departments. In addition, the student is required to assist in teaching three courses.

In addition to the requirements listed above, admission to either of the programs requires:

- A minimum of a bachelor’s degree.
- Graduation from an accredited program in physical therapy (or equivalent, if trained outside the United States).
- Demonstrated clinical experience in physical therapy.

Applicants to the physical therapy track of the physiology program also are encouraged to have completed at least one course in organic chemistry. Applicants should refer to the departmental Web site for more information or contact:

Dr. Sheryl Finucane, Director of Graduate Studies
Department of Physical Therapy
School of Allied Health Professions
Virginia Commonwealth University
P.O. Box 980224
Richmond, VA 23298-0224
Phone: (804) 828-0234

For additional information about the collaborating departments, refer to their Web sites:

- Department of Physical Therapy
- Department of Anatomy and Neurobiology
- Department of Physiology

**Physical Therapy, Doctor of (D.P.T.)**

VCU’s Department of Physical Therapy offers a three-year degree program leading to a Doctor of Physical Therapy. The professional track prepares students for entry into the profession by teaching them to evaluate and manage patients with physical therapy problems effectively and in accordance with ethical principles. It also provides students with strategies to continually define and meet their own educational needs in order to keep skills and knowledge current throughout their professional careers.

Applicants must meet the following requirements for entry into the Doctor of Physical Therapy program:

- A Bachelor of Arts or Bachelor of Science degree from an accredited college or university. A grade of “D” in any required prerequisite course is not acceptable.
- A minimum grade-point average of 2.7 (in a 4.0 system).
- The Graduate Record Examination. Scores should be reported directly to VCU.
- For nonnative English-speaking applicants, regardless of immigration status, a Test of English as a Foreign Language score of at least 600 (score of 250 on computerized exam). Scores should be reported directly to VCU.
- A minimum total of 100 volunteer hours in at least two physical therapy practice settings.
- Three recommendations, with at least one from a physical therapist.

Application deadline is Nov. 14. Visit the Department of Physical Therapy Web site for application instructions.

The department also offers a transitional track leading to the Doctor of Physical Therapy degree. The t-DPT program is designed for practicing clinicians and...
offers a didactic augmentation of clinicians’ professional education to meet current and future expectations for physical therapy practice. Applications to this program are accepted on a rolling basis.

For more information and to apply to this program, visit the Department of Physical Therapy Web site.

Professional track

The goal of this program is to provide a quality educational program that prepares students for entry into the profession of physical therapy. The program prepares students to evaluate and manage patients with physical therapy problems effectively and in accordance with ethical principles. The program also provides students with strategies to continually define and meet their own educational needs in order to keep skills and knowledge current throughout their professional careers. Upon completion of the program, students are awarded a Doctor of Physical Therapy degree.

Objectives

Satisfactory performance in the educational experiences provided in the Doctor of Physical Therapy program prepares the graduate to:

• within the scope of physical therapy practice, effectively examine, evaluate, diagnose and determine the prognosis of individuals with impairments, functional limitations and disabilities.
• within the domain of physical therapy practice, apply health promotion principles and practices in primary, secondary and tertiary prevention.
• manage physical therapy problems in a safe, ethical, legal and professional manner.
• use appropriate educational principles to design methods to teach patients/clients, caregivers, colleagues and other health care professionals.
• effectively manage changes in the physical function and health status of patients/clients.
• collaborate with other health care practitioners to achieve the optimum delivery of health care.
• select and implement safe and effective physical therapy interventions and assess the subsequent outcomes.
• determine the need for further examination or consultation by another physical therapist or for referral to another health care professional.
• manage human and material resources and services to provide high quality and cost effective physical therapy services in diverse settings.
• apply concepts and principles of management to effectively supervise support personnel to whom tasks have been delegated.
• effectively document patient information and physical therapy services to colleagues in an organized, logical and concise manner.
• integrate basic principles of critical inquiry to evaluate, interpret and utilize professional literature in clinical practice, participate in clinical research activities and critically analyze new concepts in the application of physical therapy practice.
• effectively communicate, verbally and non-verbally, with patients and their caregivers, health care personnel and members of the community.

• demonstrate an awareness of the influence of social, economic, legislative and demographic factors of the delivery of health care.
• demonstrate an understanding of the importance of lifelong learning and a commitment to the physical therapy profession.

Admission requirements

Prerequisites for admission to the professional Doctor of Physical Therapy program include a Bachelor of Arts or Science degree from an accredited college or university. If your university has given you college credits for your AP courses and/or exam, and it is listed on your transcript, we will accept those credits. A grade of D in any required prerequisite course is not acceptable. A minimum GPA of 2.7 (in a 4.0 system) is required to be considered for admission. The GRE is required; the scores should be reported directly to Virginia Commonwealth University. For non-native English-speaking applicants, regardless of immigration status, a Test of English as a Foreign Language (TOEFL) score of at least 600 (score of 250 on computerized exam) is required; scores should be reported directly to Virginia Commonwealth University. The program of study necessary to be considered for admission to the professional Doctor of Physical Therapy program must include a minimum of the following subject areas:

- Biological sciences – 12 semester hours including laboratory experiences
  • Must include four credits of college-level biology
  • Must include four credits of anatomy and four credits of human physiology, or eight credits of anatomy/physiology
  • An exercise physiology course is not an acceptable substitute for a human physiology course
  • Cell biology and histology are highly recommended but not required
- Chemistry – eight semester hours including laboratory experiences
- Mathematics – three semester hours
  • Must be in precalculus or a more advanced mathematics course
- Physics – eight semester hours of general physics with laboratory
  • Courses that emphasize mechanics, electricity, heat and light are highly recommended
- Psychology – six semester hours
  • One introductory course and one course in human growth and development, or abnormal psychology is required
- Statistics – three semester hours

In order to complete the total requirements, students are encouraged to elect courses from the following categories: computer science, embryology, histology, cell biology, comparative anatomy, kinesiology, exercise physiology, foreign languages and courses in physical education dealing with an analytical approach to human movement or motor learning. Students must also present a minimum total of 100 volunteer hours in at least two physical therapy practice settings.

Students are required to have current CPR certification. One of the three required letters of recommendation should be from a physical therapist.

Application deadlines

The American Physical Therapy Association will launch a physical therapy centralized application service (PTCAS) in the summer of 2008 in an effort to better accommodate prospective physical therapy applicants. The Virginia Commonwealth University Department of Physical Therapy will be participating in this common application service. Therefore, all students interested in applying to VCU’s Doctor of Physical Therapy program will submit their application materials directly to PTCAS. This service will not be available until Aug. 1, 2008.

Applicants who apply through PTCAS will submit a completed Web-based application comprising biographical data, colleges and universities attended, academic course history, physical therapy observation hours, list of reference providers, work experience, extracurricular activities, honors, professional licenses and a personal essay. It is the applicants responsibility to read and follow all PTCAS and program-specific instructions.

Apply online now.

Please also note that our application deadline has changed. All materials must be submitted to PTCAS by Nov. 14, 2008.
## Curriculum plan

### First professional year

#### Summer semester one
- PHTY 501 Gross Anatomy: 7 credits

#### Fall semester
- PHTY 502 Kinesiology: 4 credits
- PHTY 506 Functional Neuroanatomy: 5 credits
- PHTY 510 Rehabilitation I: 3 credits
- PHTY 512 Professional Aspects of Physical Therapy: 2 credits
- PHTY 516 Topics in Health Care Services and Delivery: 1 credit
- PHTY 531 Scientific Inquiry: 2 credits

#### Spring semester
- PHTY 503 Applied Exercise Physiology: 3 credits
- PHTY 505 Applied Microscopic Anatomy for Physical Therapists: 4 credits
- PHTY 508 Measurement and Assessment: 6 credits
- PHTY 537 Rehabilitation II: 3 credits

#### Summer semester two
- PHTY 520 Clinical Education I: 4 credits

### Second professional year

#### Fall semester
- PHTY 609 Clinical Biomechanics: 3 credits
- PHTY 621 Therapeutic Agents: 5 credits
- PHTY 624 Physical Therapy Seminar I: 2 credits
- PHTY 626 Life Span Development and Motor Control I: 6 credits
- PHTY 648 Orthopedic Physical Therapy: 5 credits

#### Spring semester
- PHTY 615 Pharmacology: 1 credit
- PHTY 623 Cardiopulmonary Physical Therapy: 3 credits
- PHTY 627 Life Span Development and Motor Control II: 2 credits
- PHTY 640 Neurological Physical Therapy: 6 credits
- PHTY 644 Orthotics and Prosthetics: 2 credits
- PHTY 646 Clinical Medicine: 2 credits

#### Summer semester three
- PHTY 650 Clinical Education II: 8 credits

### Third professional year

#### Fall semester (block 1 – 8 weeks)
- PHTY 651 Professional Issues: 2 credits
- PHTY 654 Physical Therapy Seminar II: 1 credit
- PHTY 661 Administration and Management: 2 credits
- PHTY 670 Clinical Integration: 2 credits
- PHTY 691 Special Topics (electives): 1 credit

#### Fall semester (block 2 – 8-weeks)
- PHTY 680 Clinical Education III: 8 credits

#### Spring semester
- PHTY 674 Physical Therapy Seminar III: 1 credit
- PHTY 680 Clinical Education III (continuation; two 8-week clinical internships): 16 credits

Note: The preceding curriculum plan is under continuous review by the faculty. Course content, sequencing and time commitments are subject to change.

### Transitional track

The Transitional Doctor of Physical Therapy Program is intended for practicing physical therapy clinicians and offers a didactic augmentation of clinicians' professional education to meet current and future expectations for physical therapy practice. Upon successful completion of this postprofessional program of study, students will have knowledge, skills and behaviors at a level consistent with the current professional (entry-level) D.P.T. standards and will be awarded the D.P.T. degree. The t-D.P.T. program will provide practicing therapists with a mechanism to attain degree parity with more-recently trained therapists who hold the professional D.P.T. by addressing the key differences between their professional baccalaureate or master’s degree PT education and the current professional D.P.T. degree education. The curriculum is designed for practicing clinicians to complete through part-time, largely distance-based study in one to three years.

### Admission requirements

Applicants must have either a bachelor’s or master’s degree in physical therapy from an accredited physical therapy program in the U.S., a current license to practice physical therapy in the U.S. and at least one year of full-time clinical experience. The department will consider applications from foreign-trained physical therapists if all other admission criteria are met and if credentials have been evaluated by the Foreign Credentialing Commission on Physical Therapy and found to be equivalent to those required of physical therapists educated in the U.S.

Applicants for admission to the program must complete an admission packet that includes the VCU Application for Transitional Doctor of Physical Therapy Program as well as supplementary program materials. Admission packets are available by mail or online:

Virginia Commonwealth University
School of Allied Health Professions
Department of Physical Therapy
P.O. Box 980224
Richmond, Virginia 23298-0224
www.vcu.edu/pt/prospectivestudents/tdpt_apply.html

Application packets must contain:
- a completed VCU Application for Transitional Doctor of Physical Therapy Program form.
- an official copy of all transcripts of the applicant’s undergraduate and/or graduate record indicating that the applicant has completed a degree in physical therapy.
- a copy of the applicant’s license to practice physical therapy.
• a completed Clinical Experience Documentation Form.

Application deadlines

Applications are reviewed on an ongoing basis. Each year, the application deadline for fall enrollment is June 1, and the application deadline for spring enrollment is Nov. 1.

The applicant is encouraged to check the status of his or her application packet to ensure that all components of the packet have been received. Inquiries should be made to the Department of Physical Therapy. Incomplete packets will not be reviewed.

Curriculum

The t-DPT program will require 15 to 21 credits. The program must be completed within three years of matriculation. Students will be required to complete:

• 12 credits of core courses comprised of two classes in evidence-based practice, a class in applied exercise physiology, and a class in physical therapy evaluation in the direct access setting.
• three to nine credits of elective course work, depending on matriculation status.
  ◦ For students with a master’s degree in physical therapy, a minimum of two elective courses.
  ◦ For all other students, a minimum of four elective courses.

Admission requirements

Admission decisions are made by an admissions committee comprised of faculty members from each of the major collaborating departments: Exercise Science, Physical Therapy and Physical Medicine and Rehabilitation. Applicants must have completed at least one of the following: a master’s degree in a related area, 30 hours of postbaccalaureate work (e.g. course work at 500 level or greater), or a first professional degree program. Admission decisions are made only on the basis of a completed application packet.

Applicants for admission to the program must complete an admission packet that includes the VCU Application for Graduate Study as well as supplementary program materials. Admission packets are available from:

Graduate School
Virginia Commonwealth University
Moseley House
P.O. Box 843051

The entrance requirements fall into the following three categories. All criteria must be completed for consideration for admission.

Academic criteria

• A completed VCU Graduate School Application.
• Two official and up-to-date copies of all transcripts of the applicant’s undergraduate and graduate record indicating that the applicant has completed the minimum required prerequisite course work.
• Official and current scores (within the past five years) for the general test of the GRE. Older scores may be submitted and consideration will be based upon the time elapsed since last formal schooling, occupation success and research ability.
• Priority for admission will be given to the applicants who have attained at least 3.5 in all graduate work attempted and a combined verbal and quantitative score on the GRE of a minimum of 1,000. If the TOEFL is required, a minimum of 600 is expected (250 on the computer-based test).

External criteria

• A professional resume indicating an applicant’s educational and career experience as well as evidence of research potential.
• Completed reference forms from three individuals capable of evaluating the applicant’s academic and research potential.

Written expression

• A personal statement in which the applicant discusses his or her personal career goals and the manner in which this doctoral program would enhance those goals.
• A summary of motivation, education and aims in pursuing an interdisciplinary degree in rehabilitation and movement science.
 Applicants being considered for admission must complete an interview with a Ph.D. admissions committee representative and/or research faculty member with whom the student would like to work. The applicant is encouraged to check the status of his or her application packet to ensure that all components of the packet have been received. Inquiries should be made to the Office of Doctoral Studies. The Admissions Committee will not review incomplete packets.

**Transfer credit**

Students in the program may transfer up to nine credit hours into the program, including courses taken at VCU prior to being admitted to the program. Note that credits earned for one degree cannot be applied to another degree.

**Curriculum**

The Ph.D. in Rehabilitation and Movement Science will require a minimum of 38 credits hours of course work and 12 credits hours of dissertation research. Students will be required to complete:

- 12 credit hours of research core courses comprised of a research design class, two classes in statistical application and an elective in the area of research design or statistics.
- 18 credit hours in a concentration comprised of a focus on course work in a specific discipline formulated with the major adviser and approved by the Admissions Committee of the degree program.
- Three credit hours comprised of laboratory rotations in a minimum of two laboratories within the Rehabilitation and Movement Science program; each credit hour requires a minimum of 50 contact hours in the laboratory selected.
- Five credit hours minimum of professional development comprised of an interdisciplinary research/journal club seminar (0.5 credit hour per semester), a teaching practicum (one credit hour) and a presentation delivered at a regional, national or international conference of a related discipline (one credit hour).
- 12 credit hours of dissertation research comprised of a focused line of research over a three-to-four-year period of doctoral work.

**Advisory committee**

**Adviser**

Incoming students will identify a faculty member in the program with whom they would like to pursue their academic program and research endeavors. Every effort will be made to accommodate the student’s first choice of a faculty adviser. If the student is unsure of a research interest and adviser selection, the Admissions Committee will assign an adviser. Within the first two semesters of attendance, a permanent adviser should be identified. The adviser, together with the student, will develop a plan of study for the student’s didactic and scholarly program and will be responsible for guiding the student’s academic progress such that the adviser will supervise the student’s research work and dissertation preparation.

**Advisory committee**

The student, in consultation with the adviser, will identify faculty members to serve on the advisory committee. The committee shall be appointed no later than the end of the spring semester following matriculation into the program. The student’s advisory committee shall be comprised of five faculty members to include the adviser, two members from the rehabilitation and movement science faculty and two faculty members from other related departments. The student’s adviser, who is active in the field of research the student has selected, will chair the committee.
Comprehensive examination

Once core courses are successfully completed, students must pass written and oral comprehensive examinations before transitioning to candidacy. These examinations will test students on their basic knowledge of rehabilitation and movement science principles (primarily in their chosen track) and research methods as obtained through core, research and elective courses of the curriculum. The student must demonstrate a firm grasp of the material and the potential to become an independent researcher.

The written exam will be given to students during their second spring semester in the program. The written exam will consist of an area paper pertinent to the student’s area of interest. The student’s adviser and advisory committee must approve the topic and an outline of the area paper. The student’s adviser is responsible for grading the area paper. If a student receives a less than satisfactory grade on the area paper, he/she will be afforded the opportunity to make appropriate revisions. Students will only be allowed to revise the area paper once. The area paper should be a minimum of 15 double-spaced pages in 12-point font. The area paper must be in a form suitable for submission for publication to a journal whose content addresses topics consistent with the area paper. The student’s adviser and advisory committee must approve the journal selection and manuscript prior to submission. A passing grade on the written exam is not contingent upon the manuscript being accepted for publication.

Following acceptance of the area paper, the student will write a research proposal. The structure of the proposal will follow federal grant submission guidelines such as those specified by the National Institutes of Health or the Centers for Disease Control. The analytical research proposal must be submitted to and approved by the student’s advisory committee prior to the oral examination.

The oral exam should be conducted within three to six months of successful completion of the written exam with the goal of proceeding to candidacy by the end of the fall semester of the student’s third year. The oral exam will be based on, but not primarily limited to, the student’s proposed analytical research project. The student must receive a satisfactory grade from each committee member to pass the oral exam. The student may proceed to candidacy and begin the research outline in the proposal once successful completion of the oral examination is achieved.

Exit requirements

Dissertation defense

Upon completion of all required course work and the research project, the student must prepare a dissertation to describe the research. A dissertation manual is available for download from the VCU Web site. Students are highly encouraged to become familiar with this manual and use it as a guide for preparation of their dissertation. All committee members must approve the written dissertation and the student must orally defend this dissertation in a publicly advertised seminar prior to graduation.

Students are expected to meet all university graduate school requirements regarding minimal GPA and limitation on credits achieved with a grade of "C" or below.

Time to degree

The doctoral degree must be obtained within seven years of matriculation. It is expected that full-time students will satisfy all requirements within four to five years. Part-time students may take the full seven years to complete all courses and the research project.

Goals

The goals of the Department of Radiation Sciences are to:

- Deliver thoughtfully developed curricula in radiation sciences for individuals preparing for professional practice.
- Provide an educational atmosphere that will engender intellectual curiosity and commitment to lifelong learning.
- Cultivate professional behavior and ethical conduct.
- Promote research and scholarly activity in the radiation sciences and health-related sciences.
- Offer timely, relevant educational opportunities that encourage practicing professionals to complete a baccalaureate degree.

Administration

Jeffrey S. Legg
Associate Professor and Department Chair
www.sahp.vcu.edu/radsci

History

Radiologic technology education began at the Medical College of Virginia in the 1930s with a one-year training program in radiography. This program has undergone a number of changes through the years to evolve into the current baccalaureate educational program.

A concentration in nuclear medicine technology was added in 1984 and in radiation therapy in 1992. Degree-completion programs have been added to provide an opportunity for certified technologists and therapists to complete requirements for the baccalaureate degree.

Facilities

The educational facilities for the Department of Radiation Sciences are located at 701 W. Grace St., Suite 2100. These facilities include energized laboratories in radiography, nuclear medicine, radiation therapy and mammography. The radiography laboratory includes a digital imaging system. In addition, the radiation therapy laboratory has a 3-D treatment planning system.

During the various phases of the curriculum, students will be assigned to one or more of the following affiliate institutions: VCU Health System’s MCV Hospitals, McGuire Veterans Affairs Medical Center, CJW Medical Center, Southside Regional Medical Center and Henrico Doctors’ Hospitals.

Clinical radiation sciences courses

Descriptions for all courses offered by the university may be accessed through the online courses database at www.pubapps.vcu.edu/vccourses. You may search by unit, subject or keyword, as well as by degree level.

Follow these links to clinical radiation sciences (CLRS) courses or the (CLRZ) laboratories.

Department of Rehabilitation Counseling

Founded in 1955, the Department of Rehabilitation Counseling serves as a national leader in the professional preparation of certified rehabilitation counselors who exercise skill and competence on a high ethical level and with personal integrity. Accessible, innovative, research-based educational experiences that encourage the use of a critical and exploratory attitude are emphasized. The department seeks to perpetuate active programs of research and service, and maintain high levels of teaching competence. In partnership with students, community agencies and consumer and professional organizations, the department endeavors to advance the personal, social and economic independence of individuals with disabilities.

The Department of Rehabilitation Counseling is fully accredited by the Council on Rehabilitation Education (CORE), and is the only such program in the commonwealth of Virginia. The purpose of accreditation is to promote the effective delivery of rehabilitation services to people with disabilities by fostering ongoing review and improvements of rehabilitation education programs. CORE has developed a field-based research accreditation process that has gained
The encouragement of advanced graduate education in counseling. Transfer credits are not accepted. The 15 credits must be nonduplicative of previous graduate work completed. The facilitation of the acquisition or maintenance of professional state licenses or national certificates. The expansion of the student’s awareness and expertise in specialized counselor roles and functions.

Admission requirements
The applicant must:
1. Have completed a master’s degree in counseling
2. Submit an application to the VCU Graduate School, including a statement of goals, three letters of reference and transcripts from all schools attended
3. Complete a personal interview with a faculty member from the Department of Rehabilitation Counseling

While not a requirement for admission, applicants who are seeking licensure or certification in the commonwealth of Virginia need to contact the Virginia Board of Counseling for official requirements necessary for licensure or certification.

To apply
Applicants for admission to the program must complete forms provided by the Graduate School indicating “Certificate in Professional Counseling” as the curriculum and designate a preferred specialization or interest area. Detailed information on the curriculum is available from:

Virginia Commonwealth University
Department of Rehabilitation Counseling
P.O. Box 980330
Richmond, VA 23298-0330
(804) 828-1132
Fax: (804) 828-1321

Physical address:
Theater Row
730 East Broad Street
3rd Floor, Room 3067
Richmond, Virginia

Completed applications and all credentials must be addressed to:

Virginia Commonwealth University
Graduate School
1001 Grove Ave.
P.O. Box 843051
Richmond, VA 23284-3051

Graduation requirements
To qualify for the advanced certificate in professional counseling, the following requirements must be satisfied:

1. With an academic adviser, design and complete an approved course of study that leads to the completion of the educational requirements for licensure or certification as a professional counselor.
2. Complete a minimum of 15 graduate hours of course work in professional counseling with an overall GPA of 3.0 or higher.
3. Complete six of 15 hours of graduate course work in advanced counseling skills courses.
4. The 15 credits must be nonduplicative of previous graduate work completed at VCU or other institutions.
5. Transfer credits are not accepted.

Concentration areas
Two concentration areas are available in the certificate program as follows:

- Professional counseling, which requires a minimum of six credits in advanced counseling skills course work in the RHAB 613-614 series consisting of skills development in cognitive/behavioral counseling, motivational enhancement therapy, Gestalt therapy and others.
• Substance abuse counseling, which requires the completion of RHAB 521 Foundations of Substance Abuse Rehabilitation, RHAB 522 Clinical Evaluation, Assessment, and Treatment Planning in Substance Abuse Rehabilitation and RHAB 523 Contemporary Issues in Substance Abuse Treatment and Recovery. For persons who have not completed a practicum experience, RHAB 695 Supervised Clinical Experience is required.

Advanced supervised clinical practice within the above concentrations also can be arranged for internship and practicum experience in the student’s area of specialization.

Additional information

The program and all RHAB courses are taught from a rehabilitation counseling perspective. While course work from other departments such as Psychology, Social Work and Counselor Education may be included in the course of study, emphasis is placed upon a rehabilitation philosophical approach.

It also is important that applicants understand that no guarantee can be provided by VCU that a particular licensing or certification body will accept the courses listed in fulfillment of certificate requirements. Credentialing bodies are numerous, their requirements are in flux and they are not always consistently applied to individual applicants. In advising students, the faculty advisers make good faith efforts to interpret educational requirements with students. However, the student is ultimately responsible for verifying the appropriateness of any course with the specific credentialing body involved.

**Rehabilitation Counseling, Master of Science (M.S.)**

**Admission requirements summary**

<table>

<td>Fall</td>
<td>Jun 1</td>
<td>GRE or MAT</td>
</tr>
<tr>
<td></td>
<td>Spring</td>
<td>Oct 1</td>
<td></td>
</tr>
</tbody>
</table>

**Admission deadlines and requirements**

Both full- and part-time students are valued and are welcome to apply. Applications are reviewed on an ongoing basis. To be considered, all pertinent materials must be received in the department by June 1 (for fall) or Oct. 1 (for spring). Admission requirements include:

• An undergraduate GPA of 2.7 on a 4.0 scale; or 2.7 in the last 60 semester hour credits (based upon transcripts provided to the Graduate School).

• Three positive letters of reference from professors or employers (on reference forms provided by the Graduate School).

• Satisfactory performance on either the GRE (804) 828-6916 or the MAT (804) 828-1193.

• A relevant and clear statement of goals for graduate study and career.

• Statement of previous work or volunteer experience.

• A personal interview with a faculty member may be required.

A complete set of application materials is available from the Graduate School Web site.

**Transfer credit**

A maximum of 12 hours of graduate credit may be transferred from another VCU graduate program or outside institution if not applied previously to another degree. Transfer credits must carry a grade of B or higher from an accredited institution. Acceptance of transfer credit is made at the level of the department chair and dean of the School of Allied Health Professions. Transfer credits earned as a nondegree-seeking graduate student are limited to six semester hours of credit. Credits earned as deficiency hours or to demonstrate the ability to compete at the graduate level, though transferable, may not be applied to the 48-credit program of study.

Graduates from accredited rehabilitation counseling programs are typically trained in counseling theory and techniques; individual, group and environmental assessment; psychosocial and medical aspects of disability; human development; cultural diversity; principles of psychiatric rehabilitation, case management and rehabilitation planning; issues and ethics in rehabilitation service delivery; technological adaptation; vocational evaluation and work adjustment; career counseling; implementation of the Americans with Disabilities Act; job development; and placement.

**Degree requirements**

The minimum degree requirement is 48 graduate credits including 33 credits of didactic course work, 100 hours of fieldwork; 600 hours of internship, six credits of electives, and a comprehensive examination.

The on-campus Master of Science in Rehabilitation Counseling degree has been available since 1955. The program consists of 48 graduate credits. Currently, 90 full- and part-time graduate students are enrolled on campus. In addition, the same degree has been made available on a distance-learning basis since July 1999. Ten required courses and the two electives are available online according to a predetermined schedule. Two clinical counseling courses also are available on-site in a compressed schedule (typically one-to-two weeks) at various locations. Alternately, up to 12 hours may be taken at an accredited graduate counseling program and accepted as transfer credit with prior approval. Approved internships with appropriate faculty and agency supervision are negotiated by the department, student and the local community organization.

</tbody>
</table>

**Comprehensive examination**

All students are required to complete the Certified Rehabilitation Counselor (CRC) Examination in conjunction with RHAB 695 or 696.

**Specializations**
In collaboration with the faculty adviser, students may wish to design a program of study around a specific area of interest. Specializations in substance abuse, mental health, physical/sensory disabilities and gerontology are the most common in the department. Careful planning will typically allow students to meet the educational requirements for several additional credentials beyond the Certified Rehabilitation Counselor (CRC); e.g., Licensed Professional Counselor (LPC), National Certified Counselor, Certified Mental Health Counselor, Certified Case Manager, Certified Vocational Evaluator, Certified Disability Management Specialist, Rehabilitation Provider (Virginia), or Master Addictions Counselor. Specialization is achieved through:

- Customization of assignments in required courses such as RHAB 640, RHAB 633, RHAB 691 or RHAB 654. These courses often involve assignments that require the student to specify a population of interest that the student is free to select.
- Required courses specific to your population of interest (e.g., RHAB 521).
- Careful selection of elective course work (e.g., RHAB 522, RHAB 523, RHAB 533).
- Careful selection of a 600-hour internship site and supervisor (RHAB 695-696).
- Additional elective course work beyond the required 48 credits.

**Foundations of clinical training**

According to CORE Standards and the requirements of the department, students must have supervised rehabilitation counseling fieldwork and internship experiences that include:

- A minimum of 100 clock hours of fieldwork experience (as part of RHAB 691).
- A minimum of 600 clock hours of internship experience in rehabilitation settings (as part of RHAB 695-696).
- Written expectations and procedures for these experiences that are distributed to students and agency supervisors.
- The following activities: orientation to program components, policies and procedures; introduction to staff and their roles and functions; identification of the expectations for students; observation of all aspects of the delivery of rehabilitation counseling services; work assignments performing the tasks required of an employed rehabilitation counselor in a rehabilitation setting from intake to discharge and/or placement; reporting, including all required academic reports as well as logs, weekly progress reviews and summaries of activities.
- Evaluation of student performance by the agency supervisor and the faculty supervisor, and including self-evaluation by the student.

Internship experiences shall be carried out under the regularly scheduled supervision of a CRC. The quality of supervision shall be maintained by involvement of VCU faculty in terms of in-service training, consultation, information and the provision of professional development resources to agency supervisors.

**Colloquia and grand rounds**

Periodically, special colloquia, grand rounds, workshops and institutes are offered for department students and agency personnel. Students will receive reasonable notice of these events, and some may be required for specific classes. Students should make every effort to attend because these experiences significantly enrich the curriculum.

**Time limit for completion of degree**

All degree requirements must be met within seven years from the date of initial enrollment.

**Combined Certificate in Aging Studies (Post-baccalaureate graduate certificate) and Master of Science in Rehabilitation Counseling (M.S.)**

The Department of Rehabilitation Counseling, in cooperation with the Department of Gerontology, provides its degree-seeking students with the opportunity to earn the Certificate in Aging Studies while concurrently completing the requirements for the Master of Science in Rehabilitation Counseling. Students must meet admission requirements for both the rehabilitation degree and the gerontology certificate program, and admission into one is independent of the other. Additional information, including the specific program of study for the counseling program, may be obtained in the Department of Rehabilitation Counseling. Information on the curriculum presented by the Department of Gerontology can be obtained by contacting the chair of the Department of Gerontology.

**Admission requirements**

See the individual program pages for admission requirements specific to the separate degrees.

**Curriculum**

In addition to the requirements for the Master of Science in Rehabilitation Counseling, the certificate program requires the completion of 15 credits in gerontology and six credits in rehabilitation counseling.

**Program in Patient Counseling**

Patient counseling is the practice of communicating empathic concern, support and sensitive spiritual counsel to the physically or emotionally troubled person in the traumas of life. There is a long history of a concerted effort toward this end at the VCU Health System. With the appointment of Dr. George D. Ossman as chaplain in 1943, the administration gave clear evidence of its awareness of the need for a specialized caring ministry to hospitalized patients and their families. The chaplaincy program was significantly expanded in 1958 and was accredited to begin the education and clinical training of persons in patient counseling. Since then, a continuous program has been in existence and has evolved into the present program in patient counseling. Patient counseling, as it exists today, became an integrated program in the School of Allied Health Professions in 1970. A comprehensive curriculum review was completed in 1999.

With the rapid growth of health care and the increasingly complex problems of medical ethics and viable delivery systems, it is very important to educate qualified persons to deal with the human dimensions of illness as well as the personal and family stressors related to it. Through this program, VCU has an opportunity to make an impact upon health care education by emphasizing the spiritual dimension of human needs in life crises. By so doing, this university has a significant role to play in the important task of keeping health care holistic and utilizing technical and scientific methodology in the context of a deep respect for the total life of persons.

**Accreditation**

The program is accredited by the Association for Clinical Pastoral Education, Incorporated. It is offered in collaboration with the VCU Health System.

**Administration**

Alexander F. Tartaglia
Associate Professor and Program Chair

**Objectives**

The Program in Patient Counseling is designed to assist an individual to work in the health field as one skilled in dealing with the whole person in the context of
life’s crises and in a cooperative interprofessional team approach. It is offered to persons who have an existing identity in a helping or counseling profession. This includes clergy, social workers, institutional counselors, education specialists, psychologists, community health workers and others in the health care professions.

Facilities
West Hospital (N2S) is the base for the educational program, and limited space is available in clinical areas to work with persons and families in crisis. The Main Hospital, mezzanine level, contains the chapel, family consultation room and administrative offices.

Code of ethics
The professional behavior of the student is expected to be in accordance with the Code of Professional Ethics, as adopted by the Association for Clinical Pastoral Education, Inc. and the Code of Ethics of the Association of Professional Chaplains.

Programs
Students serve in the dual capacity of providing pastoral care service while learning. Extensive clinical involvement, including night and weekend responsibilities, is required for selected courses and clinical pastoral education credit. Each student receives individual supervision by a member of the faculty.

- Intern Certificate
- Postbaccalaureate Graduate Certificate in Patient Counseling
- Master of Science in Patient Counseling

Students who are unsuccessful in demonstrating completion of designated clinical pastoral education outcomes in any program will be required to develop with a faculty mentor an individualized plan of study toward their completion. Typically, this plan will be accomplished through additional course work or a directed independent study.

Continuation requirements, advising, transfer and part-time status
A student must maintain a minimum GPA of 3.0 in all course work completed at VCU. A student who falls below that minimum will have one semester to remedy the deficiency.

A student must register for at least one credit hour each academic year for continuation in the program. Any student who fails to register must have prior approval to do so or be dropped from the program and must reapply for reinstatement.

There is a five calendar-year maximum for students to complete the Master of Science degree and a seven calendar-year maximum for the dual degree. The graduate certificate program must be completed within a four calendar-year maximum. Part-time students who wish to accumulate concurrent ACPE credit need to be sure that course work is completed in accordance with ACPE standards.

A maximum of eight credits may be transferred from another university toward the Master of Science course requirements provided these credits have not been applied to a previous degree. A maximum of one-third of the didactic hours may be transferred from another VCU program. Dual degree candidates may apply six credits from their seminary studies to the VCU degree. Transfer is given at the discretion of the chair after consultation with the faculty, subject to university approval. Credits are not transferable to either of the certificate programs.

Students who have been admitted to the graduate certificate program may be admitted to the master of science degree with advanced standing after the completion of at least 18 credits with a “B” or better. All credits of a “B” or better will transfer to the degree program.

Upon admission to all programs students will be assigned a faculty adviser.

Patient counseling courses
Descriptions for all courses offered by the university may be accessed through the online courses database at www.pubapps.vcu.edu/vcucourses. You may search by unit, subject or keyword, as well as by degree level.

Follow this link to patient counseling (PATC) courses.
• supplemental ACPE application materials; and
• personal interview with a member of the faculty or an approved substitute.

Special requirements:
Contact the department for specific admission requirements.

The Master of Science requires 44 credit hours of study according to one of the established curricula. A 30-credit accelerated M.S. as well as a dual degree track M.S./M.Div. with the School of Theology at Virginia Union University and Baptist Theological Seminary at Richmond are available. Course substitutions require faculty approval.

Final granting of the Master of Science requires an oral review with the faculty demonstrating completion of outcomes for Level II Clinical Pastoral Education or Supervisory Clinical Pastoral Education as determined by the chosen track of study.

Admission requirements

- Bachelor of Arts or its equivalent.
- Completed graduate application.
- Supplemental ACPE application materials.
- Submission of the Graduate Record Examination or at least one year of graduate education with a GPA of “B” or better.
- Personal interview with faculty.
- Additional requirements for the Accelerated M.S.
  - Completion of a graduate-level degree in theology, pastoral care or a health-related field.
  - One unit of clinical pastoral education in a center accredited by the Association for Clinical Pastoral Education Inc.

International students should submit scores at an acceptable level (minimum of 550) on the TOEFL and give additional evidence of ability to communicate in English with faculty for admission to the graduate certificate and Master of Science programs.

Students seeking concurrent positions as pastoral care residents at the VCU Health System should contact the department directly. Applicants for resident positions should have completed two years of graduate theological education or a graduate degree in a health-related field with demonstrated background in theological studies and Level I Clinical Pastoral Education in an ACPE accredited center.

Monroe Park and MCV campuses

2008-09

Graduate and Professional Programs Bulletin

School of the Arts
The School of the Arts offers 25 degree programs and is comprised of more than 3,000 students. With the inclusion of our campus in Qatar, come an additional three programs and another 181 students. It all began as one night class taught by Theresa Pollak in the fall of 1928.

The school strives to be a stimulating community of students and teachers who cross the boundaries of conventional art and design disciplines, apply aesthetic and intellectual vision to the expression of complex ideas, value artistic tradition and experimentation in the search for creative solutions, connect international experience with professional education, integrate technical skills with theoretical understanding and care about the impact of their work on people.

Dean and Vice Provost for International Affairs

Allyson Vanstone  
Dean for VCU-Qatar

Joseph H. Seipel  
Senior Associate Dean for Academic Affairs and Director of Graduate Studies

John DeMao  
Associate Dean for VCU-Qatar

Nancy M. Scott  
Associate Dean for Academic Administration

Susan K. Roth  
Associate Dean for Research and Academic Affairs

Carolyn Henne  
Assistant Dean for Student Affairs

**Accreditation**

VCU School of the Arts is accredited by the National Association of Schools of Art and Design, the National Association of Schools of Dance, the National Association of Schools of Music, and the National Association of Schools of Theatre.

**Visual arts**

All visual arts degree programs: art education, art history, communication arts, craft and material studies, fashion (design and fashion merchandising), film (cinema), graphic design, interior design, kinetic imaging, painting and printmaking, and sculpture

National Association of Schools of Art and Design

Art education (bachelor’s and master’s degrees)  
National Association of Schools of Art and Design, National Council for Accreditation for Teacher Education, Virginia Department of Education

Interior design (bachelor’s degree)  
National Association of Schools of Art and Design, Council for Interior Design Accreditation

**Performing arts**

Dance and choreography (bachelor’s degree)  
National Association of Schools of Dance

Music (bachelor’s and master’s degrees)  
National Association of Schools of Music  
• Music education concentrations (bachelor’s and master’s degrees)  
National Council for Accreditation National Association of Schools of Music, for Teacher Education, Virginia Department of Education

Theatre (bachelor’s and master’s degrees)  
National Association of Schools of Theatre  
• Theatre education concentration (bachelor’s degree)

**Programs**

The School of the Arts offers degrees in the following areas of study:

**Art Education**

• Bachelor of Fine Arts  
• Master of Art Education

**Art History**

• Bachelor of Arts  
• Master of Arts  
• Doctor of Philosophy

**Communication Arts**

• Bachelor of Fine Arts

**Craft and Material Studies**

• Bachelor of Fine Arts  
• See Fine Arts concentrations

**Dance and Choreography**

• Bachelor of Fine Arts

**Design**

• Master of Fine Arts (with concentrations in interior environments and visual communications)

**Fashion**

• Bachelor of Arts  
• Bachelor of Fine Arts

**Film**

• Bachelor of Arts

**Fine Arts**

• Master of Fine Arts (with concentrations in ceramics, fibers, furniture design, glassworking and jewelry/metalworking; kinetic imaging; painting or printmaking; photography and film; sculpture)

**Graphic Design**

• Bachelor of Fine Arts

**Interior Design**

• Bachelor of Fine Arts

**Kinetic Imaging**

• Bachelor of Fine Arts  
• See Fine Arts

**Music**

• Bachelor of Arts  
• Bachelor of Music  
• Master of Music

**Painting and Printmaking**

• Bachelor of Fine Arts  
• See Fine Arts

**Photography and Film**

• Bachelor of Fine Arts  
• See Fine Arts

**Sculpture**

• Bachelor of Fine Arts  
• See Fine Arts

**Theatre**
School of the Arts Visual Resource Center
The School of the Arts Visual Resource Center, located in the Pollak Building, has a collection of more than 450,000 slides and a working collection of current art publications and magazines. VCU is a short distance from Washington, D.C., Baltimore, Philadelphia and New York City and the museums, libraries and research facilities in those urban areas.

Graduate information

Graduate admission

Admission procedures
Application forms and instructions for applying to all graduate programs in the School of the Arts are available on the School of the Arts Web site at www.vcu.edu/arts/

General information about admission to graduate study and application procedures can be found in the Graduate School section of this bulletin or on the Graduate School Web site.

Admission requirements
For Ph.D. degree, see Ph.D. in Art History section.
For all other degrees (M.A., M.A.E., M.F.A. and M.M.):
- Applicants should hold the baccalaureate degree from an accredited institution.
- It is expected that applicants will have a 3.0 (“B”) average on the last 60 semester hours of undergraduate work.

The prospective student should consult the appropriate section of this bulletin for additional admission requirements for a particular degree program. Such requirements include:
- The Graduate Record Examination (GRE) for applicants to art history.
- An audition and examination for music applicants, as described in the program description for the M.M. degree.
- An audition or presentation of portfolio, as well as a personal interview, for applicants for the M.F.A. in Theatre.
- A portfolio review for all applicants to the visual arts M.F.A. degrees (a personal interview is encouraged).

Graduate student status
The School of the Arts recognizes two categories of graduate students. The first is comprised of those who are accepted either provisionally or as students with full standing into the graduate degree programs of the various departmental areas. These students may matriculate full time or part time except for the residence limitation discussed elsewhere in this bulletin.

The second category is that of the nondegree-seeking graduate student, or “special” graduate student. There are two types of “special” graduate students. The first is the student whose expectation of eventual acceptance into a graduate program is high and who wants to begin graduate work while application materials are being completed and processed.

Holders of the baccalaureate degree from recognized institutions may enroll in graduate courses as nondegree-seeking special graduate students, but such courses are not applicable toward a graduate degree from this institution unless the student is accepted into a graduate degree program prior to the conclusion of the semester in which the student registered as a nondegree-seeking graduate student.

A nondegree-seeking student who is later admitted as a degree-seeking student will not be allowed to apply toward a degree more than six credits earned as a nondegree-seeking student.

The second type of nondegree-seeking graduate student is the student who holds a baccalaureate degree, who wishes to take graduate courses for personal enrichment, and who does not intend to work toward a graduate degree. There is no limit to the number of credits that students in this category may take, as long as the academic performance is credible.

All nondegree-seeking (“special”) graduate students must have written permission from the chair of the appropriate department in order to enroll in classes.

Registration for graduate students
Graduate art students are urged to plan their schedules and register during advanced registration. Registration materials for students accepted into advanced degree programs are available in the department during the advance registration and registration periods. The advantage of advanced registration is that of securing places in classes before they are closed and of obtaining proper counsel from advisers. All graduate students must see their assigned advisers for schedule planning and signature approval. New nondegree-seeking graduate students, or those contemplating registration as such, must secure written permission to register from the departmental chair.

Continuous enrollment policy for graduate students
Graduate students in the School of the Arts must observe the University Continuous Enrollment Policy as explained in the Graduate Studies at VCU chapter of this bulletin.

Candidates for all advanced degree programs, after completing all formal course work, must register for at least one semester hour of credit each semester, except during the culminating graduate project (dissertation, thesis, creative project, exhibition, recital, etc.) is completed and the student is ready to graduate. Also, if candidates intend to graduate in August, they must be enrolled for at least one semester hour in the summer session.

Transfer credit and graduate study
A maximum of nine graduate credits may be transferred from other accredited institutions and applied to any of the graduate degree programs in the School of the Arts upon approval of the department chair.

Graduate advising
All students accepted into advanced degree programs must make an appointment with the chair of the department or the graduate adviser prior to registration for their first semester of course work. Normally, the student’s initial adviser will be the chair of the department; but students may be assigned an adviser more directly related to their areas of concentration.

Students also are encouraged to consult faculty members outside their major area and arrange with the appropriate departmental chair to use facilities and equipment available in other departments.

Finances for graduate students

Special charges
All degree-seeking graduate students are charged an art comprehensive fee. The art comprehensive fee is not charged to students who are registered only in course work to complete a dissertation/thesis/creative project or who are enrolled in order to satisfy the one-credit requirement for continuous enrollment. Nondegree-seeking graduate students enrolled in any of the courses that require an additional outlay for materials will be billed for those individual fees by the Student Accounting Department.

In addition to the comprehensive fee for all majors in the School of the Arts, all students registering for private music lessons pay an applied music fee.

Financial support
The School of the Arts awards a limited number of graduate assistantships and scholarships to full-time students. Please see the specific program requirements for more information and application deadlines.

Advanced degree candidacy
Students seeking an advanced degree in all programs must apply for advanced degree candidacy. Those taking the M.A.E. And the M.M. must submit the application during or after the completion of the first nine semester credits of graduate work and prior to the completion of 18 semester credits. Students pursuing the M.F.A. Degree must submit the application during or after the
completion of the first 15 semester credits of graduate work and prior to the completion of 30 semester credits. Applications for candidacy are available in the departmental offices and the Office of Graduate Studies, School of the Arts.

Admission to a degree program does not constitute candidacy, and admission to degree candidacy is not an automatic process. Departments carefully review applicants for candidacy on such basis as examination or review of creative work or performance. Upon certification by the department that the applicant has met all departmental expectations, including the minimum 3.0 GPA and is adequately prepared to continue pursuing the degree program, the School of the Arts will admit the applicant to degree candidacy.

Students who are found to be inadequately prepared to continue their graduate programs, but who demonstrate the potential to ultimately fulfill degree requirements will be advised as to what additional work will be needed in order to meet departmental expectations. Candidacy, in such instances, will be postponed until departmental expectations are satisfied; postponement of candidacy may result in termination of financial assistance. Students whose academic or creative work demonstrate no likelihood of successful completion of a graduate program will be denied candidacy by the School of the Arts.

Advanced degree requirements

- Students must achieve candidacy (with the exception of art history students).
- Students must complete all formal course work.
- Students must maintain at least a 3.0 cumulative GPA. No grade below “B” will count toward graduation for students in the art history and the visual communications degree programs. For all students in the theatre program, any grade below “B” in any course will result in termination from the degree program. Students in all programs in the Department of Music must not have more than six hours or 20 percent of semester hours attempted — whichever is greater — with a grade of “C.” For all other degree programs in the School of the Arts, no grade below “B” is acceptable for any course within the student’s major department, and a grade below “B” in a course in the student’s major department will result in termination from the degree program.
- All students must complete the culminating project (dissertation, thesis, final examination, creative project, recital, etc.) as outlined in departmental guidelines. The thesis, or other written documentation related to the culminating project, must be done in a form that can be retained by the university and in accordance with departmental guidelines. Students preparing a thesis must use the guidelines set forth in the Preparation of Thesis, available in departmental offices or the Office of Graduate Studies, School of the Arts.

Residency requirements for graduate study

Candidates for the master of fine arts degree in the fine arts and theatre must complete a minimum of one-third of their degree program semester-hour credits within one calendar year.

Candidates for all master’s degrees in the School of the Arts have five years plus two possible extensions of one year each to complete all degree requirements. The above limitations apply to both full-time and part-time students. A petition for an extension is initiated with the academic or thesis adviser.

Ceramics (see Fine Arts, Master of Fine Arts, M.F.A.)

For information on the ceramics track, see the Master of Fine Arts in Fine Arts.

Design, Master of Fine Arts (M.F.A.)

Admission requirements summary

Design, Master of Fine Arts (M.F.A.)

Indicate specialization:

The purpose of this advanced degree program in design is to prepare the individual designer to assume a leadership role in a complex and expanding profession. The course work, applied experience and research that constitute the program will enable the designer to better solve visual and spatial problems and to function more effectively as an administrator, planner and educator.

The program offers the graduate student the opportunity to use appropriate courses and resources from schools within the university, to participate in internships and research with various agencies and organizations concerned with programs of design, and to view design as an interdisciplinary profession with an essential contribution to make toward the solution of the problems of today.

For general department information, visit www.vcu.edu/arts/areas_of_study/graduate_programs.html.

Characteristics of the program

The Master of Fine Arts in Design is an advanced interdisciplinary program in the study of design that utilizes knowledge and human potential in alternative ways to define problems and create change.

Graduate students not only have the opportunity to work within a design field, such as visual communications and interior environments, but also have the opportunity to develop competencies across fields and to engage in research and inquiry of a social or environmental nature to create new visual forms and communicative content in a rapidly changing society.

Internship and field experiences

Within a professional school of the arts in an urban university there are excellent opportunities for appropriate graduate field experiences. They include:

- formal arrangements with state agencies, industries, foundations and community organizations that would enable the graduate designer to function as a member of a project team or task force,
- service to various organizations, offered as the need arises, possibly with the student working on a specific problem or project, and
- research internships developed with the university on school-supported or outside-funded projects, especially those that concern social problems, health care and institutional environments.

Program requirements

Thesis

The thesis or creative project is a requirement for the M.F.A., design (visual communications) degree and a research-design project and exhibition are required for the M.F.A., design (interior environments) degree. The culminating work is done in a form which can be retained by the university.

Examples of thesis

Interior environments: An investigation in a scholarly area or specific research and documentation of a technical or creative project.

Visual communications: An exhibition of a visual communications problem appropriately documented or a specific research problem that explores the communicative, formal, and/or technological aspects of visual problem solving.

School of the Arts and university courses

The following courses common to all graduate programs in the School of the Arts are available to M.F.A. in Design students who desire to engage in research supervised by qualified professors within the school and other academic divisions within the university.

ARTS 592, 692 Individual Projects/Fieldwork
ARTS 704, 705 Research in the Arts

A variety of graduate courses offered within the School of the Arts can be utilized as electives by the student in this degree program. Some examples are:

ARTH 539 Advanced Studies in 20th Century Art and Architecture
ARTH 574 Advanced Studies in Film
PAPR 605 Graduate Painting
PAPR 615 Graduate Printmaking
PAPR 621 Graduate Drawing
SCPT 500, 600 Graduate Sculpture
THEA 603, 604 Problems in the History of Dramatic Literature

VCU offers a wealth of graduate courses that can, as electives, support the educational process and personal development of graduate students.

Interior environments – postprofessional track
Admission requirements summary  

**Interior environments – postprofessional track**

<table>
<thead>
<tr>
<th>Degree:</th>
<th>Semester(s) of entry:</th>
<th>Deadline dates:</th>
<th>Test requirements:</th>
</tr>
</thead>
<tbody>
<tr>
<td>M.F.A.</td>
<td>Fall</td>
<td>Feb 1</td>
<td>None</td>
</tr>
</tbody>
</table>

Special requirements:  
Please see www.vcu.edu/arts/prospective_students/graduate_studies for details on the application process.

The Postprofessional Track is a concentration in interior environments, one of about 10 available nationally, that allows students who already have an undergraduate degree in interior design or architecture the opportunity to develop an individualized direction in scholarship. Admission is highly selective and open only to students who have demonstrated a high caliber of work at the undergraduate and/or master’s level.

**Specific admission requirements**

Students may enter the postprofessional track in the fall semester only. Admission to the graduate degree program follows successful completion on an undergraduate degree program in interior design or in a related design degree program (such as architecture). All students are required to have a cumulative 3.5 GPA before entering the program. A proposal that outlines the topic and course of study and a three to five page (minimum) sample of academic writing must be submitted with the application. Prospective students should identify both their area of specialization and the faculty member(s) they wish to work with in their application. Interview is highly recommended.

Students are required to have computer graphics and word processing proficiency. A PC laptop computer is required. Information about the current computer package is available on the department Web site.

**Portfolio**

A minimum of 10 recent design projects that exemplify awareness, understanding and competency in creative design, graphic skills and technical ability are required. Other pertinent data should be included as necessary.

**Degree requirements**

A minimum of 60 credits is required within prescribed courses. A research-design project is required to complete the program of study. This project is undertaken and developed in the context of IDES 699 and must consist of the testing of an original idea that is supported by research. This information will be synthesized through the design development process and culminate in an individual creative project of complex scale and scope. Documentation must follow established guidelines and be presented in a form that can be retained by the department and the university. On completion of the thesis, students participate in an oral examination and a graduate exhibition.

</tbody>
</table>

Special requirements:  
Please see www.vcu.edu/arts/prospective_students/graduate_studies for details on the application process and TOEFL score requirements.

The professional entry level track is a 60-72 credit program for second-degree seekers who have a proven record of academic excellence in a field other than architecture or interior design and are interested in pursuing a career in interior design. The structure of the track echoes the B.F.A. in Interior Design program in content, but advances the student at a very accelerated rate during the first year and summer, bringing students parallel with the curriculum of the postprofessional track by the second year.

The curriculum is highly sequenced and students are admitted to the program for the fall semester only. All incoming students are required to take part in an intensive workshop in the summer that introduces and develops drawing, presentation skills and an understanding of two- and three-dimensional design methods. Students must successfully pass the workshop with a grade of “B” or better to begin the professional entry level track. Applicants who have an art or design background are strongly encouraged to submit a portfolio for review with their application. PowerPoint is the preferred format for the portfolio. Applicants are also required to submit three letters of recommendation and a three-to-five page writing sample.

Undergraduate preparation
The 36 semester credits in studio art should include a minimum of 20 semester credits in visual communications and/or related fields. Under special circumstances, these requirements may be waived.

Portfolio
A minimum of 20 and a maximum of 40 images that demonstrate visual organization, creative problem-solving ability and potential for research and growth are required. Portfolios may be submitted in either slides or CDROM (PDF files preferred). Under special circumstances, these requirements may be waived; applicants are accepted into a provisional course of study.

Interview
The department strongly recommends that applicants arrange an interview with the associate chair to meet with graduate faculty and current students and to tour facilities. Applicants may contact the department to schedule an interview.

Special requirements:
Please see www.vcu.edu/arts/prospective_students/graduate_studies for details on the application process.

The graduate program in visual communications is oriented toward individuals interested in pursuing a career in design education and/or furthering their professional practices, in conducting visual or theoretical research, and in investigating the intersections of function and expression in design problem solving.

Specific admission requirements
The priority deadline for fall admission is Feb. 1. The program will continue to review applications on a space-available basis until June 30.

Fibers (see Fine Arts, Master of Fine Arts, M.F.A.)
For information on the fibers track, see the Master of Fine Arts in Fine Arts.

Fine Arts, Master of Fine Arts (M.F.A.)

Admission requirements summary

<table>
<thead>
<tr>
<th>Fine Arts, Master of Fine Arts (M.F.A.)</th>
<th>Indicate specialization:</th>
</tr>
</thead>
</table>

Students may be admitted to one of the following School of the Arts Master of Fine Arts degree tracks: ceramics, fibers, furniture design, glassworking, jewelry/metalworking, painting, photography and film, printmaking or sculpture. Students completing the M.F.A. in Fine Arts will be prepared for professional artistic practice directed toward the creation of works of art, the application and transmission of knowledge about works of art and their interrelationships with
each other and with other aspects of culture. The graduate program advances the development of:

- Individual studio and scholarly talents, interests and philosophies, used creatively to both expand and preserve our cultural heritage.
- Professional studio competence as exemplified by a significant body of work.
- Individuals with the potential to solve contemporary problems in all aspects of the visual arts and to explore and address new questions and issues.
- Professional competence in the dissemination of knowledge, including logical, clear verbal and written presentation of aesthetic ideas in teaching and other contexts.
- Scholarly competence in the organization, evaluation and interpretation of knowledge.

For general department information, visit www.vcu.edu/arts/areas_of_study/graduate_programs.html.

Admission requirements

Undergraduate preparation

In addition to the School of the Arts admission requirements, applicants in the visual arts must have completed a minimum of 36 semester hour credits in art at the undergraduate level.

Portfolio

Refer to the specific specialization for the portfolio requirements.

Characteristics of the program

In M.F.A. studio art programs, assessment of progress is conducted on a regular and periodic basis through scheduled critiques and final course critiques and evaluations. Students have frequent opportunities to exhibit their work in the context of their educational programs. They are encouraged to develop and present their work in circumstances that develop connections with the professional world related to their course of study. Students are admitted to degree candidacy after receiving approval by a faculty review committee.

Program requirements

Each specialization within the M.F.A. in Fine Arts program requires specific course work. Refer to the specific specialization for the program pattern. The M.F.A. candidate is required to present a final body of work demonstrating professional competence. This usually takes the form of an exhibition, written statement and oral review by a graduate faculty committee. The documentation of the culminating work is done in a form that can be retained by the university.

Specializations

- Ceramics, fibers, furniture design, glassworking or jewelry/metalworking
- Kinetic imaging
- Painting or printmaking
- Photography and film
- Sculpture

Special requirements:

Please see www.vcu.edu/arts/prospective_students/graduate_studies for details on the application process.

The M.F.A. program requires 60 credits, which students usually complete in two years of full-time study. The majority of credits are taken in the student’s area of specialization. Graduate seminars, art history courses and other studio/academic electives round out the graduate student’s individualized program. Studio visits and critiques with visiting artists are an important aspect of the program.

Within the studio concentration, emphasis is placed on self-motivation, individual investigation, and the development of professional attitudes and skills. Graduate students are expected to demonstrate a serious commitment to their work and to develop mature ideas and forms of expression. Admission to the graduate program is highly selective and competitive.

Graduate students interact formally and informally with the faculty in their areas and with other faculty in the School of the Arts. Each graduate student works closely with a faculty committee that meets twice a semester for critiques and discussions. At the end of the first year, students present their work to their committee and departmental faculty in a candidacy review. At the successful completion of the 60 credits, a thesis exhibition is mounted at the university’s Anderson Gallery or at an alternative venue.

Admission requirements

In addition to the requirements specified in the M.F.A. in Fine Arts section of this bulletin, students are required to submit a portfolio. Please see the departmental Web site for details.

Kinetic imaging
Admission requirements summary

**Kinetic Imaging**

| Degree: M.F.A. | Semester(s) of entry: Fall | Deadline dates: Feb 15 to be considered for teaching assistantships, working fellowships and scholarships | Test requirements: Jan 15 to also be considered for the University Graduate School Fellowship |

Special requirements:
Please see [www.vcu.edu/arts/prospective_students/graduate_studies](http://www.vcu.edu/arts/prospective_students/graduate_studies) for details on the application process.

The Department of Kinetic Imaging is committed to the artistic exploration of video, animation and sound. The M.F.A. program emphasizes the extension of these practices into the arts and their connection to contemporary issues in visual culture.

Graduate students are exposed to a vigorous visiting artist schedule. Through studio reviews, seminars and research, the students are expected to build an awareness of contemporary and historical definitions of art that will influence their creative work. In addition to their own investigations, graduate students participate in and contribute to the undergraduate program.

While the graduate program is generally a two-year, four-semester in-residence program, students are expected to continue studio pursuits either on campus or at an alternative site throughout the calendar year.

**Painting or printmaking**

| Degree: M.F.A. | Semester(s) of entry: Fall | Deadline dates: Feb 15 to be considered for teaching assistantships, working fellowships and scholarships | Test requirements: Jan 15 to also be considered for the University Graduate School Fellowship |

Special requirements:
Please see [www.vcu.edu/arts/prospective_students/graduate_studies](http://www.vcu.edu/arts/prospective_students/graduate_studies) for details on the application process.

The Master of Fine Arts program is based on intensive studio practice at an advanced level in the areas of painting and printmaking. The program is highly selective and is presently limited to 15 participants.

The Master of Fine Arts degree program in painting or printmaking requires 60 credits and is usually completed in two years of full-time study. Most of these credits are in studio areas and are augmented by related courses in specialized academic fields. A graduate seminar meets weekly and addresses topics related to contemporary art and theory. Two semesters of Art and Critical Theory, a course that surveys the major themes of contemporary art criticism, also are required.

Graduate students meet with individual committees composed of three faculty members. Each committee and student conducts an ongoing dialogue and critique. At the end of the second semester students discuss their work at a candidacy critique comprised of their committee and additional faculty. M.F.A. recipients mount a comprehensive exhibition of their work at the university’s Anderson Gallery at the successful conclusion of the program’s second year.

**Admission requirements**

In addition to the requirements specified in the M.F.A. in Fine Arts section of this bulletin, students are required to submit a portfolio. The portfolio should consist of 20 slides of representative work from the chosen specialization (either painting or printmaking). Digital portfolios in the form of a PowerPoint presentation or a folder of JPEG files, sized no larger than 1024x1024@72 dpi, are accepted. Slides should be sent in a clear plastic slide sheet with an information page that includes title, size, medium and date for each work. Digital portfolios should include the title, size, medium and date within the PowerPoint presentation or in a separate information document. Word or plain text is acceptable.

Special requirements:
Please see www.vcu.edu/arts/prospective_students/graduate_studies for details on the application process.

The program is designed to be flexible. Participants in the program may use either traditional or electronic technology to accomplish their personal goals. The program culminates with the presentation of a body of work, both written and visual, that coherently expresses some aspect of the medium.

The successful candidate for the M.F.A. in Fine Arts degree will be prepared to function as an artist working in photography or film and to begin a career in teaching photography or film.

Admission requirements

Undergraduate preparation

Thirty-six semester hour credits in studio art at the undergraduate level are preferred; they should include a minimum of nine semester hour credits in photography or cinematography. Applicants who do not meet these requirements may be considered.

Portfolio

A portfolio is required for admission to this program. Please see the departmental Web site for details.

Degree requirements

The advanced study of photography and film is both broad and varied. Therefore, the program’s requirements are flexible and determined by the needs of each student on an individual basis. There are, however, a few definite requirements. On completion of the program, each student must have knowledge of contemporary art history, a more in-depth knowledge of the history of his or her discipline and an understanding of the critical dialogue that is connected with his or her medium. Courses are suggested for students to meet these requirements, based on their background.

Typical program pattern

| Photographic studio | 24 |
| Seminar in photography and film | 12 |
| Research in photography and film | 9 |
| Approved electives | 12 |
| Graduate exhibition | 3 |

Special requirements:
Writing sample reflecting multimedia interests for all applicants. Portfolio for students wanting to take studio courses at graduate level.

This interdisciplinary Ph.D., a collaboration between the Department of English, the School of the Arts and the School of Mass Communications, is a 42-credit program of core and elective courses, seminar experiences and creative work, and a strong research component in the form of a dissertation project and defense.

The MATX Ph.D. theoretically and practically addresses a range of media, focusing on the production, dissemination and employment of literary texts, works of art and other types of texts, and, in turn, on how these texts function within specific settings informed by gender, ethnicity, class, race and other cultural factors. The course of study in the Ph.D. program also extends its reach to film and new media, television, and advertising, responding to the growing need for the study of visual and virtual texts. The program is not limited to one department or discipline within the participating units. Rather, it breaks down disciplinary walls, encouraging students to fashion new intellectual areas for the study, creation and dissemination of knowledge.

Curriculum

The 42-hour curriculum of the Ph.D. program in Media, Art, and Text is designed to foster an intellectual, creative and artistic environment in which students from different disciplines can work collaboratively and independently to develop and disseminate knowledge in this emerging field.

Core curriculum

The first year has 12 hours of shared course work that is required of all candidates and six hours of core electives. The courses include:

**First year**

<table>
<thead>
<tr>
<th>Fall</th>

</tbody>
</table>

**Spring**

9 hours of electives and study credits to prepare for spring exams and to write a project proposal. By the end of the spring semester, candidates should have completed their comprehensive exams. By the end of the spring semester, candidates should also have their project proposal completed and approved.

Students will be required to take 18 hours in elective courses. In addition to MATX 690, the following 500- and 600-level seminars also may be used for elective credits. Students are advised to choose courses that directly relate to their research and creative work. Students must meet the prerequisites for these courses either through their previous course work, previously earned degrees or comparable demonstration of mastery needed for the course.

Approved electives in the second year

ARTE 501-502 Concepts in Art Education
ARTE 520 Teaching Concepts Through the Arts
ARTE 553 Art and Perceptual Communication
ARTE 592, 692 Independent Study in Art Education
ARTE 600 Seminar: Issues in Art Education

Degree requirements
Candidates for degrees are eligible for graduation upon completion of all academic requirements in effect at the time of their first registration, provided the students are continuously enrolled and provided the requirements are met within the specified time frame.

Credit requirements
Students are required to complete 42-credit hours in core and elective courses and to conduct research or produce significant work within the participating disciplines. The core course work will be completed with courses offered through Media, Art, and Text, but the additional elective courses may draw from both seminars offered through Media, Art, and Text, and approved seminars offered in participating units.

Grade requirements
To graduate, degree applicants must achieve an overall grade-point average of 3.0 ("B") on a 4.0 scale with a grade of “C” in no more than two courses. The GPA for graduation will be based on all graduate courses attempted after acceptance into the program.

Admission to candidacy for Ph.D. degree
Before admission to candidacy for the Ph.D., students must have completed all required course work, successfully completed a comprehensive examination and fulfilled the requirement for demonstrated competencies.

Requirement for demonstrated competencies
In addition to the core courses and electives selected from the curricular offerings, students must also demonstrate competencies in two areas:

1. All students must achieve competency by demonstrating mastery in computer-based media, leading to the creation and maintenance of an e-portfolio. This portfolio will be a component of the core courses in the program. When presented to demonstrate competency, the e-portfolio will be accompanied by a theoretical argument or justification.

2. Students and their dissertation committees will determine a second area of competency and the manner in which it will be fulfilled. This second competency will be integral to the interdisciplinarity of the student’s course of study. Such areas might include but not be limited to foreign language (recommended for students with art history focus), rhetoric, socio-linguistics, statistics, research methods in ethnography or other specializations, or arts administration/management.

These requirements must be met by the time of the qualifying exam (e.g., not later than the end of the third semester of the program).

Qualifying examination
Upon completion of all required course work, student will take a written qualifying examination. Exams have two components: one that covers material from the core curriculum and a second related to the candidate’s specific focus area. The exam will be written by the Graduate Studies Committee. The first portion of the exam, based on the core curriculum, will be the same for all students. The second portion will be based on a bibliography compiled by the candidate and his or her project adviser. The second portion of the exam is integral to the candidate’s project proposal discussed in the section entitled “dissertation research.”

Painting (see Fine Arts, Master of Fine Arts, M.F.A.)

Department of Art Education

The Department of Art Education supports instruction in art that encourages the construction of meaning. Faculty and students are actively involved with the art world, education and local and global communities through art-based service-learning, visual culture studies, critical thinking, exhibition, assessment, curriculum, critical theory and emerging digital technologies (virtual and interactive).

The department emphasizes interdisciplinary connections throughout the School of the Arts and the university as a whole. Through their own research and instruction, art teacher candidates engage their students and themselves in traditional and nontraditional forms of inquiry to contribute to the continuing growth and strength of the profession.

Admission requirements summary

Art Education, Master of (M.A.E.)

<table>
<thead>
<tr>
<th>Degree: M.A.E.</th>
<th>Semester(s) of entry: Fall</th>
<th>Deadline dates: Jan 15</th>
</tr>
</thead>
</table>

Test requirements:
GRE (required if GPA is below 3.0) and/or Praxis I recommended

Special requirements:
Please see www.vcu.edu/arts/prospective_students/graduate_studies for details on the application process.

The Master of Art Education offers two specific tracks. One track is for teachers who are already licensed and who wish to deepen their understanding of art education. The second is for people who hold a baccalaureate degree and wish to earn both a master’s degree in art education and a teaching license at the same time.

The program includes required and elective courses and allows students to pursue their areas of interest. All students are expected to work at a high level of independence, be self-motivated, respect peers and instructors and participate in the opportunities that the Department of Art Education and the School of the Arts offer. With the assistance of the adviser, the student determines a viable structure for the content and sequence of a program of graduate studies. Such a program can utilize the collective expertise of the art education faculty as well as appropriate community resources. Graduate course work, therefore, could include both on-campus and off-campus involvement.

Opportunities for personal growth through the M.A.E. program also include the rich resources of other graduate departments in the university in the visual and performing arts, education (including supervision, administration and special areas), the natural and social sciences and the humanities. Alternative approaches to traditional thesis methods are also encouraged within the program.

For general department information, visit www.vcu.edu/arts/areas_of_study/graduate_programs.html.

Admission requirements

Undergraduate preparation

In addition to the School of the Arts admission requirements, applicants in art education must have completed a minimum of 36 semester-hour credits in studio art at the undergraduate level. It is desirable for applicants to have had at least two years of teaching experience prior to beginning graduate studies.

Portfolio

Applicants must submit a digital portfolio through the School of the Arts online application system. The portfolio must include 10 to 15 images of the applicant’s work. In addition to the 10 to 15 images of personal artwork, applicants may also submit clearly labeled images of student work through the online system. CDs, slides, photographs, etc. will not be accepted for the portfolio requirement.

Degree requirements

Program pattern

| Art education graduate courses | 12 (minimum) |
| Approved electives | 15 |
| Issues and methods of inquiry | 3 |
| Thesis or project option or nonthesis option | 6 |
| **Total credits** | **36** |

Degree candidacy

After taking nine credits, including ARTE 690, and before completing 18 credits, all students are required to submit a written exam. This exam will determine whether a student is ready to proceed to the final stages of the degree program. Failure to submit this required exam or failing the exam may result in dismissal from the program.

Thesis or project option

A thesis or project option may develop from graduate course work or professional involvement. Projects are those endeavors of thesis proportion that do not fit the traditional thesis format. A thesis or project may be explored by descriptive research, historical research, empirical/statistical research, design of learning packages, philosophical study, curriculum development or action research.

Comprehensive exam option

In lieu of the thesis, students may complete six credit hours of graduate course work in the Department of Art Education. The selection of these six credits is subject to the approval of the student’s adviser. In addition, the student must successfully pass a written and oral comprehensive examination at the conclusion of all course work. The examination will pertain to the course work, to contemporary issues in the field and to the student’s particular area of expertise. This option is suggested for students pursuing the track that results in the M.A.E. and simultaneous teaching licensure.

If a student does not pass all portions of the comprehensive exam, she or he will have one opportunity to retake the exam the following semester. If the student fails the exam on the second attempt, he or she will be dismissed from the program and will not be eligible to graduate from the Department of Art Education.

Department of Art History

The Department of Art History offers programs that acquaint students with the humanistic discipline of art historical inquiry. While providing students with the opportunity for a broad education drawing on the liberal arts and humanities, the department also emphasizes a close bond with the studio and performing arts and enjoys a close relationship with the other departments in the School of the Arts.

The department offers a broad-based education in the humanistic discipline of art history at the baccalaureate, master’s and doctoral levels.
Overseas studies are available through university-sponsored programs abroad in Europe and Asia. Graduate assistantships and fellowships are available to full-time graduate students.

---

**Art History, Doctor of Philosophy (Ph.D.)**

**Admission requirements summary**

<table>
<thead>
<tr>
<th>Art History, Doctor of Philosophy (Ph.D.)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Degree:</td>
</tr>
<tr>
<td>Ph.D.</td>
</tr>
</tbody>
</table>

Special requirements:
Please see www.vcu.edu/arts/prospective_students/graduate_studies for details on the application process.

The Ph.D. in Art History is a research-oriented degree designed to train critical and productive scholars who are well-grounded in the literature, methodology and major art historical problems in a designated area of study. The program’s focus is on interdisciplinary and multicultural studies utilizing new critical methodologies.

Doctoral students will undertake an established program of course work and will be engaged in directed research and scholarly exposition within specialized areas of art historical inquiry.

For general department information, visit www.vcu.edu/arts/areas_of_study/graduate_programs.html.

**Admission requirements**

Prospective students holding a master’s degree in art history from VCU or any other accredited institution may apply directly to the doctoral program. In addition to all required VCU graduate application materials, applicants should submit either a completed master’s thesis or two writing samples. A personal interview with the director of graduate studies and the prospective adviser is strongly encouraged prior to submitting an application. Prospective students with master’s degrees in other fields may also apply, although additional course work may be required.

Prospective students who hold only a B.A. in art history or related field also may apply directly to the Ph.D. program but, if admitted, will need to complete the equivalent of the M.A. degree, including the thesis, before beginning Ph.D. course work. In addition to the School of the Arts requirements, applicants should have completed a minimum of 21 undergraduate semester credits in art history with additional work in relevant humanities and social science courses, such as English, philosophy, foreign language and history. Applicants should include with their application an undergraduate research paper in art history to serve as a writing sample. Students whose undergraduate training is less extensive may be admitted provisionally and subsequently attain full graduate status. Upon completion of M.A. course work (generally the beginning of the fourth semester), students wishing to continue in the Ph.D. program must secure the support of the prospective dissertation adviser and submit a formal request to the Graduate Committee. To continue students must maintain a minimum GPA of 3.8. If approved by the Graduate Committee, students will commence their Ph.D. course work the next semester, pending successful completion of the master’s thesis.

Upon completion of the first nine credits of course work (first semester), the student will choose a program adviser, who, together with the departmental chair of the Graduate Committee, will advise the student in establishing a program of study.

For application materials, write to: Director of Graduate Studies, Department of Art History, 922 W. Franklin St., Richmond, VA 23284-3046.

---

**Degree requirements**

Course work beyond the master’s degree in art history:

<table>
<thead>
<tr>
<th>credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>Major area</td>
</tr>
<tr>
<td>Minor area</td>
</tr>
<tr>
<td>Art history electives</td>
</tr>
<tr>
<td>Dissertation</td>
</tr>
</tbody>
</table>

The requirements of the Graduate School for candidacy exams and dissertation committees apply to participants in this program. Part-time study for portions of the program is possible.

**Requirements for the Ph.D. degree**

Doctoral students must demonstrate competency in two foreign languages before admission to candidacy. Foreign language competency demonstrated for an M.A. may be applied to this degree with departmental approval. Although French and German are typically the two languages of proficiency, a student may be required to demonstrate competency in other languages for study in particular areas. Students must take one departmental language exam in their first academic semester and, if necessary, the second in the second academic semester. Requests to repeat the exam more than once in a given language require departmental approval.

Ph.D. students must satisfy each of the following criteria for successful completion of the program: a) 24 credits of prescribed graduate course work beyond the master’s degree; this must include a minimum of six credits in Western and six credits in non-Western areas, and a minimum of 12 credits in seminar courses; b) all language proficiency requirements; c) the comprehensive slide and field examinations; d) attend three professional development workshops; e) approved dissertation proposal with candidacy granted; and f) completed dissertation and successful defense. All degree requirements must be completed within seven years of the first semester of enrollment in the doctoral program.

**Majors and concentration**

Ph.D. students must select major and minor areas under the direction of two different full-time department faculty members. The same faculty members may not supervise both areas for a single student. Students will select an area of minor concentration, which may be from any area of art historical inquiry outside the major or, upon approval of the Graduate Committee, may be outside the department. Students will be particularly encouraged to undertake cross-cultural investigations.

Nine credits will be taken in the major area and six in the minor; nine additional elective credits may be taken from any art history area. With approval of the Graduate Committee, students may substitute three elective credits with a course outside of the department.

**Comprehensive exam/admission to candidacy**

All master’s and doctoral students enrolled in the graduate program in art history must pass the departmental comprehensive slide examination given each semester. Doctoral students will be required to pass a field comprehensive examination, which may consist of written and oral components. After satisfactory completion of the comprehensive examination and demonstration of proficiency in two languages, the student will work with an adviser to establish a committee and will submit to said committee a dissertation proposal. Upon approval of the dissertation proposal, candidacy for the doctoral degree will be granted. Only after candidacy is granted may a student enroll for dissertation credits. (A student who does not pass the comprehensive examination may take that exam a second time. This second examination must be taken within six months of the first attempt.)

**Dissertation**

After admission to candidacy, participants proceed to complete and defend their dissertation. This is done under the supervision of the dissertation director working in concert with the dissertation committee. Participants are required to maintain continuous enrollment of at least three credit hours per semester.
A total of 39 credits in course work and thesis

Degree requirements

<table>
<thead>
<tr>
<th>Thesis</th>
<th>6</th>
</tr>
</thead>
</table>
| At least 12 of the architectural and art history credits must be taken at the 600 or 700 level. Students must earn a minimum grade of B in ARTH 690 Historiography and Methodology of Art History in order to enroll in subsequent graduate-level art history courses.

Students must demonstrate a reading knowledge of German or any appropriate Romance language by passing a departmental exam. All students must take the relevant departmental language exam during the first academic semester. Requests to repeat the exam more than once in a given language require departmental approval.

Students also must demonstrate general programmatic competence in art history by passing a comprehensive examination taken sometime toward the end of the course work.

The master’s program culminates with a thesis, written under the direction of a departmental adviser and a thesis committee.

Financial assistance

Although financial assistance is limited, funds are available. No prospective student should refrain from seeking admission to the school for financial reasons alone. However, since funds available through the School of the Arts are limited, applicants are strongly urged to seek additional sources to finance their education.

Research and teaching assistantships

Research and teaching assistantships may be available to doctoral students. Additional information is available from the director of graduate studies, Department of Art History.

Architectural history track

The Department of Art History offers a master of arts degree with a track in architectural history. While concentrating in architectural history, students are required to take courses in art history as well as museum studies and/or urban studies and planning. Such a program is designed for students who wish to pursue careers as academicians or practitioners in the field, as well as for those who wish to pursue a doctoral degree. The courses taken in museum studies, or in conjunction with the Department of Urban Studies and Planning, provide a unique interdisciplinary approach to the study of architectural history.

Admission requirements

In addition to the School of the Arts requirements, applicants should have completed a minimum of 21 undergraduate semester credits in art history with additional work in relevant humanities and social science courses, such as English, philosophy, foreign language and history. Applicants should include with their application an undergraduate research paper in art history to serve as a writing sample. Students whose undergraduate training is less extensive may be admitted provisionally and subsequently attain full graduate status.

Degree requirements

| Art history (period courses) | 21 |
| Historiography and methodology | 3 |
| Thesis | 6 |

At least 12 of the 21 art history credits must be taken at the 600 or 700 level. Students must earn a minimum grade of B in ARTH 690 Historiography and Methodology of Art History in order to enroll in subsequent graduate-level art history courses.

Students must demonstrate a reading knowledge of German or any appropriate Romance language by passing a departmental exam. All students must take the relevant departmental language exam during the first academic semester. Requests to repeat the exam more than once in a given language require departmental approval.

Students also must demonstrate general programmatic competence in art history by passing a comprehensive examination, taken sometime toward the end of the course work.

The master’s program culminates with a thesis, written under the direction of a departmental adviser and a thesis committee.

Historical studies track

Graduate studies leading to the M.A. degree in art history are intended to train students to become creative and accomplished teachers and scholars in the discipline of art history. The program is designed to provide a comprehensive knowledge of the major areas and historical periods of art as well as the various research and methodological skills requisite to the field.

The requirements listed below are in conjunction with School of the Arts graduate admission and degree requirements.
Graduate and Professional Programs Bulletin 2008-09

For more complete information and details on these procedures, contact the Department of Art History.

**Museum studies track**

The program in museum studies stresses those attitudes and skills necessary to accomplish the major goals of any professional museum operation: to collect, preserve, exhibit and interpret the art and artifacts of the past and present within an extended curriculum and professional museum environment. The course of study also includes an internship for academic credit under the direct supervision and professional guidance of individuals in the field.

The curriculum provides a broad overview of historical developments, institutional responsibilities and theoretical issues relevant to contemporary museum practice. And it offers a practical and scholarly foundation upon which students may build curatorial careers that include exhibit and/or education program development.

**Admission requirements**

In addition to the School of the Arts admission requirements, applicants should have completed a minimum of six credits in the survey of western art, nine credits of period studies and some undergraduate work in the humanities. Applicants should include with their application an undergraduate research paper in art history to serve as a writing sample. Any applicant whose training is less extensive may be provisionally admitted and subsequently may gain full graduate status upon completion of the deficiency.

**Degree requirements**

| Museum studies | 12 |
| Museum internship | 3 |
| Art history (period courses) | 12 |
| Historiography and methodology | 3 |
| Museum project or thesis | 6 |
| **Total** | **36** |

At least nine of the 12 art history credits must be taken at the 600 or 700 level. Students must earn a minimum grade of B in ARTH 690 Historiography and Methodology of Art History in order to enroll in subsequent graduate-level art history courses.

Students must demonstrate a reading knowledge of German or any appropriate Romance language by passing a departmental exam. All students must take the relevant departmental language exam during the first academic semester. Requests to repeat the exam more than once in a given language require departmental approval.

Students also must demonstrate general programmatic competence in museum studies and art history by passing a comprehensive examination taken toward the end of the course work.

An internship at one of the cooperating local or regional museums is a degree requirement of particular importance, enabling students to apply their knowledge and to develop a personal awareness of effective museum exhibition procedures. As a culmination to the course of study, students may opt to plan and mount a major exhibition on campus or at a museum in lieu of a written thesis with the approval of the department.

**Communication arts courses**

Descriptions for all courses offered by the university may be accessed through the online courses database at www.pubapps.vcu.edu/vcucourses. You may search by unit, subject or keyword, as well as by degree level.

Follow this link to communication arts (COAR) courses.

**Department of Craft and Material Studies**

The Department of Craft and Material Studies is housed in the new Fine Arts Building that includes private and semi-private graduate studios. These new facilities provide a safe and excellent physical environment in which to work. Students have access to well-equipped studios in each of the five media areas along with a computer lab and wood shop. The building also houses the facilities for sculpture, painting and printmaking, and kinetic imaging. Interaction among departments is encouraged.

In addition to the Bachelor of Fine Arts in Craft and Material Studies, the department offers graduate course work leading to the Master of Fine Arts in Fine Arts degree in five disciplines: ceramics, fiber, furniture design, glassworking and jewelry/metallworking.

The M.F.A. is the terminal degree in the studio areas and is a requirement for most university teaching positions. Every effort is made to assist students in gaining valuable teaching experience while they are in the program. The department aids the students financially through a variety of scholarships and graduate assistantships. Opportunities exist for qualified students to teach courses during the academic year and in summer school.

**Department of Dance and Choreography**

James Frazier
Associate Professor and Department Chair
www.vcu.edu/arts/dance

The mission of the Department of Dance and Choreography is to create an environment where the student experiences the demands and challenges of the professional dancer/choreographer. In a community setting where communication, mutual respect and self-motivation are encouraged, classes provide students with disciplined training that will maximize their potential to become dancers of technical excellence, choreographers with original and powerful voices and thinkers with high academic standards.

Students are trained to be performers, choreographers and teachers in this curriculum, which emphasizes modern dance and offers dance courses in modern, improvisation, composition, choreography, music, and dance forms and dance history, as well as ballet, jazz, tap, African-Caribbean, ballroom, contact improvisation, dance science, anatomy for dancers, video/choreography and

**Department of Communication Arts**

James B. Miller
Professor and Department Chair
www.vcu.edu/arts/communicationarts

Communication arts is the study and exploration of the qualities, disciplines and technologies that enable us to create and communicate with insight and vision. Our studies are firmly rooted in understanding the power of image and art to communicate.

Communication arts includes studies in:

- Drawing, which is the fundamental means to articulate ideas; it is elemental to everything we do.
- Illustration, a discipline with a rich history in drawing, painting, design and print media, which is being expanded by powerful new tools and technologies.
- Visual studies, which encompasses studio, historical, conceptual and theoretical issues that include analysis and exploration of image, media, content and context.

Study leads to a Bachelor of Fine Arts and students may choose an emphasis in either communication arts or scientific and preparatory medical illustration.

Follow this link to craft and material studies (CRAF) courses.
teaching methods for dance. Additionally, the program provides a variety of experiences in performance, choreography and production. These offerings enable students to develop as sensitive, expressive artists with professional training in dance technique; knowledge of dance philosophies and a foundation in history, enabling them to function as independent and creative artists in the field of dance. VCU Dance is an accredited member of the National Association of Schools of Dance.

### Dance and choreography courses
Descriptions for all courses offered by the university may be accessed through the online courses database at www.pubapps.vcu.edu/vcucourses. You may search by unit, subject or keyword, as well as by degree level.

---

### Department of Fashion Design and Merchandising

Karen M. Videtic  
Associate Professor and Department Chair  
www.vcu.edu/arts-fashion

The Department of Fashion Design and Merchandising offers two programs: the fashion design track leads to a Bachelor of Fine Arts degree and the fashion merchandising track leads to a Bachelor of Arts degree.

Both tracks are extremely time consuming. Students are expected to put class attendance and study time above other campus activities or employment.

All students are required to have a laptop computer. The department can provide specifications.

Students must take classes in the sequence prescribed by the department and adhere to all prerequisites. Failure to comply can lengthen the number of semesters necessary for completion of degree requirements.

Internships provide not only experience but industry contacts, and are strongly recommended. They may be conducted primarily during the summer semester.

### Fashion design and merchandising courses
Descriptions for all courses offered by the university may be accessed through the online courses database at www.pubapps.vcu.edu/vcucourses. You may search by unit, subject or keyword, as well as by degree level.

Follow this link to fashion design and merchandising (FASH) courses.

---

### Department of Graphic Design

Graphic design is a creative and analytical process that integrates art and technology to communicate ideas and information. The goal of the Department of Graphic Design at VCU is to educate students to become innovators and leaders in three related areas of professional practice: print design, sequential design and interaction design.

#### Mission statement

The Department of Graphic Design encourages the exploration of diverse problem-solving methodologies, innovative investigations and creative research in all forms of communication. It is dedicated to excellence in teaching, scholarship, academic and creative research and professional practice. The Department of Graphic Design provides both an undergraduate and graduate education stressing creative and intellectual thinking; awareness of individual, social, cultural and communicative issues; the integration of new technology; and a concern for ethical implications and the natural environment. The program actively contributes to the university, local, state, national and international communities through its scholarly and creative activities, educational programs and service efforts.

---

### Department of Interior Design

Sharran F. Parkinson  
Professor and Department Chair  
www.vcu.edu/arts/interiordesign

The department has a very comprehensive Web site with extensive information about the program, interior design in general, faculty, student work and the department newsletter. In advance of scheduling a meeting for department advising or for application to the program, students should review the Web site at www.pubinfo.vcu.edu/artweb/interiors/.

### Interior design courses
Descriptions for all courses offered by the university may be accessed through the online courses database at www.pubapps.vcu.edu/vcucourses. You may search by unit, subject or keyword, as well as by degree level.

Follow this link to interior design (IDES) courses.

---

### Department of Kinetic Imaging

Robert Kaputof  
Associate Professor and Department Chair  
www.vcu.edu/arts/kineticimaging

The Department of Kinetic Imaging prepares students to use video, animation and sound for the purpose of art-making, self-expression and experimentation. The kinetic imaging programs are designed for students who want to study video art, sound design and experimental two-dimensional and three-dimensional animation. Emphasis is placed on artistic uses of the media.
The department offers an undergraduate curriculum leading to a Bachelor of Fine Arts in Kinetic Imaging as well as a graduate level program that results in a Master of Fine Arts in Fine Arts.

Kinetic imaging courses

Descriptions for all courses offered by the university may be accessed through the online courses database at www.pubapps.vcu.edu/vcucourses. You may search by unit, subject or keyword, as well as by degree level.

Follow this link to kinetic imaging (KINE) courses.

Department of Music

The Department of Music is committed to the advancement of Western art music and jazz as academic disciplines, as fields of professional endeavor and as a viable presence in the community. Entrance and graduation requirements comply with the National Association of Schools of Music guidelines. The department offers degree programs at the baccalaureate and master’s levels, and each of them are described in detail on individual program pages within the Bulletins Web site.

Participating in the VCU musical community means involvement in a musically rich environment of studio lessons, small classes, independent study and participation in performing organizations, as well as hearing outstanding professional performers in the classical and jazz traditions. On-campus master classes with major touring artists are an important addition to the regular instructional program. Student soloists also may appear with regional and university ensembles. Through the Mary Anne Remnolds Chamber Concerts and other events, the department is one of the region’s major sponsors of music performances.

Approximately 330 students choose to major in music, with many other students from throughout the university taking courses and participating in ensembles. There are 20 full-time faculty, more than half of whom hold doctorates, in addition to 45 part-time instructors. Among the faculty are internationally recognized performers, composers, researchers and teachers — musician-educators who are active in all facets of the professional music world. The faculty includes members and regular performers with ensembles that include the Richmond and Virginia Symphonies, the New York Philharmonic, the Virginia Opera, Rhythm and Brass, the Great American Music Ensemble and National Chamber Players. The faculty maintains a high level of recognition through each individual’s publications, recordings, international performances and lectures.

The department is housed in three buildings. The principal facility is the W.E. Singleton Center for the Performing Arts, which includes the 502-seat Sonia Vlahcevic Concert Hall, faculty offices, rehearsal rooms and special studios for organ, percussion and piano. The Bowe House contains additional faculty offices and teaching studios. The Music Center has a 347-seat recital hall, classrooms, practice rooms, rehearsal spaces, faculty offices and studios.

Administration

John Guthmiller
Professor and Department Chair
www.vcu.edu/arts/music

Music courses

Upper-division undergraduate students may enroll for selected 500-level graduate courses with permission of the department chair and instructor. Descriptions for all courses offered by the university may be accessed through the online courses database at www.pubapps.vcu.edu/vcucourses. You may search by unit, subject or keyword, as well as by degree level. Unless otherwise indicated, courses must be taken in numerical sequence.

The Department of Music offers courses in the following areas:

- Use this link to see applied music (APPM) courses.
- Use this link to see music composition (MUSC) courses.
- Use this link to see music education (MUED) courses.
- Use this link to see music history, literature and theory (MHIS) courses

**Special requirements:**

Please see www.vcu.edu/arts/prospective_students/graduate_studies for details on the application process.

The Department of Music offers the Master of Music degree with a track in music education. Selection is made on the basis of prior academic performance reflected in undergraduate (and prior graduate) transcripts, an audition or interview, and a writing sample. The applicant should have completed the appropriate undergraduate program (a bachelor’s degree in music education with certification) or the equivalent for admission as a graduate student.

Prospective music education majors should submit a vita/resume, which includes education, background, teaching experience, honors and awards, publications, and any other important information. Applicants also should submit a writing sample on their "Personal Philosophy of Music Education." An interview will be scheduled with the music education faculty prior to admission.

Music education students have the option of a thesis or project. Specific information regarding the preparation of research documents and projects is available from the director of music education.

For general department information, visit www.vcu.edu/arts/areas_of_study/graduate_programs.html.

Department of Painting and Printmaking

The Department of Painting and Printmaking offers an undergraduate program that earns a Bachelor of Fine Arts in Painting and Printmaking, as well as a graduate program of study that leads to the Master of Fine Arts in Fine Arts. Students admitted to the programs are expected to have a high level of competence in either painting or printmaking. The graduate program is designed to encourage the development of professional attitudes and skills, with an emphasis on individual investigation.

The department is housed in the new Fine Arts Building with 15 individual graduate studios plus a large graduate printmaking area in addition four state-of-the-art undergraduate printmaking studios: etching, lithography, screenprinting and digital. These new facilities provide an excellent physical environment for the programs with easy access to the other fine art areas of sculpture and crafts. Established in 1928, the Department of Painting and Printmaking was the first department in what has become the School of the Arts. For nearly 70 years, the department has made significant contributions to the development of the School of the Arts’ reputation as one of the premier art schools in the country.
The Department of Photography and Film seeks to advance the highest standards of the media of photography and filmmaking by encouraging the creative and professional growth of both its students and faculty. The goal is to provide a forum for the development and exchange of visual ideas and to encourage its members to translate these ideas with a high degree of sensitivity and proficiency. The department fosters a pluralistic approach that allows both faculty and students to expand the traditional boundaries of the respective media, explore a broad range of conceptual orientations and engage in multidisciplinary practice.

The department offers undergraduate concentrations in photography and filmmaking resulting in a Bachelor of Fine Arts in Photography and Film, as well as a graduate program that leads to a Master of Fine Arts in Photography and Film with a concentration in photography and film. To promote student development and research of contemporary art practice and theory, the Department of Photography and Film presents a diverse and active visiting artist program. Through lectures, critiques and research courses, students are exposed to the valuable insights of respected international artists, scholars and critics. In addition, the visiting artists teach courses exploring the current artistic and conceptual foundations found in their own work. Graduate students are encouraged to establish an individual critical dialogue with the visiting artists and faculty and attain a strong critical and historical basis for their work.

The facilities include several critique and screening rooms; a large black-and-white darkroom; a large state-of-the-art digital photography and film editing lab; a shooting studio; a student checkout center with a wide range of still photography and film cameras, professional lights and sound recording equipment; a professionally staffed graphics lab located in the same building that provides student with digital services on several high-tech imaging devices; and two large professionally staffed graphics lab located in the same building that provides student with digital services on several high-tech imaging devices; and two large

**Department of Sculpture and Extended Media**

The Department of Sculpture and Extended Media’s eight full-time faculty members and various part-time and technical faculty represent a spectrum of directions and philosophical attitudes. Faculty interests range from formal to conceptual, from the concrete to the evanescent. This breadth of interests is presented to students and contributes to the comprehensive nature of our department. Students are not only exposed to traditional sculpture media, but encouraged to explore technology’s parameters and to pursue interdisciplinary activity.

We encourage sculpture students to broaden their experience in other areas. By promoting a curriculum that encourages students to take a wide range of courses throughout the university, we stress links between art, science, the humanities and the world. As a consequence, sculpture students have rich, productive associations with professors in many fields.

Sculpture students are challenged to exploit their full potential by questioning notions of contemporary art. Our goal is to provided students with the vocabulary, the seeds of discernment and the skills of both analysis and synthesis in order to become participants in the dialogue of our time. All of this takes place in an environment of high expectation regarding self-motivation, intellectual capacity and responsibility.

The sculpture program is housed in a state-of-the-art facility. Sculpture majors are provided with semi-private, locked studio spaces and are given time, support and encouragement to pursue their independently determined goals.

**Administration**

**Amy Hauft**  
Professor and Department Chair  
sculpture@vcu.edu

**Sculpture and extended media courses**

Descriptions for all courses offered by the university may be accessed through the online courses database at www.pubapps.vcu.edu/vucourses. You may search by unit, subject or keyword, as well as by degree level. Follow this link to sculpture and extended media (SCPT) courses.

**Department of Theatre**

The mission of the Department of Theatre is to educate and train students as theatre professionals and/or academicians in the field of performance, design/technology or theatre pedagogy.  

In fulfilling its mission, the Department of Theatre provides students with the professional and cultural foundations essential for achieving the highest standards of the art. Applicants are admitted based on demonstration of ability, genuine interest determined during an interview, and audition and/or portfolio presentation.  

In addition to introductory theatre and acting courses for non-majors, the department also serves students throughout the university with offerings in speech communication.  

The Department of Theatre employs 23 faculty and staff and enrolls 230 undergraduate and 40 to 50 full-time graduate students. Theatre VCU produces four mainstage productions and numerous graduate and undergraduate directing projects each year.

**Administration**

**David Leong**  
Professor and Department Chair

<td></td>
<td></td>
</tr>
</tbody>
</table>

#### Special requirements:

Please see www.vcu.edu/arts/prospective_students/graduate_studies for details on the application process.

The Department of Theatre offers intensive Master of Fine Arts degree programs in two tracks, the professional theatre degree track and the theatre pedagogy degree track. The professional degree program is offered in the areas of scenic design and costume design, to prepare designers for careers in regional repertory theatre and commercial production companies. The M.F.A. in Theatre Pedagogy Program is individually tailored to prepare the student to enter the field of teaching at the university or college level. Areas of concentration can be chosen from acting, directing, scene design, costume design, voice and speech, movement and choreography, and dramatic literature and dramaturgy.

The Master of Fine Arts program is based on the philosophy that the nature of theatre requires the creative collaboration of all theatre artists working together. All share the responsibility of solving problems related to planning, preparation and realization of productions.

For general department information, visit www.vcu.edu/arts/areas_of_study/graduate_programs.html.

#### Admission requirements

In addition to the School of the Arts admission requirements, applicants in theatre must have completed a minimum of 30 semester hour credits in theatre at the undergraduate level. Professional experience will be considered.

Applicants are admitted only upon satisfactory demonstration of ability and genuine interest through audition or portfolio presentation, interview, evidence of scholarly writing (essay or research paper) and a minimum 3.0 GPA. The demands of the program are stringent; and only those students who are willing to commit themselves to the work assigned and who are capable of observing strict professional discipline should apply.

An audition or presentation of portfolio is required in addition to a personal interview that the applicant must arrange with the Department of Theatre’s graduate studies adviser.

#### Special admissions requirements – professional tracks

##### Acting and directing

Applicants for acting and directing must present upon entrance at least six credit hours of undergraduate production or technical theatre course credit or the equivalent in professional experience.

##### Design

Applicants in costume and stage design must present upon entrance at least six credit hours of undergraduate performance course credit or the equivalent in professional experience.

#### Core degree requirements

Candidates in all degree track options for the M.F.A. in Theatre must satisfy the following core requirements:

<table>
<thead>
<tr>
<th>Course</th>
<th>Credits</th>

Theatre pedagogy candidates select a major area specialty, present a minor area and participate in practicum situations both in the department and with community theatre companies.
Virginia Commonwealth University’s School of Business can be traced back to 1917 when a board of private citizens organized the Richmond School of Social Economy for Social Workers and Public Health Nurses. By 1937 the school was called the Richmond Professional Institute, was affiliated with The College of William and Mary, and had added business courses to the curriculum. The school began offering a graduate program in 1962. Since then, the program has continued to develop and mature to meet the needs of the future.

**Vision**
The vision of the VCU School of Business is to be nationally recognized as the leading technologically focused school of business in the commonwealth of Virginia.

**Mission**
The mission of the VCU School of Business is to prepare students for successful careers and lifelong learning by providing management education firmly grounded in technology, interdisciplinary teamwork and global perspectives. Essential to achieving this mission is striving to excel in teaching and scholarly research, and to build effective, value-based relationships with the external community.

**Accreditation**
The School of Business is accredited by the Association to Advance Collegiate Schools of Business, which accredits programs of professional education in business at the collegiate level. AACSB International accreditation represents the highest standard of achievement for business schools, worldwide. Institutions that earn accreditation confirm their commitment to quality and continuous improvement through a rigorous and comprehensive peer review. AACSB International accreditation is the hallmark of excellence in management education.

The School of Business is the first school of business in the nation to gain accreditation from the Accreditation Board for Engineering and Technology (ABET) for its undergraduate program in information systems.

**Financial aid, scholarships and awards**

**Scholarships and awards**
In addition to university scholarships, business students may apply and compete for scholarships awarded through School of Business endowed scholarship funds or through the various School of Business academic programs. For detailed information on scholarships and awards, visit the School of Business Web site.

**Cooperative Education and internships**
Business students are eligible for the university’s Cooperative Education Program. Qualified students placed with an employer will either alternate one semester of full-time study with one semester of full-time work or combine study with part-time work during the same semester. The School of Business also offers internships, allowing advanced students to pursue part-time work assignments with area employers.

**Assistantships**
The School of Business offers a limited number of graduate assistantships to full-time students for the academic year. For further information, write to the Graduate Studies in Business Office.

Graduate students also are eligible for funds administered under the National Defense Loan and college work-study programs. For further information, write to Director of Financial Aid, Virginia Commonwealth University, Richmond, VA 23284-2526.

**Graduate information**

**Graduate programs**
The School of Business offers degree programs leading to the Master of Arts in Economics, Master of Accountancy, Master of Business Administration, Master of Business Administration/Master of Science in Information Systems, Master of Science in Business, Master of Science in Information Systems, Master of Taxation, and the Ph.D. in Business and Pharm.D./M.B.A.

**Graduate policies**

**Enrollment in graduate courses**
Students may not enroll in any graduate business courses (except MGMT 500) for credit without first being admitted formally to a graduate degree or graduate certificate program.

Exceptions may be granted by the director of graduate studies in business to students with superior academic records. No credit will be given for graduate classes taken prior to acceptance into a graduate degree program in business or economics unless such an exception has been granted. A form to request such an exception is available from the Graduate Studies in Business Office.

A “graduate transient” classification may be granted to a student in good standing in any graduate school accredited by the Association to Advance Collegiate Schools of Business (AACSB) who desires to enroll in the School of Business for any one semester or summer session. Students will be required to present certificates of graduate standing but will not have to submit the data normally required for an admission decision. A form is available from the Graduate Studies in Business Office to facilitate transient enrollment.

**Transfer credit**
A maximum of six semester hours of acceptable graduate credit earned in a degree program at an AACSB-accredited institution may be transferred and applied toward the graduate degree. Acceptance of transfer credit is made at the discretion of the director of graduate studies in business.

All transfer work must be at the A or B grade level. Students must be in good standing both at VCU and at the institution from which the credits were earned. Additionally, students must have had full admission during the time these credits were earned at that college or university. Transfer credit shall not be older than seven years at the time the degree is awarded.

Credit to be earned at other institutions after acceptance in the graduate program must be approved in advance, and approval is granted at the discretion of the director of graduate studies in business. Such work is approved only under unusual circumstances such as job transfers or other extenuating circumstances.

**Advising program**
All students admitted to graduate programs are assigned advisers. Students are expected to work with their advisers to plan their graduate programs. Each student is required to complete an approved program form and file it with the Graduate Studies in Business Office no later than the end of the first semester in which the student is admitted. The curriculum plan described on the form must be approved by both the adviser and the director of graduate studies in business. Courses taken without approval are taken at the student’s own risk.

Students are responsible for knowing and fulfilling all general and specific requirements relating to the completion of their degree programs. Answers to specific questions may be obtained from the Graduate Studies in Business Office, (804) 828-4622.
Change in program or concentrations

Students who wish to change their graduate programs or areas of concentration within the school must make that request in writing to the director of graduate studies in business. The director will advise them of the necessary requirements and whether the change is possible. The student must be in good standing at the time of change.

Notification

The student should notify in writing both Records and Registration and Graduate Studies in Business, 301 W. Franklin St., P.O. Box 844000, Richmond, VA 23284-4000, of any address changes. Students who do not wish to register in any given semester must notify in writing the Graduate Studies in Business Office of their intent not to register and their plans for continuation in the program.

Student appeals

Appeals for exceptions to policies or academic standards may be made in writing to the Graduate Studies in Business Office, School of Business, Virginia Commonwealth University, 301 W. Franklin St., Richmond, VA 23284-4000.

Individual research projects

Various opportunities exist for students to work closely with faculty on individual research projects. Courses in the School of Business numbered 690, 693 and 697 are suitable for this purpose. No more than one research course may be taken as part of a master’s program.

Registration in all research courses requires approval of both the student’s adviser and the director of graduate studies in business. Forms for this purpose are available upon request from the Graduate Studies in Business Office. Students are expected to seek permission to register in research courses by the end of the semester or summer session preceding the semester or summer session for which registration is desired. The written research report is required to be filed at the Graduate Studies in Business Office no later than the last day of classes of the semester or summer session in which the course is taken.

General requirements for master’s degrees

In addition to the general academic regulations stated in the Graduate Studies at VCU chapter of this bulletin and the regulations listed earlier in this section, master’s students in the School of Business are subject to the following requirements:

1. A course for which a passing grade was received cannot be repeated without prior written permission of the director of graduate programs in business. An appeal to the School of Business Master’s Committee is required.

2. Students who satisfy all requirements except the 3.0 average may be allowed to take a maximum of six additional credit hours to raise the average. Students are required to appeal to the School of Business Master’s Committee for permission.

3. A foundation course may be waived by the director of graduate studies in business, based on satisfactory completion of equivalent undergraduate work prior to acceptance in the program. CLEP credit at the “B” or higher level may be accepted in lieu of foundation courses with permission. The waiver of courses is at the discretion of the School of Business.

4. A maximum of two one-year extensions may be granted by the director of graduate studies in business in the time allowed to complete a degree if satisfactory progress has been demonstrated on the part of the student requesting an extension. For extensions, write to the director of graduate programs in business.

5. Students are not permitted to take undergraduate courses equivalent to foundation courses once they are admitted to the graduate program without the written permission of the director of graduate studies in business.

6. Grades received for undergraduate courses are not included in the calculation of the cumulative graduate GPA.

7. All students admitted into a program must have earned a bachelor’s degree or its equivalent. To be accepted in the graduate program, in addition to other requirements, applicants must be in good standing at the college or university they previously attended.

Graduate courses in business and economics

The School of Business courses are grouped into seven categories: accounting; economics; finance, insurance and real estate; fast track M.B.A.; information systems; management; and marketing and business law.

Courses at the 500 level may not be included in the 36 semester credits of advanced work required of any of the master’s degrees offered by the School of Business.

School of Business courses

Descriptions for all courses offered by the university may be accessed through the online courses database at www.pubapps.vcu.edu/vcucourses. You may search by unit, subject or keyword, as well as by degree level.

The purpose of the Master of Accountancy program is to provide the skills and knowledge necessary to be future leaders in the professional business community and the public sector for students who wish to specialize in the areas of accounting/information systems, auditing, financial reporting and accounting/other fields of business.

The Master of Accountancy offers 150-hour professional program leading to a Bachelor of Science and Master of Accountancy, a program for applicants with a bachelor’s degree in accounting and a program for applicants with a bachelor’s degree in fields other than accounting.

150-hour professional program

The integrated 150-hour professional program gives students the opportunity to earn both a Bachelor of Science and Master of Accountancy degrees upon completion of the required 150 credit hours of study. It is an integrated program consisting of 120 hours of undergraduate credits and 30 hours of graduate credits. A student declares his/her major in accounting at the end of the sophomore year. He/she enters the 150-hour program at the beginning of the junior year and earns both degrees with a major in accounting and a concentration in information systems, finance and auditing, or another area of business. The 30 graduate credits consist of 10 courses, at least five of which the student may select from an area outside of accounting. The flexibility of electives gives students the ability to design a broad program, which supports and enhances career objectives.

A student can be guaranteed admission to the program in one of two ways:

1. Students who are participants in the University Honors Program and maintain the required scholastic standards throughout the freshman and sophomore years are guaranteed admission into the 150-hour program at the end of the sophomore year.

2. Students who rank in the top 15 percent of their high school class or who have a minimum unweighted 3.0 GPA, have a minimum combined SAT score of 1260 obtained in a single setting, and have a VCU undergraduate cumulative GPA of at least 3.5 at the end of their sophomore year are guaranteed admission.
Students who do not meet the criteria for guaranteed admission may seek admission to the program by submitting a complete application form for graduate study, including GMAT test score. Students who apply in this manner may be admitted, depending upon the cumulative GPA at the completion of the university general education requirements and the business foundation requirements along with satisfactory performance on the GMAT.

Finance and auditing track

Literature and language
ENGL 201 or foreign language or philosophy elective
ACCT 203 and 204 Introduction to Accounting I and II
ECON 210 and 211 Principles of Economics I and II
INFO 360 Business Information Systems
MGMT 301 Business Statistics
SPCH 121 or 321 Effective Speech or Speech for Business and Professions
ENGL 304 Advanced Composition
Visual and performing arts elective

Note: Upon completion of the foundation program, students are expected to have competency in computer-based word processing and spreadsheet skills. Students without this competency must complete INFO 160, 161 or 162, or equivalent.

Third year
ACCT 303 and 304 Intermediate Accounting
ACCT 307 Accounting Systems
MGMT 319 Organization and Management
MGMT 320 Production Operations
MKTG 308 Introduction to Marketing
CMSC 255 Structured Programming
ECON 303 Managerial Economics
INFO 361 Systems Analysis and Design
MGMT 325 Organizational Communication

Note: If INFO 161 and 162 are taken during the sophomore year instead of a non-business elective, then a non-business elective should be substituted for a business elective during the junior year.

Fourth year
INFO 362 Computer Hardware and Software
ACCT 306 Cost Accounting
MGMT 481/ACCT 481 Law for Accountants I
ACCT 513 Financial Reporting
ACCT 405 Tax Accounting
FIRE 311 Financial Management
ACCT 401 Government and Not-for-profit Accounting
MGMT 434 Strategic Management
INFO 464 Database Systems
INFO 370 Fundamentals of Data Communication
MGMT 524 Quantitative Management

Fifth year
ACCT 506 Auditing
INFO 610 Analysis and Design of Database Systems
INFO 620 Data Communication

Program for students with a bachelor’s degree in accounting

Students who have already completed a bachelor’s degree in the field of accounting from an accredited institution may be admitted directly to the Master of Accountancy program. The graduate degree requires completion of 10 graduate courses. There are four 600-level required accounting courses and six 600-level courses selected from the three tracks of interest. Students applying directly to the Master of Accountancy program may be admitted depending upon the cumulative grade-point average obtained in the last 60 credits of course work, plus satisfactory performance on the GMAT.

Program requirements

Department of Accounting prerequisites:
ACCT 401 Governmental and Not-for-profit Accounting (if not previously taken)
ACCT 506 Auditing
ACCT 513 Financial Reporting

Graduate accounting required core courses:
ACCT 601 Financial Accounting Theory
ACCT 604 Auditing
ACCT 606 International Accounting
ACCT 682 Financial Reporting

Graduate elective courses:
Students are permitted to select six 600-level courses from the three tracks of interest (information systems, finance and auditing, or general business). Students are encouraged to take the following elective courses for specialty training in the following three tracks. The final selection of elective courses that will be taken for graduation can be negotiated with the student’s graduate academic adviser.

Information systems – students selecting this track may be required to complete additional undergraduate prerequisite courses before taking the graduate information systems electives.

INFO 610 Analysis and Design of Database Systems
INFO 620 Data Communication
INFO 630 Information Engineering
INFO 640 Information Systems and Knowledge Management
One graduate elective in accounting
One graduate elective in either accounting or information systems

Finance and auditing
FIRE 621 Cases in Financial Management
FIRE 635 Investments and Security Analysis
Two graduate electives in finance
One graduate elective in accounting
One graduate elective in accounting or finance

Other approved business tracks – students will work with their advisers to identify a separate track of study in one of the following approved areas: economics, international business, management, marketing or another area negotiated with the faculty adviser. Depending upon the track of study selected, students may have to complete additional undergraduate prerequisites. The number of graduate electives that must be taken is the same, regardless of the area of study:
• four graduate electives in selected track
• one graduate elective in accounting
• one graduate elective in accounting or selected track

Program for students with a bachelor’s degree in fields other than accounting

Students who have already completed a bachelor’s degree in a field of study other than accounting from an accredited institution may be admitted directly to the Master of Accountancy program. The graduate degree requires completion of 10 graduate courses. There are four 600-level required accounting courses and six 600-level courses selected from the three tracks of interest. Students applying directly to the Master of Accountancy program may be admitted depending upon the cumulative grade-point average obtained in the last 60 credits of course work, plus satisfactory performance on the GMAT.

Program requirements

School of Business foundation requirements (up to 12 semester credits)
ACCT 507 Fundamentals of Accounting
And three of the following courses, depending upon track of interest:
ECON 500 Concepts in Economics
FIRE 520 Financial Concepts of Management
MGMT 500 Quantitative Foundation for Decision Making
MGMT 524 Statistical Elements of Quantitative Management
MGMT 530 Fundamentals of the Legal Environment of Business
MGMT 540 Management Theory and Practice
MKTG 570 Concepts and Issues in Marketing

Department of Accounting prerequisites (up to 21 semester credits)
ACCT 303 Financial Accounting I
ACCT 304 Financial Accounting II
ACCT 306 Cost Accounting
ACCT 401 Governmental and Not-for-profit Accounting
ACCT 405 Tax Accounting
ACCT 506 Auditing
ACCT 513 Financial Reporting

Graduate accounting required core courses
All master’s students must complete the following four graduate courses:
ACCT 601 Financial Accounting Theory
ACCT 604 Auditing
ACCT 606 International Accounting
ACCT 682 Corporate Taxation

Graduate elective courses

Students permitted to select six 600-level courses from the three tracks of interest (information systems, finance and auditing, or general business). Students are encouraged to take the following electives for specialty training in the tracks. The final selection of elective courses that will be taken for graduation can be negotiated with the student’s graduate academic adviser.

Information systems – students selecting this track may be required to complete additional undergraduate prerequisite courses before taking the graduate INFO electives:
INFO 610 Analysis and Design of Database Systems
INFO 620 Data Communication
INFO 630 Information Engineering
INFO 640 Information Systems and Knowledge Management
One graduate elective in accounting
One graduate elective in either accounting or information systems

Finance and auditing
FIRE 621 Cases in Financial Management
FIRE 635 Investments and Security Analysis
Two graduate electives in finance
One graduate elective in accounting
One graduate elective in accounting or finance

Other approved business tracks – students will work with their advisers to identify a separate track of study in one of the following approved areas: economics, international business, management, marketing or another area negotiated with the faculty adviser. Depending upon the track of study selected, students may have to complete additional undergraduate prerequisites. The number of graduate electives that must be taken is the same, regardless of the area of study:
• four graduate electives in selected track
• one graduate elective in accounting
• one graduate elective in accounting or selected track

The Post-baccalaureate Certificate in Business Administration is designed for professional who seek an opportunity for advanced study in core business function areas. The certificate provides students the ability to advance their careers while receiving recognition for academic accomplishment in the form of a graduate certificate. By completing the curriculum for the certificate, students will have satisfied the foundation course requirements in the M.B.A. and other master’s programs in business.

Admissions criteria

Applicants must have earned a baccalaureate degree or its equivalent from an accredited college or university. Other admission requirements include a minimum undergraduate GPA of 2.7 in at least 60 hours of course work. Work experience is preferred. If students have not previously completed MGMT 500 Quantitative Foundation for Decision Making and INFO 360 Business Information Systems, or
their equivalents, they are expected to complete these courses before completion of the certificate requirements.

Certificate requirements

In order to be eligible to receive the certificate, a student must maintain an overall GPA of 3.0. Completion of this graduate certificate program requires 21 credit hours beyond the bachelor’s degree. The director of graduate studies in the School of Business may waive up to 12 credit hours based upon equivalent course work completed in the past five years with a grade of B or better. Successful completion of the graduate certificate program does not guarantee admission to a master’s-level program. Students interested in applying at a later date to either the M.B.A. or other master’s programs must do so through a separate application process.

The purpose of the Master of Business Administration programs at VCU is to prepare individuals for the responsibilities of management. As students at VCU, individuals will learn the functions and techniques of effective management. The student also will come to understand the environmental and economic factors that affect decision making in organizations. In short, the student will know what to do as future events unfold that affect his/her firm or organization.

An M.B.A. from VCU benefits students at various points in their career. Individuals who have recently received their baccalaureate may choose to refine their business skills while their undergraduate training is fresh. Individuals with work experience often find that an M.B.A. is the key to rapid promotion or a career change. Finally, an M.B.A. from VCU meets the needs of students who recognize that the best preparation for an uncertain future is continuous learning. School of Business students have diverse interests, backgrounds and levels of business experience. Therefore, the school provides a choice of programs by which the students may obtain an M.B.A. The M.B.A. is designed for students who wish to attend school in the evening on either a full- or part-time basis. The dual M.B.A./M.S. Information Systems degree program allows students to pursue both degrees simultaneously. The Fast Track Executive M.B.A. program is designed for applicants with at least six years of business experience who are interested in attending class on the weekends. The Pharm.D./M.B.A. is designed for students who want to add business skills to their training as pharmacists.

The M.B.A. program

The curriculum for the M.B.A. program is flexible and is designed for students with diverse undergraduate backgrounds. The M.B.A. student may elect an M.B.A. without a concentration or may prefer an M.B.A. with a single or double concentration. Concentrations are available in eight areas: decision sciences, economics, finance, human resource management and industrial relations, information systems, marketing, real estate and urban land development, or risk management and insurance.

Most classes are held in the evening to accommodate working students’ schedules. Classes typically meet one evening a week from 7 to 9:40 p.m. A limited number of classes meet twice a week, either in the morning from 7 to 8:15 a.m., or in the early evening from 5:30 to 6:45 p.m. M.B.A. courses also are offered at Innsbrook, an office park and residential area in the suburban west end of Richmond.

Students may choose to include international study or an exchange program in their course of study. In recent years, credit has been earned for programs in Italy, China, France, Germany, Hong Kong, Indonesia and Mexico.

Admission criteria

Admission criteria include undergraduate performance, Graduate Management Admissions Test (GMAT) scores, intellectual capacity, experience and other indicators of the ability to pursue graduate study profitably. Deadlines are as follows:

<table>

</tbody>
</table>

Requirements for the M.B.A.

- A course in calculus is a prerequisite for the M.B.A. This prerequisite may be waived for students who present satisfactory equivalent preparation. Applicants who have not met this prerequisite may take the course after admission.
- Students are expected to enter the program with basic computing proficiency. Specific expectations will be provided by the Graduate Studies in Business Office. Specific means of evaluating and correcting any deficiency also will be identified.
- The program includes seven foundation courses. These courses may be waived for students who have taken the equivalent material at the undergraduate level within the last five years and received a grade of “B” or better. These courses must be taken at the graduate level after the student has been admitted.

Each student must begin the advanced portion of the program with the courses below in each of the first two semesters. Full-time students will take additional courses from the remainder of the Advanced Program.

Semester one (to be taken at the same time)
- ECON 610 Managerial Economics 3
- MGMT 641 Organizational Leadership and Project Team Management 3

Semester two (to be taken at the same time)
- MGMT 675 Operations Management 3
- One of the following courses: 3
  - INFO 661 Information Systems for Managers
  - MKTG 671 Marketing Management

Remainder of the Advanced Program (including course not taken in semester two)
- ACCT 608 Managerial Accounting
- FIRE 621 Cases in Financial Management
- INFO 661 Information Systems for Managers
- INFO 664 Emerging Information Technologies
- MGMT 642 Business Policy (to be taken after completion of 15 credits of advanced program)
- MKTG 671 Marketing Management

Electives* 9

Total credits in Advanced Program 36

* Electives must be 600-level courses. Students can establish a concentration by taking all of the electives in a single area. The Graduate Studies in Business Office maintains current lists of approved electives for each concentration and for the general program.

The Fast Track Executive Master of Business Administration program provides an opportunity for rising executives and professionals with six or more years of management-level work experience to obtain a master’s degree in business administration. Participants gain a wide range of new skills and knowledge by combining course work with day-to-day business activities.

The program is targeted to rising business executives, entrepreneurs, nonprofit managers and service professionals. It differs from other Master's programs at VCU as a result of its unique modular curriculum, which integrates components of communication, technology, service/quality, globalization and strategy. The modules include 1) team building and leadership, 2) business foundations, 3) analysis and decisions, 4) global challenges, 5) organizational culture, 6) productivity and innovation, and 7) strategic management.

The Fast Track Executive M.B.A. Program is a lockstep program that meets alternating weekends, Fridays, 12:30 to 6:15 p.m. and Saturdays, 8 a.m. to 2:15 p.m. The program can be completed in approximately 20 months.

## Program requirements

The program is designed for students with familiarity with significant work experience. The student’s adviser will review the student’s educational and professional background to determine the extent to which the student has satisfied the prerequisites. Those with outstanding prerequisites will be required to attend one or more training sessions to remove any deficiencies.

The program consists of 13 courses that are divided into seven integrated modules.

### Combined Doctor of Pharmacy (Pharm.D.) and Master of Business Administration (M.B.A.)

The Pharm.D./M.B.A. program seeks to prepare pharmacists for careers that encompass pharmacy and business theories and principles. The program is designed to take advantage of efficiencies and electives in both the Pharm.D. and M.B.A. programs. Students in the combined program can earn both degrees and save as much as one year or more over the time required for enrolling in the programs separately.

Students may be admitted in the program during their first year of enrollment in the Pharm.D. program. Applicants must be an enrolled student in the Pharm.D. program, have demonstrated a good academic record and have successfully completed the Graduate Management Admission Test (GMAT).

To get both degrees, students will take all pharmacy courses unless waived, the seven business foundation courses, the nine M.B.A. core courses and three
Tuition and financial aid considerations
Upon admission to the M.B.A. program, a Pharm.D. student will be considered a dual-degree-seeking student. Students will most often register for a mix of School of Business courses and School of Pharmacy courses each semester of the program. The School of Pharmacy and School of Business have agreed that dual-degree-seeking students will be considered Pharm.D. students in years P1, P2, P3 and P5. Students will be considered M.B.A. (graduate) students in year P4. When categorized as Pharm.D., a student will be charged tuition and fee rates as a graduate student and be eligible to receive financial aid awards as a graduate student.

Curriculum requirements
To earn both degrees, students will complete the following requirements. For the Pharm.D. program, all required Pharm.D. prerequisite and required courses must be taken unless waived by the appropriate representative of the School of Pharmacy. For the M.B.A. program requirements, the foundation courses listed below must be taken. Courses may be waived for students who have taken the equivalent material at the undergraduate level.

Acct 507 Fundamentals of Accounting
ECON 500 Concepts in Economics
FIRE 520 Financial Concepts of Management
MGMT 524 Statistical Elements of Quantitative Management
MGMT 530 Fundamentals of the Legal Environment of Business

MGMT 540 Management Theory and Practice
MKTG 570 Concepts and Issues in Marketing

The following nine courses of the M.B.A. Advanced Program will be required for each student:

Semester one: (to be taken at same time)
INFO 661 Information Systems for Managers
MGMT 641 Organization Leadership and Project Team Management

Semester two: (to be taken at same time)
MGMT 675 Operations Management
One of the following courses:
ECON 610 Managerial Economics
INFO 644 Emerging Information Technologies
MKTG 671 Marketing Management

Remainder of the Advanced Program (including courses not taken in semester two)
ACCT 608 Managerial Accounting
ECON 610 Managerial Economics
FIRE 621 Cases in Financial Management
INFO 664 Emerging Information Technologies
MGMT 642 Business Policy (to be taken after completion of 15 credits of advanced program)
MRBL 671 Marketing Management

Electives
Three M.B.A. elective courses may be taken in the School of Business or by completing approved Pharm.D. electives and/or an applied pharmacy practice experience in pharmacy management, as individually approved by the director of graduate programs in the School of Business.

The key to successful completion of the Pharm.D./M.B.A. dual degree program will be timely and continuing advising from both the appropriate School of Pharmacy adviser and the director of graduate programs in the School of Business. For this reason, students are encouraged to seek admission to the dual degree program as early in their Pharm.D. program as possible.

Combined Fast Track Master of Business Administration (M.B.A.) and Master of Science in Information Systems (M.S.) – information technology management

Students in the Fast Track M.B.A. program have the option to continue with the Fast Track Executive M.S. in Information Systems – Information Technology Management program after having completed the requirements for the Fast Track M.B.A. to earn both degrees. Students pursuing this dual degree option will have four courses in the Fast Track M.S. program waived (these four courses cover the information systems content of the Fast Track M.B.A. program).

Combined Master of Business Administration (M.B.A.) and Master of Science in Information Systems (M.S.)

Students can earn both M.B.A. and M.S. in Information Systems degrees by having 12 credits counted toward both degrees, thus requiring only 54 credits total of advanced course work (not counting foundation courses), rather than the 36 and 30 credits normally required for the two degrees. Students in the combined degree program will follow the same schedule as regular M.B.A. students, including the two lockstep semesters. To get both degrees, students will take all foundation courses required for the M.B.A., unless waived, all nine core courses required for the M.B.A., and nine additional courses in the M.S. in Information Systems program, including INFO 610, INFO 620 and INFO 630. Students whose
undergraduate degree is not in Information Systems may also be required to take
additional undergraduate prerequisite courses before taking the graduate
information systems courses, as determined by the program adviser. The INFO
661 course taken for the M.B.A. will substitute for INFO 640, normally required
for the M.S. in Information Systems degree, and three of the additional
information systems courses also will count toward the normally required three
elective courses in the M.B.A. program.

One of the information systems courses must have substantial global,
entrepreneurial and/or experiential components. The six information systems
courses to be taken in addition to INFO 661, INFO 664, INFO 610, INFO 620 and
INFO 630 must be approved by the program adviser, and would normally be
selected to satisfy one of the M.S. in Information Systems tracks.

Special requirements:
Accounting majors admitted fall 2003 and alternating years thereafter

The Ph.D. in Business program is designed specifically for individuals intending
to fill positions at institutions that require a balance of scholarly training, teaching
and practical application of the appropriate field of study. With its small size —
the program has less than 40 students — it allows for extensive one-to-one
interaction between students and faculty. Three areas of study are offered:
accounting, information systems and management (organizational behavior).

A basic tenet of the Ph.D. in Business program is that the classic trilogy of
research, teaching and service typically invoked in university mission statements
is synergistic. The program strives to develop graduates who share this perspective
and aspire to well-rounded individual roles within universities, colleges and other
learning organizations. For this reason, the program provides instruction in both
research and teaching.

Instruction in basic and applied research is the cornerstone of the program. To
fulfill the requirements for the degree, students must demonstrate successful
completion of prerequisite and advanced courses, of comprehensive examinations
in major and minor areas of study, and completion and defense of a dissertation.
The advanced courses provide coverage in basic theories, methodologies and
techniques needed to conduct research. The dissertation demonstrates the student’s
competence in conducting independent research.

Enhancement of teaching skills is emphasized in the program. It provides students
with mentoring and teaching experience. Formal instruction designed to augment
student teaching skills is also required. Mentoring involves teaming a student with
a faculty member with the goal of augmenting student self-awareness and self-
confidence in the classroom. Classroom experience is required to insure that the
Ph.D. graduate enters the job market with certifiable teaching experience. The formal courses are designed to provide substantive instruction on teaching the
adult learner.

A third aspect of the Ph.D. program is its emphasis on practical application in the
area of study for students concentrating in accounting and information systems. In
accounting, for example, emphasis is placed on projects based on real-world
experience, and students are encouraged to develop papers around topics that
address practical application of accounting concepts. In information systems,
students usually work on projects brought in to the Information Systems Research
Institute (ISRI). These projects focus on user applications and emphasize solutions
to specific requirements.

Admission requirements

Admission will be restricted to those who are considered by the School of
Business Ph.D. Committee to possess academic and professional qualifications
necessary to succeed in the program and to make a contribution to the profession.
Criteria considered will include, among other things, performance at the
bachelor’s and graduate levels, GMAT scores, letters of recommendation, as well as
both academic and business experience. Department admission committees may
accept GRE scores as they deem appropriate. Preference will be given to students
who have fulfilled the general business prerequisites of the program. An interview
is highly recommended. Applicants should contact the Graduate Studies in
Business Office or the Ph.D. area coordinator for the applicant’s intended major to
schedule an interview. Admission to the doctoral program is highly competitive;
consequently, qualified applicants may be denied admission because of
insufficient space and resources. Applications should be completed by Jan. 1 for
full admission.

Prerequisite

Students are expected to be adequately prepared to begin doctoral study in their
proposed major. Normally an M.B.A. degree earned from an AACSB-accredited
institution is considered an indication of sufficient preparation. However, for
the information systems major, the M.S. in Information Systems is considered
sufficient preparation for doctoral study. Students deficient in preparation may be
required to take necessary courses specified by the appropriate Ph.D. area
coordinator or relevant designee.

Degree requirements

Each student must select a major in one of the following specialties:
• Accounting.
• Information systems.
• Management (organizational behavior).

Additionally, students must select one different minor from the specialties listed
above or the following:
• Decision sciences.
• Economics.
• Finance.
• Human resource management.
• International business.
• Marketing.
• An approved field outside the School of Business in a school or a department
that offers a doctoral program. This option must have the approval of the
Ph.D. committee and the director of graduate programs.

The following courses beyond those required at the master’s level will be required
for the Ph.D. degree.

In addition to the general academic regulations stated in the Graduate Studies at
VCU section of this bulletin and the regulations listed earlier in this section for all
students in graduate programs administered by the School of Business, Ph.D.
students in the school are subject to the following requirements:

1. Students who fall below a 3.0 GPA will have one semester to make up that
deficiency.

2. Students must register each semester (summer sessions excluded) for
continuation in the program. Students who fail to register each semester will
be dropped automatically from the program and must reapply for
reinstatement.

3. The maximum time to complete all the requirements for the degree is eight
calendar years from the date of entry into the program. The maximum time to
Doctoral study involves a devotion to independent study outside the classroom and interaction with the faculty and other students. During the period of advanced course work, students must complete at least nine credits each semester for a minimum of two consecutive semesters, one of which may be a summer session.

5. A maximum of six semester credits may be transferred from another AACSB-accredited university and applied toward the Ph.D. course requirements. All transfer work must be at the A or B grade level. Transfer credit shall not be older than seven years at the time the Ph.D. degree is awarded. Transfer credit is given at the discretion of the director of graduate programs in business after consultation with appropriate departmental or faculty representatives.

Advising and evaluation
Each student will be assigned an adviser. The student’s original program and any subsequent changes must be approved by the adviser and the director of graduate programs in business. A file will be maintained on all students in the Graduate Studies in Business Office where their progress will be monitored and coordinated. Each student is required to complete an approved program form and file it with the Graduate Studies in Business Office no later than the end of the first semester in which the student is admitted. Failure to do so may result in dismissal from the program.

Ph.D. in Business Handbook
The School of Business publishes a handbook that provides a comprehensive overview of the policies and procedures involved in obtaining a Ph.D. in business at VCU. All procedures associated with the Ph.D. program are covered — from admission to graduation — with special emphasis placed on the dissertation process. The handbook includes detailed information about financial support, comprehensive examinations, and dissertation proposals and defenses.

The Master of Science program provides in-depth knowledge of one business discipline and allows students to develop and build technical skills in their specific area of interest. It is frequently recommended for students with an undergraduate business degree. Concentrations are available in the following functional areas:

- Decision sciences
- Finance
- Global marketing management
- Human resource management
- Real estate valuation

Admission requirements

Admission criteria include undergraduate performance, GMAT scores, intellectual capacity, experience, and other indicators of the ability to pursue graduate study profitably. Deadlines are as follows:

<table>
<thead>
<tr>
<th>Spring</th>
<th>Nov 1</th>
</tr>
</thead>
</table>

Program requirements

A course in college algebra is a prerequisite for some concentrations; a course in calculus is required for others. Some concentrations (e.g., real estate valuation) have additional undergraduate prerequisites as well. Some or all of these prerequisite courses may be waived for students who present satisfactory, equivalent preparation or may be taken after admission.

Each student in the program must complete a minimum of four 500-level foundation courses (12 credit hours) required for the M.B.A. degree. Foundation courses may be waived for students who present satisfactory, equivalent preparation at either the undergraduate or graduate level. Students who are required to take foundation courses may do so at the graduate level after admission. The foundation courses required will vary depending upon the student’s background, career interests and the chosen area of specialization. Applicants should consult with the area coordinators or department chairs or the director of graduate programs in business to determine the foundation courses required for a particular area. Each student in the program also must complete a minimum of 10 600-level advanced courses (30 credit hours), although up to two additional courses (six credit hours) may be required for some concentrations. A student, in consultation with a faculty adviser, selects a set of advanced courses to create a tailored and focused program of study. Applicants should consult with the area coordinators, department chairs, or the director of graduate programs in business to determine the departmental guidelines controlling the required courses and electives for a particular concentration.

For additional information, refer to the Web: http://www.gsib.vcu.edu.

Decision sciences

The Master of Science in Business with a decision sciences concentration provides students with knowledge of quantitative skills and experience in analyzing problems arising in a business environment. Depending upon individual student interests and adviser approval, the required nucleus is supplemented with relevant elective courses from within the School of Business or from outside departments.

Prerequisite courses
All students must have completed a course in calculus prior to attempting graduate business courses. This prerequisite can be met after admission to the program.

Foundation courses
Students must complete up to four courses (0 to 12 credit hours) of work from the following list. At the time of application, all undergraduate and graduate transcripts will be reviewed to determine if the following courses may be waived. Waivers of foundation courses only occur when a student has completed the required undergraduate equivalent courses with at least a C grade.

MGMT 648 Managerial Decision Making (3)
MGMT 669 Forecasting Methods for Business (3)
MGMT 677 Quality Management and Six Sigma (3)

**Total core credits** 18

**Elective courses – 12 credit hours**

Additional courses (to be approved by adviser) Credits
Choose four from the School of Business list of approved electives*
ACCT 608 Managerial Accounting Concepts (3)
ECON 610 Managerial Economics (3)
ECON 612 Econometrics (3)
INFO 619 Computer-assisted Simulation (3)
MGMT 642 Business Policy (3) [to be taken in the last semester of study]
MGMT 697 Guided Study in Management
MKTG 673 Marketing Research

* Students may also take the remaining course in the core credits as an elective
(MGMT 643, MGMT 648, MGMT 669 or MGMT 677)

**Total elective credits** 12

**Finance**

The finance concentration is designed to prepare students for financial decision-making positions in corporate, investment, financial and governmental institutions. Courses offered in finance include advanced financial management, investments and security analysis, funds management in financial institutions, international finance, and derivatives.

**Prerequisite**
Calculus (MGMT 212 or MGMT 500)

**Foundation courses** (0 to 12 credit hours, dependent on the number of courses waived or included as free electives.)
ACCT 507 Fundamentals of Accounting
ECON 500 Concepts in Economics
FIRE 520 Financial Concepts of Management
MGMT 524 Statistical Elements of Quantitative Management

**Core area** (15 credit hours)
FIRE 622 Financial Management of Financial Institutions
FIRE 623 Financial Management
FIRE 635 Investments and Security Analysis
FIRE 639 International Finance
FIRE 650 Derivatives

**Finance, insurance and real estate electives** (12 credit hours)
Students select four of the following courses:
FIRE 621 Cases in Financial Management
FIRE 625 Group Insurance and Pension Planning
FIRE 626 Risk Management
FIRE 628 Using GIS in Real Estate Decisions
FIRE 629 Real Estate Investment Analysis
FIRE 654 Short-term Financial Management
FIRE 657 Current Issues in Investments and Markets
FIRE 658 Real Estate Finance and Investments
FIRE 664 Current Issues in Corporate Finance
FIRE 691 Topics in Finance, Insurance and Real Estate
FIRE 693 Field Project in Finance, Insurance and Real Estate*
FIRE 697 Guided Study in Finance, Insurance and Real Estate*

* FIRE 693 Field Project in Finance, Insurance and Real Estate is recommended for full-time students. The department will work closely with full-time students and prospective employers in order to achieve this goal.

A student may substitute a free elective for one of the FIRE electives with the approval of the director of the concentration in finance.

**Free electives** (9 credit hours)
Students may choose any three free electives approved by the director of the M.S. program in finance. Students are encouraged to select accounting, economics, math or statistics courses. Up to two foundation courses may be included as free electives, if they were not waived, as may additional courses included in the list of finance, insurance and real estate electives.

**Global marketing management**

The Master of Science in Business with a global marketing management concentration offers students the opportunity to concentrate their studies in two related areas: marketing management and global business management. Students select foundation, core and/or elective courses in accounting, economics, finance or management to complement marketing courses in the program. Students interested in preparing for the increasingly global nature of business will be well suited for this unique Master of Science degree program. All degree candidates are strongly encouraged to participate in an intensive study program in a foreign language and/or a foreign study program.

**Foundation courses** (0 to 21 credit hours; these courses may be waived for students who have taken equivalent material at the undergraduate level.)
ACCT 507 Fundamentals of Accounting
ECON 500 Concepts in Economics
FIRE 520 Financial Concepts of Management
MGMT 524 Statistical Elements of Quantitative Management
MKTG 570 Concepts and Issues in Marketing
Two-course sequence in a foreign language at the undergraduate or graduate level (or demonstrated proficiency)

or

Two approved cross-cultural courses taken at the undergraduate or graduate level

**Core courses** (30 credit hours)
Required marketing and strategy courses (15 credits)
MGMT 642 Business Policy (to be taken in the last semester)
Economics, Master of Arts (M.A.)

**Human resource management**

The Master of Science in Business with a human resource management concentration is designed to provide students with an in-depth understanding of the field and its problems and opportunities. Utilizing an interdisciplinary approach, the curriculum combines courses from within and outside the School of Business to focus on the dynamics of an ever-changing field from a local, national and international perspective. Topics included in the curriculum reflect the body of knowledge covered in professional certification examinations administered by the Human Resource Certification Institute. The ultimate objective of the program is to prepare students for a career in human resource management.

**Foundation courses** (0 to 15 credits) 1

- MGMT 500 Quantitative Foundation for Decision Making
- MGMT 524 Statistical Elements of Quantitative Management

Choose any three of the following:

- ACCT 507 Fundamentals of Accounting
- ECON 500 Concepts in Economics
- FIRE 520 Financial Concepts of Management
- MGMT 640 Management Theory and Practice
- MGMT 570 Concepts and Issues in Marketing

**Required courses** (12 credits)

- MGMT 637 Advanced Human Resource Management
- MGMT 641 Organizational Leadership and Project Team Management

**Electives** (9 credits)

Choose three of the following courses:

- MGMT 672 Concepts in Consumer Behavior
- MGMT 674 Service Quality Management
- MGMT 676 Marketing Strategy
- MGMT 697 Guided Study in Business

**Core requirements** (30 credit hours)

- ECON 617 Financial Markets

- FIRE 621 Cases in Financial Management

- FIRE 627 Real Estate Development

- FIRE 628 Using GIS in Real Estate Decisions

- FIRE 629 Real Estate Investment Analysis

- FIRE 638 Real Property Investment Law

- FIRE 658 Real Estate Finance and Investments

- FIRE 697 Guided Study – Real Estate Analysis

MKTG 656 International Marketing (prerequisite MKTG 570)

MKTG 657 International Marketing Planning Project (prerequisite MKTG 570 and 673)

MKTG 671 Marketing Management (prerequisite MKTG 570)

MKTG 673 Marketing Research (prerequisite MKTG 570 and MGMT 524)

Required global business courses (choose two; 6 credits)

- ACCT 606 International Accounting (prerequisite ACCT 507)
- ECON 609 Advanced International Economics (prerequisite ECON 500)
- FIRE 639 International Finance (prerequisite FIRE 520)
- MGMT 644 International Business Management

Any courses from study abroad (up to 6 credits)

**Research methods – choose one**

- EDUS 661 Educational Evaluation: Models and Designs
- PADM/GVPA/CRJS/URSP 623 Research Methods for Government and Public Affairs
- PADM 654 Program Design and Evaluation in the Nonprofit Sector

**Global focus – choose one**

- MGMT 644 International Business Management
- MGMT 684 Issues in International Human Resource Management

**Human resource electives** (12 credits) – choose four

- ECON 631 Labor Market Theory and Analysis
- FIRE 625 Group Insurance and Pension Planning
- MGMT 632 Statistical Analysis
- MGMT 646 Legal Foundations of Employment
- MGMT 649 Compensation Policy and Administration
- MGMT 677 Quality Management and Six Sigma

- MGMT 680 Health, Safety and Security Administration
- MGMT 682 Human Resource Staffing
- MGMT 684 Issues in International Human Resource Management

**Interdisciplinary electives** (6 credits) – choose two

- ADLT 620 Human Resource Development Overview
- ADLT 623 Organizational Learning
- ADLT 625 Change Strategies for HRD Practitioners
- PADM 607 Public Human Resource Management
- PADM 691 Topics in Public Administration

**Notes**

1. Some or all foundation courses may be waived if a student has completed equivalent undergraduate courses prior to admission.

2. Available to non-MBA students only in the summer.

3. Strongly recommended for students considering doctoral study.

4. May not serve as an elective when taken as a global focus course.

5. Requires approval of the program adviser.

**Real estate valuation**

The real estate valuation concentration is one of only five programs in the nation that satisfies the rigorous educational requirements of the Appraisal Institute’s MAI designation. Students can satisfy most of the Appraisal Institute’s education requirements by completing the concentration. This concentration emphasizes real estate valuation while providing comprehensive education in related disciplines so that graduates’ analytical skills and abilities to communicate with other professionals are greatly enhanced. Whenever possible, students will be placed in internships with MAIs.

**Prerequisite courses**

- FIRE 425 Real Estate Appraisal
- FIRE 431 Advanced Real Estate Appraisal

A course in calculus (MGMT 212 or MGMT 500)

**Foundation courses** (0 to 18 hours, dependent on the number of courses waived)

- ACCT 507 Fundamentals of Accounting
- ECON 500 Concepts in Economics
- FIRE 520 Financial Concepts of Management
- MGMT 524 Statistical Elements of Quantitative Management
- MGMT 530 Fundamentals of the Legal Environment of Business
- MKTG 570 Concepts and Issues in Marketing

**Required courses** (30 credit hours)

- ECON 617 Financial Markets
- FIRE 621 Cases in Financial Management
- FIRE 627 Real Estate Development
- FIRE 628 Using GIS in Real Estate Decisions
- FIRE 629 Real Estate Investment Analysis
- FIRE 638 Real Property Investment Law
- FIRE 658 Real Estate Finance and Investments
- FIRE 697 Guided Study – Real Estate Analysis

MKTG 656 International Marketing (prerequisite MKTG 570)

MKTG 657 International Marketing Planning Project (prerequisite MKTG 570 and 673)

MKTG 671 Marketing Management (prerequisite MKTG 570)

MKTG 673 Marketing Research (prerequisite MKTG 570 and MGMT 524)

Any courses from study abroad (up to 6 credits)

**Research methods – choose one**

- EDUS 661 Educational Evaluation: Models and Designs
- PADM/GVPA/CRJS/URSP 623 Research Methods for Government and Public Affairs
- PADM 654 Program Design and Evaluation in the Nonprofit Sector

**Global focus – choose one**

- MGMT 644 International Business Management
- MGMT 684 Issues in International Human Resource Management

**Human resource electives** (12 credits) – choose four

- ECON 631 Labor Market Theory and Analysis
- FIRE 625 Group Insurance and Pension Planning
- MGMT 632 Statistical Analysis
- MGMT 646 Legal Foundations of Employment
- MGMT 649 Compensation Policy and Administration
- MGMT 677 Quality Management and Six Sigma

- MGMT 680 Health, Safety and Security Administration
- MGMT 682 Human Resource Staffing
- MGMT 684 Issues in International Human Resource Management

**Interdisciplinary electives** (6 credits) – choose two

- ADLT 620 Human Resource Development Overview
- ADLT 623 Organizational Learning
- ADLT 625 Change Strategies for HRD Practitioners
- PADM 607 Public Human Resource Management
- PADM 691 Topics in Public Administration

**Notes**

1. Some or all foundation courses may be waived if a student has completed equivalent undergraduate courses prior to admission.

2. Available to non-MBA students only in the summer.

3. Strongly recommended for students considering doctoral study.

4. May not serve as an elective when taken as a global focus course.

5. Requires approval of the program adviser.
Admission requirements summary

Economics, Master of Arts (M.A.)

Indicate specialization:

The Master of Arts in Economics is designed to enhance the students’ abilities to use economic modeling to conduct applied analytical and econometric research. Students in this program are expected to demonstrate competence over a rigorous and current core curriculum in microeconomic and macroeconomic theory and in econometrics.

Graduates of the program should be well qualified to conduct applied economic analysis in either a government or corporate research setting. The program also is an excellent preparation for entry into a doctoral program in economics or finance.

Students may elect a Master of Arts in Economics without specialization or may specialize in financial economics. The specialization in financial economics combines the theoretical and econometric foundation obtained in the core courses of the concentration in quantitative economics with an in-depth study of their application to financial markets.

The Master of Arts in Economics without specialization requires 30 semester hours of work, while the specialization in financial economics requires 33 semester hours. Both a thesis and a nonthesis option are available.

Admission criteria

Admission criteria include undergraduate performance, the Graduate Record Examination (GRE), intellectual capacity, experience and other indicators of the ability to pursue graduate study profitably. The GRE subject test in economics is not required. Applicants to the financial economics track may substitute the GMAT for the GRE. Applications should be completed at least eight weeks prior to the beginning of the semester or summer session desired.

Degree requirements

One course in each of the following subject areas is a prerequisite for the specialization in financial economics: intermediate macroeconomic theory, intermediate microeconomic theory, introductory econometrics, calculus and finance. The student’s adviser will review the student’s economics and mathematical background to determine the extent to which the student has satisfied the prerequisites. Required prerequisites may be taken after admission.

The specialization in financial economics requires 33 semester hours of 600-level courses. Under the thesis option, the 33 hours must include seven core courses, three restricted electives and one general elective in economics, finance or other approved field.

Curriculum

One course in each of the following subject areas is a prerequisite for the Master of Arts in Economics: intermediate macroeconomic theory, intermediate microeconomic theory, introductory econometrics and calculus. The student’s adviser will review the student’s economics and mathematical background to determine the extent to which the student has satisfied prerequisites. Required prerequisites may be taken after admission. The degree requires 30 semester hours of 600-level credit. Under the thesis option, the 30 hours must include eight core courses and one economics elective, and one business or economics elective.

Under the nonthesis option, the 30 hours must include six core courses, two economics electives, and two business or economics electives.

Degree requirements with thesis
Students applying to the master’s program must show evidence of competence in selected prerequisite areas of information systems including: application programming, systems analysis and design, database, telecommunications, and hardware/software. Evidence of this competence may include formal course work, comparable training within a work environment, or significant, relevant and recent work experience in the field. Students enrolled as majors in the program who do not have formal background or equivalent training must take the appropriate undergraduate courses to satisfy the prerequisites prior to taking master’s program courses. The required undergraduate courses are: INFO 300, INFO 350, INFO 360, INFO 361, INFO 370, INFO 464 and a course in calculus.

Students who do not have a business degree must complete a minimum of four 500-level foundation courses (12 credit hours). Foundation courses may be waived for students who present satisfactory, equivalent preparation at either the undergraduate or graduate level. Students who are required to take foundation courses may do so after admission. The foundation courses required will vary depending upon the student’s background, career interests and the chosen area of specialization. Students applying to the Master of Science in Information Systems program should consult with their master’s program adviser to determine the foundation courses required for a particular area.

The program consists of 30 graduate credit hours including: four core courses (12 credit hours), two courses in each of two concentration areas (12 credit hours) and two elective courses (6 credit hours). Core graduate course are:

- INFO 610 Analysis and Design of Database Systems
- INFO 620 Data Communications
- INFO 630 Systems Development
- INFO 640 Information Systems Management
- In addition to the core courses, students must select two concentration areas from those listed below, plus two elective courses. The two elective courses may be taken from one or more of the other concentration areas or from other approved courses in information systems, in consultation with the student’s adviser and based upon the student’s area of interest, career goals, and existing departmental and university areas of expertise.

- Business engineering concentration
  - INFO 611 Data Engineering
  - INFO 632 Business Process Engineering

- Knowledge engineering concentration
  - INFO 614 Data Mining
  - INFO 616 Data Warehousing

- Information technology management concentration
  - INFO 643 Information Technology Project Management
  - INFO 641 Strategic Information Systems Planning

- Information assurance concentration
  - INFO 644 Information Systems Security
  - INFO 622 Network Security and Administration

The Master of Science in Information Systems program is designed to prepare students for specialized roles in information systems. The program is intended to provide a graduate-level, technically oriented curriculum that focuses on the design and development of information systems to solve real-world problems. The department’s curriculum is focused on the rapidly emerging area known as Enterprise Information Systems. Graduates of the program are expected to be able to take significant roles in planning, organizing, managing, designing, configuring and implementing EIS systems using state-of-the-art technologies within organizations.

The Fast Track Executive Master of Science in Information Systems with a concentration in information technology management provides an opportunity for current information technology professionals and business managers to receive the necessary preparation to move into IT management roles. Participants gain a wide range of new skills and knowledge by combining course work with their day-to-day professional activities. The program is targeted to rising business executives, entrepreneurs and information systems professionals. The program differs from the regular M.S. in Information Systems program in that it is offered in a weekend format, with students meeting for classes on alternate weekends throughout the calendar year. The lock-step program consists of 10 required courses.

The program is designed for students familiar with business foundations as well as with technical areas of information systems, including programming, systems analysis and design, database, and data communications. The student’s adviser will review the student’s educational and professional background to determine the extent to which the student has satisfied the prerequisites. Students lacking in prerequisite knowledge will be required to participate in special training sessions provided by the School of Business.

Information technology management concentration

Master of Science in Information Systems with a concentration in information technology management provides an opportunity for current information technology professionals and business managers to receive the necessary technology management provides an opportunity for current information technology professionals and business managers to receive the necessary preparation to move into IT management roles.

Prerequisites

Applicants should have undergraduate courses or substantial professional experience in the following subject areas:

- accounting
- business law
- computer hardware/software
- database
- data communications
- e-commerce
- economics
- finance
- management
- marketing
- organizational behavior
- programming
- systems analysis and design

Combined Fast Track Master of Business Administration (M.B.A.) and Master of Science in Information Systems (M.S.) – information technology management

Students in the Fast Track M.B.A. program have the option to continue with the Fast Track Executive M.S. in Information Systems – Information Technology Management program after having completed the requirements for the Fast Track M.B.A. to earn both degrees. Students pursuing this dual degree option will have four courses in the Fast Track M.S. program waived (these four courses cover the information systems content of the Fast Track M.B.A. program).

Combined Master of Business Administration (M.B.A.) and Master of Science in Information Systems (M.S.)

Students can earn both M.B.A. and M.S. in Information Systems degrees by having 12 credits counted toward both degrees, thus requiring only 54 credits total of advanced course work (not counting foundation courses), rather than the 36 and 30 credits normally required for the two degrees. Students in the combined degree program will follow the same schedule as regular M.B.A. students, including the two lockstep semesters. To get both degrees, students will take all foundation courses required for the M.B.A., unless waived, all nine core courses required for the M.B.A., and nine additional courses in the M.S. in Information Systems program, including INFO 610, INFO 620 and INFO 630. Students whose undergraduate degree is not in Information Systems may also be required to take additional undergraduate prerequisite courses before taking the graduate information systems courses, as determined by the program adviser. The INFO 661 course taken for the M.B.A. will substitute for INFO 640, normally required for the M.S. in Information Systems degree, and three of the additional information systems courses also will count toward the normally required three elective courses in the M.B.A. program.

One of the information systems courses must have substantial global, entrepreneurial and/or experiential components. The six information systems courses to be taken in addition to INFO 661, INFO 664, INFO 610, INFO 620 and INFO 630 must be approved by the program adviser, and would normally be selected to satisfy one of the M.S. in Information Systems tracks.

Special requirements:

Minimum of five years experience is preferred.

The Graduate Certificate in Real Estate and Land Development is designed for professionals who seek an opportunity for advanced study in real estate and are more interested in the focused knowledge obtainable than receipt of a graduate degree. The certificate provides students the ability to advance their careers while receiving recognition for their academic accomplishment in the form of a graduate certificate. Many working professionals, especially those with undergraduate majors in liberal arts, will find this program attractive since they can concentrate their energies on a tightly focused curriculum without enrolling in a large number of prerequisite courses. The graduate certificate may be completed by taking both on-campus and internet-based courses.

Admission criteria

Applicants must have an earned baccalaureate degree or its equivalent from an accredited college or university. Other admission requirements include (1) proficiency in using spreadsheet computer software demonstrated either by examination or completion of appropriate course work and (2) minimum of 2.7 GPA at the undergraduate level. A minimum of five years of business experience is preferred. Students are expected to have completed FIRE 431 Advanced Real Estate Appraisal or its equivalent prior to beginning graduate course work.

Certificate requirements

In order to be eligible for receiving the certificate, a student must maintain an overall GPA of 3.0. Eighteen credit hours beyond the bachelor’s degree is required for completion of this graduate certificate program. A maximum of one three-hour
The program consists of one prerequisite course, three foundation courses and 10 courses distributed over core courses, restricted electives and individual electives. The foundation courses may be waived for students who have taken the equivalent material at the undergraduate level or may be taken at the graduate level after the student has been admitted. A minimum of 30 hours of advanced graduate credit at the 600 level or higher will be required of all students.

The approved electives may include:
- Any 600-level taxation course not taken in the advanced courses or selected as a tax elective.
- Any 600-level accounting course except ACCT 608 and 678.
- Any approved 600-level advanced business or economics course.
* These foundation courses may not be included in the 30 semester credits of advanced work required for the Master of Taxation.

---

**Admission**

Applicants may be admitted under either a professional or an academic track. The professional track is designed for current tax professionals who want to enhance existing skills. Admission under the professional track requires a minimum undergraduate GPA of 3.0 (on a 4.0 scale); C.P.A., C.M.A. or J.D. designation; a minimum of two years relevant work experience, which should include independent tax research and supervisory experience; letters of recommendation; and a personal interview. The academic track is designed primarily for students seeking entry into the tax field. Admission under the academic track is based on traditional academic indicators designed to reflect an individual’s ability to complete graduate study and include the undergraduate record, GMAT score, letters of recommendation and a personal interview (preferred). Once admitted to the program, all students must satisfy the same requirements for award of the Master of Taxation degree. Applications should be completed by:

- **Fall**: Jul 15
- **Spring**: Nov 15
- **Summer**: Mar 15

**Requirements**

Three semester hours of tax accounting and a course in college algebra are prerequisites for the Master of Taxation. Prerequisites need not be completed prior to completing the application to the program.
The future development of the accounting profession depends upon the quality of the educational foundation on which it rests. The Department of Accounting is committed to the support of professional accounting through the delivery of educational experiences directed toward practice and through research that addresses the important policy issues of the day.

The mission of the department is to prepare students for careers in accounting, to interpret and expand accounting knowledge, and to render service to the profession and communities. The department does so by:

1. Providing a learning environment in which students are encouraged to interact with others in identifying and solving accounting and business problems.
2. Investigating, developing and sharing knowledge, which has the potential for significant influence on accounting, business and education.
3. Interacting with the accounting profession, the business community and the community at large.

**Administration**

Descriptions for all courses offered by the university may be accessed through the online courses database at www.pubapps.vcu.edu/vcucourses. You may search by unit, subject or keyword, as well as by degree level.

Follow this link to accounting (ACCT) courses.

**Department of Economics**

The Department of Economics provides instruction for degree programs at the baccalaureate, master's and doctoral level. The faculty works to develop in students the ability to use economic reasoning to understand and analyze business and economic phenomena and policies — the skills needed for careers in a rapidly changing world. To enhance the educational process and to broaden the frontiers of knowledge, faculty members conduct basic and applied research and provide academic and professional service to the university and professional communities.

**Administration**

Follow this link to economics (ECON) courses.

**Department of Finance, Insurance and Real Estate**

The Department of Finance, Insurance and Real Estate delivers knowledge to students in all programs offered by the School of Business and contributes to the expansion of knowledge by engaging in scholarly activity. The department provides core courses as well as majors, minors and concentrations. In addition, the department develops and delivers courses in continuing professional education for practitioners seeking to upgrade their skills and/or attempting to achieve professional certification.

**Areas of study**

- Finance (refer to the B.S. in Business concentrations for more information)
- Real estate and urban land development (refer to the B.S. in Business concentrations and the post-baccalaureate certificate for more information)
- Financial technology (refer to the B.S. in Financial Technology for more information)

**Administration**

**Combined Fast Track Master of Business Administration (M.B.A.) and Master of Science in Information Systems (M.S.) – information technology management**

Students in the Fast Track M.B.A. program have the option to continue with the Fast Track Executive M.S. in Information Systems – Information Technology Management program after having completed the requirements for the Fast Track M.B.A. to earn both degrees. Students pursuing this dual degree option will have four courses in the Fast Track M.S. program waived (these four courses cover the information systems content of the Fast Track M.B.A. program).

**Department of Information Systems**

The Department of Information Systems provides an innovative, high quality curriculum that is recognized nationally and internationally and maintains the ability to rapidly respond to the dynamic, changing needs of the academic discipline, industry and community.

The department offers degree programs at both the undergraduate and graduate level, as well as continuing education programs that support alumni and the community. Additionally, courses in information systems are offered to meet the needs of students in other curricula offered by the university as well as those who are seeking to enhance their knowledge of information systems.

Our faculty offers expertise in information technology and has wide-ranging research and teaching interests. As part of the department, the Information Systems Research Institute provides opportunities for sponsored research, innovative teaching initiatives and faculty development.

**Information systems courses**

Descriptions for all courses offered by the university may be accessed through the online courses database at www.pubapps.vcu.edu/vcucourses. You may search by unit, subject or keyword, as well as by degree level.

The Department of Information Systems offers courses in the following areas:

- Use this link to see information systems (INFO) courses.
- Use this link to see graduate-level information technology management (ISTM) courses.

**Department of Management**

The Department of Management offers a variety of baccalaureate-, masters- and doctoral-level degrees and certificate programs. Courses offered include organizational behavior, human resource management, entrepreneurship, international management, strategic management, operations management, organizational communication, and decision sciences.

**Areas of study**

- Business administration and management (refer to the B.S. in Business concentrations for more information)
• Human resource management (refer to the B.S. in Business concentrations, the post-baccalaureate certificate and the minor for more information)
• International management (refer to the undergraduate certificate program)

Graduate and Professional Programs Bulletin

School of Dentistry
The School of Dentistry was created in 1893 when the University College of Medicine opened with a dental department as one of its original divisions. The Medical College of Virginia inaugurated a dental education program in 1897, and in 1913 the two schools were merged to form the MCV School of Dentistry.

In 1968, by an act of the Virginia General Assembly, MCV was merged with Richmond Professional Institute to form Virginia Commonwealth University. The School of Dentistry is located on VCU's MCV Campus.

The facilities of the School of Dentistry are housed in the Wood Memorial and Lyons buildings and contain clinical facilities, research facilities, classrooms, student laboratories, departmental offices and a computer-learning laboratory.

The school provides opportunities for selected, qualified individuals to study dentistry under the most favorable conditions and in accordance with the standards established by the Commission on Dental Accreditation of the American Dental Association.

The degree of doctor of dental surgery (D.D.S.) is awarded to graduates of the school’s professional program and the Bachelor of Science degree to graduates of the Division of Dental Hygiene.

Graduates of the advanced dental education programs in endodontics, orthodontics, pediatric dentistry and periodontics are awarded the Master of Science in Dentistry degree.

Mission

The VCU School of Dentistry is a public, urban, research dental school, supported by Virginia to serve the people of the commonwealth and the nation. The school’s mission is to provide educational programs that prepare graduates who are competent to provide dental care services, generate new knowledge through research and other scholarly activity and provide quality oral health care to the public and service to the community.

Philips Institute of Oral and Craniofacial Molecular Biology

Andrew Yeudall
Interim Director, The Philips Institute, and Professor of Oral and Craniofacial Molecular Biology and Microbiology and Immunology

The mission of the Philips Institute of Oral and Craniofacial Molecular Biology is to serve the university and the commonwealth of Virginia as a center of educational and research excellence focused on infectious, neoplastic and genetic diseases of the oral cavity, head and neck.

Dentistry, Doctor of Dental Surgery (D.D.S.)

The Doctor of Dental Surgery is a four-year program in general dentistry leading to the D.D.S. degree and emphasizing study in three broad areas: basic sciences, clinical sciences and social sciences. The academic year begins in July and extends through May.

Admission requirements

A minimum of 90 semester hours (or equivalent) in an accredited college or university is required and must be documented. Most acceptances have a bachelor’s degree and/or four years of college. Required courses are general biology, biochemistry, general chemistry, organic chemistry, physics and English. Laboratory experiences are required for those courses where applicable. Biology courses should emphasize zoology rather than botany. Courses in general microbiology or bacteriology, animal physiology, immunology, histology, genetics, embryology, the behavioral sciences, and courses involving psychomotor skills are strongly recommended. Academic credits presented by an applicant must be acceptable for credit toward a degree in the institution in which the courses are taken. Individuals interested in pursuing a career in dentistry should schedule an appointment in the Office of Admissions for individual guidance.

In order to successfully complete the dental curriculum at VCU, students must meet non-academic criteria for motor, sensory and observation, communication, cognitive and behavioral abilities in the document Technical Standards for Dental Education Programs for VCU School of Dentistry. Accordingly, applicants may be required to prove their proficiency in American English via standardized tests and interviews. An applicant may consider the option of postponing matriculation until such time that he/she can meet these requirements.

Participation in the Dental Admission Test (DAT) of the American Dental Association is required. It is recommended that this test be taken the year before the intended matriculation year. Applicants are encouraged to take the examination more than one time, and the best set of scores is used as the official set. Information about the Dental Admission Test can be obtained from: a) your pre-health advising office of your undergraduate school, b) VCU, School of Dentistry Office of Admissions or c) the American Dental Association, Department of Testing Web site: http://www.ada.org/prof/ed/testing.

Selection factors

VCU is a state-supported, public university and gives admission preference to state residents. All applicants are evaluated by uniform criteria without regard to age, race, color, national origin, gender, religion, sexual orientation, veteran’s status, political affiliation or disability. Students are accepted by the Admissions Committee on the basis of excellence of predental education, DAT scores, recommendations, experiences in dentistry and results of personal interviews with members of the committee. The interview process is standardized and designed to determine motivation, knowledge of and interest in the dental profession, and to afford the applicant an opportunity to provide additional information pertaining to his/her application. Selection occurs on a rolling admissions basis, and once the class is complete, an alternate list is created. Members of minority groups underrepresented in dentistry are especially encouraged to apply. Each year a certain number of students who are not accepted into the freshman class are invited to take selected courses with this class. Their performance in these courses plays a vital role in their being considered for the following year’s admissions process.
Admission with advanced standing
The School of Dentistry will consider applicants for admission with advanced standing on an individual basis depending upon positions available and qualifications of the applicant. Pre-admission evaluation of skills and knowledge by performance testing is required prior to admission consideration.

Application procedures
The School of Dentistry participates in the American Association of Dental Schools Application Service (AADSAS). All applicants are required to submit credentials through this service. Re-applicants must also reapply through the application service. Application forms can be obtained from AADSAS, 1400 K St. N.W., Suite 1100, Washington, D.C. 20005 (e-mail to aadsas.apply@adea.org or call (202) 289-7204, predental advisers in colleges and universities, and the Office of Admissions, School of Dentistry, Virginia Commonwealth University, P.O. Box 980566, Richmond, VA 23298-0566.

Applicants to the School of Dentistry can be made through AADSAS on or after May 15 and must be received by AADSAS no later than Nov. 1 of the year preceding intended matriculation.

AADSAS compiles academic records and other pertinent information and forwards these with the application to the School of Dentistry. Qualified applicants are then requested to submit supplemental information, such as the VCU supplemental application. The application fee is $70.

Applicants will be notified of decisions according to guidelines established by the American Association of Dental Schools. The first acceptances are sent out on Dec. 1, and a $500 deposit (credited to tuition) is required by Jan. 15. After Feb. 1, the deposit must be received within two weeks following notification of acceptance. A second deposit of $300 credited to tuition is due on May 1. Both deposits are nonrefundable.

A letter of acceptance offers the candidate a position in the class entering for the session cited. Receipt by the Office of Admissions of the initial $500 nonrefundable tuition deposit within the prescribed period reserves the position in the class. Failure to reserve a position results in that position being offered to another candidate. A second $300 nonrefundable tuition deposit initiates active administrative processing of matriculation into the first-year class. Failure to send this deposit results in loss of position, and the position is then offered to another candidate. The act of matriculation also implies a willingness on the part of the student to comply with university rules and regulations, to take an interest in school/class activities.

For more information please visit the School of Dentistry Web site at www.dentistry.vcu.edu.

Financial assistance
A general description of financial aid based on demonstrated need is contained in the Professional Studies at VCU chapter of this bulletin. Financial need-based aid programs available to dental students include Health Professions Student Loans, Loans for Disadvantaged Students, Virginia Rural Dental Scholarship Program, and federal educational loans. Further information may be obtained from the offices of Admissions, Financial Aid and Student Affairs of the School of Dentistry.

Honors and awards
The School of Dentistry presents numerous awards, honors and scholarships to students during the academic year. These awards are presented during special school events, including graduation, Student Clinic Day and the Senior Gala. Students who excel in scholarship and leadership also may be eligible for membership in university or school honor societies. In addition, students who meet established criteria may be eligible for scholarships or election to membership in organizations related to dentistry.

Omicron Kappa Upsilon is the national honorary dental society. Each year the society selects those students who, in addition to scholarship, have demonstrated exemplary traits of character and potential qualities of future professional growth and attainments.

Phi Kappa Phi is a national honor society that recognizes and encourages superior scholarship. It accepts members from applied and professional fields of study, as well as from letters, arts, sciences and humanities. The VCU chapter was installed in 1977.

Alpha Omega Scholarship Award is presented to the graduating student who has attained the highest scholastic rating for his/her four years of dental study.

Harry Lyons Scholarship Award is awarded to the graduating senior dental student who has attained the highest grade-point average for his/her four years of dental school.

A. D. Williams Foundation Award is an annual stipend made to a student in each class who demonstrates, by virtue of high scholastic attainment and professional performance, unusual promise and ability. Character, motivation, intellectual curiosity and realization of the opportunities for intellectual development will be considered in the award, which is made at the end of the academic year.

O.M. Clough Award is awarded to a graduating senior dental student for outstanding achievement in restorative dentistry.

William B. Fitzhugh Scholarship Award is awarded to an incoming dental student who has demonstrated financial need, preference being given to students who have demonstrated athletic abilities at their undergraduate institution.

R. Ashton Gay and Henry F. Vaughan Scholarship is awarded to a student who is a Virginia resident at the VCU School of Dentistry, demonstrates academic excellence and leadership during the D-1 year, and has demonstrable need of financial assistance at the beginning of the D-2 year.

Edmond T. Glenn Award is awarded on the basis of financial need to a student ranked in the upper half of the class at the end of the D-3 year and who has been involved in school/class activities.

International College of Dentists Award is presented to the graduating dental student who has shown the most professional growth and development during his/her years of dental study.

Pierre Faucher Academy presents an award to the graduating dental student who has exhibited leadership qualities and through his/her accomplishments has demonstrated dedication to the advancement of dental literature.

The Richmond Dental Study Club Memorial Endowment Scholarship is awarded annually to a D-3 (junior) dental student based on his/her having a GPA in the top 25 percent of the class and demonstrating exceptional leadership and participation in school and/or community extracurricular activities at the end of the D-2 (sophomore) year.

Alexander Kaufman Award is awarded to a junior dental student based on class leadership and financial need.

P.D. Miller Award goes to the dental student judged by faculty as having demonstrated excellent understanding of the relationship between restorative dentistry and periodontics.

Robert M. Saunders Scholarship is awarded to a junior or senior Virginia resident predoctoral dental student with excellent academic credentials.

Curriculum
The curriculum in the dental school is organized into a competency-based, four-year program leading to the doctor of dental surgery (D.D.S.) degree. The academic year begins in July and extends through June. The program emphasizes study in three broad areas: biomedical sciences, clinical sciences and behavioral sciences.

The biomedical sciences include the in-depth study of human anatomy, biochemistry, genetics, material science, microbiology, pathology, pharmacology and physiology.

The clinical sciences prepare the student for the actual practice of dentistry and provide exposure to the various specialties in dentistry. The behavioral sciences cover such topics as dental health needs, the system of health care delivery, practice management, professional ethics and behavioral factors.

Laboratory and clinical experiences are offered throughout the four years to develop the skills and judgment vital to the practice of general dentistry.

In general, courses offered as part of the curriculum in dentistry are not available to other students in the university. Exceptions may be granted by the dean of the School of Dentistry to students enrolled in graduate degree programs upon written request of the department chair in which the student is seeking a degree.

PEDD 749 Clinical Pediatric Dentistry IV 2.0

Senior, second semester
DENS 745 Patient Management and Professional Conduct 3.0
DENS 752 Clinical General Practice Dentistry* 3.0
ORSG 749 Oral Surgery/Urgent Care Clinic* 3.0

* Continues into second semester.
** Completed first semester senior year.

Academic performance evaluation
The faculty of the VCU School of Dentistry has the responsibility for evaluating the student’s academic performance. It is incumbent on the course directors or their designees to specify, at the time that courses first convene, the criteria to be used in student assessment and the standards by which they will be judged.

The VCU School of Dentistry Guidelines for the Evaluation of Student Performance and Academic Status are distributed to all students at the beginning of their study. They are available upon request from the Office of Academic Affairs, School of Dentistry.

Advanced Dental Education

Martha C. Clements
Director, Continuing Education

Office of Continuing Education

For every professional person who serves the health sciences, education must be a lifetime commitment.

Graduation from dental school is the beginning of a lifelong educational experience for the serious, conscientious student of dentistry. Regardless of how well prepared a health professional may be at the time of graduation, the adequate knowledge of yesterday is often insufficient information for today and tomorrow. With the rapid advancements made in dental technology and techniques, the professional must constantly seek new knowledge if the health care provider is to improve the health care given to patients.

Although the majority of continuing education courses are presented at the School of Dentistry, some are offered in other locations. The courses, which vary in length from one to four days, are scheduled throughout the year and consist of a variety of instructional methods from didactic to hands-on participation in clinical programs.

The instructional staff is comprised of faculty from the VCU School of Dentistry, guest lecturers from other dental schools, and members of the dental profession and related professions from the United States and other countries.

Advanced Dental Education programs

The School of Dentistry provides advanced dental education programs in the areas of endodontics, oral and maxillofacial surgery, orthodontics, pediatric dentistry, periodontics, and advanced education in general dentistry (AEGD). Satisfactory completion of the program leads to the award of a certificate of training and certifies eligibility for examination by the appropriate specialty board. All programs are accredited by the Commission on Dental Accreditation of the American Dental Association. Those enrolled in the advanced education programs are full-time resident trainees, considered to be the equivalent of full-time students. Under special circumstances, trainees may be accepted into some programs on a part-time basis.

Students enrolling in endodontics, orthodontics, pediatric dentistry and periodontics also are awarded a Master of Science in Dentistry degree upon completion of the requirements for the certificate and successful defense of a thesis. The certificate program and Master of Science in Dentistry degree must be completed concurrently. See the School of Dentistry Graduate Program for more information on the Master of Science in Dentistry degree program.

Applications for admission should be directed to the director of the appropriate program, School of Dentistry, Virginia Commonwealth University, P.O. Box 980566, Richmond, VA 23298-0566. Successful completion of Part II of the National Board Dental Examination is required prior to admittance to the program.

Advanced Education in General Dentistry

Debra Haselton
Associate Professor and Interim Program Director

The purpose of this 12-month Advanced Dental Education residency program is to provide advanced education and clinical experience to prepare dental school graduates for a career in the practice of comprehensive, general dentistry. This program has a strong emphasis on treatment planning, experience with new technology, developing skills in aesthetic dentistry and restoration of dental implants. Graduates of this program will have attained added competency and confidence in all areas of dental care, practice management and professional responsibility. Further, this program provides residents with meaningful experiences in the delivery of dental care to diverse populations and people at high risk for dental disease. A strong affiliation exists between the School of Dentistry and the statewide Virginia Area Health Education Center (AHEC), whose mission is to increase primary health care in underserved areas. The AEGD program works in concert with AHEC to deliver dental care and recruit/train minority health care providers from health professional shortage areas.

The School of Dentistry is committed to advanced dental education. The residents will receive hands-on experience with diagnostic and therapeutic care of special patient populations in addition to extensive training in the art and science of general dentistry. AEGD residents may be required to participate in off-site clinical experiences outside the city of Richmond, Va. Funds will be provided for travel and lodging when required.

Eligibility and selection

Dentists with the following qualifications are eligible to apply for the AEGD program: Dental graduates from institutions in the United States accredited by the Commission on Dental Accreditation of the American Dental Association and who have passed Part I of the National Board Examination.

Selection criteria include: didactic and clinical achievements, extramural experience, interpersonal skills and a demonstrated commitment to pursue a career in general dentistry. Every effort is made to recruit qualified applications from minority dentists and dentists from health professional shortage areas or dentists who profess a desire to serve in these areas. A selection committee consisting of the program director, the assistant dean for admissions, members from specialty areas, former residents and current residents will screen all applications. Using the above-mentioned selection criteria, the most promising applicants will be invited for personal interviews. Trainees and alternates will be selected. This program participates in the Postdoctoral Application Support Service Program. Telephone (804) 828-3601; fax (804) 828-3159; e-mail drhaselton@vcu.edu.

Endodontics

Karan Reploge
Professor and Interim Department Chair, Endodontics

The Advanced Dental Education Program in Endodontics offers the student a comprehensive 24-month course of study in clinical, didactic and research endodontics. The program is designed to educate qualified individuals to pursue careers as educators, researchers and practicing clinicians, and meets the educational requirements for limitation of practice to the specialty of endodontics and examination by the American Board of Endodontics. The program is composed of several interrelated phases. The first phase consists of lecture courses that provide the student with a firm biological basis for patient care. The second phase consists of lectures, seminars and clinical training designed to produce clinical mastery of endodontics. The third phase is research experience gained through completion of an individual research project and master’s thesis.

Students completing the program earn a specialty certificate in endodontics and a Master of Science in Dentistry degree. Students must complete the requirements for the master’s degree prior to being awarded the specialty certificate.

The program conforms to the Standards for Advanced Specialty Education in Endodontics and carries a full approval status from the Commission on Dental Accreditation of the American Dental Association.

Oral and Maxillofacial Surgery

Robert A. Strauss
Professor and Program Director

The oral and maxillofacial surgery program is designed to provide extensive didactic and clinical experience in all aspects of the specialty. Those who complete training satisfactorily fulfill the prerequisites for examination and certification by the American Board of Oral and Maxillofacial Surgery.

The didactic portion of the program includes formal courses in oral pathology, anatomy and physical diagnosis, as well as numerous weekly conferences and seminars. Clinical rotations on oral pathology, anesthesia, medicine, surgical oncology, neurosurgery, cardiology, general surgery, emergency room and the trauma services are used to supplement the trainee’s surgical experience. Throughout the program there is a constant correlation of the clinical experience with the biomedical sciences.

Through the multiple clinical and didactic facilities of the VCU Medical Center complex, the McGuire Veterans Affairs Medical Center, and St. Mary’s Hospital, there is ample material for education in the latest oral and maxillofacial surgical
techniques. The oral and maxillofacial surgery service is responsible for diagnosis and management of diseases and injuries related to the oral and facial region. Trainees are involved in all aspects of treatment including simple and complicated oral surgery, anesthesia and pain control, oral and maxillofacial trauma, preprosthetic surgery, orthognathic surgery, head and neck pathology, oral and maxillofacial reconstruction, temporomandibular joint surgery, laser surgery, cosmetic facial surgery, and microneural and microvascular surgery. During the four years, the trainee assumes ever-increasing responsibilities as time and abilities dictate.

Upon satisfactory completion of the four-year residency, the trainee may earn the Doctor of Medicine degree from the School of Medicine by enrolling in the second and third years of that curriculum.

Orthodontics

Bhava Shroff
Professor and Program Director

The Department of Orthodontics at VCU’s MCV Campus offers a 24-month advanced education in orthodontics and Master of Science in Dentistry program. The program teaches state-of-the-art clinical care in an environment modeled after private orthodontic practice. The curriculum is composed of seminars and small-group instruction with emphasis on critical thinking and problem solving. Contemporary concepts of orthodontic treatment are reviewed for substantive and scientific content. Also included are regularly scheduled orthognathic surgery conferences and seminars with other dental and medical specialists.

The postgraduate program is designed to develop skilled practitioners who are prepared to grow with the future and manage busy orthodontic practices. The goal is not only to familiarize future orthodontists with contemporary techniques but also to teach them how to interpret cutting-edge scientific information and use it to approach clinical challenges logically and practically. Clinical experience consists of a wide variety of orthodontic patients, including complex cases requiring orthognathic surgery and patients with facial clefts and other craniofacial abnormalities. An original research experience is an integral part of the program, with each project intended to produce results suitable for publication in a nationally circulated orthodontic journal. The successful completion of a research project is a requirement of the program. All senior residents present their research at the Virginia Association of Orthodontists meeting. The program qualifies students to take the written portion of the American Board of Orthodontics examination in the senior year. Residents are required to take the written portion of the American Board of Orthodontics examination prior to graduation, and are encouraged to continue and complete the board certification process. This exam is given prior to the American Association of Orthodontists meeting.

Students completing the program earn a specialty certificate in orthodontics and Master of Science in Dentistry degree. Students must complete the requirements for the master’s degree prior to being awarded the specialty certificate.

The program is accredited by the Commission on Dental Accreditation of the American Dental Association.

Pediatric Dentistry

Michael D. Webb
Associate Professor and Program Director

The Advanced Education Program in Pediatric Dentistry offers the student a comprehensive 24-month course of study in clinical and didactic pediatric dentistry. The program is designed to meet the educational requirements for limitation of practice to the specialty of pediatric dentistry and examination by the American Board of Pediatric Dentistry. The program emphasizes a diversified educational experience. The program places emphasis on all phases of pediatric dentistry including trauma, preventive dentistry, restorative, endodontics, periodontics, oral surgery, orthodontics and hospital dentistry. The program enables the student to provide comprehensive oral health care for the well child, the medically compromised and children with special needs. There is extensive use of various treatment modalities for pain control and behavioral management, such as sedation, analgesia and general anesthesia. Research experience is gained through completion of an individual research project and master’s thesis.

Seminars are held in pediatric dentistry, orthodontic diagnosis and treatment, treatment planning, growth and development, cephalometric analysis, pediatric dentistry literature review, and behavior guidance. Formal courses in biostatistics, principles of pediatrics, pediatric advanced life support, head and neck anatomy, neurodevelopmental disabilities, leadership seminars, basic sciences, and clinical core courses are required. The students participate in undergraduate clinical teaching and supervision.

One-month rotations occur in general anesthesia, and two-week rotations occur in the pediatric emergency room, pediatric medicine and oral pathology. During the year, rotations in cleft palate, craniofacial anomalies and hemophilia occur. Optional elective rotations are available in treating institutionalized handicapped patients (in Lynchburg) and in providing treatment in rural areas that have low access to dentistry on the school’s mobile dental van. Elective didactic courses also are available.

Students completing the program earn a specialty certificate in pediatric dentistry and a Master of Science in Dentistry degree. Students must complete the requirements for the master’s degree prior to being awarded the specialty certificate.

The program is accredited by the Commission on Dental Accreditation of the American Dental Association.

Periodontics

Thomas C. Waldrop
Professor and Program Director

The advanced education program in periodontics consists of a 36-month clinical and didactic curriculum leading to a certificate in periodontics. Students are responsible for all materials and make up of lost clinical time. Courses in the basic and clinical sciences, medicine, head and neck anatomy, statistics, and advanced cardiac life support are required. Students are responsible for attending and preparing for lectures, current and periodontal literature, medical-oral medicine, treatment planning, case presentation, and surgical seminars. No grade less than 80 percent or passing is acceptable from any periodontal or basic science course work. Less than passing grades may require retesting or retaking of a course. Students are expected to be able to utilize a computer to prepare lectures and to access Internet resources.

Students are responsible for documentation of clinical and course work data. Specified digital intra-oral camera and documentation of all clinical cases and department archiving is required. Students are responsible for the service for rotations in general medicine, dental anesthesiology and oral pathology. Proficiency and certification in intravenous conscious sedation is required. Students are responsible for clinical and classroom teaching to undergraduate and specialty students. Research on a topic that is reviewed and approved by a faculty committee is required. Upon completion of the research, the student is required to prepare a thesis, defense and manuscript for publication. Certificates are not awarded until completion of the Master of Science in Dentistry requirements. Students are responsible for the purchase of program-required equipment, instruments, books and all associate fees. All students are required to become student members of the American Academy of Periodontology.

Combined Master of Science (M.S.)/Doctor of Philosophy (Ph.D.) and Doctor of Dental Surgery (D.D.S.)

In cooperation with the School of Dentistry, students in dentistry with an interest in academic and research careers are afforded the opportunity to undergo advanced degree training while in dental school or residency. Admission of students enrolled in the School of Dentistry to combined degree programs is processed through the Office of Graduate Education of the School of Medicine by established procedures. The Dental Aptitude Test may be accepted in lieu of the GRE as an admission requirement. No application fee is required of students already regularly enrolled as degree-seeking graduate students at the university.

The requirements for a combined professional school/graduate school degree in basic health sciences are equivalent to those required of students seeking a graduate degree alone and are determined by the individual departments. A time limit of five calendar years for the M.S. and seven calendar years for the Ph.D. degree, beginning at the time of first registration in the graduate school, applies to work to be credited toward degrees for students in combined programs.

Dentistry, Master of Science in (M.S.D.)

Admission requirements summary

Dentistry, Master of Science in (M.S.D.)

Indicate specialization:
The master’s degree program is offered concurrently with the advanced dental education programs in endodontics, orthodontics, pediatric dentistry and periodontics. Students completing these programs are awarded a specialty certificate and a Master of Science in Dentistry (M.S.D.) degree. The certificate and degree programs must be completed concurrently.

Applications for admission should be directed to the director of the appropriate program, School of Dentistry, Virginia Commonwealth University, P.O. Box 980566, Richmond, VA 23298-0566. Successful completion of Part II of the National Board Dental Examination is required prior to admittance to the program.

For more information on these advanced dental education programs see the School of Dentistry Advanced Dental Education programs section of this bulletin.

**Admission requirements**

Students must first be accepted into one of the advanced dental education programs in endodontics, orthodontics, pediatric dentistry or periodontics. Once accepted, students are automatically enrolled in the master’s degree program in the Graduate School. A separate application and fee are required for admission to the Graduate School.

**Degree requirements**

1. The student must complete all course work for the particular advanced dental education program.
2. The student must initiate, develop and complete an original scientific study.
3. The student must complete a thesis according to the Graduate School’s guidelines.
4. The student must pass the final defense of the thesis.
5. The student must maintain a cumulative GPA of 3.0.

**Thesis adviser and committee**

Students receive guidance and counsel from the director of their program. The program director holds primary responsibility for monitoring the development of the student in the program and providing appropriate guidance and counsel essential to the scholarly development of the student.

A thesis advisory committee, appointed shortly after the student enrolls, serves as both an examining and consultative body, functioning to assist the student with development of their research.

Each student shall have a thesis adviser and advisory committee. In many cases, the program director also will serve as the thesis adviser.

The student’s thesis adviser shall be appointed by the program director. The adviser must be a member of the regular graduate faculty (not affiliate). Appointment should be made by the beginning of the spring semester of the first year.

The adviser shall, with the student’s advisory committee, have responsibility for guiding the student’s research. The adviser will identify members of the faculty to comprise the advisory committee. The adviser will serve as the chair of the committee. The adviser will supervise the student’s research work and thesis preparation and be one of the examiners of the thesis defense.

The student’s advisory committee shall be appointed no later than the midpoint of the spring semester of the first year. Exceptions to this rule must be approved by the program director and thesis adviser. The committee shall consist of a minimum of three members as follows: the student’s thesis adviser; two members from the graduate faculty, one of which must be from the department/program. Adjunct faculty can be appointed to the graduate faculty as an affiliate member for the purpose of serving on an individual student’s advisory committee.

The advisory committee functions as an advisory body to ensure that timely progress toward completion of the thesis is being achieved. It is the student’s responsibility to stay in contact and meet regularly with the committee. The advisory committee serves as a scientific consultative body and conducts the final examination of the thesis work.

www.dentistry.vcu.edu/academics/dh_division/dh_division.html

Kim T. Isringhausen
Director, Division of Dental Hygiene

Coral Diaz
Chair, Dental Hygiene Admissions Committee
The Division of Dental Hygiene believes the modern practicing dental hygienist requires a broad range of skills to function effectively. Competency in specific clinical-technical skills, while essential, will not be sufficient to meet increasing social needs and demands for comprehensive oral health care at all societal levels. The division views the dental hygienist with a baccalaureate degree as a leader not only in helping the dental profession respond to a changing environment, but in developing and initiating interventions that prevent and control oral disease and promote oral wellness, as well as in facilitating that change itself.

The division assumes a responsibility to provide current and future practitioners with skills that allow them to provide efficient, quality oral health care to the public, to be responsive to a changing profession, to be lifelong learners and to provide service to the community and the profession.
The primary objective of the Virginia Commonwealth University School of Education is to prepare students for careers in education, government, health-related professions, recreation and research. All programs combine comprehensive studies in the liberal arts and sciences with professional preparation and concentration in specialized fields of study. Practical applications and field experiences are an integral part of each academic program. The School of Education is committed to preparing high-quality professionals for service in urban, suburban and rural areas.

Beverly J. Warren  
Professor and Dean

Henry T. Clark III  
Associate Dean for Academic Affair

Diane J. Simon  
Associate Dean for Student Affairs

Ted A. Conway  
Associate Dean for Research Services

**Accreditation**

**Education (all degrees)**
The National Council of Accreditation for Teacher Education (initial licensure and advanced degrees for school personnel), the Virginia Department of Education and the Southern Association of Schools and Colleges

**Athletic training**
The M.S.A.T. program will apply for accreditation by the Commission on Accreditation of Athletic Training Education (CAATE) in September 2007 with an expected program evaluation in the spring semester of 2008. Application for CAATE accreditation does not guarantee accreditation, and if accreditation is not awarded to the M.S.A.T. program following their anticipated site visit, students enrolled in the program will not be eligible to register with the Board of Certification and take the certifying examination.

**Recreation and park management, therapeutic recreation (bachelor’s degree)**
The Council on Accreditation National Recreation and Park Association/American Association for Leisure and Recreation

The school holds membership in the American and Virginia Association of Colleges of Teacher Education and in the Holmes Partnership.

**Values statement**
The VCU School of Education is dedicated to the preparation of professional educators and clinicians, the ideals of academic scholarship, and the worthiness of service. Through our work in these areas, we recognize our responsibilities to students, university colleagues, the community at large, and professional organizations. While all of us share common values, the statements below intentionally allow for a variety of interpretations that may be influenced by our assignments, our experiences, and our philosophical principles within programs and across the School of Education.

The school demonstrates its belief in the value of high quality programs by:

- Attracting high quality students.
- Being responsive to the external standards of accrediting and professional organizations.
- Providing meaningful clinical placements.
- Continually evaluating, assessing and improving programs and services.

The school demonstrates its belief in the value of high quality teaching by:

- Demonstrating a variety of effective teaching strategies, including technology integration, universal design for learning and student-centered instruction.
- Fostering curriculum development that ensures familiarity with best practice across all disciplines.

The school demonstrates its belief in the value of diversity by:

- Preparing students to work in culturally and linguistically diverse settings.
- Accommodating students with special learning needs.
- Promoting a diverse student and faculty community.
- Supporting intellectual curiosity.
- Modeling and promoting social justice.

The school demonstrates its belief in the value of high quality scholarship and, in particular, the value of research culture by:

- Conducting relevant, high quality research that is responsive to the metropolitan community and contributes to the disciplines.
- Encouraging collaborative research with colleagues, practitioners and students.
- Supporting the creation, interpretation and dissemination of knowledge.
- Integrating current research into teaching.

The school demonstrates its belief in the value of collaboration and partnerships by:

- Serving as a resource for the development of policy, curriculum, instructional practice and professional standards.
- Providing leadership and professional outreach to organizations, the university and the community at large.
- Maintaining partnerships and shared responsibility for professional preparation.

The school demonstrates its belief in the value of critical reflection by:

- Observing ethical practice and professional honesty.
- Encouraging students to exhibit dispositions consistent with accepted professional practice.
- Fostering a trusting, safe community of scholars.
- Engaging in ongoing professional development.
- Examining professional practices.

**Educator as critically reflective practitioner**
The guiding theme of educator preparation programs in the School of Education is educator as critically reflective practitioner. Courses and experiences provide opportunities for individuals to consider means of building on appropriate knowledge to make instructional, assessment, counseling and leadership decisions.

**Organization**
The chief administrative office for the School of Education is the Office of the Dean, Room 2090 Oliver Hall. Three associate deans assist in the administrative functions of the school. The associate dean for academic affairs is responsible for all academic programs offered by the school and assists each department in the administration of the various degree programs, and handles administrative areas related to admission, matriculation, graduation and special actions and appeals for graduate students. The associate dean for student affairs is responsible for the school’s assessment and student services offices, and handles the administrative areas related to admissions, matriculation, student appeals and graduation applications for undergraduate students. The associate dean for research services handles issues related to scholarship, including fostering faculty research and grant writing, and coordinating with the vice provost for research.

The school is organized for the management of instruction and degree programs into six departments: Counselor Education, Educational Leadership, Foundations of Education, Health and Human Performance, Special Education and Disability Policy, and Teaching and Learning. Four of the departments offer undergraduate course work or programs that lead to an undergraduate degree and/or a Master of Teaching (M.T.) degree:

- Foundations of Education
• Health and Human Performance
• Special Education and Disability Policy
• Teaching and Learning

Two departments offer graduate degrees only:
• Counselor Education
• Educational Leadership

Facilities
The School of Education is housed primarily in Oliver Hall, where classroom, laboratory and activity centers, and faculty and administrative offices can be found. Clinical laboratories are located in the Franklin Street Gymnasium.

Support/resource offices
The School of Education has developed various resources to provide support services to students, faculty and the academic programs. These resources are the Office of Student Services, the Office of Continuing Education and the Instructional Technology Center, which houses state-of-the-art computer laboratories.

Student Services Center
Basic information on the degree programs in the School of Education, as well as forms needed by students as they advance through the programs, are available in the Student Services Center, located on the third floor of Oliver Hall. Students enrolling in the B.S. program can arrange an appointment with undergraduate advising on the first floor of Oliver Hall.

The Office of Student Services in Oliver Hall receives and processes various School of Education application forms and supplies information on the Praxis I examination, Praxis II specialty area tests, Graduate Record Examination and the Miller Analogies Test. For information on student performance on the Praxis examinations, refer to the School of Education Web site at www.soe.vcu.edu/ssc/faq.htm.

This office coordinates clinical placements for students in practica, student teaching, internships and externships. Student teachers and graduate internship teachers are placed primarily in school divisions and other educational facilities in the greater Richmond metropolitan area. Students in non-teacher education programs are placed in practica and clinical experiences through the coordinator of undergraduate advising. Placements are secured in schools, agencies, clinics and hospitals in the greater Richmond metropolitan area. Every effort is made to place students in clinical experiences relevant to their intended career path.

Applications and information on scholarships available to School of Education students can be obtained at the Student Services Center. Information on financial aid administered by the university is found in the appropriate level of “Expenses and Financial Aid” sections of this bulletin.

Licensure and endorsement information, materials and applications for Virginia education personnel are available in the Student Services Center. Licensure and endorsement are based, in part, on the successful completion of an approved program that complies with national standards.

For more information about this center, visit www.soe.vcu.edu/ssc.

Instructional Technology Center
The Instructional Technology Center, a multimedia facility, is used by faculty and students in the School of Education. The center houses microcomputers with sophisticated graphics capabilities, educational software and many similar resources for the development of instructional materials. It also provides access to the School of Education’s Local Area Network, VCU Libraries, the Internet and the Web.

Computer laboratories
The Instructional Laboratory, housed in the Instructional Technology Center, gives students many opportunities to learn about computer-assisted instruction in the classroom setting. It also lends support to students enrolled in the computer science basic literacy course and other technology courses offered by the school. The laboratory equipment includes Macintosh and IBM-compatible multimedia computers. Laptop computers, laser printers, color laser printers and scanners also are available.

The INFUSIO Distance Learning Technology Laboratory, also housed in the Instructional Technology Center, is a new technology facility designed to provide assistance to faculty, preservice teachers and associates in the School of Education. The lab presently houses a Polycom two-way video conferencing system, interactive Smart and Softboards, and Mimio digital meeting assistant technology for electronic note taking. There are several high-end multimedia PC stations and a Macintosh computer with a variety of the latest software programs. Computers are equipped with headphones, microphones and digital cams for use in audio and video recording. The INFUSIO Lab includes a number of assistive technologies designed to enhance the concept of universal learning.

A university computer laboratory open to all students is housed in Oliver Hall. The laboratory is equipped with 24 IBM- and Mac-compatible computers that permit students to access the Internet and MS Office software.

Office of Doctoral Studies
The Doctoral Studies Office is responsible for the administration of the Ph.D. in Education and Ph.D. in Rehabilitation and Movement Sciences. Refer to the Ph.D. in Education and Ph.D. in Rehabilitation and Movement Sciences sections of the bulletin for further information on the programs.

School of Education Associates
The School of Education Associates Office is the contact for conducting School of Education off-campus related degree cohort programs, courses for credit and other professional development in-service workshops. Many off-campus partnerships and grant-funded projects also are coordinated and managed. The major emphasis is serving the community of K-through-12 administrators, teachers and staff in Central Virginia. Additionally, distance learning using various forms of technologies is being developed and offered by this office.

Centers and institutes
Programs, resources and scholarly and service endeavors of the school are extended by a number of academies, centers, institutes and programs directed by the faculty. These include:

  Behavioral Intervention Program
  Career Connections Techlink
  Center for School-Community Collaboration
  Central Virginia Leadership Academy
  Commonwealth Educational Policy Institute
  Metropolitan Educational Research Consortium
  Metropolitan Educational Training Alliance
  Partnership for Persons with Disabilities
  Professional Opportunities for Developing Excellent Teachers:
    English Second Language
    Rehabilitation Research and Training Center
  Training and Technical Assistance Center
  Virginia Adult Learning Resource Center

Licensure and reciprocity
Upon completion of degree requirements in any of VCU’s teacher preparation programs and with the recommendation of the School of Education, students are eligible to receive initial teacher licensure from the Virginia Department of Education. For additional information on licensure, licensure renewal or an add-on endorsement, contact the School of Education’s Student Services Center.

In Virginia, initial licensure requires successful completion of the Praxis examinations. Students may meet the Praxis I assessment requirement by achieving passing scores on the reading, writing and mathematics tests or by achieving the established composite score for the three tests. Students who present the requisite test scores on the Scholastic Aptitude Test or American College Test may substitute either test for the Praxis I. Applicants for initial licensure must take the Praxis I examination and Praxis II specialty area test in the endorsement area in which licensure is sought. In fields where the specialty exam is not available, only the Praxis I test is required of licensure candidates. Students must pass Praxis I (or its established equivalent) prior to admission to teacher preparation. Students must pass any applicable Praxis II test prior to student teaching.

Students should request that their Praxis I and Praxis II specialty area test scores be reported to VCU and the Virginia Department of Education. Students in
elementary education or reading education must take the Virginia Reading Assessment.

Before a recommendation for licensure can be sent to the Teacher Licensure Division of the Virginia Department of Education, these test scores must be on file with the School of Education’s Student Services Center.

**Licensure for education personnel**

Licensure and endorsement are based in part on the successful completion of an approved program developed in response to nationally recognized standards. All licensure and endorsement programs offered by the School of Education are approved by the Virginia Department of Education and the National Council for the Accreditation of Teacher Education. The commonwealth of Virginia is a member of the National Association of State Directors of Teacher Education and Certification, which has a national reciprocity agreement for teacher licensure. Therefore, all licensure and endorsement programs in the School of Education have approved program status and are a part of the NASDTEC Certification Reciprocity Agreement. Information about VCU students’ performance on the state-mandated licensure tests (Praxis I Reading, Writing and Mathematics, Praxis II Specialty Area Tests, and other required assessments) is available on the School of Education Web site: www.soe.vcu.edu/ssc.

**Graduate programs leading to initial teacher licensure**

Individuals often decide to pursue a teaching career after they have completed a baccalaureate degree. VCU serves qualified individuals through approved programs leading to a Master of Teaching, Master of Education (special education) or a Postbaccalaureate Certificate in Secondary Teaching. Upon completion of a degree program, graduates are eligible for both Virginia licensure and/or endorsement in the specific degree area.

Students seeking initial licensure in Virginia must have earned a liberal arts degree (or its equivalent) and pursue professional studies focusing on a specific area of preparation or licensure. Those without initial licensure who enter a program should expect to take some additional course work prior to the awarding of a degree.

Individuals seeking initial licensure to teach must pass the Virginia Board of Education licensure examinations. Admission to teacher preparation and clinical experiences requires that candidates meet or exceed the Virginia scores for Praxis I. Prior to licensure, candidates must pass the Praxis II specialty test in their respective disciplines. Candidates in early/elementary, special education (emotional disturbance, learning disabilities and mental retardation) and reading must pass the Virginia Reading Assessment. Effective Jan. 1, 2007, all teacher preparation candidates must take and pass the Virginia Communication and Literacy Assessment. All teacher candidates in foreign languages must take the American Council on the Teaching of Foreign Languages Oral Proficiency Interview before the internship. For more information, refer to the School of Education Web site at www.soe.vcu.edu/ssc.

Those planning to teach at the secondary level must possess a major or its equivalent in the discipline in which they wish to teach and for which VCU offers the approved program teaching specialty.

Individuals who wish to obtain licensure in art education, music education or theater education should consult the School of the Arts section of this bulletin.

The Master of Teaching program integrates undergraduate course work for a bachelor’s degree in a liberal arts or science major with course work and graduate study leading to a Master of Teaching in a program area.

**Approved programs and certification reciprocity**

All of VCU’s initial teacher preparation programs are approved by the Virginia Department of Education and accredited by the Southern Association of Colleges and Schools and the National Council for Accreditation of Teacher Education. VCU’s School of Education also holds membership in the American and Virginia Associations of Colleges for Teacher Education and the Holmes Partnership.

Based on the National Association of State Directors of Teacher Education and Certification agreement, VCU graduates will be eligible for teacher licensure reciprocity with other states. Students interested in licensure reciprocity should contact the School of Education’s Office of Student Services.

**Bachelor of Science in Health, Physical Education and Exercise Science**

- Community health education
- Exercise science
- Teacher education in health and physical education P-12
  - Concentrations: Pre-medicine, Pre-occupational therapy, Pre-physical therapy

**Minor in foundations of special education**

**Master of Teaching (extended programs)**

- Early and elementary education
- Secondary education 6-12
- English
- Foreign languages
  - French
  - German
  - Spanish
- History
- History and social studies
- Mathematics
- Sciences
  - Biology
  - Chemistry
  - Interdisciplinary sciences
  - Physics

**Master of Education**

- Adult learning
- Counselor education
- School counseling PK-12
- College student development and counseling
- Educational leadership
  - Administration and supervision
  - Leadership studies
- Reading
- Special education
  - Early childhood special education
  - Emotional disturbance
  - Learning disabilities
  - Mental retardation
  - Severe disabilities

**Master of Science**

- Health and movement sciences
- Recreation, parks and sport leadership

**Master of Science in Athletic Training (M.S.A.T.)**

**Ph.D. in Education**

- Adult education and human resource development
- Educational leadership
- Instructional leadership
- Research and evaluation
- Special education and disability leadership
- Urban services leadership

**Ph.D. in Rehabilitation and Movement Science**

- Exercise physiology track
- Neuromusculoskeletal dynamics track

**Post-baccalaureate certificates**

- Autism spectrum disorders
- Instructional technology
- Teaching
  - Secondary education
  - English
  - Foreign languages
  - French
  - German
  - Spanish
  - History/social studies
- Mathematics
- Sciences
  - Biology
  - Chemistry
Extended Teacher Preparation Program

The School of Education, in cooperation with the College of Humanities and Sciences, offers extended teacher preparation programs in early childhood/elementary education (prekindergarten through grade six), secondary education (grades six through 12) and special education (kindergarten through grade 12). The successful completion of these programs results in the simultaneous awarding of both a bachelor’s and a master’s degree.

General degree requirements

The successful completion of these programs results in the simultaneous awarding of both a bachelor’s and a master’s degree. Prospective Master of Teaching students earn their bachelor’s degree in a specific field in which they plan to teach. A student generally begins work on the professional studies component in the third or fourth year of academic study.

A student enrolled in any one of the three extended teacher preparation programs must complete a minimum of 153 credits. The student must maintain a cumulative GPA of 2.8 for admission to the teacher preparation program. Completion of at least 90 credits with a minimum GPA of 3.0 in the last 60 semester hours of study is required for that student to be admitted to the graduate studies portion of the extended program.

A Post-baccalaureate Graduate Certificate in Teaching is open primarily to those who have already earned a master’s degree. The candidate must complete at least 24 additional hours beyond the bachelor’s level. Admittance to this program requires a minimum GPA of 3.0 in the last 60 semester hours of study.

Clinical experiences

Programs in special education encompass planned experiences in the field or clinical settings, including guided practica experiences. These direct experiences lead to an internship.

With the guidance of a mentor, the intern assumes more independence in the field setting. Satisfactory completion of the internship and the preceding training is charted through evaluations made by the university supervisor, colleague-teacher and school administrator.

Change of major and transfer students

Students wishing to enter the Extended Teacher Preparation Program must transfer initially to the College of Humanities and Sciences. They must declare a major in the college and a specialization in the appropriate professional studies sequence in the School of Education.

For admission to teacher preparation, a minimum GPA of 2.8 is required. A minimum GPA of 3.0 in the last 60 semester hours of study is required for admission to the graduate phase of the Extended Teacher Preparation Program.

Transcript evaluation

The College of Humanities and Sciences evaluates transcripts of all students pursuing the extended program. Credits are accepted if they conform with specific program guidelines; course equivalents from accredited colleges and universities are accepted if the grade earned is C or better. From the extended program, 60 semester hours of acceptable undergraduate course work are required to be admitted to a teacher preparation program. See specific criteria in the “Admission to the Extended Teacher Preparation Programs” section of this bulletin.

Credits that are accepted from two-year institutions may meet liberal arts and sciences requirements, but will not meet professional requirements for upper-division course work. The VCU Transfer Guide for Virginia Community Colleges lists, in full, credits accepted by VCU that have been earned in the state’s community colleges.

After the initial student transcript evaluation, the assigned adviser reviews the accepted transfer credits with the student, determining what additional course work at VCU will be necessary. An adviser is not required to use all the accepted transfer credits in a student’s program of study. Only those credits approved for transfer can be applied toward the chosen degree.

Faculty advisement

An academic adviser is assigned to a student by the department of that student’s chosen major in the College of Humanities and Sciences. A professional studies adviser is similarly assigned by the Department of Teaching and Learning according to the student’s proposed teaching endorsement. This adviser-student relationship continues throughout the course of study at VCU. Student and adviser jointly develop the student’s individual program. During the planning process, the student identifies, clarifies and explores his or her personal and professional goals.

Professional development schools

A professional development school is one where substantial numbers of the faculty are interested in working with future teachers, participating regularly in staff development and willing to research the answers to questions that concern them about teaching, learning and students. A VCU faculty liaison is in the school on a weekly basis working with teachers, students and administrators, and significant numbers of VCU students are placed there for various clinical experiences. These schools include:

Elementary school
Mary Munford Elementary (Richmond City)

High school
Maggie L. Walker Governor’s School for Government and International Studies (a regional high school located in Richmond and serving more than a dozen school divisions)

Educator as reflective practitioner

The guiding theme of the teacher preparation program is “educator as reflective practitioner.” The underlying foundation of instruction in the teacher preparation program is to challenge the prospective teacher to develop skills in critical reflection and to value thoughtful decision making. Candidates demonstrate critical reflection by: being open to and respectful of all stakeholders; taking other perspectives into account; utilizing critical thinking in framing and solving educational problems; making informed, ethical and professional decisions; and taking ethical and professional action.

Demographics consideration in teaching

The demographics of elementary, middle and high school students are changing. There is an increase in the number of students for whom English is not the first language, of minority students, of students who do not all learn or respond in similar ways and of students who may be identified as possessing a disability. Future teachers are encouraged to take advantage of opportunities through formal courses and other experiences to gain greater insight and ability in addressing learners from differing cultural backgrounds and considering the needs of learners with different learning styles, participation styles, and special abilities or disabilities.

Honors study

Students who qualify can participate in The Honors College and are eligible to take course sections and special seminars designated “honors.” Honors sections of the Foundations of Education and Human Development and Learning courses are offered to qualified students, providing them with opportunities for critical investigation in areas of special professional interest.

Standards of learning

Much of the prekindergarten through grade 12 curriculum is based on the commonwealth of Virginia’s current Standards of Learning. Students preparing to
be teachers are advised to examine the SOLs for the grade levels and content areas they plan to teach. The School of Education Web site has a link to the SOLs.

In some instances the content and concepts associated with one or more SOLs may be incorporated in a course in the College of Humanities and Sciences or in the School of Education, but as the SOLs are for a kindergarten through grade 12 curriculum and not a college curriculum, one may need to study several of these on her or his own.

**Technology standards**

The use of computers, graphing calculators, science probeware and other technologies is integral to successful teaching in today's schools. Individuals preparing to teach must be competent on each of the eight standards in Virginia's Technology Standards for Instructional Personnel. These standards may be reached through the School of Education Web page.

Students are advised to consult with the professional studies adviser regarding the program’s requirements for demonstrating competence. Several of the standards may be documented as met by passing the Computer Literacy Examination offered online through KnowledgeNet. Please see the General education requirements for undergraduate study in the “College of Humanities and Sciences” section of this bulletin.

**Extended program in early and elementary or secondary education**

Prospective secondary school teachers earn their bachelor’s degree in a specific field in which they plan to teach — English, foreign language, science, mathematics or history. Similarly, prospective middle school teachers most often specialize in English, history, mathematics, science or social science.

Effective fall 2005, freshmen students who plan to become early childhood/elementary education teachers are required to enroll in the Bachelor of Interdisciplinary Studies liberal studies for early and elementary education major.

Transfer students should meet with a B.I.S. adviser prior to course registration. The B.I.S. degree requirements are outlined in the College of Humanities and Sciences section of this bulletin.

In the extended program, a student generally begins work on the professional studies component in the third year of study. Information on specific requirements for all academic majors is available in the Department of Teaching and Learning, in the College of Humanities and Sciences’ associate dean’s office or through the departments/tl for information about programs in the Department of Teaching and Learning. A student in the extended program must maintain a minimum cumulative GPA of 2.8 for admission to teacher preparation and clinical experience and, prior to the fifth year, a minimum GPA of 3.0 for admission to the graduate study portion of the program.

**Admission information**

Any undergraduate admitted to VCU who declares a major in the College of Humanities and Sciences is eligible to declare a specialization in special education or secondary education. Students specializing in early/elementary education must declare liberal studies for early/elementary education as their major.

Transfer students and students currently attending VCU who wish to change their field of study must be accepted to Teacher Preparation Program to be eligible for provisional admission.

Transfer students should meet with a B.I.S. adviser prior to course registration. Transfer students should meet with a B.I.S. adviser prior to course registration. Transfer students should meet with a B.I.S. adviser prior to course registration.

**Step 1: Admission to the university**

**Requirements**

a.) Scores from Scholastic Aptitude Test (SAT) or American College Test (ACT).

b.) Minimum 2.0 GPA from high school or previous college.

**Procedures**

a.) Declare an undergraduate major in the College of Humanities and Sciences.

b.) Declare an education specialization in early childhood/elementary, middle, secondary or special education.

**Step 2: Admission to teacher preparation**

Complete before enrolling in the first practicum (upon completion of 60 credits of liberal arts and prior to completion of 90 credits).

**Requirements**

a.) 2.8 GPA or better.

b.) Completion of six hours of English, three hours of mathematics, four hours of laboratory science and six hours of social science and/or history.

c.) Meet Virginia scores required for Praxis I or meet the established composite score.

d.) Confirmation of education specialization (Undecided majors must decide.).

e.) Enroll in or have completed TEDU 101 or EDUS 300 or EDUS 301 or equivalent course.

**Procedures**

a.) Complete Admission to Teacher Preparation Application Form (obtain in Office of Student Services) and submit a current transcript.

b.) Complete TEDU 101 or EDUS 300 or EDUS 301 or equivalent course; submit required Praxis scores.

c.) Register in dean’s office for interview upon returning Admission for Teacher Preparation Application Form; complete required interview with education program faculty.

Note: Students must be admitted to Teacher Preparation Program to be eligible for practicum placement and accompanying courses. Applications for practicum are available at the Office of Student Services. (In secondary education, such applications may be distributed at the initial class meeting.)

d.) Register for, take and submit required Praxis I scores.

**Step 3: Application to graduate studies**

**Requirements**

a.) 3.0 GPA or better. Students with GPAs of 2.8 to 2.99 may be considered for provisional admission.

b.) Acceptable scores on the Graduate Record Examination (GRE) or Miller Analogies Test (MAT).

c.) Personal statement addressing reasons for seeking graduate education, including career goals; experience working with age group to be taught; reasons for entering teaching; and success in organizing, planning and implementing work with other individuals.

d.) Three references: it is suggested that these be instructors or advisers in the College of Humanities and Sciences and the School of Education; use Graduate Studies Reference Forms.

**Procedures**

a.) Obtain Graduate School Admissions packet from the Office of Student Services in Room 3106, Oliver Hall.

b.) Return completed application packet, along with up-to-date transcripts, to the VCU Graduate School.

Note: Students must be admitted to the Graduate School to be eligible to enroll in graduate-level courses. No more than six graduate credits taken prior to admission to graduate study may be accepted toward the degree.

**Application deadlines for early and elementary or secondary education**

- Nov. 1 for spring semester
- March 15 for summer and fall sessions

**Step 4: Internship**

All programs require a graduate-level internship (TEDU 672) during the fifth year. Applications for internship can be obtained in the Office of Student Services in Room 3106, Oliver Hall. Individuals choosing special education are placed in a kindergartener and a grade one through six in the same semester.

Individuals in middle and secondary education typically have a single placement, although perhaps with two different teachers.

**Requirements**

a.) 3.0 GPA or better on graduate courses.

b.) Admission to teacher preparation and to graduate study.
c.) Completed application and transcripts submitted by established deadlines.
d.) Acceptable scores on applicable Praxis II specialty tests.

Procedures
a.) Obtain application form from the Office of Student Services.
b.) Submit copies of transcripts and required statement to a professional studies adviser for review.
c.) Obtain approval signature of professional studies adviser.
d.) Submit completed application to Office of Student Services by Sept. 15 for the following spring semester; by March 1 for the following fall semester.

Step 5: Admission to the profession
(during the final semester of enrollment)

Requirements
a.) Completion of all degree requirements.
b.) Completion of application for initial teacher licensure (obtain from Office of Student Services).

Procedures
a.) Complete applications for undergraduate degree in humanities and sciences with academic major adviser, and graduate degree in education with professional studies adviser.
b.) Submit application for initial teacher licensure with signature of university supervisor or professional studies adviser to the Office of Student Services.

School of Education courses
Descriptions for all courses offered by the university may be accessed through the online courses database at www.pubapps.vcu.edu/vcucourses. You may search by unit, subject or keyword, as well as by degree level.

The School of Education offers courses in the following areas:
- Use this link to see administration and supervision (ADMS) courses.
- Use this link to see adult education (ADLT) courses.
- Use this link to see athletic training (ATTR) courses.
- Use this link to see counselor education (CLED) courses.
- Use this link to see early childhood special education (ECSE) courses.
- Use this link to see educational studies (EDUS) courses.
- Use this link to see emotional disturbance (EMOD) courses.
- Use this link to see English education (ENED) courses.
- Use this link to see health and movement sciences (HEMS) courses.
- Follow these links to health, physical education and exercise science (HPEX) courses or the (HPEZ) laboratories.
- Use this link to see interdisciplinary developmental disability studies (IDDS) courses.
- Use this link to see mental retardation (MNRT) courses.
- Use this link to see reading (READ) courses.
- Use this link to see reading and study skills (RDSS) courses.
- Use this link to see rehabilitation and movement science (REMS) courses.
- Use this link to see recreation, parks and leadership (RPSL) courses.
- Follow these links to recreation, parks and sport management (RPSM) courses or the (RPSZ) laboratories.
- Use this link to see special education and disability policy (SEDP) courses.
- Use this link to see special education – learning disabilities (SELD) courses.
- Use this link to see sport leadership (SPTL) courses.
- Use this link to see teacher education (TEDU) courses.

Graduate information

Admission procedures for graduate study

Application procedures
Application forms and instructions for applying to all graduate programs are available on the Graduate School Web site at www.graduate.vcu.edu. Note that applications cannot be processed until they are complete (including test scores). Admission information specific to each program can be found in the division section of this bulletin.

Test scores
Either the GRE, General Aptitude portion, or the MAT is required for the Master of Teaching, the Master of Education, the Master of Science, the Post-masters Certificate for Principals and Supervisors, the Post-masters Certificate in Reading, the Post-baccalaureate Certificate in Teaching and the Post-baccalaureate Certificate in Instructional Technology. The Ph.D. program requires the GRE, General Aptitude portion.

A passing score on Praxis I, although not required for graduate admission, is required for placement in clinical experiences (practica, internships and certain externships) as well as for licensure in Virginia. Contact the Student Services Center for applications for Admission to Teacher Preparation, booklets on Praxis I and Praxis II, and information regarding offerings of the Praxis examinations by paper and pencil or by computer. Information about the tests may be obtained in the Student Services Center as well.

Application deadlines
The following application deadlines have been established for the Master of Education, the Master of Science, the Master of Teaching and the Post-baccalaureate Certificate in Teaching.

<table>
<thead>
<tr>
<th>Application Deadline</th>
<th>Program</th>

<tbody>
<tr>
<td>Mar 15</td>
<td>Summer session or fall semester term of entry</td>
</tr>
<tr>
<td>Nov 1</td>
<td>Spring semester term of entry</td>
</tr>
</tbody>
</table>

The Ph.D. in Education has the following application deadline:

Jan 15 Fall semester term of entry

Students who are unable to enroll for the semester for which they are accepted must request a deferment.

General admission requirements
The admission decision will be made on an overall analysis of the following for each degree program. See each division section for any additional information.

- Master of Teaching, Master of Education, Master of Science, Post-master's Certificate for Principals and Supervisors, Post-master's Certificate in Reading, Post-baccalaureate Graduate Certificate in Instructional Technology and Post-baccalaureate Graduate Certificate in Teaching
  - A minimum GPA of 3.0 on a 4.0 scale on the last 60 semester hours of study.
  - Applicants whose GPA during the last 60 hours of course work falls between 2.8 and 2.99 on a 4.0 scale will be considered for provisional admission. See the Graduate Studies at VCU chapter of this bulletin for further information on provisional admission.
  - Acceptable scores on the GRE or the MAT.
  - An interview with the applicant may be required by the faculty of the program to which the applicant is seeking admission.

- Ph.D. in Education
  - Refer to the Ph.D. in Education program section of this bulletin for admission requirements.

- Ph.D. in Rehabilitation and Movement Science
  - Refer to the Ph.D. in Rehabilitation and Movement Science section of this bulletin for admission requirements.

Advising and student program planning
All students admitted to the School of Education are assigned advisers. Students are expected to work with their adviser to plan their programs of study. Each graduate program agreement, or changes thereto, must be approved by the adviser and the appropriate department chair, or the associate dean for academic programs. Courses taken without approval are taken at the student’s risk. Each student is required to complete and file a program plan with the department before the completion of the sixth credit hour.

* Not required in M.S. in Recreation, Parks and Sport Management, and M.Ed. in Special Education and being phased out in the M.Ed. in Curriculum and Instruction.

The chart outlines the general steps to completing the Master of Education and the Master of Science degrees. All other graduate-level students in the School of Education should refer to the appropriate section of this bulletin for information specific to these programs.

**Admission to candidacy**

Admission to graduate study in the Master of Education or Master of Science programs does not constitute candidacy for a degree. Rather, students who have been admitted to graduate study are advanced to degree candidacy upon the recommendation of the adviser, core faculty and department in which the degree is sought.

Advancement to degree candidacy requires that students must have completed at least 12 but no more than 18 semester hours of graduate study with a minimum GPA of 3.0; must have demonstrated clearly the aptitude and ability to pursue graduate study, including independent study; must have exhibited a commitment to their profession; and must have demonstrated promise for a successful career in the field selected in terms of temperament and personality. Specific courses may be required prior to application for candidacy. Admission to degree candidacy is not an automatic process. Students must file an approved application for candidacy with their departments. Only students who have been admitted to candidacy may pursue additional work toward the degree.

**Comprehensive examination**

- Some students in a Master of Education or Master of Science in Health and Movement Science program must take a three-hour written comprehensive examination.
- Written examinations will be given on the first Saturday in November, the fourth Saturday in March, and the second Saturday in July. Students must notify the department in writing of the intention to take the examination at least 30 days prior to the published date. All comprehensive examinations must be taken on dates indicated except for religious or health reasons. Any exceptions must be approved in advance by the department chair.
- A minimum of three faculty members, designated by the core faculty, will evaluate each examination independently. Satisfactory performance on the comprehensive examination requires approval of two of the three evaluators.
- Any student failing the comprehensive examination must have a joint conference with at least two core faculty members, one of whom is the student’s adviser, before taking the comprehensive examination again.
- During the conference, the core faculty members may recommend additional academic preparation and/or competencies that must be met by the student prior to retaking the comprehensive examination.
- The student will be notified by letter of the recommendations made by the core faculty in the conference.

The student will have only two opportunities to take the comprehensive examination. Failure to pass the comprehensive examination the second time will result in the student being dropped from the degree program.

**Transfer credit**

A maximum of six credit hours of acceptable graduate credit may be transferred into a graduate degree program. Course work taken prior to being admitted to a program in the School of Education and not applied to another degree may be applied for transfer. This includes course work taken at VCU.

Course work submitted for transfer is evaluated by the student’s adviser and the department head. See the Ph.D. in Education program section of this bulletin for information regarding transfer credit for this program. As a general rule, continuing education courses taken at institutions other than VCU will not be transferred.

Students seeking to earn credit at other institutions after acceptance to a graduate program in the School of Education must receive prior approval from their advisers and the department chair, or the director for the Ph.D. program. See the Graduate School section of this bulletin for further information regarding transfer credit.

**Awards**

The **Virginia Arnold Scholarship** is awarded annually to one or more outstanding students who demonstrate financial need and who are enrolled in either the early or middle education teacher preparation program. It is supported by an endowment created by Arnold, a former VCU faculty member.

The **William C. Boshier Jr. Scholarship** is awarded annually to an outstanding student in the Educational Leadership program. The endowed scholarship was created through contributions from friends and family of Dr. Boshier.

The **Pearl Burford Scholarship** was established by her former students at Richmond Professional Institute. It is awarded to students planning to become elementary teachers.

The **Jack A. Duncan Scholarship** is awarded annually to a student in the M.Ed. in Counselor Education program who possesses promise as an effective school counselor in the future. Applicants must have a GPA of 3.0 or higher and be able to demonstrate personal and academic qualities predictive of success as a counselor. The scholarship honors Dr. Jack Duncan, professor emeritus of counselor education.

The **Patricia H. Duncan Scholarship**, established by friends and colleagues of Duncan, was endowed in 2000. This scholarship, in the endowed amount of $500, is awarded to graduate students who have an interest in language arts education.

The **Fleming Scholarship** was established to honor Drs. Gladys and Robert Fleming, longtime professors in the School of Education, who exemplified the value of the arts and humanities in their teaching. The award is given annually to a graduate student in administration and supervision, adult education, or counselor education. The successful applicant must demonstrate a commitment to humanities education and must be registered for six or more credit hours.

The **Arnold P. Fleshood Scholarship** is awarded annually to a graduate student in the School of Education in reading/language education or a related field with an interest in reading/language arts.

The **Howard G. Garner Scholarship** for Developmental Disabilities and Interdisciplinary Studies was established in honor of Dr. Howard G. Garner — a former faculty member and the first director of the Virginia Institute for Developmental Disabilities — by friends and family of Garner. This $500 endowed award provides financial assistance for a trainee at the graduate or advanced level of education to pursue or continue interdisciplinary study in the field of developmental disabilities.

The **Health and Physical Education Scholarship**, endowed in the spring of 1994, is awarded to an outstanding education student majoring in a health or physical education subject area. Preference will be given to undergraduate health and physical education majors classified at sophomore, junior or senior level and having a 2.5 overall GPA. This scholarship is intended to benefit academically talented students who also have been active in university and community service.

The **Jessie Hibbs Scholarship** is funded by the VCU-MCV Women’s Club. This scholarship is awarded to a female graduate student with dependent child(ren) who is enrolled in a graduate program on the Monroe Park Campus. The School of Education Scholarship Committee nominates one candidate for this university-
The Department of Special Education and Disability Policy and Teaching and Learning Scholarship was established by faculty for an academically talented major pursuing a teaching career working with children and youth who come from traditionally underserved populations or who demonstrates a commitment to teaching students who present special challenges. Applicants must plan to take a minimum of six credit hours each semester during the period of the award and have a minimum grade point average of 3.0.

The Gaynelle Whitlock Scholarship honors Dr. Gaynelle Whitlock, a former associate dean of the school. It will provide financial assistance for graduate students in the counselor education program. Preference is given to individuals preparing to become elementary school counselors in the commonwealth of Virginia.

The John Van de Walle Scholarship was established by Dr. John Van de Walle, retired mathematics education professor, during the spring of 2002. Applicants must be students enrolled in the Master of Education program in curriculum and instruction with a concentration in mathematics.

The Willie W. Whitlock Merit Scholarship was established by Mr. Willie W. Whitlock Esq. (B.S. 1950) as a merit scholarship in education to honor his sister Dr. Gaynelle Whitlock, a faculty member and former associate dean in the School of Education.

The MERC Research Fellowship Awards are designed to prepare individuals for leadership and research positions at the school, division, state and federal levels and/or teaching, research and consulting positions in higher education. MERC Fellows support the work of the Metropolitan Educational Research Consortium (MERC), which is composed of VCU and regional metropolitan school divisions.

### Autism Spectrum Disorders, Certificate in (Post-baccalaureate graduate certificate)

#### Admission requirements summary

The Post-baccalaureate Graduate Certificate in Autism Spectrum Disorders will prepare personnel to educate and support individuals with autism spectrum disorders in the educational setting, from early intervention through adult services. Course work and other activities will enable school administrators, general and special education teachers and other interested personnel to gain knowledge and skills necessary to assess individual needs and incorporate best practice in a variety of educational environments.

All applicants must hold a bachelor’s degree in any area related to education. Participants are required to earn 12 graduate credits as outlined below. Upon successful completion of the certificate program, participants will be able to:

- Describe the primary and secondary characteristics of ASD and the impact on communication, socialization, sensory responses, patterns of behavior and learning style throughout the lifespan.
- Understand the concerns of families of individuals with ASD and describe strategies and provide resources to help address these concerns.
- Understand and apply theories and research that form the basis of curriculum development and instructional practice.
- Assess student ability and develop individualized programs that use evidence-based practice to support and enhance learning across environments and across areas of development and need.
- Describe the behavior of individuals with ASD in terms of its function and identify how to provide positive behavioral support in order to replace existing problem behavior or prevent the development of new problem behaviors.
- Provide environmental supports, structure and technology adaptations to provide optimal learning and independence for individuals with ASD across environments.

### Curriculum

- The Post-baccalaureate Graduate Certificate in Autism Spectrum Disorders will prepare personnel to educate and support individuals with autism spectrum disorders in the educational setting, from early intervention through adult services. Course work and other activities will enable school administrators, general and special education teachers and other interested personnel to gain knowledge and skills necessary to assess individual needs and incorporate best practice in a variety of educational environments.

All applicants must hold a bachelor’s degree in any area related to education. Participants are required to earn 12 graduate credits as outlined below. Upon successful completion of the certificate program, participants will be able to:

- Describe the primary and secondary characteristics of ASD and the impact on communication, socialization, sensory responses, patterns of behavior and learning style throughout the lifespan.
- Understand the concerns of families of individuals with ASD and describe strategies and provide resources to help address these concerns.
- Understand and apply theories and research that form the basis of curriculum development and instructional practice.
- Assess student ability and develop individualized programs that use evidence-based practice to support and enhance learning across environments and across areas of development and need.
- Describe the behavior of individuals with ASD in terms of its function and identify how to provide positive behavioral support in order to replace existing problem behavior or prevent the development of new problem behaviors.
- Provide environmental supports, structure and technology adaptations to provide optimal learning and independence for individuals with ASD across environments.

- Provide environmental supports, structure and technology adaptations to provide optimal learning and independence for individuals with ASD across environments.
Academic criteria

- A completed VCU Graduate School Application form.
- Two official and up-to-date copies of all transcripts of the applicant’s undergraduate and graduate record indicating that the applicant has earned a master’s degree from an accredited college or university. For the educational psychology track only undergraduate transcripts are necessary if graduate undergraduate work if in the educational psychology track). In addition, applicants should have a composite score of at least 1000 on the verbal and quantitative sections of the GRE with a minimum of 50th percentile on the verbal test.

External criteria

- A professional resume indicating an applicant’s educational and career experience as well as evidence of leadership potential. This experience may come from professional, civic, religious, fraternal or advocacy organizations. The applicant must present evidence of sustained experience in planning, leading, administering or evaluating programs and personnel in varied positions that are related directly to a program track. The evidence might include dates of positions, job responsibilities, supervisor’s evaluations, publications and important knowledge that came from the position. Other appropriate evidence may include letters of recognition, awards and professional memberships.
- Completed forms from three references. The applicant must submit names, addresses and telephone numbers of three persons qualified and willing to rate the applicant’s intellectual and leadership ability. If the applicant has attended school within the last three years, at least one of the references should be academic. Each of these persons completes a form rating the applicant in a number of personal and academic areas. Submission of these names constitutes permission to contact these persons by telephone anytime during the admission decision process.

In addition to these three names, the applicant should submit the name, address and telephone number of his or her current job supervisor. This person may be contacted by a representative of the Admissions Committee and informed of the full scope and requirements of the doctoral program. The supervisor is expected to support the applicant’s educational goals and be willing to provide release time for externship and other program-related activities.

Self-expression

The applicant must submit a single statement in which he or she describes: (1) his or her work experience; (2) personal career goals and how they have emerged from his or her work experience; (3) the manner in which the doctoral program will enhance his or her career goals; and (4) what he or she might contribute to the program.

In addition, applicants who meet the first-tier admission requirements must also complete a controlled writing assessment. Details of this assessment are provided in the application packet (see below).

Admissions process

Admissions decisions occur in a two-tiered process. In the first tier, applicants are evaluated for academic potential based on the three academic criteria listed above. Applicants who meet the academic criteria will have their full applications forwarded to the track faculty for further review in the second tier of the process. At this level, an applicant’s personal statements, resume and letters of reference are evaluated. In addition, applicants may be invited for a personal interview and a controlled writing assessment. After the interview and writing assessment are completed and evaluated, each applicant is notified by mail of the admission decision.

Application packet

Applicants for admission to the program must complete an admission packet, which includes the VCU Application for Graduate Study as well as supplementary essay materials. Admission packets are available from:

Virginia Commonwealth University
Graduate School
1001 Grove Avenue
P.O. Box 843051
Richmond, Virginia 23284-3051
(804) 828-6916
The applicant is encouraged to check, in advance of the deadline date, the status of
his or her application packet to ensure that all components are in the packet by
the deadline. Inquiries should be made to the Office of Doctoral Studies in the School
of Education. Incomplete packets will not be reviewed by the Admissions
Committee.

Delayed admission
Anyone admitted for a particular year may request a delay of one year for entrance
to the program. Normally this request will be granted. Individuals requiring a
further delay will be required to reapply for admission. The request for delayed
admission must be transmitted in writing to the director of the Office of Doctoral
Studies and must state the reasons for the request and the date that the individual
plans to begin the program.

Transfer credit
Ph.D. in Education program students may transfer up to nine credit hours into the
program, including courses taken at VCU prior to being admitted to the program.
Note that credits earned for one degree cannot be applied to another degree. The
rules for transferring credit to this program are:

- Transfer credit requests will be considered only after the student has been
  awarded continuing doctoral status.
- There are no substitutes for the foundation courses, externship or dissertation.
- Each request for transfer credit must stipulate the program component to
  which it applies with attendant reasoning. Requests for transfer and
  substitution for a specific research or concentration course must include
  course syllabus, reading list, instructor’s name and any other pertinent
  material. Each request for transfer credit must be approved by the program
director and must be judged appropriate for the development of the student’s
  concentration or cognate area.
- To be valid for application to the program, transfer credit must have been
  taken no more than seven years prior to completion of all program
  requirements for awarding the degree, including successful defense of the
dissertation.

Students wishing exceptions to these transfer rules must petition the program
director through their advisers. Their recommendations may be reviewed by the
Ph.D. in Education Policy Board for final action.

See the Graduate Studies at VCU section of this bulletin for further policies
governing transfer credit.

Curriculum
There are six components of the program leading to the Doctor of Philosophy in
Education:

- Foundations component (six hours minimum). This component will consist
  of a writing-intensive sequence of two courses (three credits each) to be taken
  in the fall and spring semesters of the first year. The experience will begin
  with practical knowledge (what it means to be a doctoral student, the students
  place in the program, the programs place in the realm of education, how to
  engage in research-related activities, etc) and move toward theoretical and
  formal knowledge, taking care through course structure and content to
  illuminate the interplay between the two. Students will learn about the nature
  of scholarly inquiry and the worth of situating research within its wider social
  and political contexts while becoming members of VCU and their
disciplinary scholarly communities.

- Research component (12 hours minimum). This component emphasizes the
  prerequisite skills essential to designing, conducting and interpreting
  research. It also provides the research, statistical and computer tools and
  resources necessary to produce research beneficial to the urban leader.

An applicant’s level of research competence is considered prior to admission. 
Research-related prerequisites and/or corequisites may be established for
individuals based on past academic and/or work experience.

- Concentration component (18 hours minimum). This component is
designed to allow the student to pursue a series of courses that provide a
specific focus and serve as the student’s primary discipline. These courses are
expected to develop the in-depth knowledge and skills in an identifiable area
that is congruent with the student’s current or projected career field. It is at
this point in the program that the student pursues study in one of the
following tracks:
  - Adult education and human resource development.
  - Educational leadership.
  - Instructional leadership.
  - Research and evaluation.
  - Special education and disability policy leadership.
  - Urban services leadership.

At least six hours of course work in research and/or concentration component
must be taken outside the School of Education.

- Externship component (three hours minimum). The semester externship
refers to a minimum of 120 hours of work experience, 90 hours of which
must be completed on-site, designed to enhance the student’s program, career
goals and professional development. The externship site is outside the setting
in which the student is employed currently and ideally in a different, but
related, career area in which the student has had no or limited prior work
experience. It is expected that the student will develop an appreciation for the
network of service delivery systems in the urban setting and acquire
additional leadership skills to function more effectively within that network.

Externships are developed jointly by the student and the student’s adviser and
approved by the program director. Students may begin the externship
experience only after being awarded continuing doctoral status. The required
120 clock hours of the externship may be extended over two consecutive
semesters, if appropriate.

- Dissertation component (nine hours minimum). This component consists of
EDUS 890 Dissertation Seminar, three hours, and EDUS 899 Dissertation
Research, six hours. EDUS 890 Dissertation Seminar is designed to aid the
student in identifying the resources and refining the skills required to initiate,
develop and complete a scholarly prospectus and dissertation. The remaining
credit hours of EDUS 899 Dissertation Research are assigned to the scholarly
pursuit and completion of the dissertation.

- Co-curricular activities. These are activities designed to meet the core
values of the Ph.D. program and include those related to instruction (e.g.,
serving as a teaching assistant for a course or teaching a course), scholarship
(e.g., writing an article or conference proposal, participating in grant writing),
professional development (e.g., attending workshops or seminars),
professional service (e.g., participating in a program to enhance achievement
of K-12 students in an urban setting), as well as other activities deemed
appropriate by the individual tracks. It is anticipated that these activities will
occur throughout the program and will be configured to represent increasing
skill and sophistication as students move through the program.

Other Ph.D. in Education program requirements

Residency requirement
Ph.D. in Education students are required to complete a minimum of 12 credit hours each calendar year, commencing with the first semester in which the student enrolls for course work.

Qualifying examination
After completing 15 hours of study (including the doctoral foundations seminars and initial research course), students will take the qualifying examination covering basic research and writing skills. Additional content related to the concentration could be assessed at the discretion of the individual tracks. The examination provides an early assessment of students progress. Student must pass the qualifying examination to proceed in the program.

Program planning
Ph.D. in Education students are required to submit a final plan of program study before the completion of the 27th credit hour of study.

Comprehensive examination
Ph.D. in Education students are required to pass a comprehensive examination at the completion of all course work (excluding the dissertation component). The examination is scheduled once each semester over a two-day period.

Special requirements:
- Personal interview and writing sample required.
- Work experience and goals statement, professional vitae/resume, and current supervisor’s contact information.

Curriculum
Designed primarily for personnel who will be responsible for the design and management of adult education and training functions in environments such as business and industry, county, state and federal agencies, and volunteer organizations. Emphasis is placed on leadership training for planning, developing, managing and evaluating training in adult and continuing education programs. This program of study is highly individualized and is based on the student’s professional goals, previous graduate courses and work experiences.

Other courses selected in consultation with the adviser.

The educational psychology track is designed to train research-oriented doctoral students who want to promote the success of students in educational environments. Doctoral students will integrate theory and research in the areas of developmental psychology, cognition, social psychology and motivation, assessment, exceptional learners, and diversity to better study learning in schools or school-like settings.

Curricula

For students admitted with baccalaureate degree

Content foundation: 15 credits
EDUS 605 Child and Adolescent Development
EDUS 609 Learning Theories in Education
EDUS 660 Research Methods in Education
PSYC 612 Seminar in Motivation
STAT/SOCY 508 Introduction to Social Statistics

Foundation: 3 credits
EDUS 702 Foundations of Educational Research and Doctoral Scholarship I
EDUS 703 Foundations of Educational Research and Doctoral Scholarship II

Research: 12 credits
EDUS 710 Educational Research Design
EDUS 711 Qualitative Methods for Analysis
STAT/SOCY 608 Statistics for Social Research
Research elective

The Post-baccalaureate Certificate for Instructional Technology prepares educators to use technology effectively in their schools and to provide instructional leadership and technical support to other educators who use computer technology. Designed for teachers, resource persons and administrators at all grade levels (K-12), the sequence in instructional technology offers a unique opportunity to develop comprehensive knowledge and experience in the educational applications of computers and related technologies. The primary purpose of this certificate program is to meet the growing need for highly qualified core curriculum teachers, instructional technology support teachers and associated administrative personnel. The program requires six three-credit hour courses. In addition, prerequisites for the program require that students must be licensed K-12 teachers or administrators with a minimum of two years of classroom experience, who have completed TEDU 507 or provide evidence of mastery level of the requirements of that class. The program is committed to providing access to technology so that hands-on experience is offered in every class and participants produce instructional material that can be immediately integrated into the classroom.

Curriculum

- TEDU 560 Instructional Strategies Using the Internet
- TEDU 556 Advanced Computer Applications in Education
- TEDU 610 Developing and Critiquing Visual Literacy
- TEDU 620/MASC 681 Video Applications in Instruction
- TEDU 640 Designing and Managing eLearning
- TEDU 673 Technology Leadership and Staff Development

The certificate program is offered for individuals who aspire to become reading specialists. Applicants for the certificate program must hold a master’s degree in any specialty area related to education.

The certificate program is designed for students who wish to gain state licensure as a reading specialist in kindergarten through high school settings. Applicants are required to have at least three years of teaching experience in a reading-related field setting if they want to be recommended to the Department of Education for endorsement as a reading specialist in Virginia.

All requirements for admission to graduate school apply to applicants for the Post-mast er’s Certificate for Reading Specialist. All state department requirements for reading specialist (specifically the 12 hours of graduate or undergraduate work in selected areas) must be met.

Students are required to earn a minimum of 24 graduate hours beyond their current master’s degree, including the required reading courses, an approved reading selective and an elective in the School of Education that has been approved by the adviser. Advisers will recommend selective courses based upon student experience and goals. During the last semester of course work, students must complete a reading portfolio documenting their work in the program and related work experiences. See adviser for specific due date.

Persons completing the program are expected to demonstrate:

- the ability to critique, adapt and model use of a variety of reading instructional strategies, methods and programs,
- expertise in developing and providing for continuous assessment of an individual and groups,
- ability to implement school-wide developmental, creative and intervention reading/language arts programs, and
- ability to understand and apply theory to practice within a variety of cultural contexts.

Required content courses

- READ 600 Analysis and Correction of Reading Problems
- READ 605 Organizing and Implementing Reading Programs
- TEDU 561 Reading Foundations: Sociological/Psychological Perspectives
- TEDU 562 Reading Instruction in the Content Areas
- TEDU 672 Internship in Reading
- READ 700 Externship

Approved literacy selective (select one of the following)

- TEDU 525 Teaching Language Arts (3)
- TEDU 528/ENGL 528 Children’s Literature II (3)
- TEDU 549 Diagnostic Reading in the Secondary School (3)
- TEDU 552/ENGL 552 Teaching English as a Second Language (3)
- READ 602 Teaching Reading to Adults (3)
- READ 601 Psycholinguistics and the Language Arts Curriculum (3)
- TEDU 681 Investigations and Trends in Teaching and ENGL 651 Topics in Teaching Composition: Capital Writing Project (6)
- TEDU 500 Workshops in Education: Topics in Literacy (to be designated) (3)

Elective

Electives should be used to ensure state regulations for the endorsement are met.

Added or add-on endorsements Teaching English as a Second Language

This program leads to an added endorsement, meaning an individual must already be licensed to teach in one or more areas of elementary, middle, secondary, special education or be certified in another teaching area.

Foreign language

Linguistics (choose two)

- ENGL/LING 449 Introduction to Linguistics
- ENGL/LING 450 Modern Grammar
- ENGL/LING 451 History of the English Language

  READ 602 Teaching Reading to Adults

Add-on endorsements in grades 6 through 12, science

Add-on endorsements in science are available in biology, chemistry, earth science and physics. Each add-on requires a first endorsement in one science and at least 18 semester hours in the add-on science that includes preparation in specified areas. The earth science added endorsement is listed below. For information about the added endorsements in biology, chemistry or physics, contact the Department of Teaching and Learning.

Earth science

To add an earth science endorsement to an endorsement in another science discipline, the individual must earn at least 18 semester hours in the earth sciences, including preparation in geology, oceanography, meteorology and astronomy. Courses to meet these requirements include:

GEOG/ENVS 105 and 105L Physical Geology
GEOG/ENVS 335 and 335L Environmental Geology
GEOG/ENVS 411 Oceanography
GEOG/ENVS 401 Meteorology and Climatology
PHYS 103 Astronomy

Elective courses to complete at least 18 hours include: GEOG 203 and 204 Physical Geography and PHYS 391 Fieldwork and Special Topics.

The Department of Counselor Education at Virginia Commonwealth University is committed to excellence in the initial preparation and continuing development of professionals in the counseling field. The department, located in an urban setting, provides graduate students with research-based professional studies and clinical experiences necessary for effective counseling, advocacy and leadership in diverse geographic and socioeconomic settings. Specifically, the department prepares counselors with the specialized knowledge and skills required for placement in elementary, middle and high schools, as well as postsecondary educational institutions in the commonwealth of Virginia and throughout the nation. Consistent with this approach are the program goals of graduating students who have knowledge of basic counseling theory and practice, possess competencies in essential counseling services, exhibit scholarly inquiry, have the skills necessary to evaluate relevant research, are committed to evaluating their counseling interventions and participate in a variety of professional development activities.

Specific admission criteria can be found on this Web site at www.pubapps.vcu.edu/bulletins/graduate/?uid=10045&iid=30032. For information on financial aid, visit www.vcu.edu/enroll/finaid.

The M.Ed. in Counselor Education is a 48-credit-hour program designed to prepare counselors for elementary, middle and high schools, as well as counselors for higher education and community agencies throughout Virginia and the nation. The school counseling track leads to school counseling licensure and preparation for advanced graduate work at the post-master’s level. The college student development and counseling track provides students with the specialized knowledge and skills necessary for employment as student affairs professionals in higher education settings.

The faculty makes every effort to assist students in individualizing a graduate program to match their professional needs and interests. However, individualization takes place in an environment of legitimate constraints revolving around institutional, accreditation and licensure requirements. Faculty members view each program as more than simply an aggregate of courses, and students should plan all program work with their faculty advisers.

For students who already have a master’s degree in education, the 33 credits of program core courses in school counseling also will lead to recommendation for licensure as a school counselor. Students who wish to gain this licensure must meet with the department chair and file a plan of study. Although students holding master’s degrees do not apply for admission to the graduate program, they must file the appropriate plan of study in order to qualify for the VCU-approved program of study. No course work taken more than seven years prior to applying for licensure as a school counselor will count toward meeting VCU’s approved program course equivalents.

Graduate and Professional Programs Bulletin 2008-09

147
Department of Educational Leadership

The mission of the department is to prepare reflective instructional leaders for K-12 schools and for literacy programs and corporate training centers. Through course work and other experiences, the program aims to turn out leaders who are able to develop positive school cultures through the use of communications skills and by appropriation of fiscal, material and human resources.

The department offers programs that lead to the M.Ed., Post-master’s Certificate and Ph.D. in Education with a track in educational leadership. Individuals who complete one of those programs may qualify for endorsement by the Virginia Department of Education as administrator/supervisor. An optional track M.Ed. is offered for individuals in institutions of higher education and other settings who will benefit from the study of educational leadership but do not wish to seek positions as school administrators.

For more information consult the department’s Web site at www.soe.vcu.edu/departments/el.

The M.Ed. in Educational Leadership offers two tracks. The administration and supervision track is designed for individuals who aspire to positions as instructional leaders in schools. Those who hold positions of leadership in other educational institutions that don’t require endorsement as a principal or supervisor may choose the leadership studies track.

Admission and supervision track

The M.Ed. in Educational Leadership administration and supervision track is a 33-hour program that prepares individuals to fill positions as reflective leaders for schools. Applicants are expected to have at least two years of teaching experience. An end-of-program assessment is required. Individuals must meet the Technology Standards approved by the Virginia Board of Education, and they must supply proof of Child Abuse and Neglect Recognition Training. Individuals who successfully complete the program are eligible for endorsement as an administrator/supervisor K-12.

**Assessment (no credit)**

Individuals must take the School Leader's Licensure Assessment or any other assessment required by the Virginia Board of Education for endorsement as a school principal/supervisor for grades K-12.

Leadership studies track

The M.Ed. in Educational Leadership leadership studies track is a 30-hour program for individuals who hold or expect to hold leadership positions in educational organizations but who do not wish to obtain the administration/supervision endorsement from the Virginia Department of Education. The program includes 15 hours of credit in required courses and 15 hours in a concentrated series of electives chosen with approval of the students adviser.

</tbody>
</table>

The Master of Science in Athletic Training (M.S.A.T.) is an entry-level program for students interested in becoming certified as athletic trainers. Athletic training is recognized by the American Medical Association as an allied health profession. Certified athletic trainers (ATCs) are unique health care providers who specialize in the prevention, assessment, treatment and rehabilitation of injuries and illnesses that occur to athletes and the physically active. Typical undergraduate backgrounds include exercise science, kinesiology and the life sciences, but other degrees will be considered provided prerequisite courses have been completed.

Prerequisites for the program include human anatomy and physiology (one semester each or one year total, six credits minimum), kinesiology, personal health, exercise physiology, and nutrition. Other recommended courses include exercise or sport psychology, biomechanics, statistics, chemistry and physics.

The course of study offered by VCU is a 24-month program beginning during the summer semester, in July, in the first year. Students complete a total of four semesters and two summer sessions.

The M.S.A.T. program will apply for accreditation by the Commission on Accreditation of Athletic Training Education in September 2007 with an expected program evaluation in the spring semester of 2008. Application for CAATE accreditation does not guarantee accreditation, and if accreditation is not awarded to the M.S.A.T. program following their anticipated site visit, students enrolled in the program will not be eligible to register with the Board of Certification and take the certifying examination.

Students who successfully complete the program are required to pass an entry-level examination administered by the National Athletic Trainers’ Association Board of Certification to be awarded the Master of Science in Athletic Training. Virginia requires state licensure by the Virginia Board of Medicine to practice as an athletic trainer.

Technical standards

The master’s-level athletic training program at VCU is rigorous and intense, and it places specific requirements and demands on the students enrolled in the program. An objective of this program is to prepare graduates to enter a variety of employment settings and to render care to a wide spectrum of individuals engaged in physical activity. The technical standards set forth by the program establish the essential qualities considered necessary for admitted students to achieve the knowledge, skills and competencies of an entry-level athletic trainer, as well as meet the expectations of the program’s accrediting agency, the Council for the Accreditation of Athletic Training Education.

The following abilities and expectations must be met by all students admitted to the M.S.A.T. program. In the event a student is unable to fulfill these technical standards, with or without reasonable accommodation, the student will not be admitted to the program. Compliance with the program’s technical standards does not guarantee a student’s eligibility for the National Athletic Trainers’ Association Board of Certification exam.

Candidates for selection to the athletic training program must demonstrate:

1. The mental capacity to assimilate, analyze, synthesize, integrate concepts and problem solve to formulate assessment and therapeutic judgments and to be able to distinguish deviations from the norm.

2. Sufficient postural and neuromuscular control, sensory function and coordination to perform appropriate physical examinations using accepted techniques; and accurately, safely and efficiently use equipment and materials during the assessment and treatment of patients.

3. The ability to communicate effectively and sensitively with the patients and colleagues, including individuals from different cultural and social backgrounds; this includes, but is not limited to, the ability to establish rapport with patients and communicate judgments and treatment information effectively. Students must be able to understand and speak the English language at a level consistent with competent professional practice.
4. The ability to record the physical examination results and a treatment plan clearly and accurately.
5. The capacity to maintain composure and continue to function well during periods of high stress.
6. The perseverance, diligence and commitment to complete the athletic training education program as outlined and sequenced.
7. Flexibility and the ability to adjust to changing situations and uncertainty in clinical situations.
8. Affective skills and appropriate demeanor and rapport that relate to professional education and quality patient care.

The perseverance, diligence and commitment to complete the athletic training education program as outlined and sequenced.

Candidates for selection to the program will be required to verify they understand and meet these technical standards or that they believe that, with certain accommodations, they can meet the standards. VCU’s Office of Disability Support Services will evaluate a student who states he or she could meet the program’s technical standards with accommodation and confirm that the stated condition qualifies as a disability under applicable laws. The university will then determine whether it agrees that the student can meet the technical standards with reasonable accommodation; this includes a review of whether the accommodations requested are reasonable, taking into account whether accommodation would jeopardize clinician/patient safety or the educational process of the student or the institution — including all course work, clinical experiences and internships deemed essential to graduation.

Application process

Application to the athletic training program is a two-step process. Students must first apply directly to VCU’s Graduate School and complete all application materials requested in that process. Supplemental application materials must also be completed and submitted to the program director. For more information on the application process and to access these supplemental materials, visit the School of Education Web site at www.soe.vcu.edu/departments/hhp/MS_hlthMovSc_athletic.htm. The selection of students for admission to the athletic training program is competitive. The application deadline for admission is March 15, but priority will be given to applications received by Feb. 1. Review of applications will begin Feb. 1 and continue until the class is complete.

(Graduate and Professional Programs Bulletin 2008-09

The program provides advanced course work for students interested in the application of health and movement science principles to exercise science, teaching and sports medicine. Applicants planning to enter the teaching profession should hold a valid teaching endorsement. Students typically admitted to this program have backgrounds in exercise science, life science or related fields. This program does not provide opportunities for initial licensure in health and physical education.

The Master of Science in Health and Movement Sciences program of study offers a thesis and non-thesis option. Both options require a minimum of 36 total graduate credit hours for completion of the degree program.

After completing at least 12 graduate credits and not more than 18 credits, with a minimum GPA of 3.0, all students must apply for advancement to candidacy. In the thesis option, students must complete HEMS 798 Thesis for six credit hours and 30 hours of prescribed course work. Students enrolling in this option will not be required to complete a comprehensive examination. In the non-thesis option, students must complete 36 hours of prescribed course work and must pass a comprehensive examination, which is taken after completing 30 hours of course work.

### Rehabilitation and Movement Science, Doctor of Philosophy (Ph.D.)

**Admission requirements summary**

| Rehabilitation and Movement Science, Doctor of Philosophy (Ph.D.) | Degree: Ph.D. | Semester(s) of entry: Fall preferred | Deadline dates: Applications received prior to Jan 9 will be given priority consideration | Test requirements: GRE

The Ph.D. in Rehabilitation and Movement Science is an interdisciplinary degree program developed through a collaborative partnership of the departments of Health and Human Performance, Physical Therapy, and Physical Medicine and Rehabilitation. The mission of this collaborative degree program is to prepare applied scientists capable of approaching multifaceted health care, preventive medicine and rehabilitation initiatives from an integrative rather than competitive perspective, and to prepare graduates to assume leadership positions in higher education teaching, research and management within rehabilitation and movement science.

There are two program tracks: exercise physiology and neuromusculoskeletal dynamics. The exercise physiology track prepares individuals to teach, conduct research and direct external funding initiatives in the area of cardiopulmonary rehabilitation and physiology, particularly in areas associated with metabolic and chronic disease states. The neuromusculoskeletal dynamics track prepares individuals for teaching, research and clinical initiatives associated with the identification and rehabilitation of movement disorders.

#### Admission requirements

Admission decisions are made by an admissions committee comprised of faculty members from each of the major collaborating departments: Exercise Science, Physical Therapy and Physical Medicine and Rehabilitation. Applicants must have completed at least one of the following: a master’s degree in a related area, 30 hours of postbaccalaureate work (e.g. course work at 500 level or greater), or a first professional degree program. Admission decisions are made only on the basis of a completed application packet.

Applicants for admission to the program must complete an admission packet that includes the VCU Application for Graduate Study as well as supplementary program materials. Admission packets are available from:

**Graduate School**
Virginia Commonwealth University
Moseley House
P.O. Box 843051
Richmond, VA 23284-3051
(804) 828-6916
www.gradschool.vcu.edu

**Office of Doctoral Studies**
Virginia Commonwealth University
P.O. Box 842020
Richmond, VA 23284-2020

The entrance requirements fall into the following three categories. All criteria must be completed for consideration for admission.

#### Academic criteria

- A completed VCU Graduate School Application.
- Two official and up-to-date copies of all transcripts of the applicant’s undergraduate and graduate record indicating that the applicant has completed the minimum required prerequisite course work.
- Official and current scores (within the past five years) for the general test of the GRE. Older scores may be submitted and consideration will be based upon the time elapsed since last formal schooling, occupation success and research ability.
- Priority for admission will be given to the applicants who have attained at least 3.5 in all graduate work attempted and a combined verbal and quantitative score on the GRE of a minimum of 1,000. If the TOEFL is required, a minimum of 600 is expected (250 on the computer-based test).

#### External criteria

- A professional resume indicating an applicant’s educational and career experience as well as evidence of research potential.
- Completed reference forms from three individuals capable of evaluating the applicant’s academic and research potential.

#### Written expression

- A personal statement in which the applicant discusses his or her personal career goals and the manner in which this doctoral program would enhance those goals.
- A summary of motivation, education and aims in pursuing an interdisciplinary degree in rehabilitation and movement science.

Applicants being considered for admission must complete an interview with a Ph.D. admissions committee representative and/or research faculty member with whom the student would like to work.

The applicant is encouraged to check the status of his or her application packet to ensure that all components of the packet have been received. Inquiries should be made to the Office of Doctoral Studies. The Admissions Committee will not review incomplete packets.

#### Transfer credit

Students in the program may transfer up to nine credit hours into the program, including courses taken at VCU prior to being admitted to the program. Note that credits earned for one degree cannot be applied to another degree.

**Curriculum**

The Ph.D. in Rehabilitation and Movement Science will require a minimum of 38 credit hours of course work and 12 credit hours of dissertation research. Students will be required to complete:

- 12 credit hours of research core courses comprised of a research design class, two classes in statistical application and an elective in the area of research design or statistics.
- 18 credit hours in a concentration comprised of a focus on course work in a specific discipline formulated with the major adviser and approved by the Admissions Committee of the degree program.
- Three credit hours comprised of laboratory rotations in a minimum of two laboratories within the Rehabilitation and Movement Science program; each credit hour requires a minimum of 50 contact hours in the laboratory selected.
- Five credit hours minimum of professional development comprised of an interdisciplinary research/journal club seminar (0.5 credit hour per semester), a teaching practicum (one credit hour) and a presentation delivered at a regional, national or international conference of a related discipline (one credit hour).
- 12 credit hours of dissertation research comprised of a focused line of research over a three-to-four-year period of doctoral work.
Required research courses for the program (nine credit hours) – both tracks:

Advisory committee

Adviser
Incoming students will identify a faculty member in the program with whom they would like to pursue their academic program and research endeavors. Every effort will be made to accommodate the student’s first choice of a faculty adviser. If the student is unsure of a research interest and adviser selection, the Admissions Committee will assign an adviser. Within the first two semesters of attendance, a permanent adviser should be identified. The adviser, together with the student, will develop a plan of study for the student's didactic and scholarly program and will be responsible for guiding the student's academic progress such that the adviser will supervise the student’s research work and dissertation preparation.

Advisory committee
The student, in consultation with the adviser, will identify faculty members to serve on the advisory committee. The committee shall be appointed no later than the end of the spring semester following matriculation into the program. The student’s advisory committee shall be comprised of five faculty members to include the adviser, two members from the rehabilitation and movement science faculty and two faculty members from other related departments. The student’s adviser, who is active in the field of research the student has selected, will chair the committee.

Comprehensive examination

Once core courses are successfully completed, students must pass written and oral comprehensive examinations before transitioning to candidacy. These examinations will test students on their basic knowledge of rehabilitation and movement science principles (primarily in their chosen track) and research methods as obtained through core, research and elective courses of the curriculum. The student must demonstrate a firm grasp of the material and the potential to become an independent researcher.

The written exam will be given to students during their second spring semester in the program. The written exam will consist of an area paper pertinent to the student’s area of interest. The student’s adviser and advisory committee must approve the topic and an outline of the area paper. The student’s adviser is responsible for grading the area paper. If a student receives a less than satisfactory grade on the area paper, he/she will be afforded the opportunity to make appropriate revisions. Students will only be allowed to revise the area paper once. The area paper should be a minimum of 15 double-spaced pages in 12-point font. The area paper must be in a form suitable for submission for publication to a journal whose content addresses topics consistent with the area paper. The student’s adviser and advisory committee must approve the journal selection and manuscript prior to submission. A passing grade on the written exam is not contingent upon the manuscript being accepted for publication.

Following acceptance of the area paper, the student will write a research proposal. The structure of the proposal will follow federal grant submission guidelines such as those specified by the National Institutes of Health or the Centers for Disease Control. The analytical research proposal must be submitted to and approved by the student’s advisory committee prior to the oral examination.

The oral exam should be conducted within three to six months of successful completion of the written exam with the goal of proceeding to candidacy by the end of the fall semester of the student’s third year. The oral exam will be based on, but not primarily limited to, the student’s proposed analytical research project. The student must receive a satisfactory grade from each committee member to pass the oral exam. The student may proceed to candidacy and begin the research outline in the proposal once successful completion of the oral examination is achieved.
Exit requirements

Dissertation defense

Upon completion of all required course work and the research project, the student must prepare a dissertation to describe the research. A dissertation manual is available for download from the VCU Web site. Students are highly encouraged to become familiar with this manual and use it as a guide for preparation of their dissertation. All committee members must approve the written dissertation and the student must orally defend this dissertation in a publicly advertised seminar prior to graduation.

Students are expected to meet all university graduate school requirements regarding minimal GPA and limitation on credits achieved with a grade of “C” or below.

Time to degree

The doctoral degree must be obtained within seven years of matriculation. It is expected that full-time students will satisfy all requirements within four to five years. Part-time students may take the full seven years to complete all courses and the research project.

Department of Special Education and Disability Policy

The mission of the Department of Special Education and Disability Policy is to prepare skilled, effective professionals who can meet the educational needs of children and youth with disabilities and their families through graduate degree programs, discover new instructional and service delivery strategies through an ongoing program of research, and share information on these strategies to a wide audience through collaborative relationships with children and youth with disabilities, their families, educators, local, state and federal government agencies, and other professionals throughout the commonwealth and across the nation.

The department offers extended teacher preparation programs that allow students to prepare for professional roles as teachers of students with emotional disturbance, learning disabilities, or mental retardation. These five-year programs culminate in the simultaneous awarding of both a bachelor’s degree from the College of Humanities and Sciences and a Master of Teaching degree from the School of Education.

At the graduate level, the department offers five Master of Education programs. Successful completion of one of the degree programs leads to endorsement in early childhood special education, emotional disturbance, learning disabilities, mental retardation or severe disabilities. In addition, the department offers a Ph.D. in Education with an emphasis on Special Education and Disability Policy.

For more information consult the department’s Web site at www.soe.vcu.edu/departments/sedp.

Special Education, Master of Education (M.Ed.)

Admission requirements summary

Special Education, Master of Education (M.Ed.)
Indicate specialization:

The Master of Education in Special Education program prepares graduates for work in one of six areas: early childhood special education, emotional disturbance, learning disabilities, mental retardation, severe disabilities or general education. Applicants who do not already hold a teaching license must meet both licensure and degree requirements prior to the awarding of the Master of Education degree unless exempted as a professional from another discipline. Students should plan carefully with their adviser to ensure that the appropriate courses and experiences are completed. Successful completion of the degree program leads to endorsement in early childhood special education, emotional disturbance, learning disabilities, mental retardation or severe disabilities.

The Master of Education in Special Education program with a track in early childhood special education is a sequentially planned series of courses and clinical experiences designed to prepare individuals to work with young children, from birth through age 5, with developmental disabilities and their families. Successful completion of the degree program qualifies students for teacher licensure with endorsement in early childhood special education by the Virginia Department of Education. Students are prepared to intervene with infants and young children representing a wide range of abilities, including those at risk for developmental delays and those at risk for severe disabilities. As a result of training, students will be prepared to fill a variety of early intervention roles. The program can be completed in five semesters of full-time study or six semesters of part-time study.

The Master of Education in Special Education with a specialization in emotional disturbance provides teachers the professional knowledge and skills needed to work in a variety of settings: general education classrooms (where children with special needs are being included), resource rooms, self-contained classrooms and residential programs. In developing teacher competencies the master’s program focuses on specific skills and strategies for diagnosing and remediating behavior and learning problems of students with emotional disturbance. The educational and therapeutic interventions taught in the program are based on a number of theoretical models including behavioral, psychodynamic, ecological and psychoeducational. An emphasis of the program is on collaboration with parents, with professionals from other disciplines, and with other community agencies and programs.

Program course work builds on a strong foundation of knowledge in psychology, child development, research and education. Students receive in-depth training in how to identify students with emotional disturbances, how to diagnose individual needs, and how to plan and deliver individualized programs in a team setting. Special training is provided in the teaching of reading, behavior management and the use of interactive strategies teaching positive social skills. Graduates are prepared to work with students in completing a variety of transitions, such as from special education to the general education classroom or from high school to employment and independent living.

The program offers a variety of placement opportunities for practicum and externship experiences, including a range of public and private schools and mental health programs in the Richmond area that allow graduate students to select field experiences that are consistent with their professional goals. Previous teaching experience is valued, but not required. Students without previous teaching experience must complete a practicum in addition to the externship. When students complete the program, they are eligible for licensure by the Virginia Department of Education with an endorsement to teach students with emotional disturbance in grades K-12. Students are offered the option of taking a full-time externship for one semester, a half-time externship for each of two semesters or an on-the-job externship for the duration of one academic year following one year of successful teaching in that setting.

A personal interview with program faculty is required as a part of the admission process.

Graduates of the Master of Education in Special Education general education track learn the professional knowledge and skills needed to work in a variety of settings:

- General education classrooms (where children with special needs are being included)
- Resource, modified resource or collaborative resource rooms
- Self-contained settings or classrooms in varied urban, suburban or rural areas
- Residential programs
- Various community environments

Special training is provided in teaching reading and language, behavior management, and the use of interactive strategies that teach positive social skills. Candidates are prepared to work with students in completing a variety of transitions, such as from special education to the general education classroom or from high school to employment and independent living.

Program course work encompasses broad concepts of education, research, development, related disciplines and special education to build a foundation of professional knowledge and understanding. Specialized course develop the intensive diagnostic, remedial, decision-making and consultative skills and understandings required of a professional in special education-general education setting, including the ability to recognize educational and social problems, to formulate effective individualized instructional interventions using a variety of methodologies and modifications, to incorporate accommodations and transitions into program plans and to consult productively with appropriate personnel in the development of maximum educational opportunities for students with high-incidence disabilities.

The program offers a variety of placement opportunities for clinical experiences, including a range of public and private schools and mental health programs in the Richmond area, that allow graduate students to select field experiences that are consistent with their professional goals. Previous teaching experience is valued, but not required. Students without previous teaching experience complete a practicum in addition to the externship. When students complete the program, they are eligible for licensure by the Virginia Department of Education with an endorsement to teach students enrolled in special education-general education settings, with learning disabilities develops and refines the competencies needed for work with persons with learning disabilities in collaborative resource and self-contained settings at all levels, as well as in a variety of cultural environments. Students enrolling in the program will be required to complete two semesters of externship during the regular academic year and may be required to complete additional fieldwork activities and/or credits. Students in bachelor’s degree or extended programs who are planning to enroll are encouraged to consult with program faculty for assistance in selecting elective courses that provide a sound foundation and may reduce the number of additional courses necessary for certification.

Program course work encompasses broad concepts of education, research, development, related disciplines and special education to build a foundation of professional knowledge and understanding. Specialized course develop the intensive diagnostic, remedial, decision-making and consultative skills and understandings required of a professional in learning disabilities, including the ability to recognize educational and social problems, to formulate effective individualized instructional interventions using a variety of methodologies and modifications, to incorporate accommodations and transitions into program plans, and to consult productively with appropriate personnel in the development of maximum educational opportunities for students with learning disabilities.

Mental retardation

Graduates of the Master of Education in Special Education with a specialization in mental retardation may fill roles as resource room, modified resource room, or self-contained classroom teachers in varied urban, suburban or rural areas. Some graduates are employed in residential programs for individuals with mental retardation or in programs in community or state department settings. The commonwealth of Virginia licenses their employment in public or private settings serving students from kindergarten through secondary school age.

The course of study includes a minimum of 42 credits designed around three components: foundations, special education core and specialization in mental retardation. The foundations component is comprised of nine semester hours that focus on three distinct content areas: human development and learning, cultural, philosophical and historical foundations, and research and evaluation methods. The special education core of 18 semester hours focuses on a curriculum that is rooted in special education for individuals with mental retardation as well as other disabilities. The specialization in mental retardation is comprised of 15 semester hours that focus on the development of specific advanced competencies for filling the varying roles of professionals in mental retardation. With previous licensure in mental retardation, the program will require approximately one year of full-time study for completion. Students seeking initial licensure should consider the Master of Teaching, which is designed for that purpose.

Severe disabilities
The severe disabilities program is designed to prepare teachers to work with students, ages 5 to 21, in public school settings. Throughout the program, emphasis is placed on person-centered planning, school and community inclusion, transdisciplinary teamwork, and the role of the family. Courses address physical and medical management issues, functional assessment strategies, longitudinal curriculum planning, systematic instruction, augmentative and alternative communication systems, assistive technology, transition from school to adulthood, positive behavioral supports, and the special needs of students with autism or physical, sensory and health-related disabilities.

Students enrolled in the program complete a field-based externship in their school (if they currently serve students with severe disabilities) or in one of the many public schools in the Richmond area. The externship is designed to meet the student’s needs for professional development and is generally completed toward the end of the master’s program.

Successful completion of the 42 credit hour program results in Virginia endorsement in severe disabilities, in addition to the Master of Education degree.

MNRT 610 Teaching Strategies for Students with Severe Disabilities (3)  
MNRT 602 Assessment and Curriculum Development for Students with Severe Disabilities (3)  

The Department of Teaching and Learning is committed to excelling in the initial and continuing preparation of teachers for the commonwealth, with particular emphasis on early childhood through secondary education in diverse settings; to collaborating with colleagues in educational agencies; to applying research about learning in classrooms; to undertaking scholarly endeavors that examine learning and teaching processes; and to providing technical assistance to special populations and service to school divisions and agencies.

The department values:

- Providing the highest quality teaching and opportunities for learning.
- Integrating academic disciplines, professional studies and clinical experiences as program components for student learning.
- Collaborating in the preparation of teachers and in the continuing development of faculty both within the university and in public and private educational settings.
- Enabling teachers and intending teachers to work effectively with students from diverse populations and those with special needs.
- Helping intending teachers become effective decision makers and practicing teachers refine their decision-making skills in the roles for which they are preparing.
- Effectively modeling the use of technology to enhance and foster learning.
- Incorporating, among others, developmental, cognitive and functional approaches and content areas in the preparation of personnel in early, middle, secondary and special education programs.
- Serving the university through faculty participation in institutional committees and task forces, programs, and supportive research and service institutes and centers within the university.
- Serving the community through technical assistance, workshops, consulting education activities, Professional Development Schools and other partnerships.

The Department of Teaching and Learning houses six degree and certificate granting programs.

- Master of Education in Curriculum and Instruction  
- Master of Education in Reading  
- Master of Teaching  
- Postbaccalaureate Certificate in Teaching (Secondary)  
- Post-master’s Certificate for Reading Specialist  
- Ph.D. in Education

The Master of Education in Adult Learning is a 39-credit program of study that prepares individuals for a broad range of positions related to the education of adult learners. Graduates are found in major corporations, state and federal agencies, nonprofit and community-based organizations, human services agencies, and community colleges and university settings. Admission to the program is predicated on the “whole person” concept, taking into account life experience, academic record, references and the reasons for the student’s interest in the program. An interview with the program adviser is recommended prior to admission.

The program provides a three-course foundation in educational research, evaluation and adult development. A strong core of seven courses related to the design, development and delivery of adult learning programs and activities comprises the major portion of the curriculum. The emphasis is upon equipping an educator of adults with the requisite knowledge, skills and dispositions to work with a broad array of adult learners in business and industry, government, education, non-profit, and community and human service agencies. The program also addresses the needs of educators who work with multicultural adult learners and those with special needs.

In the last two years of the program, students select one of three specialization tracks for a three-course concentration in adult literacy, human resource development or adults with disabilities. The last course in the program, ADLT 636 Capstone Seminar in Action Learning, reunites students from all three specialization tracks for a comprehensive synthesis of learning as they work in action learning teams to solve a real problem of strategic importance to an organization in the community.

A unique feature of the program is the portfolio assessment, which, in combination with the capstone seminar, replaces a comprehensive examination requirement. For the portfolio, students are required to write a reflective essay at the end of each core and specialty track course taken, evaluating their learning experiences and how they intend to apply what has been learned. The reflective essay, along with a copy of the student’s “best work” from each course is placed in the portfolio, to be reviewed at the end of the program by the student and his or her adviser. The portfolio then serves as a demonstration of the graduate’s abilities to a prospective employer.

## Specialization Tracks

### Adult Literacy Track
- TEDU 681 Investigations and Trends in Teaching**
- READ 602 Literacy for Adults

** A special section for students in the M.Ed. in Adult Learning program covering trends and issues in adult literacy, with prerequisites of TEDU 552 and READ 602, or permission of instructor, will be noted in the Schedule of Classes.

### Adults with Disabilities Track
- SEDP 616 Introduction to Disability Studies, Community Services and Business Networks
- SEDP 618 Strategies for Managing Disabilities in the Workplace
- TEDU 651 Topics in Education*

* A special section for students in the M.Ed. in Adult Learning program, covering competitive employment for individuals with disabilities, with prerequisites of SEDP 616 and 618, or permission of instructor, will be noted in the Schedule of Classes.

### Human Resource Development Track
- ADLT 620 Human Resource Development Overview
- ADLT 623 Organizational Learning
- ADLT 625 Change Strategies for Human Resource Development Practitioners

The Master of Education in Curriculum and Instruction program is designed to provide professional and cognate experiences for veteran teachers. Individuals may select to concentrate in early childhood education, middle education, secondary education, gifted education or instructional technology. Content courses within the program are selected in consultation with an adviser from the appropriate concentration.
The Master of Education in Reading program is designed to provide experienced teachers who are prospective reading specialists with a program of sequential and integrated experiences in areas of the reading curriculum ranging from preschool to adult levels. Students will gain an understanding of the developmental and diagnostic processes involved in teaching reading and the language arts and will become familiar with the resource and supervisory functions, which are part of the specialist role. Prior to graduation, students must complete a reading portfolio documenting their work in the program and related work experiences. The M.Ed. in Reading is an approved program (K-12) for students who meet Virginia State Department of Education requirements. The reading specialist endorsement also requires completion of three years of teaching in a reading-related field.

A cooperative agreement has been established with Virginia State University to permit selected, qualified students to complete the M.Ed. in Reading Program. Up to 12 credit hours from an approved list may be transferred from the cooperating institution. Interested students should contact the Department of Teaching and Learning.

(The Department of Teaching and Learning)

Electives

Electives should be used to ensure state regulations for the endorsement are met.

36
Teaching, Master of (M.T.)

Admission requirements summary

Teaching, Master of (M.T.)
Indicate specialization:

(Department of Teaching and Learning)
The Master of Teaching programs are designed to incorporate eligibility for initial teaching licensure in Virginia in early childhood/elementary, middle, or secondary education (biology, chemistry, English, French, German, history, history and social studies, mathematics, physics, science, Spanish) or special education.

The approved programs include undergraduate qualifying courses as well. Individuals pursuing the extended program are awarded undergraduate and graduate degrees simultaneously; baccalaureate degree recipients who meet the admission criteria also may pursue the Master of Teaching degree program, including the qualifying courses. The combined baccalaureate and Master of Teaching program requires a minimum of 153 hours, at least 33 of which must be at the graduate level.

Admission

Admission criteria for holders of baccalaureate degrees are the same as for the extended program, including admission to teacher preparation.

Liberal arts requirements

Additionally, individuals pursuing licensure must have a liberal arts degree, as defined by VCU, germane to what they propose to teach: for secondary, a major in the subject to be taught; for middle, a major in one of the subjects traditionally taught in middle grades (English, mathematics, history and social studies, or a science); for early childhood/elementary or special education, a major in one of the content areas typically taught (mathematics, a science, English, history or a social science) is particularly appropriate, but majors in other liberal arts areas are acceptable.

Individuals who do not hold such a degree may satisfy it as follows:

- for middle or secondary education, the required and, as appropriate, cognate courses in the pertinent academic major.
- for early childhood/elementary, a liberal arts equivalency totaling at least 70 arts and sciences semester credits and consisting of no less than six hours in English (including composition), six hours in mathematics and statistics, three hours in human behavior and institutions, 12 hours in humanities, and 12 hours in science (with at least one laboratory course in a life science and another laboratory course in a physical science); and the remaining 31 credits from courses in literature, history, art or music history, foreign languages, philosophy and religious studies, African American studies, anthropology, economics, geography, international studies, political science, psychology, sociology, urban studies, women’s studies, or classical studies.

Additional information about the liberal arts requirements for early childhood/elementary, middle and secondary is listed under the pertinent program in the Department of Teaching and Learning section of the Undergraduate Bulletin.

See the Undergraduate Bulletin for detailed information on the requirements of the various baccalaureate degrees in the College of Humanities and Sciences.

State licensure examination

Successful completion (defined as meeting or exceeding the scores established by the Virginia State Board of Education) on the state-mandated licensure examination, currently Praxis I, is required for admission to teacher preparation. Students must be admitted to teacher preparation before enrolling in any clinical course, including practica and corequisites to clinical courses.

Requirements for both initial licensure and added endorsements include taking and achieving state-established pass scores on the Praxis II specialty area tests.

Standards of Learning

Much of the pre-kindergarten through grade 12 curriculum is based on the commonwealth of Virginia’s current Standards of Learning (SOLs). Individuals preparing to be teachers are advised to examine the SOLs for the grade levels and content areas they plan to teach. Since the content and concepts associated with one or more SOLs may be incorporated into a course in the College of Humanities and Sciences curriculum and not a college curriculum, one may need to study several of these SOLs on his/her own. The Department of Teaching and Learning Web site, connected to the School of Education Web page has a link to the SOLs.

Technology standards

The use of computers, graphing calculators, science probeware and other technologies is integral to successful teaching in today’s schools. Individuals preparing to teach must be competent on each of the eight standards in Virginia’s Technology Standards for Instructional Personnel. These standards may be reached through the Department of Teaching and Learning Web page.

Students are advised to consult with the professional studies adviser regarding the program’s requirements for demonstrating competence. Several of the standards may be documented as met by passing the Computer Literacy Examination offered online through EKidenet.

Early and elementary education

Freshman students bound for the Master of Teaching in Early and Elementary Education program are required to enroll in the Bachelor of Interdisciplinary Studies — liberal studies concentration for early and elementary education. This program offers liberal studies curriculum designed through an interdisciplinary collaboration among professors in the College of Humanities and Sciences and the School of Education in consultation with successful area teachers. It targets core knowledge across the four major subject areas represented in Virginia’s Standards of Learning (mathematics, sciences, social sciences and language arts/communication) while also providing a university-level skill set and knowledge base. Throughout the undergraduate program, contact with area schools and young learners is programmed into service and experiential learning venues.

Transfer students intending to be elementary teachers (and completing the Master of Teaching in Early and Elementary Education) are required to meet with advisors for the LSEE track prior to registering for courses. Advisors will evaluate all courses successfully completed outside of the LSEE track prescribed curriculum (from VCU or elsewhere) to determine their transferability to the LSEE track.

Majors are encouraged to select at least one minor in order to deepen knowledge and appreciation of a subject area. Philosophy, religious studies, African American studies and international studies have relevance in their understanding of human investigation of knowledge, human behavior and world cultures. A minor in a science area like environmental studies may be more “employable” because of school and societal concerns about our planet and its preservation. Whatever the humanities and sciences minor, the choice should be based on the student’s interest and perceived relevance.

Consult with the appropriate professional studies adviser for additional information regarding professional studies and liberal arts requirements.

Program requirements – mathematics and statistical reasoning

The general education requirement is three to six credits; the Early Childhood/Elementary Education Program requirement is six credits, including three credits in mathematics at the college algebra level or higher and three credits in a statistics course typically taught by a college department of mathematics. Choosing among these courses is recommended:

MATH 131 Introduction to Contemporary Mathematics
STAT 208 Statistical Thinking
STAT 210 Basic Practice of Statistics

Program requirements – natural sciences

The general education requirement is seven to nine credits, with one course each from the physical sciences and the biological sciences, with at least one laboratory; the program requirement is 12 credits, again with at least one course each in the physical sciences and the biological sciences, and two laboratories. Choosing among these courses is recommended:

The Master of Teaching with a concentration in secondary education leads to endorsement in one of these disciplines: biology, chemistry, drama, earth science, economics, English, French, geography, German, history and social sciences, mathematics, physics, political science, science, Spanish. An option within the foreign language track allows students to earn an ESL endorsement concurrent with the baccalaureate and M.T. degrees. This option requires nine additional hours. An added endorsement is also available in earth science.

Professional studies requirements (39 credits)

Qualifying courses (undergraduate) 6 to 9 credits
300 or 400 elective if needed
EDUS 301 Human Development and Learning
TEDU 310 Practicum (2 credits with TEDU 537, 1 credit with TEDU 540, 543, 545, 547 or 548)

Foundations courses 6 credits
EDUS 607/PSYC 607 Advanced Educational Psychology
EDUS 673 Seminar on Educational Issues, Ethics and Policy

Concentration courses 9 credits
TEDU 537 Secondary School Curriculum (3)
TEDU 540 Teaching Middle and High School Sciences (3)
TEDU 543 Teaching Secondary School Foreign Languages (3)
TEDU 545 Teaching Secondary School Mathematics (3)
TEDU 547 Teaching Secondary School Social Studies (3)
TEDU 548 Teaching Secondary School English (3)
TEDU 681 Investigations and Trends in Teaching (3)

Selectives 9 credits
Graduate selectives are to be chosen from the following:

Technology:
TEDU 556 Computer Applications in Education
TEDU 554/CMSC 554 Applications of Computers in the Teaching of Mathematics I

Reading:
TEDU 562 Reading Instruction in the Content Areas

Classroom management:
TEDU 600 Organizing for Effective Classroom Instruction
TEDU 631 Behavior Management of Students with Disabilities

Special education:
TEDU 605 Theory and Practice of Educating Individuals with Special Needs

Six graduate credits from other courses in (1) above, from the academic major or from courses such as these:

TEDU 521 Teaching Mathematics for Middle Education (required in math)
TEDU 626 Home-school Communication and Collaboration
ENED 601/ENGL 601 Young Adult Literature

All selectives should be chosen in consultation with the professional studies adviser.

Note: A minimum of 21 credits, including EDUS 300, EDUS 301, TEDU 310, TEDU 537, one of (TEDU 540, 543, 545, 547 or 548), EDUS 607 or 673 and the required selective (see 1 above), must be completed prior to the internship.

Clinical experience 9 credits
TEDU 672 Internship

* At least 33 credit hours must be taken at the graduate level.

The Master of Teaching in special education program leads to dual endorsement in two of these three special education areas: emotional disturbance, learning disabilities or mental retardation. The professional sequence in the Master of Teaching in Special Education program is designed to develop competencies needed to work with children and youth in two of these areas of special education in kindergarten through 12th grade.

Emotional disturbance
This phase prepares the student to teach children and youth with emotional disturbance in public school, residential and correctional settings. The student learns to apply a variety of interventions because of the integration of didactic course work and clinical experience. The program emphasizes the development of a wide range of teaching competencies derived from a number of theoretical models to promote social, behavioral and academic growth in children and youth with emotional disturbance.

Mental retardation
This phase prepares the student to teach children and youth with mental retardation in public, private and community settings. The program stresses assessment, curriculum, service delivery and adaptational techniques.

Learning disabilities
This phase prepares the student to teach children and youth with learning disabilities in school settings. The program accentuates the development of a broad range of teaching competencies allowing for wide latitude in the application of a prolific variety of academic interventions.

Program requirements liberal arts and sciences
In addition to satisfying the general education requirements of the College of Humanities and Sciences, candidates selecting special education as the specialization may choose almost any College of Humanities and Sciences major offered. One in the social sciences, such as psychology or sociology, may be especially useful, but majors in English, a science, mathematics, history or similar programs are acceptable.

Program requirements professional studies
All courses listed below are three semester credit hours unless otherwise indicated.

Required courses 30 credits

Undergraduate
300-400 level elective (if needed)
TEDU 330 Survey of Special Education
EDUS 301 Human Development and Learning or PSYC 305 Educational Psychology
TEDU 426 Teaching Reading and Other Language Arts

Graduate
TEDU 521 Teaching Mathematics for Middle Education or TEDU 522 Teaching Mathematics for Elementary Education
TEDU 531 Collaborative/Consultation Skills for Working with Families and Professionals
TEDU 533 Educational Assessment of Individuals with Exceptionalities
S E L D 530 Language Disabilities: Assessment and Teaching or MNRT 500 Language Intervention for Young Children and Learners with Severe Disabilities
TEDU 631 Behavior Management of Students with Disabilities
TEDU 632 Secondary Programming for Students with Disabilities

Selectives
Social/cultural foundations selective (One of the following is chosen with adviser)
EDUS 601 Philosophy of Education
EDUS 608 History of Western Education
EDUS 610 Social Foundations of Education
EDUS 612 Education and the Worlds Future
EDUS 614 Contemporary Educational Thought
EDUS 673 Seminar on Educational Issues, Ethics and Policy

Educational/psychological foundations selective (one of the following is chosen with adviser.)
Non-psychology majors must take EDUS/PSYC 607 Advanced Educational Psychology
Psychology majors may select one of the following:
EDUS 602 Adolescent Growth and Development
EDUS 603 Seminar in Child Growth and Development
EDUS/PSYC 607 Advanced Educational Psychology
EDUS 609 Learning Theories in Education

Option: With advisor’s permission, students with a strong background in psychological or/and or child development may select EDUS 660 Research Methods in Education.

Graduate or undergraduate selective (a course, at the 600 level or below, chosen with advisor from the following list)
TEDU 542 Parent/Professional Partnership
A second language course
A second reading course
A course in the third special education area (emotional disturbance, learning disabilities or mental retardation)
A course in early childhood special education (ECSE)
A course in counseling education (CLED)
A course in rehabilitation counseling (RHAB)
A course approved by the program faculty

Concentration courses
Two of the following three special education areas (12 semester credit hours of courses, 16 semester credit hours of clinical experiences)

Emotional disturbance
EMOD 400 Characteristics of Children/Adolescents with Emotional Disturbance
EMOD 501 Teaching Students with Emotional Disturbance
Clinical experience:
TEDU 310 Practicum: Emotional Disturbance (2)
EMOD 672 Internship: Emotional Disturbance (6)

Learning disabilities
TEDU 444 Introduction to Learning Disabilities
S E L D 501 Methods of Clinical Teaching
Clinical experience:
TEDU 310 Practicum: Learning Disabilities (2)
S E L D 672 Internship: Learning Disabilities (6)

Mental retardation
MNRT 400 Characteristics of Children and Youth with Mental Retardation
MNRT 560 Curriculum Design for Students with Mental Retardation
Clinical experience:
TEDU 310 Practicum: Mental Retardation (2)

MNRT 672 Internship: Mental Retardation (6)

Total
67

* A minimum of 33 semester credit hours must be taken at the graduate level.

Program in Recreation, Parks and Sport Leadership
The School of Education provides a professional core of courses leading to a Master of Science in Recreation, Parks and Sport Leadership. Graduates from this program seek positions with government departments, nonprofit agencies, and commercial recreation and sport enterprises. Students who desire careers in improving the lives of others, developing and managing sport programs and facilities, meeting the needs of persons with disabilities, preserving and conserving natural resources, or creating leisure opportunities that provide a sense of satisfaction for participants, should review departmental program offerings.

Administration
Jack Schiltz
Special Assistant to the Dean

Recreation, Parks and Sport Leadership, Master of Science (M.S.)

Admission requirements summary
Recreation, Parks and Sport Leadership, Master of Science (M.S.)
Indicate specialization:

Students may select one of three specialty areas: leisure service management, therapeutic recreation or sport leadership. Entry into the Sport Leadership specialty area requires admission to the VCU SportsCenter Program. For more information and to request a VCU SportsCenter application, contact the VCU SportsCenter at (804) 828-TEAM or visit the Web at www.vcu.edu/sportscenter.

Leisure service management is for students who want to expand their professional preparation for general administration and leadership in public or private leisure service organizations. Therapeutic recreation is for students seeking advanced study to prepare for careers in leadership and supervision of recreation programs for disabled persons in clinical, residential or community settings. In these programs of study, specialty courses and electives focus on either leisure service management or therapeutic recreation.

Through teaching and research, the VCU School of Engineering creates knowledge and transforms ideas in engineering and life sciences into technologies that enhance regional and global prosperity. The school prepares its students for leadership and entrepreneurship through collaborative and interdisciplinary partnerships.

Founded in 1995 and graduating its first class in May 2000, the School of Engineering is the result of a collaboration rare in the history of higher education in Virginia. Virginia Commonwealth University has, with the support of Virginia Polytechnic Institute and State University, created a school that brings innovative engineering and computer science education to central Virginia. Building reciprocal relationships with business and industry in the greater Richmond area, contributing to the region’s manufacturing enterprises and aggressively developing an international orientation, the school has developed programs of research and study that are sensitive to the unique demands of its time and culture.

In 1998, the undergraduate degree program in biomedical engineering was added to the original engineering disciplines of chemical, electrical and mechanical engineering, which were established in 1996. The long-standing and accredited degree program of computer science was assimilated into the School of Engineering beginning with the fall 2001 semester. In 2004-05, the chemical engineering department added an emphasis in life sciences and changed its name to the Department of Chemical and Life Science Engineering.

Students are offered an integrated and multidisciplinary curriculum in biomedical, chemical and life science, computer, electrical, or mechanical engineering, or computer science. Supported by the internationally recognized strengths of MCV Hospitals and the cutting-edge developments being generated by the Virginia BioTechnology Research Park, the School of Engineering at VCU has innovative curricula that emphasize creativity and imagination. By encouraging their interaction with practicing professionals, students are continually aware of the real-world application of their research and their studies.

Serving the best and the brightest students and supporting VCU’s dedication to diversity by opening doors of opportunity to underrepresented populations in the engineering and computer science professions, the school continually strives to enrich the technological and intellectual climate of the metropolitan area.

Discovering new knowledge is the goal of the best of the nation’s schools. The School of Engineering at VCU celebrates not only the discovery of knowledge, but also the creative integration and application of that knowledge.

Accreditation

The Accreditation Board for Engineering and Technology is the premier organization in the U.S. that provides accreditation to engineering and computer science programs. Individual programs (i.e., mechanical engineering) are accredited at the bachelor’s level.

The Engineering Accreditation Commission of ABET has accredited the Biomedical, Chemical and Life Science, Electrical and Computer, and Mechanical engineering programs at the VCU School of Engineering.

The Computer Accreditation Commission of ABET has provided accreditation to the Computer Science Program for many years.

Degree programs

The School of Engineering offers the following degree programs:

Bachelor of Science

Biomedical Engineering
Chemical and Life Science Engineering
Computer Engineering
Computer Science
Electrical Engineering
Mechanical Engineering

Students also may be admitted under “Undeclared Engineering” for entrance to the School of Engineering. A field of study can be determined after the first semester.

Master of Science

Biomedical Engineering
Computer Science

Engineering – with tracks in:

• Chemical and Life Science Engineering
• Electrical and Computer Engineering
• Engineering
• Mechanical Engineering

Doctor of Philosophy

Biomedical Engineering

Engineering – with tracks in:

• Chemical and Life Science Engineering
• Computer Science
• Electrical and Computer Engineering
• Engineering
• Mechanical Engineering

Joint degree

M.D./Ph.D. in Biomedical Engineering in participation with the School of Medicine

Interdisciplinary and cooperative studies degree

M.S. Commonwealth Graduate Engineering Program

Post-baccalaureate certificate

Computer Science

Engineering courses

Descriptions for all courses offered by the university may be accessed through the online courses database at www.pubapps.vcu.edu/vcucourses. You may search by unit, subject or keyword, as well as by degree level.

Follow these links to engineering (ENGR) courses or the (ENGZ) laboratories.

Commonwealth Graduate Engineering Program

The Commonwealth Graduate Engineering Program is a collaborative effort of the University of Virginia, Virginia Commonwealth University, Virginia Polytechnic Institute and State University, Old Dominion University, and George Mason University. The University of Mary Washington participates as a funded receive site.

See the School of Engineering Graduate Programs section of this bulletin for information on VCU’s graduate programs in engineering.

Administration

Rosalyn S. Hobson
Associate Dean for Graduate Studies

The VCU Commonwealth Graduate Engineering Program (CGEP) director works closely with the other CGEP directors, the VCU Dean of School of Engineering, and local businesses and industries.
Program description

Students who have baccalaureate degrees in engineering or strong backgrounds in the sciences may work toward a master’s degree in engineering on the Monroe Park Campus of VCU. Graduate engineering courses are available from the CGEP member universities via interactive television, the Web and two-way audio/video teleconferencing. In addition to the required engineering courses, elective courses are available in applied mathematics, mathematical statistics, chemistry, operations research, and physics in classes at VCU. The following academic programs are available through CGEP:

- Chemical Engineering
- Civil and Environmental Engineering
- Computer Science
- Electrical and Computer Engineering
- Engineering Management
- Industrial and Systems Engineering
- Manufacturing and Design Engineering
- Materials Sciences and Engineering
- Mechanical and Aerospace Engineering
- Modeling and Simulation

Degree-seeking students

Students enrolling in the program should apply for admission in a given academic area of study and may select courses from any of the participating institutions, consistent with selected degree requirements.

Nondegree-seeking students

Qualified individuals may enroll in a particular course without pursuing a formal degree program of study. Admission will be based on the individual’s academic preparation and the availability of space.

Admission requirements

Students should apply for admission to the CGEP University offering the desired degree program. Applicants should have a “B” average, but a successful professional experience may strengthen admission credentials. Three recommendations from persons who are qualified to give information concerning the applicants’ probable success in the program and the completion of the Graduate Record Examination (GRE) also are required.

Graduate information

Registration for graduate study

In the biomedical engineering program, all new students begin their course of study in the fall semester (August). Spring semester admissions require the recommendation of the graduate program director, approval of the chair and the assistant dean for graduate affairs. Students may begin a course of study in either the fall or spring semesters for the engineering and computer science graduate programs; however, a start in the fall semester is preferred. For the CGEP, students may begin a course of study in either the fall or spring semester.

Engineering, Doctor of Philosophy (Ph.D.)

Admission requirements summary

The School of Engineering offers a Doctor of Philosophy in Engineering with five tracks. The engineering program utilizes the faculty and research facilities of the Computer Science Department as well as those of Chemical and Life Science Engineering, Electrical and Computer Engineering, and Mechanical Engineering to expose students to advanced and emerging technologies. Research thrusts in the School of Engineering include computer science, life sciences, micro-nano technology, and manufacturing and design. Engineering Ph.D. degrees are interdisciplinary and provide a wide array of specialization areas including microelectronics, silicon fabrication, VLSI design, networks, embedded systems, image/signal processing, photonics/optical electronics, neural networks, MEMS, digital communications, micro-nanotechnology, smart materials and devices, robotics, manufacturing and design, polymers, biochips, biochemical and biological engineering, fuel cells, software engineering, parallel processing, databases, compiler theory, machine learning, and artificial intelligence. These areas cross the discipline lines of computer science, chemical, electrical, and mechanical Engineering.

For students who want to study and conduct research in these areas or related areas, the following tracks are available:

- Chemical and life science engineering track (EGRC)
- Computer science track (CMSC)-Ph.D. only
- Electrical and computer engineering track (EGRE)
- Engineering track (ENGR)
- Mechanical engineering track (EGRM)

Each track can be tailored to meet the individual student’s academic goals and research interests. Students seeking to take course work and conduct their research in one of these tracks should contact the graduate program coordinator or program chair of the desired track for detailed information about that track.

General requirements for the doctoral degree in engineering

Assistantships

A number of full or partial teaching and research assistantships are available in the engineering, biomedical engineering and computer science programs. Assistantships are awarded based on academic performance. Full support assistantships are for a 12-month period and cover tuition, fees and a stipend. A brief description of financial aid based on demonstrated need is detailed in the chapter of this bulletin regarding financial aid. Need-based aid programs include National Direct Student Loan, college work-study and institutional loans.

The student adviser and the advisory committee

The successful completion of the requirements for the Ph.D. degree includes an original research project, the progress of which is guided by a faculty adviser and monitored by an advisory committee. Students receive guidance and counsel from the graduate program director prior to the appointment of the permanent adviser. The permanent adviser holds the primary responsibility for directing the development of the student in the program and providing the appropriate guidance and counsel essential to the scholarly development of the student. An advisory committee, appointed shortly after the permanent adviser is appointed, serves as both an examining and consultative body. Its function is to assist the development of the student. Committee members hold a special responsibility as a source of counsel for the student. For details, students should contact either the respective graduate program director or the program chair.

Graduate degree requirements

All full-time graduate students are expected to register for a minimum of 12 hours of graduate credits per semester and at least one semester hour during the summer, exclusive of audited courses. This requirement includes research.

At least half of the credits required in the student’s program must be those designated as exclusively for graduate students; that is, those at the 600 level or above.

Graduate students are required to remain in good academic standing through the course of their degree program. Unsatisfactory student performance includes:

- the assignment of a grade of “U,” “D” or “F” in any course.
- failure to maintain a cumulative GPA of 3.0 or greater.
- failure to pass the written or oral comprehensive examination.
- failure to pass the final examination.

A student whose performance is unsatisfactory must successfully petition the dean of the Graduate School to continue in the graduate program. Unsatisfactory performance also constitutes grounds for the termination of financial assistance to the student.

Graduate students may not take the comprehensive examination for the Ph.D. degree if their overall GPA is less than 3.0 or if the GPA for courses within the program is below 3.0. Students may not take the final oral examination for the Ph.D. degree if their overall GPA is below 3.0. The student’s advisory committee
is the examining body for the administration of the comprehensive examinations and the final examination.

In addition to these requirements and those set forth by the university, students must meet the requirements for specific degrees set forth in the School of Engineering program listings.

**Enrollment information**

**Nondegree-seeking students**

Students not admitted to a degree program must obtain permission from the program director and chair before being allowed to register for courses.

**Termination of enrollment**

The university reserves the right to terminate the enrollment of any student for unlawful, disorderly or immoral conduct or for persistent failure to fulfill the purposes for which the student was matriculated.

A minimum of three years of study, including research, is necessary to complete all requirements for the Ph.D. A period of residence of at least three consecutive semesters is required. Residency is defined as registration for at least nine credits per semester. A time limit of seven calendar years, beginning at the time of first registration, is placed on work to be credited toward the Ph.D.

**Curriculum**

There are three components of each Ph.D. in Engineering track.

**Concentration (track-specific) component.** This component allows the student to pursue a series of courses that focus on a specific field of engineering and serve as the student’s primary engineering discipline.

**Track electives component.** This component allows the student to take courses in either engineering or science with approval of the student’s adviser.

**Directed research component.** This component emphasizes research directed toward completion of degree requirements under the direction of an adviser and advisory committee.

**Degree requirements**

A minimum of 60 credit hours beyond the bachelor’s degree, including research credits, is generally required for the Ph.D. in Engineering. Students holding the master’s degree must complete a minimum of six semester credits in concentration course work, three credits in track elective course work and 21 semester credits in dissertation research. The student’s adviser must approve all course work. Ph.D. students must take a minimum of 30 semester credits (including research) beyond the master’s degree. No elective courses may be used for both M.S. and Ph.D. degrees. At least half of the credits required in the student’s program must be those designated as exclusively for graduate students, that is those at the 600 level or above.

**Admission requirements**

In addition to the general requirements for admission to graduate programs in the Graduate School and the School of Engineering, applicants to the chemical and life science engineering track must have a B.S. degree in chemical and life science engineering or a closely related discipline.

Acceptance of an applicant is based upon the recommendation of the Admissions Committee with approval of the program chair and the assistant dean for graduate affairs.

**Registration**

Students may begin a course of study in either the fall or spring semesters for the engineering graduate programs, although a start in the fall semester is preferred.

**Comprehensive examinations**

In order to advance to doctoral candidacy, the student must pass both written and oral comprehensive examinations. The written examination(s) focuses on the subject matter deemed critical as a foundation in the program. The examination(s) is largely based on material covered in required course work and its application to theoretical and practical problems. The oral examination, which follows successful completion of the written examination(s), is administered to assess the ability of the student to integrate information and display an appropriate mastery of problem-solving capabilities. Graduate students may not take the comprehensive exam if their overall GPA is less than 3.0. Students must also have a GPA of at least 3.0 for courses within the program in order to take the comprehensive exam. For further details, see the graduate program director or the program chair.

**Admission to candidacy**

Before admission to candidacy for the doctorate, students must have: (1) completed required course work, (2) successfully completed the comprehensive examinations and (3) fulfilled all additional departmental requirements. A student may seek admission to candidacy for the Doctor of Philosophy degree without first completing the research and thesis portion of the Master of Science degree.

**Dissertation research**

The student must conduct a substantial original investigation under the supervision of the permanent adviser and prepare a dissertation reporting the results of this research and analyzing its significance in relation to existing scientific knowledge.

When the dissertation has been completed, copies in accepted form and style are submitted to the members of the advisory committee. The committee members decide upon the acceptability of the candidate’s dissertation. A favorable unanimous vote is required to approve the dissertation and all examiners are required to vote.

If the advisory committee accepts the dissertation for defense, the candidate appears before them for a final oral examination. This examination is open to all members of the faculty. The final oral examination will be limited to the subject of the candidate’s dissertation and related matters. A favorable vote of the candidate’s advisory committee and no more than one negative vote shall be required for passing the final oral examination. All committee members must vote. There shall be an announcement of the candidate’s name, department and title of dissertation, together with the day, place and hour of the final oral examination at least 10 working days in advance.

A minimum of three years of study, including research, is necessary to complete all requirements for the Ph.D. A period of residence of at least three consecutive semesters is required. Residency is defined as registration for at least nine credits per semester. A time limit of seven calendar years, beginning at the time of first registration, is placed on work to be credited toward the Ph.D.

Curriculum
There are three components of each Ph.D. in Engineering track.

<table>
<thead>
<tr>
<th>Concentration (track-specific) component. This component allows the student to pursue a series of courses that focus on a specific field of engineering and serve as the student’s primary engineering discipline.</th>
</tr>
</thead>
<tbody>
<tr>

<tr>
<td>Directed research component. This component emphasizes research directed toward completion of degree requirements under the direction of an adviser and advisory committee.</td>
</tr>
</tbody>
</table>

Degree requirements
A minimum of 60 credit hours beyond the bachelor’s degree, including research credits, is generally required for the Ph.D. in Engineering. Students holding the master’s degree must complete a minimum of six semester credits in concentration course work, three credits in track elective course work and 21 semester credits in dissertation research. The student’s adviser must approve all course work. Ph.D. students must take a minimum of 30 semester credits (including research) beyond the master’s degree. At least half of the credits required in the student’s program must be those designated as exclusively for graduate students, that is those at the 600 level or above.

Admission requirements
In addition to the general requirements for admission to graduate programs in the Graduate School and the School of Engineering, applicants to the engineering track must have a B.S. degree in engineering or a closely related discipline.
Acceptance of an applicant is based upon the recommendation of the Admissions Committee with approval of the program chair and the assistant dean for graduate affairs.

Registration
Students may begin a course of study in either the fall or spring semesters for the engineering graduate programs, although a start in the fall semester is preferred.

Comprehensive examinations
In order to advance to doctoral candidacy, the student must pass both written and oral comprehensive examinations. The written examination(s) focuses on the subject matter deemed critical as a foundation in the program. The examination(s) is largely based on material covered in required course work and its application to theoretical and practical problems. The oral examination, which follows successful completion of the written examination(s), is administered to assess the ability of the student to integrate information and display an appropriate mastery of problem-solving capabilities. Graduate students may not take the comprehensive exam if their overall GPA is less than 3.0. Students must also have a GPA of at least 3.0 for courses within the program in order to take the comprehensive exam. For further details, see the graduate program director or the program chair.

Admission to candidacy
Before admission to candidacy for the doctorate, students must have: (1) completed required course work, (2) successfully completed the comprehensive examinations and (3) fulfilled all additional departmental requirements. A student may seek admission to candidacy for the Doctor of Philosophy degree without first completing the research and thesis portion of the Master of Science degree.

Dissertation research
The student must conduct a substantial original investigation under the supervision of the permanent adviser and prepare a dissertation reporting the results of this research and analyzing its significance in relation to existing scientific knowledge. When the dissertation has been completed, copies in accepted form and style are submitted to the members of the advisory committee. The committee members decide upon the acceptability of the candidate’s dissertation. A favorable unanimous vote is required to approve the dissertation and all examiners are required to vote. If the advisory committee accepts the dissertation for defense, the candidate appears before them for a final oral examination. This examination is open to all members of the faculty. The final oral examination will be limited to the subject of the candidate’s dissertation and related matters. A favorable vote of the candidate’s advisory committee and no more than one negative vote shall be required for passing the final oral examination. All committee members must vote. There shall be an announcement of the candidate’s name, department and title of the Master of Science degree.

The School of Engineering offers the Master of Science in Engineering degree with either a thesis or non-thesis option in four tracks. A fifth track in nuclear engineering offers only a non-thesis option. The engineering program utilizes the faculty and research facilities of the Department of Computer Science as well as those of the departments of Chemical and Life Science Engineering, Electrical and Computer Engineering and Mechanical Engineering to expose students to advanced and emerging technologies. Research thrusts in the School of Engineering include computer science, life sciences, micro-nano technology, and manufacturing and design. Engineering M.S. and Ph.D. degrees are interdisciplinary and provide a wide array of specialization areas including microelectronics, silicon fabrication, VLSI design, networks, embedded systems, image/signal processing, photonics/optical electronics, neural networks, MEMS, digital communications, micro-nanotechnology, smart materials and devices, robotics, manufacturing and design, polymers, biochips, biochemical and biomedical engineering, fuel cells, software engineering, parallel processing, databases, compiler theory, machine learning, and artificial intelligence. These areas cross the discipline lines of computer science, chemical, electrical, and mechanical engineering.

For students who want to study and conduct research in these areas or related areas, the following tracks are available:

- Chemical and life science engineering track (CLSE).
- Electrical and computer engineering track (EGRE).
- Mechanical engineering track (EGRM).
- Engineering track (ENGR).
- Nuclear engineering track (EGRN) non-thesis only.

Each track can be tailored to meet the individual student’s academic goals and research interests. Non-thesis and thesis students seeking to take course work or conduct their thesis/study research in one of these tracks should contact the graduate program coordinator or program chair of the desired track for more information about that track. Eighteen to 20 months of study usually are necessary to complete the requirements for the thesis-option Master of Science in Engineering degree. The non-thesis option generally requires 12 months of full-time study or up to five years of part-time study. A time limit of five years, beginning at the time of first registration, is placed on work to be credited toward the Master of Science degree. Generally, a maximum of six credits of approved graduate course work required for a master’s degree may be transferred from another program at VCU or outside institution and applied toward the degree.

General requirements

Assistantships

A number of full or partial teaching and research assistantships are available in the engineering, biomedical engineering and computer science programs. Assistantships are awarded based on academic performance. Full support assistantships are for a 12-month period and cover tuition, fees and a stipend. A brief description of financial aid based on demonstrated need is detailed in the chapter of this bulletin regarding financial aid. Need-based aid programs include National Direct Student Loan, college work-study and institutional loans.

The student adviser and the advisory committee

The successful completion of the requirements for both the M.S. includes an original research project, the progress of which is guided by a faculty adviser and monitored by an advisory committee. Students receive guidance and counsel from the graduate program director prior to the appointment of the permanent adviser. The permanent adviser holds the primary responsibility for directing the development of the student in the program and providing the appropriate guidance and counsel essential to the scholarly development of the student. An advisory committee, appointed shortly after the permanent adviser is appointed, serves as both an examining and consultative body. Its function is to assist the development of the student. Committee members hold a special responsibility as a source of counsel for the student. For details, students should contact either the respective graduate program director or the program chair.

Graduate degree requirements

All full-time graduate students are expected to register for a minimum of 12 hours of graduate credits per semester and at least one semester hour during the summer, exclusive of audited courses. This requirement includes research. At least half of the credits required in the student’s program must be those designated as exclusively for graduate students; that is, those at the 600 level or above.

Graduate students are required to remain in good academic standing through the course of their degree program. Unsatisfactory student performance includes:

- The assignment of a grade of U, D or F in any course.
- Failure to maintain a cumulative GPA of 3.0 or greater.
- Failure to pass the written or oral comprehensive examination.
- Failure to pass the final examination.

A student whose performance is unsatisfactory must successfully petition the dean of the Graduate School to continue in the graduate program. Unsatisfactory performance also constitutes grounds for the termination of financial assistance to the student.

Students may not take the final oral examination for the M.S. degree if their overall GPA is below 3.0. The student’s advisory committee is the examining body for the administration of the final examination. In addition to these requirements and those set forth by the university, students must meet the requirements for specific degrees set forth in the School of Engineering program listings.

Enrollment information

Nondegree-seeking students

Students not admitted to a degree program must obtain permission from the program director and chair before being allowed to register for courses.
Termination of enrollment
The university reserves the right to terminate the enrollment of any student for unlawful, disorderly or immoral conduct or for persistent failure to fulfill the purposes for which the student was matriculated.

Chemical and life science engineering track

<table>
<thead>

Curriculum
There are three components of each M.S. in Engineering track:

Concentration (track-specific) component. This component allows the student to pursue a series of courses that focus on a specific field of engineering and serve as the student’s primary engineering discipline.

Track electives component. This component allows the student to take courses in either engineering or science with approval of the student’s adviser.

Directed research component. This component emphasizes research directed toward completion of degree requirements under the direction of an adviser and advisory committee.

The track can be tailored to meet the individual student’s academic goals and research interests. Students seeking to take course work and conduct their research in the chemical and computer engineering track should contact the graduate program coordinator or department chair of Chemical and Life Science Engineering for detailed information about that track.

Degree requirements
Students seeking the M.S. degree are required to take a minimum of 30 semester credits of approved graduate courses (including research). Each student must complete 12 semester credits in concentration course work, 12 semester credits in track electives course work and six semester credits in thesis research. The student’s adviser must review and approve all course work and thesis research credits. The total of all credits must be at least 30. No elective courses may be used for both M.S. and Ph.D. degrees. At least half of the credits required in the student’s program must be those designated as exclusively for graduate students, that is those at the 600 level or above.

Each student must conduct an original investigation under the supervision of the permanent adviser and prepare a thesis reporting the results of this research and analyzing its significance in relation to existing scientific knowledge. This study is reported in a thesis prepared in acceptable form and style. Upon approval of the thesis by the adviser, the student submits a copy to each member of the advisory committee. The student’s advisory committee members examine the thesis and decide upon its acceptability. Each committee member reports to the student’s adviser when the thesis is acceptable for defense. The thesis is approved for defense only if accepted unanimously. Upon approval of the thesis, the student appears for a final oral examination administered by the student’s advisory committee. This examination of an M.S. candidate includes the subject matter of course work as well as the thesis.

Admission requirements
In addition to the general requirements for admission to graduate programs in the Graduate School and the School of Engineering, applicants to the electrical and computer engineering track must have a B.S. degree in electrical and computer engineering or a closely related discipline.

Registration
Students may begin a course of study in either the fall or spring semesters for the engineering programs, although a start in the fall semester is preferred.

Curriculum

The Department of Biomedical Engineering provides in-depth study in a variety of specialization areas including biomedical imaging systems, orthopaedic biomechanics, tissue and cellular engineering, biomaterials, artificial organs, human-computer interfaces, cardiovascular devices and rehabilitation engineering. The programs allow students to participate in cutting-edge research in one of the nations most advanced engineering facilities. The department has ongoing collaborations with numerous industries, federal laboratories, the VCU science departments, the university’s MCV Campus, the Hunter Holmes McGuire Veterans Affairs Medical Center, the Virginia BioTechnology Research Park and numerous biomedical and clinical programs throughout the VCU Medical Center’s MCV Hospitals.

Registration

Students may begin a course of study in either the fall or spring semesters for the engineering programs, although a start in the fall semester is preferred.

Biomedical engineering courses

Descriptions for all courses offered by the university may be accessed through the online courses database at www.pubapps.vcu.edu/vcu courses. You may search by unit, subject or keyword, as well as by degree level.

Follow this link to biomedical engineering (EGRB) courses.

Special requirements:
Contact department for brochure

This program is nominally a three-year program leading to the Ph.D. in Biomedical Engineering. Prior evidence of completion of physiology and/or statistics may result in a waiver of the requirements for these courses as determined by the graduate program coordinator and/or the department chair. A period of residence of at least three consecutive terms is required. Residency is defined as registration for at least nine credits per term. A time limit of seven calendar years, beginning at the time of first registration, is placed on work to be credited toward the Doctor of Philosophy degree.

At the conclusion of the first year of doctoral study (or when the core course requirements have been satisfied), each doctoral student must successfully complete written and oral portions of a comprehensive examination. This examination is designed to test the student on fundamental knowledge in engineering as evidenced by the core (and related elective) courses within the curriculum. Upon completion of this examination, a doctoral student is permitted to initiate a doctoral research project and to complete additional course work consisting of biomedical engineering, clinical and science electives.

Upon completion of all course work and the intended research, a doctoral student must prepare a dissertation describing the completed research. A dissertation defense, under the direction of the advisory committee, will be scheduled to examine the students research, dissertation documentation, and underlying fundamental knowledge needed to complete the research. Upon successful completion of the defense and dissertation, the doctoral student may apply for graduation from Virginia Commonwealth University with the Doctor of Philosophy in Biomedical Engineering.

Admission requirements

In addition to the university admission requirements, biomedical engineering has the following admission criteria for all entering graduate students (for both M.S. and Ph.D. applicants):

• Minimum GPA of at least 3.0 for all graduate credit hours
• Minimum GRE score of 1100 (combined verbal and quantitative sections) including a minimum 600 on the quantitative section
• Minimum TOEFL score of 600 paper/250 computer-based for students whose first or native language is not English.

Biomedical engineering will accept a maximum of six credit hours for transfer into Ph.D. program if the original grades for such courses are “B” or higher (or equivalent).

Acceptance of an applicant is based upon the recommendation of the Admissions Committee with approval of the program chair and the assistant dean for graduate affairs.

Registration
In the biomedical engineering program, all new students begin their course of study in the fall semester (August). Spring semester admissions require the recommendation of the graduate program director, approval of the chair and the assistant dean for graduate affairs. Students may begin a course of study in either the fall or spring semesters for the engineering and computer science graduate programs, although a start in the fall semester is preferred. For the CGEP, students may begin a course of study in either the fall or spring semester.

**Comprehensive examinations**

In order to advance to doctoral candidacy, the student must pass both written and oral comprehensive examinations. The written examination(s) focuses on the subject matter deemed critical as a foundation in the program. The examination(s) is largely based on material covered in required course work and its application to theoretical and practical problems. The oral examination, which follows successful completion of the written examination(s), is administered to assess the ability of the student to integrate information and display an appropriate mastery of problem-solving capabilities. Graduate students may not take the comprehensive exam if their overall GPA is less than 3.0 or if their GPA for courses within the program is below 3.0. Students must also have a GPA of at least 3.0 for courses within the program in order to take the comprehensive exam. For further details, see the graduate program director or the program chair.

**Honors**

The Alexander Mallory Clarke Award for academic excellence is given each spring to the biomedical engineering student who is recognized by the faculty for outstanding achievement in the first year of study.

**Admission to candidacy**

Before admission to candidacy for the doctorate, students must have: (1) completed required course work, (2) successfully completed the comprehensive examinations and (3) fulfilled all additional departmental requirements. Students must complete all the requirements for the master’s degree, including successfully defending a master’s thesis, before being admitted into candidacy for the doctoral degree. This last requirement will be waived for those students who: (1) already have a master of science in biomedical engineering or related discipline or (2) have successfully completed two years of medical school in the M.D./Ph.D. program as described in the School of Medicine chapter of this bulletin.

**Dissertation research**

The student must conduct a substantial original investigation under the supervision of the permanent adviser and prepare a dissertation reporting the results of this research and analyzing its significance in relation to existing scientific knowledge. When the dissertation has been completed, copies in accepted form and style are submitted to the members of the advisory committee. The committee members decide upon the acceptability of the candidate’s dissertation. A favorable unanimous vote is required to approve the dissertation and all examiners are required to vote.

If the advisory committee accepts the dissertation for defense, the candidate appears before them for a final oral examination. This examination is open to all members of the faculty. The final oral examination will be limited to the subject of the candidate’s dissertation and related matters. A favorable vote of the candidate’s advisory committee and no more than one negative vote shall be required for passing the final oral examination. All committee members must vote. There shall be an announcement of the candidate’s name, department and title of dissertation, together with the day, place and hour of the final oral examination at least 10 working days in advance.

**Curriculum**

A minimum of 39 credit hours, exclusive of research credits, is generally required.
**Admission requirements summary**

Special requirements:
- Contact department for brochure

**Program of study – B.S. to M.S.**

Required biomedical engineering courses
- EGRB 507 Biomedical Electronics and Instrumentation
- EGRB 511 Fundamentals of Biomechanics
- EGRB 603 Biomedical Signal Processing
- EGRB 613 Biomaterials

Required physics course
- 5 credits

Elective courses (biomedical engineering or science course work)
- 9* credits

Research seminar (biomedical engineering)
- 1 credit

Directed research
- 6** credits

EGRB 697 Directed Research in Biomedical Engineering

Total (minimum)
- 30** credits

* The nine credits listed are minimum elective credits required for graduation; however, a student’s advisory committee may require additional electives reflective of the field of study.

** Directed research is required at a level to be determined by each student’s advisory committee.

This program is nominally a two-year program leading to the M.S. in Biomedical Engineering. Prior evidence of completion of physiology may result in a waiver of the requirements for this course as determined by the graduate program coordinator and/or the department chair. Each Master of Science student must successfully complete a thesis describing his or her individualized research project. At the completion of the research, the student must present the research to the advisory committee and undergo an examination of the research results, thesis documentation and underlying educational foundation necessary to have successfully completed the research. Upon successful completion of the examination and thesis, the student may apply for graduation from Virginia Commonwealth University with the Master of Science in Biomedical Engineering.

**Admission requirements**

In addition to the university admission requirements, biomedical engineering has the following admission criteria for all entering graduate students:

- Minimum GPA of at least 3.0 during the previous 60 credit hours (for applicants with a B.S.)
- Minimum GRE score of 1100 (combined verbal and quantitative sections) including a minimum 600 on the quantitative section
- Minimum TOEFL score of 600 paper/250 computer-based for students whose first or native language is not English

Biomedical engineering will accept a maximum of six credit hours for transfer into either the M.S. program if the original grades for such courses are “B” or higher (or equivalent).

Acceptance of an applicant is based upon the recommendation of the Admissions Committee with approval of the program chair and the assistant dean for graduate affairs.

**Registration**

In the biomedical engineering program, all new students begin their course of study in the fall semester (August). Spring semester admissions require the recommendation of the graduate program director, approval of the chair and the assistant dean for graduate affairs.

**Honors**

The Alexander Mallory Clarke Award for academic excellence is given each spring to the biomedical engineering student who is recognized by the faculty for outstanding achievement in the first year of study.

**Department of Chemical and Life Science Engineering**

Chemical and life science engineering represents the formal interaction of chemical engineering with the life sciences. VCU’s Department of Chemical and Life Science Engineering is uniquely poised to bring these two premier disciplines together to form a program distinct in the nation. Programs are offered at the undergraduate and graduate levels.

Life science engineering — with interest areas including stem cell and stem cell-derived tissue engineering, biosciences/biotechnology, cellular engineering, biochips and biosensors, bioinformatics and molecular biocomputing, genetic and protein molecular engineering, environmental life science engineering, and molecular- and cellular-based therapeutics — is the fastest growing of all industries that currently employ engineers.

Chemical engineering and life science engineering share a broad range of common foundational knowledge bases, including the principles of mass and energy balances, transport phenomena and thermodynamics, surface and interfacial science, and reaction science and engineering. Strong academic and research programs in chemical and life science engineering will provide a wealth of exciting professional opportunities for successful graduates of the VCU program.

The bachelor’s program offers tracks in chemical engineering and life science engineering, and a chemical and life science engineering track is available in the Master of Science in Engineering program, as well as the Ph.D. in Engineering program. The CLSE tracks in the graduate-level programs are designed primarily for students who are interested in applying chemical and engineering principles toward important contemporary topics including process design, metabolic engineering, biosensor and biochip development, high-performance polymers in medicine and energy conversion, polymer surface science, and environmentally benign polymer processing technologies. Major emphasis is placed on chemical and life science engineering fundamentals with additional emphasis on applied chemistry and life sciences.

**Department of Computer Science**

The Department of Computer Science offers undergraduate and graduate programs. The Bachelor of Science in Computer Science is a rigorous, highly concentrated curriculum of computer science courses. It includes advanced study in several important areas of computer science and provides a strong foundation in this discipline. Every course is taught by full-time faculty members who also serve as advisers to both undergraduate and graduate students.
The master’s degree program emphasizes continuing self-development of individuals currently engaged in science-, technology- and engineering-related fields. It prepares persons who have completed undergraduate majors in these fields for entry into careers in areas that use computing technology. Both the theoretical and applied aspects of computer science are emphasized in this program. The program offers courses in a wide range of areas in computer science including artificial intelligence, theory of computation, computer architecture, software engineering, programming languages, database and computer graphics. These areas correspond to the research interests and specialization of the faculty in the computer science program. For the convenience of students with full time jobs, a full range of courses is offered both during the day and in the evening.

The Computer Science Ph.D. in Engineering track is designed primarily for students who are interested in advanced research in areas related to software engineering, networking, parallel processing, databases, compiler theory, machine learning and artificial intelligence. Emphasis in this track is placed on foundational issues as well as contemporary research areas such as human-machine interface design, the design and development of intelligent control systems, optical networks, the applicability of modal logic operations in databases, and transformations permitting the development of trusted compilers.

Special requirements:  
Contact coordinator of graduate studies for specific requirements

A student may choose either a thesis or non-thesis degree program. The thesis option is suggested for students who have a strong research interest or those who wish to pursue a Ph.D. degree. Interdisciplinary programs of study that involve computer science and another discipline are encouraged; however, a core of computer science courses is required. Courses not labeled CMSC must show relevance to the student’s program of study and must be submitted for approval by the Computer Science Graduate Program Committee through the students adviser. At most, six non-CMSC credits may be applied toward the degree.

**Admission requirements**

In addition to the general requirements for admission to graduate programs in the Graduate School and the School of Engineering, applicants to the master's program in computer science must have a B.S. degree in engineering, computer science or a closely related discipline. Acceptance of an applicant is based upon the recommendation of the Admissions Committee with approval of the program chair and the assistant dean for graduate affairs.

**Registration**

In the biomedical engineering program, all new students begin their course of study in the fall semester (August). Spring semester admissions require the recommendation of the graduate program director, approval of the chair and the assistant dean for graduate affairs. Students may begin a course of study in either the fall or spring semesters for the engineering and computer science graduate programs, although a start in the fall semester is preferred. For the CGEP, students may begin a course of study in either the fall or spring semester.

**Non-thesis option**

**M.S. requirements in computer science – Non-thesis option (30 credits):**

A minimum of 30 credits, including at least 18 credits at the 600 level. Courses that are transferred are subject to the following rules. These credits must not have been applied to any other degree; however, they may have been taken as part of a postbaccalaureate certificate program.

No more than six credits in graduate-level courses taken at VCU before admission to the M.S. program may be counted toward the M.S. degree.

Up to one-third of a student’s non-research graduate-level credits can be transferred into the M.S. program from another college or university.

The number of credits that may be transferred by students pursuing an M.S. in Computer Science through the Commonwealth Graduate Engineering Program (CGEP) is limited by CGEP policy to 50 percent of the required credits.

All transfer credits must be approved by the Computer Science Graduate Program Committee using the graduate course transfer form.

Students seeking to take a research credit course (CMSC 692 Independent Study or CMSC 697 Directed Research) in a given semester must find a faculty member willing to supervise the research. Before enrolling in the course, the student must submit a research proposal form to the Computer Science Graduate Program Committee no later than the end of the 10th week of the prior semester. At most three credits of CMSC 697 can be applied toward the degree.

**Thesis option**

**M.S. requirements in computer science – Thesis option (30 credits):**

A minimum of 24 non-thesis credits, including at least 12 credits at the 600 level. Six credits in CMSC 697 Directed Research.

Courses that are transferred are subject to the following rules. These credits must not have been applied to any other degree; however, they may have been taken as part of a postbaccalaureate certificate program.

No more than six credits in graduate-level courses taken at VCU before admission to the M.S. program may be counted toward the M.S. degree.

Up to one-third of a student’s non-research graduate-level credits can be transferred into the M.S. program from another college or university.

The number of credits that may be transferred by students pursuing an M.S. in Computer Science through the Commonwealth Graduate Engineering Program (CGEP) is limited by CGEP policy to 50 percent of the required credits.

All transfer credits must be approved by the Computer Science Graduate Program Committee using the graduate course transfer form.

Students seeking to take a research credit course (CMSC 692 Independent Study or CMSC 697 Directed Research) in a given semester must find a faculty member willing to supervise the research. Before enrolling in the course, the student must submit a research proposal form to the Computer Science Graduate Program Committee no later than the end of the 10th week of the prior semester. At most three credits of CMSC 697 can be applied toward the degree.

The thesis can be in any area of computer science or an interdisciplinary area with a strong computer science component. The proposed content will be developed in conjunction with the student’s thesis adviser. The thesis must take the form of an in-depth literature search and exposition on some area of computer science, a substantial project or other application that involves a depth of computer science knowledge, original research, or some combination of these forms. The student will produce a written thesis in the format specified by the VCU Graduate School, and will publicly defend the thesis before a committee consisting of the thesis adviser, at least one other faculty member from the computer science program, and a faculty member from outside of the computer science program.

**Accelerated Bachelor of Science (B.S.) and Master of Science (M.S.) in Computer Science**

Students accepted into this selective program accomplish both the B.S. and M.S. degrees within five years by taking additional computer science courses within the
Program administration and minimum requirements

In order to be accepted students must:

1. Apply to the Computer Science Graduate Committee during the first semester after they have completed the last of the following sequence of classes: CMSC 101, 255, 256, 302, 303 and 311.
2. Have a minimum GPA of 3.4 based on CMSC 101, 255, 256, 302, 303 and 311. All grades in any repeated courses will be included in computing this GPA.
3. Have a minimum overall GPA of 3.0.

Minimum requirements for accepted students to fulfill the program

Students accepted into the program are required to follow the curriculum outlined below in order to complete both degrees in five years.

In order to complete the B.S.:

1. All specific general education and major requirements for the B.S. degree.
2. Six CMSC 500-level credits beyond those required for the computer science major, which count as general electives toward the B.S. and as CMSC electives toward the M.S.
3. Additional credits to total 120 (including 45 upper-level credits). (The B.S. can be awarded upon completion of all requirements for the undergraduate degree. All requirements for the B.S. must be met before students are eligible to take any 600-level course.)
4. Six additional CMSC 500-level credits that do not count toward the B.S. degree. (126 total credits to be completed in first four years)

In order to complete the M.S.:

As listed above (nos. 2 and 4) and taken during first four years:

- Six CMSC 500-level credits beyond those required for the computer science major, which count as general electives toward the B.S. and as CMSC electives toward the M.S.
- Six additional CMSC 500-level credits that do not count toward the B.S. degree.

Taken during fifth year:

5. 15 CMSC 600-level credits.
6. Three CMSC graduate-level credits. (30 credits required for M.S.)

Department of Electrical and Computer Engineering

The Department of Electrical and Computer Engineering prepares students for highly competitive, national placement in electrical and computer engineering employment and graduate education by providing a thorough grounding in electrical science and design, together with a strong foundation in mathematics, basic sciences and life skills.

The department offers baccalaureate degrees in computer engineering and electrical engineering, in addition to minors in both areas, as well as the option to choose course work appropriate for a pre-medicine or pre-dentistry curriculum. An electrical and computer engineering track is available in the Master of Science in Engineering as well as the Ph.D. in Engineering. The track is designed to prepare students for practice, research and/or teaching of electrical and computer engineering at the advanced level by providing intensive preparation for professional practice in the microelectronics, nanoelectronics, computer engineering and controls and communications aspects of electrical and computer engineering. At the advanced level, this track prepares individuals to perform original, leading edge research in the broad areas of microelectronics, nanoelectronics, controls and communications and computer engineering.

The curricula of the department provide a strong foundation in the fundamentals of the profession, including engineering problem solving, breadth in the major facets of the profession and the opportunity to specialize in today's critical areas of computer engineering, communication systems and microelectronics. Graduates will be well prepared for constant technological change and growth through lifelong learning.

Department of Mechanical Engineering

The Mechanical Engineering Department provides quality graduate and undergraduate education in the diverse area of mechanical engineering, emphasizing:

- Sound technical foundation.
- Creative approach to design and problem solving.
- Ability to communicate effectively.
- The understanding of sound business practice.

A mechanical engineering track is available in the Master of Science in Engineering as well as the Ph.D. in Engineering. The mechanical engineering track is designed primarily for students who have an interest in pursuing research in the variety of areas of mechanical engineering. Those include but are not limited to thermal sciences, materials, design and manufacturing, and computational mechanics. Emphasis is placed on modern research areas such as smart materials, flow controls, microelectro mechanicals systems (MEMS), nanotechnology and biomechanics.

Graduate and Professional Programs Bulletin

School of Medicine
The School of Medicine of the then Medical College of Virginia opened on November 5, 1838, as the medical department of Hampden-Sydney College. Full-time clinical faculty members were first appointed in 1928, and improved facilities became available between 1936 and 1941 with the completion of the 600-bed West Hospital, A. D. Williams Clinic and Hunton Hall dormitory, located on the current site of the Main Hospital building. Growth in faculty students and facilities continued after World War II, leading to the development of today's academic health center.

Hospital facilities on the MCV Campus include both in-patient and out-patient facilities. MCV Hospitals of the VCU Health System is licensed for 902 beds. In addition, the hospital at the McGuire Veterans Affairs Medical Center (600 beds) provides excellent patient care, training and research opportunities for the School of Medicine through its affiliation programs.

In the School of Medicine, advanced degree programs are coordinated through the Office of the Associate Dean for Graduate Education, who acts for the dean on all issues related to administration of advanced degree programs. Each advanced-degree program is represented by a faculty member who serves as director for graduate programs. Directors are appointed either by the chair of the department offering graduate degrees or, in the case of interdisciplinary programs, by the dean in consultation with the chairs of participating departments. The directors of graduate programs act on behalf of the programs and hold the responsibility and authority to represent the respective department(s) and their faculty to the school.

**Mission statement**

The mission of the School of Medicine encompasses education and research in biomedicine including applications providing a constant improvement of the quality of health care for all citizens of Virginia. By using innovative, scholarly activity to create new knowledge, providing better systems of medical and science education and developing more effective health care methods for diverse populations, the School of Medicine seeks to enhance the training of physicians and biomedical scientists. The School of Medicine shares the general objectives of VCU.

1. To maintain an environment of educational excellence that will attract students and faculty interested in an institution maintaining the highest academic standards.
2. To promote an educational atmosphere that will develop in students: (a) desire and interest in lifelong learning, (b) intellectual curiosity, and (c) excellence in skills and knowledge required for the solution of problems of health and disease for diverse populations.
3. To provide standards of clinical practice and scientific investigation that will serve students as examples throughout their professional careers.

The primary aim of the School of Medicine is to provide an academic environment appropriate for the education of its students, including undergraduate medical students, advanced-degree (graduate) students and graduate physician house officers, as well as continuing education directed toward the needs of practicing physicians. In the classroom, laboratory, clinic and hospital, the faculty and students are brought together in teaching-learning experiences that promote scientific scholarship and personal growth in knowledge and professional skills applicable to careers in a diverse workplace environment.

The School of Medicine and its faculty have vested responsibilities for the advancement of knowledge through research and for service to the community through application of skills in biomedical knowledge, health care leadership and patient care. Therefore, the school shares with teaching the interdependent and almost inseparable objectives of research and service.

The School of Medicine is located on the MCV Campus of Virginia Commonwealth University.

For comprehensive information on the School of Medicine departments, programs and faculty, please go to the school Web site at http://www.medschool.vcu.edu.

**Faculty and facilities**
The School of Medicine consists of 700 full-time faculty, including affiliates, assisted by 630 residents and fellows and more than 700 clinical voluntary faculty. Programs of instruction and research are conducted on campus, at the McGuire Veterans Affairs Medical Center and at affiliated hospitals in an effort to expose the students to the variety of clinical disorders encountered in the eastern U.S. The School of Medicine has established a geographically separate campus at the Inova Fairfax Hospital. Each year, 24 third-year students take all their clinical clerkships at Inova Fairfax Hospital. Their fourth year elective program also is based at the Inova Fairfax Hospital.

Health policies
Virginia Commonwealth University School of Medicine requires that all medical students carry active health insurance. Health insurance benefits must be equal to or greater than those provided by the university health carrier. In addition, it is required that all students complete required immunizations within six months of matriculation and have repeat tuberculosis screening performed prior to the third-year clerkships. For details related to these policies, please visit www.medschool.vcu.edu/studentactivities.

Graduate programs
A complete listing of advanced degree programs including links to departments, programs, contact information and application requirements can be found at www.medschool.vcu.edu/prospective.

Graduate programs offering Master of Science and doctoral training in the School of Medicine include:

- Anatomy and Neurobiology.
- Biochemistry.
- Biostatistics.
- Epidemiology (doctoral training only).
- Human genetics.
- Microbiology and immunology.
- Pathology (doctoral training only).
- Pharmacology and toxicology.
- Physiology.

The Department of Human and Molecular Genetics offers a Master of Genetic Counseling degree (M.S.) and the Department of Epidemiology and Community Health offers the Master of Public Health (M.P.H.) degree. Both of these degree programs are accredited by the appropriate national organizations.

The Department of Human and Molecular Genetics offers a combined degree program that pairs the Master of Genetic Counseling and the Ph.D. in Human Genetics. The school partners with the School of Allied Health Professions to offer combined Anatomy and Neurobiology/physical therapy track and Physiology/physical therapy Ph.D. programs.

Recognizing that graduate education should prepare students for a variety of career options, and that developments in the basic sciences have expanded the breadth of scholarship, the school has developed approaches to interdisciplinary education, particularly in the areas of neuroscience, molecular biology and genetics, immunology, and structural biology.

A two-semester post-baccalaureate certificate program offering training for students seeking admission to professional school (i.e., School of Medicine, School of Dentistry) is available as the Pre-medical Basic Health Sciences Certificate. Defined curricula, which also may serve as a foundation in other advanced degree programs, are offered in the following disciplines:

- Anatomy and neurobiology.
- Biochemistry.
- Human genetics.
- Microbiology and immunology.
- Pharmacology and toxicology.
- Physiology.

A School of Public Health is in the process of being developed within the School of Medicine. Programs housed in the Department of Epidemiology and Community Health and the Department of Biostatistics are being associated with the evolution of this unit.

Application and admission to graduate programs
Application forms and instructions for applying to all graduate programs are available on the Graduate School Web site at www.graduate.vcu.edu.

1. The purpose of admission requirements and procedures is to ensure selection of competent students whose motivation, ability, education and character qualify them for graduate study in preparation for a career in science.

2. The following credentials constitute an application and should be sent to Virginia Commonwealth University, Graduate School, Richmond, VA 23284-3051.

   a. Application for admission on a form available to the applicant from either the VCU Graduate School or the VCU Office of International Education. A fee in the form of a check or money order (payable to VCU), must accompany the application. The fee cannot be returned nor credited toward tuition payment.

   b. Official transcripts of all undergraduate and graduate work sent directly from college or university registrars to the Graduate School.

   c. Letters of recommendation from three present or former teachers or others the applicant believes to be qualified to evaluate fitness to engage in graduate study for the degree in the field of choice.

   d. A personal statement from the applicant summarizing motivation, education and aims in pursuing graduate study.

   e. Verbal, quantitative, and analytical portions of the Graduate Record Examination are required. Medical College Admission Test or Dental Aptitude Test may be acceptable in lieu of the GRE for selected programs.

   f. International applicants for whom English is a foreign language must meet departmental admission requirements for performance on the TOEFL (Test of English as a Foreign Language). See section on international students in the Graduate Studies at VCU section of this Web site.

3. Acceptance of an applicant is based upon the recommendation of the director of graduate programs of the relevant program.

While most students matriculate in the fall semester, arrangements may be made to initiate graduate work at other times during the academic year.

Ph.D. programs

General requirements for graduate degrees

1. All full-time graduate students are expected to register for a minimum of five credit hours for the fall and spring semesters and six credit hours for the summer session. This requirement includes research. As an example, when students are registered for 10 credits in formal courses, they are expected to undertake five credits of research under the direction of their adviser or any approved faculty member. Research courses shall be graded as “S” (satisfactory), “U” (unsatisfactory) or “F” (fail). Registration for one credit hour is permitted only with prior permission.

2. Students are required to remain in good academic standing through the course of their degree program. Unsatisfactory student performance includes:

   a. the assignment of a grade of “U,” “D” or “F” in any course.

   b. failure to maintain a cumulative GPA of 2.5 or greater.

   c. failure to pass the written or oral comprehensive examination.

   d. failure to pass the final examination.

A student whose performance is unsatisfactory must obtain the approval of the MCV Campus Graduate Committee to gain permission for continuing in the graduate program. The committee elicits the recommendation of the department/program (as represented by the director of graduate studies of the appropriate program) and, as appropriate, the student’s adviser in making a determination. Unsatisfactory performance also constitutes grounds for the termination of financial assistance to the student.
3. Students may not take the comprehensive examination for the Ph.D. degree if their overall GPA is less than 2.5 or if the GPA for courses within the major department is below 3.0. Students may not take the final oral examination for the M.S. or Ph.D. degree if their overall GPA is below 3.0. The examining body for the administration of the comprehensive examinations and the final examination is the student advisory committee. For the oral comprehensive examination for Ph.D. students and the final examinations for M.S. students, the body is supplemented by the addition of a representative of the MCV Campus Graduate Committee who chairs the examining body. The representative must be a member of the graduate faculty and is appointed by the chair of the MCV Campus Graduate Committee. The representative holds the responsibility for compliance with protocols appropriate to the examination, including the equitable treatment of the candidate.

4. Copies of the thesis/dissertation consistent with university standards shall be provided to the members of the student’s advisory committee three weeks or more before the date of the defense of the thesis/dissertation. Following acceptance of the thesis/dissertation defense schedule by the committee, the student must submit a copy of the thesis/dissertation and a request for scheduling of the final examination to the chair of the MCV Campus Graduate Committee a minimum of ten working days in advance of the examination date. After passing the final examination, it shall be the responsibility of the candidate to present to the dean’s office the approved original thesis/dissertation plus the minimum required number of copies (three for M.S., four for Ph.D.) in final form suitable for binding. In consultation with the office staff, the candidate shall be responsible for the binding and the processing of the thesis through VCU Libraries and for the payment of all charges for these services.

5. A degree is granted only after all requirements have been fulfilled, including payment of all fees to the university, and after submission of the copies of the thesis for binding.

6. VCU currently requires registration for a defined credit hour level during both the didactic and research phases of advanced degree training. For programs requiring the preparation of a thesis or dissertation, there is therefore no obligatory linkage between the accumulation of credit hours and an expectation that a degree be awarded.

As a guide to monitoring the timely completion of the degree within the present enrollment framework, the accumulation of 80 credit hours for a M.S. degree and 180 credit hours for a Ph.D. degree can be taken as a reasonable measure. These credit hour totals refer to degree programs requiring the preparation of a thesis or dissertation. Unless explicitly stated, the figures cited above apply to Master of Science (M.S.) and Doctor of Philosophy (Ph.D.) programs offered by the School of Medicine.

The student adviser and advisory committee

Students receive guidance and counsel from the director of graduate programs for the appropriate program prior to appointment of the permanent adviser. The permanent adviser hold the primary responsibility for monitoring the development of the student in the program and providing the appropriate guidance and counsel essential to the scholarly development of the student.

An advisory committee, appointed shortly after the permanent adviser is appointed, serves as both an examining and consultative body, functioning to assist the development of the student. Committee members hold a special responsibility as a source of counsel for each student.

1. Each student shall have an adviser and an advisory committee.

2. Appointment of the adviser:
   a. The initial adviser will be the director of the graduate program or his/her designee prior to appointment of the permanent adviser.
   b. A permanent adviser shall be appointed from the graduate faculty by the chair of the MCV Campus Graduate Committee upon recommendation of the chair of the student’s major department. Appointment should be made no later than the beginning of the fall semester following matriculation. A change in the permanent adviser may be made by the chair of the MCV Campus Graduate Committee upon recommendation of the chair of the major department.

3. Duties of the adviser:
   a. The adviser shall, with the student’s advisory committee, have responsibility for guiding the student’s academic program.
   b. The adviser shall develop a plan for the student’s didactic program with the student.
   c. The adviser shall, on the basis of the proposed didactic and scholarly program for the student, identify members of the faculty to comprise the student’s advisory committee and elicit their agreement to serve, the adviser serving as the chair of the committee.
   d. The adviser shall supervise the student’s research work and dissertation preparation and be one of the examiners of the dissertation (Ph.D.).
   e. At the close of the spring semester, the adviser shall submit to the program director or the chair of the MCV Campus Graduate Committee a report covering the progress of the student. Copies of the report should be provided to the student and the membership of the student advisory committee by the adviser.

4. The student’s advisory committee:
   a. The student’s advisory committee shall be appointed no later than the end of the fall semester of the second year after matriculation by the chair of the MCV Campus Graduate Committee, upon recommendation of the student’s adviser, review by the graduate program director and recommendation of the chair of the department of the permanent adviser. Appointment of the student advisory committee must be done within three months of the appointment of the permanent adviser and prior to the administration of comprehensive (or final) examinations. The composition of the advisory committee shall be such that significant areas of the student’s scholarly program are represented in the expertise of the faculty members.
      i. The committee for the Ph.D. candidate shall consist of a minimum of five members as follows: the student’s adviser; two other members of the graduate faculty of the department/program in which the student is enrolled; and at least two other members of the graduate faculty from departments other than the one in which the student is enrolled (where feasible, from two different departments).
      ii. A faculty member who is not a member of the graduate faculty may be appointed to a student advisory committee if approved by the MCV Campus Graduate Committee. Appointment is made by the dean of the Graduate School.

   b. Duties of the student’s advisory committee:
      i. The advisory committee functions as an advisory body to ensure that timely progress toward degree completion is being achieved, as an examining body participating as appropriate for the intended degree in written qualifying examinations and conducting the oral qualifying examination and final examination, and as a consultative body to provide scholarly counsel.
      ii. The student’s advisory committee shall work with the student’s adviser in guiding the student’s graduate program and shall meet at least annually. It is strongly recommended that the advisory committee meet with the student prior to administration of the comprehensive examination(s) by the committee.
      iii. The student’s advisory committee shall recommend and approve a degree program (including foreign language if applicable) for the student as soon as it is practical. The proposed program should be filed with the chair of the MCV Campus Graduate Committee no later than the third semester of study.
      iv. The student’s advisory committee shall conduct the oral comprehensive and final examination.

Doctor of Philosophy

1. Advanced graduate study leading to a Doctor of Philosophy degree is offered in the departments of Anatomy and Neurobiology, Biochemistry, Biostatistics, Epidemiology and Community Health, Human and Molecular Genetics, Microbiology and Immunology, Pathology, Pharmacology and Toxicology, and Physiology and Biophysics.
2. A minimum of 30 credit hours exclusive of research credits is generally required. In practice, a minimum of four years of study, including research, is necessary to complete all requirements.

3. For all Ph.D. programs, a period of residence of at least two consecutive semesters is required. In the context of Ph.D. training, “residence” refers to full-time enrollment, equivalent to enrollment of nine or more credit hours in a given academic term. The School of Medicine recommends that doctoral students maintain “residency” status for one academic year (fall and spring semesters), usually during the initial year of study. This recommendation is to ensure that the didactic component of training is not prolonged. Students should register in each academic term as a means of ensuring that timely progress toward degree completion is achieved. The specific requirements for residency will be detailed by the individual programs. A time limit of seven calendar years, beginning at the time of first registration, is placed on work to be credited toward the doctor of philosophy degree.

Admission to candidacy

The development of the individual as an independent research scientist is a critical component of the Ph.D. degree. The potential for such development is assessed on the basis of both mastery of subject matter and research competency as judged in the context of written and oral examinations administered at the level of department or program. Students are admitted to candidacy by the dean on the basis of both mastery of subject matter and research competency as judged in the written and oral comprehensive examinations. The oral comprehensive examination is open to all members of the faculty. The subject matter of the examination is limited to the content of the candidate’s dissertation and related areas. A favorable vote of the advisory committee with no more than one negative vote shall be required to indicate that the candidate has passed the oral comprehensive examination. All advisory committee members must vote. The outcome of the oral comprehensive examination is reported to the Office of Graduate Education. If the examination is not passed, the Student Advisory Committee must recommend a course of action for the student. The committee might, for example, recommend that a re-examination be scheduled, or that a major revision of the dissertation be required prior to rescheduling of the examination, or that the student be terminated from the program or other action as deemed appropriate by the committee. A majority of the committee membership must concur in the recommended course of action. The recommendation must be communicated in writing to the appropriate graduate program director for approval within five working days of the examination. The program, acting through the graduate program director, shall accept the recommendation of the committee or determine an alternative within an additional five working days. The course of action approved by the program will be communicated in writing to the student by the graduate program director. The graduate program director shall inform the Office of Graduate Education of the School of Medicine in writing as to the action taken.

Dissertation research

1. The student must conduct a substantial original investigation under the supervision of the permanent adviser and prepare a dissertation reporting the results of this research and analyzing its significance in relation to existing scientific knowledge.

2. The body of experimental work to be incorporated into the dissertation is subject to the approval of the membership of the student advisory committee. The advisory committee should, therefore, be formally consulted as the research project nears completion to ensure that there is agreement with respect to the material deemed necessary and sufficient for incorporation into the dissertation. Such consultation will normally occur in the form of a meeting of the advisory committee with the student. The faculty adviser has a responsibility to advise the student when the meeting of the advisory committee for this purpose should take place.

3. The dissertation is prepared in an acceptable form and style with the counsel of the faculty adviser. The faculty adviser determines when the dissertation document can serve as the basis for the final oral examination (or dissertation defense). With the approval of the faculty adviser, the final oral examination by the advisory committee is scheduled and the dissertation document is distributed to the advisory committee. Distribution of the dissertation document to the advisory committee will usually occur at least ten working days in advance of the final oral examination. The Office of Graduate Education is informed of the scheduling of the final oral examination ten working days in advance of the examination. The Office of Graduate Education will then post an announcement of the final oral examination to include the name and department of the candidate together with the title of the dissertation and the day, place and time of the final oral examination.

4. The final oral examination is conducted by the student advisory committee at a specified time and place, is chaired by the faculty adviser and is open to all members of the faculty. The subject matter of the examination is limited to the content of the candidate’s dissertation and related areas. A favorable vote of the advisory committee with no more than one negative vote shall be required to indicate that the candidate has passed the final oral examination. All advisory committee members must vote. The outcome of the final oral examination is reported to the Office of Graduate Education. If the examination is not passed, the Student Advisory Committee must recommend a course of action for the student. The committee might, for example, recommend that a re-examination be scheduled, or that a major revision of the dissertation be required prior to rescheduling of the examination, or that the student be terminated from the program or other action as deemed appropriate by the committee. A majority of the committee membership must concur in the recommended course of action. The recommendation must be communicated in writing to the appropriate graduate program director for approval within five working days of the examination. The program, acting through the graduate program director, shall accept the recommendation of the committee or determine an alternative within an additional five working days. The course of action approved by the program will be communicated in writing to the student by the graduate program director. The graduate program director shall inform the Office of Graduate Education of the School of Medicine in writing as to the action taken.

If a re-examination is the recommended course of action, a representative of the MCV Campus Graduate Committee will be appointed to serve as the chair of the examining committee.

5. The student advisory committee approves the dissertation document as acceptable following the final oral examination. Approval of the dissertation as acceptable is indicated by the signature of all members of the advisory committee on the signature page of the dissertation. Approval of the dissertation by the advisory committee must be unanimous.

Termination of enrollment

The university reserves the right to terminate the enrollment of any student for unlawful, disorderly or immoral conduct or for persistent failure to fulfill the purposes for which he or she was matriculated.

A student enrolled in a graduate program under the supervision of the MCV Campus Graduate Committee may be dismissed from the school in which he is enrolled for failure to meet academic requirements prescribed by his school or
failure to exhibit the attitudes and skills deemed necessary to function within his chosen scientific discipline.

Any action by a graduate student in a program under the supervision of the MCV Campus Graduate Committee considered to be unprofessional conduct shall constitute cause for disciplinary action.

Unprofessional conduct includes, but is not limited to:

1. fraud or deceit in gaining admission to the university, i.e., false or obviously misleading representations on the admission application,
2. an act that violates the established legal standards regarding conduct of one person toward society (i.e., stealing, lying, cheating and slander),
3. conviction of a felony involving moral turpitude, and
4. plagiarism or other scientific misconduct.

Master's programs
Advanced graduate study leading to the Master of Science degree is offered in the departments of Anatomy and Neurobiology, Biochemistry, Biotostatics, Human and Molecular Genetics, Microbiology and Immunology, Pharmacology and Toxicology, and Physiology and Biophysics. The Department of Epidemiology and Community Health offers the Master of Public Health degree and the Department of Human and Molecular Genetics offers the Master of Genetic Counseling degree.

General requirements for graduate degrees
1. All full-time graduate students are expected to register for a minimum of five credit hours for the fall and spring semesters and six credit hours for the summer session. This requirement includes research. As an example, when students are registered for 10 credits in formal courses, they are expected to undertake five credits of research under the direction of their adviser or any approved faculty member. Research courses shall be graded as S (satisfactory), U (unsatisfactory) or F (fail). Registration for one credit hour is permitted only with prior permission.

2. Students are required to remain in good academic standing through the course of their degree program. Unsatisfactory student performance includes:
   a. The assignment of a grade of U, D or F in any course.
   b. Failure to maintain a cumulative GPA of 2.5 or greater.
   c. Failure to pass the written or oral comprehensive examination.
   d. Failure to pass the final examination.

A student whose performance is unsatisfactory must obtain the approval of the MCV Campus Graduate Committee to gain permission for continuing in the graduate program. The committee elicits the recommendation of the department/program (as represented by the director of graduate studies of the appropriate program) and, as appropriate, the student’s adviser in making a determination. Unsatisfactory performance also constitutes grounds for the termination of financial assistance to the student.

3. Students may not take the comprehensive examination for the Ph.D. degree if their overall GPA is less than 2.5 or if the GPA for courses within the major department is below 3.0. Students may not take the final oral examination for the M.S. or Ph.D. degree if their overall GPA is below 3.0. The examining body for the administration of the comprehensive examinations and the final examination is the student advisory committee. For the oral comprehensive examination for Ph.D. students and the final examinations for M.S. students, the body is supplemented by the addition of a representative of the MCV Campus Graduate Committee who chairs the examining body. The representative must be a member of the graduate faculty and is appointed by the chair of the MCV Campus Graduate Committee. The representative holds the responsibility for compliance with protocols appropriate to the examination, including the equitable treatment of the candidate.

4. Copies of the thesis/dissertation consistent with university standards shall be provided to the members of the student’s advisory committee three weeks or more before the date of the defense of the thesis/dissertation. Following acceptance of the thesis/dissertation defense schedule by the committee, the student must submit a copy of the thesis/dissertation and a request for scheduling of the final examination to the chair of the MCV Campus Graduate Committee a minimum of ten working days in advance of the examination date. After passing the final examination, it shall be the responsibility of the candidate to present to the dean’s office the approved original thesis/dissertation plus the minimum required number of copies (three for M.S., four for Ph.D.) in final form suitable for binding. In consultation with the office staff, the candidate shall be responsible for the binding and the processing of the thesis through VCU Libraries and for the payment of all charges for these services.

5. A degree is granted only after all requirements have been fulfilled, including payment of all fees to the university, and after submission of the copies of the thesis for binding.

6. VCU currently requires registration for a defined credit hour level during both the didactic and research phases of advanced degree training. For programs requiring the preparation of a thesis or dissertation, there is therefore no obligatory linkage between the accumulation of credit hours and an expectation that a degree be awarded.

As a guide to monitoring the timely completion of the degree within the present enrollment framework, the accumulation of 80 credit hours for a M.S. degree and 180 credit hours for a Ph.D. degree can be taken as a reasonable measure. These credit hour totals refer to degree programs requiring the preparation of a thesis or dissertation. Unless explicitly stated, the figures cited above apply to Master of Science and Doctor of Philosophy programs offered by the School of Medicine.

The student adviser and advisory committee
Students receive guidance and counsel from the director of graduate programs for the appropriate program prior to appointment of the permanent adviser. The permanent adviser holds the primary responsibility for monitoring the development of the student in the program and providing the appropriate guidance and counsel essential to the scholarly development of the student.

An advisory committee, appointed shortly after the permanent adviser is appointed, serves as both an examining and consultative body, functioning to assist the development of the student. Committee members hold a special responsibility as a source of counsel for each student.

1. Each student shall have an adviser and an advisory committee.

2. Appointment of the adviser:
   a. The initial adviser will be the director of the graduate program or his/her designee prior to appointment of the permanent adviser.
   b. A permanent adviser shall be appointed from the graduate faculty by the chair of the MCV Campus Graduate Committee upon recommendation of the chair of the student’s major department. Appointment should be made no later than the beginning of the fall semester following matriculation. A change in the permanent adviser may be made by the chair of the MCV Campus Graduate Committee upon recommendation of the chair of the major department.

3. Duties of the adviser:
   a. The adviser shall, with the student’s advisory committee, have responsibility for guiding the student’s academic program.
   b. The adviser shall develop a plan for the student’s didactic program with the student.
   c. The adviser shall, on the basis of the proposed didactic and scholarly program for the student, identify members of the faculty to comprise the student’s advisory committee and elicit their agreement to serve, the adviser serving as the chair of the committee.
   d. The adviser shall supervise the student’s research work and thesis preparation and be one of the examiners of the thesis (M.S.).
   e. At the close of the spring semester, the adviser shall submit to the program director or the chair of the MCV Campus Graduate Committee a report covering the progress of the student. Copies of the report should be provided to the student and the membership of the student advisory committee by the adviser.

4. The student’s advisory committee:
   a. The student’s advisory committee shall be appointed no later than the end of the fall semester of the second year after matriculation by the chair of the MCV Campus Graduate Committee, upon recommendation
of the student’s adviser, review by the graduate program director and recommendation of the chair of the department of the permanent adviser. Appointment of the student advisory committee must be done within three months of the appointment of the permanent adviser and prior to the administration of comprehensive (or final) examinations. The composition of the advisory committee shall be such that significant areas of the student’s scholarly program are represented in the expertise of the faculty members.

i. The committee for the M.S. candidate shall consist of a minimum of three members as follows: the student’s adviser (who serves as chair of the committee); one other member of the graduate faculty of the department/program in which the student is enrolled; and one other member of the graduate faculty from a department other than the one in which the student is enrolled.

ii. A faculty member who is not a member of the graduate faculty may be appointed to a student advisory committee if approved by the MCV Campus Graduate Committee. Appointment is made by the dean, School of Graduate Studies.

b. Duties of the student’s advisory committee:

i. The advisory committee functions as an advisory body to ensure that timely progress toward degree completion is being achieved, as an examining body participating as appropriate for the intended degree in written qualifying examinations and conducting the oral qualifying examination and final examination, and as a consultative body to provide scholarly counsel.

ii. The student’s advisory committee shall work with the student’s adviser in guiding the student’s graduate program and shall meet at least annually. It is strongly recommended that the advisory committee meet with the student prior to administration of the comprehensive examination(s) by the committee.

iii. The student’s advisory committee shall recommend and approve a degree program (including foreign language if applicable) for the student as soon as it is practical. The proposed program should be filed with the chair of the MCV Campus Graduate Committee no later than the third semester of study.

iv. The student’s advisory committee shall conduct the oral comprehensive and final examination.

Master of Science

1. Advanced graduate study leading to the Master of Science degree is offered in the departments of Anatomy and Neurobiology, Biochemistry, Biostatistics, Human and Molecular Genetics, Microbiology and Immunology, Pharmacology and Toxicology, and Physiology and Biophysics. The Department of Epidemiology and Community Health offers the Master of Public Health degree and the Department of Human and Molecular Genetics also offers a Master of Science degree in genetic counseling.

2. A minimum of 24 semester course hours is required, exclusive of research credits. In practice, it is found that two years of study are usually necessary to complete the requirements. A time limit of five calendar years, beginning at the time of first registration, is placed on work to be credited toward the Master of Science degree. Generally a maximum of one-third of the hours required for a master’s degree may be transferred from another VCU program or outside institution and applied toward the degree upon recommendation of the student’s director of graduate programs with the concurrence of the chair of the MCV Campus Graduate Committee.

3. Each student must conduct an original investigation under the supervision of the permanent adviser, prepare a thesis reporting the results of this research and analyze its significance in relation to existing scientific knowledge. This study is reported in a thesis prepared in acceptable form and style.

4. The body of experimental work to be incorporated into the thesis is subject to the approval of the student advisory committee members. The advisory committee should, therefore, be formally consulted as the research project nears completion to ensure that there is agreement with respect to the material deemed necessary and sufficient for incorporation into the thesis. Such consultation will normally occur in the form of a meeting of the advisory committee with the student. The faculty adviser has a responsibility to advise the student when the meeting of the advisory committee for this purpose should take place.

5. The thesis is prepared in an acceptable form and style with the counsel of the faculty adviser. The faculty adviser determines when the thesis document can serve as the basis for the final oral examination (or thesis defense). With the approval of the faculty adviser, the final oral examination by the advisory committee is scheduled and the thesis document is distributed to the advisory committee. Distribution of the thesis document to the advisory committee should take place at least ten working days in advance of the final oral examination. The Office of Graduate Education is to be informed of the scheduling of the final oral examination ten working days in advance of the scheduled date. The Office of Graduate Education then identifies a representative of the MCV Campus Graduate Committee to chair the examination, and provides an announcement of the final oral examination, which includes the name and department of the candidate together with the title of the thesis and the day, place and time of the final oral examination.

6. The final oral examination is conducted by the student advisory committee at the designated time and place and is open to the faculty. A representative of the MCV Campus Graduate Committee serves as the chair of the examination committee and is a voting member of the examination committee. The subject matter of the examination includes the subject matter of course work as well as the content of the thesis. A favorable vote of the advisory committee with no more than one negative vote is required to indicate that the candidate has passed the final oral examination. All members of the examination committee must vote. The outcome of the final oral examination is reported to the Office of Graduate Education. If the outcome is negative, the final oral examination may be retaken with the approval of the MCV Campus Graduate Committee. Advance approval is requested in writing by the department on behalf of the candidate.

7. The student advisory committee approves the thesis document as acceptable after the final oral examination has been successfully completed. Approval of the thesis as acceptable is indicated by the signature of all members of the advisory committee on the signature page of the thesis. Approval of the thesis by the advisory committee must be unanimous. A thesis is not required for completion of the Master of Genetic Counseling Program. In lieu of the thesis, students in this tract are required to successfully pass comprehensive oral and written examinations.

Master of Public Health

The M.P.H. degree is offered in five tracks (epidemiology, environmental health, addiction studies, generalist and social and behavioral science). A minimum of four semesters of full-time study (45 credit hours) is necessary to complete the degree requirements. All M.P.H. students are required to conduct a scientific investigation on a topic relevant to human and public health. The research project is conducted under the guidance of a faculty adviser and a preceptor with expertise in the topic area. The student must prepare a report of the research and give an oral presentation to the department.

Termination of enrollment

The university reserves the right to terminate the enrollment of any student for unlawful, disorderly or immoral conduct or for persistent failure to fulfill the purposes for which he or she was matriculated.

A student enrolled in a graduate program under the supervision of the MCV Campus Graduate Committee may be dismissed from the school in which he is enrolled for failure to meet academic requirements prescribed by his school or failure to exhibit the attitudes and skills deemed necessary to function within his chosen scientific discipline.

Any action by a graduate student in a program under the supervision of the MCV Campus Graduate Committee considered to be unprofessional conduct shall constitute cause for disciplinary action.

Unprofessional conduct includes, but is not limited to:

1. fraud or deceit in gaining admission to the university, i.e., false or obviously misleading representations on the admission application,
2. an act that violates the established legal standards regarding conduct of one person toward society (i.e., stealing, lying, cheating and slander),
3. conviction of a felony involving moral turpitude, and
4. plagiarism or other scientific misconduct.
Certificate programs

The School of Medicine offers a Post-baccalaureate Graduate Certificate in Premedical Basic Health Sciences. The certificate degree is offered by the departments of Anatomy and Neurobiology, Biochemistry, Human and Molecular Genetics, Microbiology and Immunology, Pharmacology and Toxicology, and Physiology and Biophysics.

MCV Campus Graduate Committee

The assembled directors of graduate programs and the associate dean for graduate education form the MCV Campus Graduate Committee, with the associate dean serving as chair of the committee. This committee holds the responsibility for ensuring appropriate administration of graduate programs, reviewing modifications of didactic courses, new course offerings and new programs, reviewing proposed modifications of program curricula to ensure maintenance of standards of quality, avoid duplication and comply with the missions of the school, and for recommending action to the dean. The committee members provide the pool of candidates from which the school representatives to the University Graduate Council are chosen.

The School of Medicine follows the policies of the Graduate School with regard to the modification of existing courses, curricula and programs as well as the introduction of new offerings. Proposals will normally come from the faculty acting through departmental bodies charged with the responsibility of monitoring academic training. In the case of offerings in interdisciplinary areas, these will normally require the input and approval of departments whose faculty and students are participants. The associate dean for graduate education in the School of Medicine may assist in the coordination of the proposal process. Proposed changes and additions are, under University guidelines, subject to review by the Curriculum Committee of the school. The MCV Campus Graduate Committee serves as the Curriculum Committee for the School of Medicine. On approval by the MCV Campus Graduate Committee, the approval of the dean of the School of Medicine is required prior to submission to University Graduate Council for review.

For comprehensive information on the School of Medicine departments, programs and faculty, please go to the school Web site at http://www.medschool.vcu.edu.

Professional programs

The School of Medicine offers the Undergraduate Medical Education, leading to the first-professional Doctor of Medicine degree; as well as Graduate Medical Education and Continuing Medical Education. Refer to each program’s description for admission and program requirements.

Undergraduate Medical Education (M.D.)

The School of Medicine offers the first-professional Doctor of Medicine (M.D.) that develops students’ clinical skills, professionalism and critical thinking. For more information about admission standards, curriculum requirements and other policies for the M.D. program, refer to the Medicine, Doctor of (M.D.) section of this bulletin.

Graduate Medical Education

Graduate Medical Education at Virginia Commonwealth University Health System provides diverse opportunities with very high academic and clinical standards for medical and dental graduates to pursue specialty training. Currently we offer over 70 medical and dental programs. The programs are accredited by either the Accreditation Council for Graduate Medical Education (ACGME) or the American Dental Association (ADA). Most of the programs use the ERAS application and the NRMP Matching program. We have over 700 residents training with the Health System and bring in approximately 200 new residents per year.

We encourage all qualified applicants to apply to our programs. For a detailed description of the qualifications and requirements please go to our Web page at www.medschool.vcu.edu/gme/residency.html.

Continuing Medical Education

The primary goal of the VCU Office of Medical Education is to provide continuing educational experiences specifically designed to enhance the delivery of high quality patient care by physicians and other health care professionals in Virginia and other states. The philosophy of continuing medical education is based on the belief that learning must be viewed as a lifelong process. In past generations, the graduating physician was able to look upon an acquired knowledge base as a reasonably stable resource for practicing medicine. However, today’s rapidly expanding load of scientific information forces a continuing learning effort upon the physician. Undergraduate and graduate medical education alone can no longer offer reasonable assurance that practitioners are armed with the knowledge, attitudes and skills that will enable them to render optimal, achievable patient care throughout their careers. Continuing education is now linked with undergraduate and graduate education to complete the continuum of medical education.

The goal and philosophy stated herein undergird and lend direction to the effort of the Office of Medical Education as it engages in a diversity of educational and education-related activities. Specifically, the Office of Medical Education works in concert with the faculty of the School of Medicine, as well as other individuals and organizations as appropriate, to:

- coordinate a statewide continuing medical education program for several networks of affiliate hospitals,
- organize the Virginia Hospital Television Network and provide continuing education programs for physicians and other health professionals directly into hospitals statewide, using satellite and audio-conferencing,
- develop and deliver a series of short courses, clinical workshops, seminars, international medical study tours and conferences for physicians and other health professionals,
- provide clinical refresher courses and make readily available self-learning materials and methods, conduct research to improve the process of continuing medical education, and
- improve the education of the general public in the proper use of health care resources.

Fostering an appreciation for the concept of lifelong learning in undergraduate and graduate medical school programs is a challenge that is now being confronted by medical schools throughout the nation. During these critical years, the attitudes of medical students toward continuing pursuits of learning are molded and developed. In order to encourage undergraduate and graduate students at VCU to embrace the concept of lifelong learning, the Office of Medical Education actively seeks their involvement in its various programs and activities. Brochures, posters and a yearly catalog are utilized to announce pending events.

Further information may be obtained by writing the Assistant Dean for Continuing Education, School of Medicine, Virginia Commonwealth University, P.O. Box 980048, Richmond, VA 23298-0048.

Combined degree programs

The School of Medicine offers several combined degree programs:

- M.D./Ph.D. Program
- M.D./M.H.A. Program
- M.D./M.P.H. Program
- Combined M.S./Ph.D. and D.D.S. degree programs

All programs require review and acceptance by the professional degree program (M.D.) as a condition of entry into the combined degree program. Training for the graduate degree takes place following an initial phase of training in the professional program. Following completion of graduate degree requirements, the final phase of training in the professional degree program is concluded. Consult the appropriate listing for details of the admissions and program requirements.

Medicine, Doctor of (M.D.)

The program for the M.D. degree is divided into four phases, each of one year’s duration. Medicine I, occupying the first year (mid-August to early June), emphasizes normal human structure, function, growth and development. Medicine II, occupying the second year (August to June), stresses the abnormal. Medicine III occupies the third year (July to July) and consists of clinical education and training. Medicine IV, lasting from August to mid-May, consists of approximately one-third required clinical education and training and approximately two-thirds electives at the VCU Health System’s MCV Hospitals and at approved medical schools elsewhere in the United States and abroad. Elective opportunities also are offered in M-I and M-II.
School of Medicine students begin their clinical exposure in the first month of medical school in the Foundations of Clinical Medicine course. This longitudinal experience runs throughout the first two years and consists of one afternoon session per week in a private primary care physician’s office, alternating with one afternoon per week in a small group session. This course gives the student the opportunity to learn the clinical relevance of basic science material and to work with a primary care role model. The course provides a fundamental understanding of the skills necessary for all clinical disciplines.

Admissions

Whitehurst-Cook, Dr. Michelle
Associate Dean of Admissions
www.medschool.vcu.edu/admissions

The School of Medicine participates in the American Medical College Application Service. The AMCAS application forms can be obtained from AMCAS, 2450 N. St., N.W., Washington, D.C. 20037-1126. The electronic application is available at www.aamc.org/students/amcas. Updated information is available at the School of Medicine Web site: www.medschool.vcu.edu. Application for the School of Medicine should be made on or after June 1 of the year preceding intended matriculation.

The closing date for filing applications for this institution is Oct. 15 of the year preceding the enrollment date. Priority for admissions is given to Virginia residents, however, 45 percent of each class are from out of state. Members of minority groups under-represented in medicine are encouraged to apply to the School of Medicine. Students previously dismissed from a medical school will not be considered. All applicants must be U.S. citizens, permanent residents of the U.S. or Canadian citizens at the time of application.

A nonrefundable $80 application fee and supplemental information, including faculty recommendations, are required with all applications accepted for further consideration. The final date for returning supplemental information is Jan. 31 of the year of possible enrollment in the School of Medicine. Students are given individual deadlines which are 60 days from the date the Supplemental Application is granted.

The School of Medicine will not admit students from other health sciences schools at VCU or any other school until such students have completed the degree program for which they are enrolled.

The School of Medicine participates in the Early Decision Plan. This program permits an applicant to file a single application through AMCAS prior to Aug. 1. All applicants filing under the Early Decision Plan will receive consideration for admission and a response on or before Oct. 1. All applications for the Early Decision Plan must be supported by the results of the new MCAT test at the time the application is made.

The early notification date of this plan ensures that those who are unsuccessful have ample time to request further distribution of their applications to other medical schools. Further information on the Early Decision Plan is available with the AMCAS application.

Requirements for entrance

The MCAT is required as part of the application. It is necessary that the test be taken no later than August of the year of application. This test is produced by the American College Testing Program, P.O. Box 414, Iowa City, IA 52240, and is administered in colleges and universities throughout the country. Information about the MCAT is available through premedical advisers or directly from the American College Testing Program.

Applicants may be admitted on the basis of 90 semester hours of outstanding achievement; however, the majority of students admitted are completing their baccalaureate programs. The college major for premedical students should be selected in accordance with the individual students aptitude and interest. The prerequisites for the School of Medicine have been reduced to a minimum in order to permit the widest possible latitude in preparation for medical education.

Prerequisites for admission include a minimum of 90 semester hours (or the equivalent) in a U.S. or Canadian college or university accredited by the regional accrediting agency. This program of study must include a minimum of:

1. English – two semesters (one semester to include grammar and composition);
2. College mathematics – two semesters;
3. Biological science – eight semester hours, including laboratory experience. This requirement may be satisfied by general biology, general zoology or botany. No more than half may be botany;
4. General or introductory chemistry – eight semester hours, including laboratory. An appropriate portion of this requirement may be met by courses in analytical chemistry or physical chemistry;
5. Organic chemistry – eight semester hours, including laboratory. This course should be equivalent to and acceptable for continued studies in a chemistry major;
6. General or introductory physics – eight semester hours, including laboratory experience.

Students are encouraged to pursue their own intellectual interests in college in order to obtain a broad education consistent with their major program. Courses in medically related science areas will not relieve the student of his/her responsibility for these subjects in the medical curriculum.

Selection factors

Demonstrated academic ability, as well as attributes of character and personality, are of significance to the admissions committee in the selection process. A review of academic achievement as represented by the standard academic record and summaries, MCAT scores, evaluations and interviews are all sources of information on which the comparative evaluation process is based. A review of the completed application file and interviews with members of the admissions committee are an integral part of the admissions process.

Noncognitive variables also are sought in all candidates. These qualities include, but are not limited to, health care experience, community service and social concern, communication skills both written and oral, leadership, ethical and moral behavior, creativity, compassion and empathy, altruism, personal maturity, self-confidence without arrogance, appropriate motivation, the ability to realistically self-appraise, and a demonstrated ability to work as a team member. These qualities and characteristics are judged by references within the letters of recommendation and from a careful review of the student’s essays and extracurricular activities, as well as the interviewers’ assessment during the interview. The School of Medicine hopes to create a learning environment where students will meet colleagues whose life experiences and views differ significantly from their own. A physician must be at home and at ease in a wide variety of environments and with a wide variety of people. Students frequently comment that the aspect of the school they appreciate most is the diversity of their class. The admissions process seeks to foster that diversity of perspective and background by admitting students from a wide range of backgrounds — socioeconomic, cultural, geographic and educational. Health care experience is also examined as a true evaluation of the motivation of the candidate for a career in medicine.

The interview is an opportunity for the applicant to become acquainted with the institution and it offers additional information for the selection process. Only on-campus interviews in Richmond are available. Each year more applicants are interviewed than can be accepted in the class. Therefore, an interview is not an indication of acceptance to the School of Medicine.

Offers for admission are made in the Early Decision Plan on Oct. 1 and on the uniform acceptance date of Oct. 15, with admissions occurring at several points thereafter until the class selections have been completed. The approximate dates for acceptance decisions are Oct. 15, Dec. 15, Jan. 31 and March 15. At the time the class is filled, an alternate list of applicants is compiled from which replacements are drawn for any vacancies that may occur in the selected class between notification and the third week of class attendance.

Since selections are made in advance of actual attendance, all acceptances are made on condition of satisfactory completion of courses planned or in progress. It is expected that candidates will maintain acceptable standards of deportment. Students offered acceptance into a class are expected to respond within two weeks of the offer. If such a response presents a problem, extension of the time for the response should be requested. After March 15, students are selected from a wait list of very good candidates until the first day of orientation in August.

The enrollment of accepted candidates is considered complete only after payment of the $100 deposit toward the first tuition payment. This deposit will be returned to the candidate should withdrawal occur prior to May 15 of the year of attendance. By the act of matriculation into the School of Medicine, the student accepts the responsibilities related to this opportunity and agrees that during the time that he/she is a registered student he/she will follow the rules and regulations established by the governing bodies of the School of Medicine and the university.
Transfer in advanced standing
Advanced standing admission is open only to students who previously have not been dismissed from any medical school and who are in good standing in LCME-accredited American or Canadian medical schools. Transfers are only at the third-year level and are limited in number each year. Interested students should request information between Jan. 1 and Jan. 15 of the year they wish to transfer. Applicants must pass Step 1 of the U.S. medical licensing examination prior to matriculation. Transfers are handled by the VCU School of Medicine curriculum office.

For additional information please see the Frequently Asked Questions About Transfer location on the VCU School of Medicine Web site at www.medschool.vcu.edu/curriculum/Transv.html.

Disability Support Services
Virginia Commonwealth University is in agreement with Section 504 of the Rehabilitation Act of 1973 and The Americans with Disabilities Act of 1990 and the VCU Disability Support Services (DSS) provides reasonable accommodation to any individual who advises us of a disability. We wish to provide new and current students who have a disability the opportunity to voluntarily identify themselves.

Early identification permits the Coordinator of Services for Students with Disabilities the opportunity to acquire verification of the disability, if required, and the opportunity to get appropriate accommodations in place as soon as possible.

All accommodations request are handled on an individual basis. Examples of some accommodations are: extended test taking time, alternative testing format, note takers, readers, scribes, quiet testing area, sign language interpreters, assistive technology and computer software programs which are located in the library for student use.

If you are an individual with a disability and wish to identify yourself as such, please contact the Office of Disability Support Services. It is important to note that all disclosures are confidential and are released only with your permission. A comprehensive VCU Handbook for Students with Disabilities is available upon request. Be sure to include your name, address and phone number if you write. We also are available to answer questions about accommodations and services.

Director, VCU Office of Disability Support Services P.O. Box 980124 Richmond, VA 23298-0124 (804) 828-9782 VTD (804) 828-4608 FAX (804) 828-4609 www.vcuhealth.org/vp/sassdss

Curriculum

Wood, Dr. Isaac K.
Senior Associate Dean for Medical Education and Student Affairs jmnessme@vcu.edu (804) 828-9790

The program for the M.D. degree is divided into four phases, each of one year's duration. Medicine I, occupying the first year (mid-August to early June), emphasizes normal human structure, function, growth and development. Medicine II, occupying the second year (August to May), stresses pathological conditions. Medicine III occupies the third year (July to July) and consists of clinical education and training. Medicine IV, lasting from August to mid-May, consists of approximately one-fourth required clinical education and training with the remainder open for electives at the Virginia Commonwealth University Medical Center and at approved medical schools elsewhere in the U.S. and abroad. Elective opportunities also are offered in M-I and M-II.

Registration in courses offered by the School of Medicine is restricted to students enrolled in the School of Medicine at Virginia Commonwealth University.

Medicine I and II

The curriculum is viewed as a dynamic and evolving entity and course titles, content or duration of emphasis may be subject to modification for the sake of improving the learning experience.

Each course in M-I and M-II is designed and implemented by a faculty committee and each phase of the curriculum is supervised by a faculty coordinator.

M-I Curriculum

The first year of medical school, from mid-August to early June, focuses on the normal human structure, function, growth and development.

2. Medical Bioethics
3. Population Medicine
4. Medical Biochemistry
5. Human Genetics
6. Gross and Developmental Anatomy
7. Physiology
8. Histology
9. Behavioral Sciences
10. Immunology
11. Neurosciences
Total Courses: 11

M-II Curriculum

The second year, from early August to late May, emphasizes the pathologic manifestations in the treatment of diseases. All students participate in the following courses:

1. Foundations of Clinical Medicine
2. Medical Bioethics
3. Pharmacology
4. Pathogenesis
5. Microbiology
6. Hematology-Oncology
7. Endocrine
8. Renal
9. Respiratory
10. Cardiovascular
11. Behavioral Sciences II
12. Central Nervous System
13. Womens Health
14. Gastrointestinal
15. Musculoskeletal
Total Courses: 15

Medicine III

M-3 Clerkships

During the third year, students receive clinical training by rotating through the various hospitals and ambulatory services. This rich clinical experience is supplemented by didactic presentations on practice-related topics. All students participate in the following clerkships:

1. Internal Medicine (12 weeks)
2. Surgery (8 weeks)
3. Pediatrics (8 weeks)
4. Obstetrics/Gynecology (6 weeks)
5. Psychiatry (6 weeks)
6. Neurology (4 weeks)
7. Family Practice (4 weeks)
8. M-III Workshop (1 week)
Total Required Rotations: 8

Medicine IV

M-IV Curriculum

M-IV is an elective year, with more than 200 electives offered. Each elective is four weeks long.
The School of Medicine, in an effort to best serve the needs and goals of the individual student, offers M-IV students the option of choosing electives during the majority of their senior year. The elective curriculum has been arranged primarily to allow those students who have definite goals to pursue them logically without adherence to a required curriculum. At the same time, it allows those who have not yet defined their goals an adequate assortment of electives with which to explore career options. Where standard elective choices seem too limiting, students are encouraged to approach individual faculty members relative to the development of unique courses that more closely approach individual needs. A member of the M-IV Advisory Committee is available to advise each student and to approve each student program.

The year is divided into nine four-week periods. The required rotations, which must be served at the MCV Campus or an affiliated institution such as Inova-Fairfax Hospital or the McGuire Veterans Administration Medical Center, are an acting internship and an emergent care selective in Anesthesiology, Emergency Medicine or one of the intensive care units. All students are required to take the year-end Update of Basic Sciences and Clinical Medicine course.

A description of the creation of the M IV schedule, including Electives Guidelines and the policy for Visiting Students is presented in the Senior Electives Catalog section of the School of Medicine Web site.

- Senior Electives Catalog – www.medschool.vcu.edu/electives
- Electives Guidelines – www.medschool.vcu.edu/electives/guidelines.htm
- Visiting Students – www.medschool.vcu.edu/electives/visiting_students.htm

U.S. Medical Licensing Examination

All students are required to take U.S. Medical Licensing Examination Step 1 prior to the start of the M-III year. Students are required to pass Step 1 for promotion to the M-IV year. If a student fails Step 1, he or she will be allowed to complete the current M-III clerkship and be required to take time off during the M-III year in an elective status to study for and retake the exam. The time off will be individualized for each student after discussion with the curriculum office and approval by the Promotions Committee.

All students are required to take U.S. Medical Licensing Examination Step 2 CK and CS for the first time after completion of their M-III year or by Dec. 1. Students are required to pass USMLE Step 2 CK and CS for graduation. Students who do not pass USMLE Step 2 CK or CS within one year of completion of all other requirements for the M.D. degree will be dismissed from school.

Grading and promotions

Each student’s progress toward his/her objectives is evaluated by examination in each area of subject matter and by national board examinations at appropriate times. Grades are assigned as honors, high-pass, pass, marginal or fail. Students receiving marginal or fail grades are counseled. All students are assigned a faculty adviser, available to the student throughout the four years of study.

Students who have attained satisfactory grades in M-1 and M-2, but who do not pass U.S. Medical Licensing Examination Step 1, must take time off to study the basic medical sciences during the third school year, prior to their repeating the Step 1 examination. These students will use part of their fourth year to complete the segments omitted during the study time. Students must pass USMLE Step 1 to be promoted to the M-IV year.

At the close of each academic year, the Promotions Committee, composed of department chairs, recommends to the dean which students have achieved the objectives of the year and which students are qualified for either promotion or graduation. The Promotions Committee is charged to give careful individual attention to all aspects of student achievement, effectiveness, behavior and attitude. The Promotions Committee shall not recommend for promotion any student who has failed to meet the requirements of the preceding year or who appears unfit for the practice of medicine. In consideration of one’s fitness for the practice of medicine and in recognition of the critical role of professionalism in being an effective physician, the Promotions Committee shall not recommend for promotion any student who has demonstrated a significant lack of either integrity or professionalism as those concepts are outlined in the School of Medicine Standards of Professional Behavior. When the committee determines by majority vote that a student will not be promoted, it then recommends to the dean remedial activities or dismissal in instances where no remedy is perceived. The dean reviews the recommendations and promptly notifies students that they have been promoted, have to repeat a year, require specific remediation or have been dismissed. A student repeating the year is expected to show significant improvement. The Promotions Committee also will meet each January to review the status of all senior students, all third-year students and M.D./Ph.D. candidates. At this meeting, the committee also will review any other students in serious academic difficulty and may choose to take final action, including dismissal, on such students.

An Appeals Committee of three senior faculty members will hear appeals of dismissals when such are filed in writing within 14 days of the students notice of dismissal. A student also may appeal a decision to repeat a year, but such appeals will be reviewed by the Appeals Committee only when it is found that the student will present information not previously available to the Promotions Committee. A student appealing has the right to appear before the Appeals Committee and to have an adviser participate. The dean of the School of Medicine will act upon the recommendation of the Appeals Committee within 14 days of receipt of the committees recommendation.

Withdrawal

Students may withdraw after meeting with the Senior Associate Dean for Medical Education and submitting a letter requesting withdrawal.

Requirements for graduation

The degree of Doctor of Medicine will be conferred by VCU upon candidates who, in the opinion of the medical faculty, have:

- Attained the schools educational objectives as evidenced by satisfactory completion of prescribed courses and examinations, by proven clinical skills and responsibilities, and by ethical standards.
- Passed Step 1, Step 2CK and Step 2CS of the U.S. Medical Licensing Examination before graduation (April of the M-IV year).
- Attended the School of Medicine for a minimum of two years, one of which must be an academic year of clinical rotations.
- Discharged all financial obligations to the university.

It is the policy of the School of Medicine that candidates must be present at commencement exercises unless excused by the dean.

School of Medicine objectives

Knowledge

The School of Medicine will ensure that before graduation a student will have demonstrated, to the satisfaction of the faculty, the following:

The capacity to recognize the limitations in one’s knowledge and clinical skills and to make a commitment to engage in lifelong learning.

Knowledge of the normal structure and function of each of the major organ systems of the body and the current basic scientific mechanisms operative at the systemic, cellular, and molecular levels.

Knowledge of the various causes (genetic, developmental, metabolic, toxic, microbiologic, immune, psychosocial, neoplastic, traumatic, and degenerative) of illnesses and diseases.

Knowledge of the altered structure and function of the body and its major organ systems that are seen in various illnesses and diseases.

Knowledge of the scientific method in establishing the causation of disease and efficacy of traditional and nontraditional therapies.

Knowledge of health care policy and the economic, psychological, social and cultural factors that affect health and health care delivery.

Knowledge of the most frequent clinical, laboratory, radiographic and pathologic manifestations of common as well as life-threatening diseases.

Knowledge about relieving pain and ameliorating the suffering of patients.

Knowledge of the epidemiology of diseases and the systematic approaches useful in promoting health.

Knowledge of techniques of patient education and counseling in basic lifestyle changes/prevention.

Knowledge of and approaches to reduce the psychological and physical risks and stresses of the practice of medicine.

Skills

The School of Medicine will ensure that before graduation a student will have demonstrated, to the satisfaction of the faculty, the following:
The ability to obtain an accurate medical history and the ability to perform both a complete and an organ-specific examination, including a mental status examination.

The ability to perform routine technical procedures.

The ability to interpret the results and be aware of the indications, complications and limitations of commonly used diagnostic procedures.

The ability to demonstrate knowledge of theories and principles that govern ethical decision making.

The ability to reason deductively and inductively in solving clinical problems.

The ability to construct appropriate differential diagnoses and treatment plans for patients with common conditions, both acute and chronic, including medical, psychiatric and surgical conditions, and those requiring short- and long-term rehabilitation.

The ability to recognize patients with immediate life-threatening conditions regardless of etiology, and to institute appropriate initial therapy.

The ability to recognize and outline an initial course of management for patients with serious conditions requiring critical care.

The ability to communicate effectively, both orally and in writing, with patients, patients’ families, colleagues and others with whom physicians must exchange information in carrying out their responsibilities.

The ability to select appropriate tests for detecting patients at risk for specific diseases and to determine strategies for responding appropriately.

The ability to retrieve, critically review and effectively utilize biomedical information from electronic databases and other resources for solving problems and making decisions that are relevant to the care of individuals and populations.

The ability to evaluate the economic, psychosocial and cultural factors that impact the health of patients and families and to incorporate these into assessment and treatment plans.

The ability to recognize and appropriately address gender and cultural biases in themselves and others and in the process of health care delivery.

**Attitudes**

The School of Medicine will ensure that before graduation a student will have demonstrated, to the satisfaction of the faculty, the following:

A commitment to advocate the interests of one’s patients.

Compassionate treatment of patients, and respect for their privacy and dignity.

Honesty and integrity and dutifulness in all interactions with patients, their families, colleagues and others with whom physicians interact.

An understanding of, and respect for, the roles of other health care professionals, and the need to collaborate with others in caring for patients and promoting health.

A commitment to provide care to patients who are unable to pay and to advocate for access to health care for members of underserved populations.

**School of Medicine Registrar**

The School of Medicine houses a Registrar’s Office to meet the needs of physician trainees and alumni. Visit the School of Medicine Web site for more information at www.medschool.vcu.edu/registrar.

**Criminal background checks**

The Association of American Medical Colleges is in the process of developing guidance for Schools of Medicine on the issue of criminal background checks for matriculated students. As we await publication of this policy guidance the School has adopted standards that meet the requirements of associated hospitals and national standards. Attached is the detailed Interim Criminal Background Check Policy [pdf] for the School of Medicine.

**Health policies**

Virginia Commonwealth University School of Medicine requires that all medical students carry active health insurance. Health insurance benefits must be equal to or greater than those provided by the university health carrier. In addition, it is required that all students complete required immunizations within six months of matriculation and have repeat tuberculosis screening performed annually. For details related to these policies, please visit www.medschool.vcu.edu/studentactivities.

**Student organizations**

The School of Medicine, through the Office of Student Affairs, provides oversight to all of the organizations available to medical students. All student organization are required to register with the Office of Student Affairs following established policy and the approved registration format.

For more information, visit the School of Medicine student organizations Web page at www.medschool.vcu.edu/studentactivities/studentorganizations.htm.

**Combined Doctor of Medicine (M.D.) and Master of Public Health (M.P.H.)**

Note: Students applying to the joint M.D./M.P.H. program should be accepted to the VCU School of Medicine prior to applying to the M.D./M.P.H. program. MCAT or DAT acceptable in lieu of GRE for combined professional/academic degree programs.

The Department of Epidemiology and Community Health in the School of Medicine offers a program for VCU medical students to obtain a Master of Public Health degree in conjunction with their medical training. The M.D./M.P.H. dual-degree program provides an opportunity for medical students who wish to pursue a public health or research career to graduate from medical school trained in both clinical and preventive, population-oriented medicine.

The objective of the dual-degree M.D./M.P.H. program is to provide high quality and in-depth training in public health to qualified medical students. The five-year program includes four years of medical school and one year of study in the M.P.H. program. During the M.P.H. year students take a minimum of 30 credits of didactic courses. To complete the M.P.H. requirements, students receive 12 credits for successful academic work during the first two years of medical school and take a minimum of one public health elective during the fourth year. Students may register for the M.P.H. year either prior to entering medical school or after the M-III year and prior to M-IV electives. Enrollment in the dual-degree program requires admission into both the School of Medicine and the Graduate School. Students must successfully complete all required course work to receive both degrees at the completion of the five years.

**Curriculum**

**Combined Doctor of Medicine (M.D.) and Doctor of Philosophy (Ph.D.)**
The M.D./Ph.D. Program seeks to train physician-scientists for careers that bridge basic and clinical science. Physician-scientists will translate laboratory discoveries into better patient outcomes. The program begins two months prior to the first year of medical school. These students arrive on campus for orientation and complete two laboratory rotations before the start of medical school classes. They complete the first two years of medical school and, after taking the first part of the U.S. National Medical Licensing Examination, enter a Ph.D.-granting department or program as a graduate student. Graduate-level course work, examinations and research will be guided by the thesis adviser and the thesis committee, with oversight by members of the M.D./Ph.D. Steering Committee. The main undertaking at this phase is laboratory research that leads to the Ph.D. dissertation. After completion of doctoral degree requirements, students move to the clinical year of medical school. Students may begin their clinical year of medical school immediately after completion of doctoral (Ph.D.) requirements, regardless of the time in the calendar year, and, 14 to 16 months later, may complete their medical school requirements. These students are exempt from the major part of the fourth year of medical school.

Prospective students submit applications through the American Medical College Application Service. Upon review of the AMCAS documents, qualified applicants are sent supplemental admission materials, including an application for the M.D./Ph.D. Program. Those invited to Richmond for interviews will spend one day in the standard interview for the School of Medicine and will spend a second day interviewing with members of the M.D./Ph.D. Steering Committee, as well as touring labs of faculty scientists.

Admission of medical students to the Ph.D. phase of training takes place formally following completion of the M-II year of M.D. training. A copy of the student file is transferred to the Office of Graduate Education and the individual is formally accepted to Ph.D. training by the VCU Graduate School.

The requirements for a combined professional school/graduate school degree in the School of Medicine are equivalent to those required of students seeking a graduate degree alone and are determined by the individual program. A time limit of seven calendar years for the Ph.D. degree, beginning at the time of first registration in the graduate school, applies to work to be credited toward degrees for students in combined programs.

For additional information, please see the program Web site at www.vcu.edu/mdphd

---

### Combined Doctor of Medicine (M.D.) and Master of Health Administration (M.H.A.)

Students may indicate their interest in the combined program prior to matriculation or during the first three years of the M.D. program.

Advanced study in health administration and medicine is available through a dual degree program co-sponsored by the department of Health Administration and the VCU School of Medicine. The program leads to the awarding of the Doctor of Medicine and Master of Health Administration degrees. The objective of the M.D./M.H.A. program is to provide highly motivated medical students the expertise for management and leadership competency in complex health care organizations. The joint program may be completed in five years. Applicants for this program are required to meet the admission requirements of each program. For information regarding the dual degree program, contact the director of the program.

For the combined degree program, course work for the M.H.A. is initiated following completion of the first two or three years of the M.D. program, occupies a full academic year (fall, spring and summer) and extends into a second year and is taken during a hiatus from the third or fourth year of the M.D. program.

Students interested in the program may contact the School of Medicine Office of Curriculum or the Director of the M.H.A. Program, Department of Health Administration (School of Allied Health Professions).

For additional information refer to the School of Medicine handbook available on the school’s Web site at www.medschool.vcu.edu.

### Curriculum

#### Fall I

- HADM 602 Health Systems Organization, Financing and Performance 3 credits
- HADM 606 Health Care Managerial Accounting 3

#### Fall II

- HADM 612 Health Information Systems and Performance 3
- HADM 646 Organizational Behavior and Design in Health Care Management 3
- HADM 661 Physician Practice Management 3
- HADM 683 Executive Skills II 1

#### Spring I

- HADM 607 Financial Management in Health Organizations 3
- HADM 610 Health Care Management Decision Support Systems 3
- HADM 624/ECON 624 Health Economics 3
- HADM 647 Management of Health Care Organizations 3
- HADM 649 Human Resources Management in Health Care 3
- HADM 684 Leadership and Change Management 1

#### Summer I

- HADM 631 Managed Care 3
- HADM 693 Internship in Health Administration 3

#### Fall II

No MHA course commitments

#### Spring II

- HADM 611 Health Care Law and Bioethics 3
- HADM 614 Health Care Marketing 3
- HADM 648 Strategic Management in Health Care Organizations 3

**Special requirements:**

Applicant’s must have qualified in a related discipline for an honors degree (level 2A or 1) or a bachelor’s degree from a recognized tertiary institution in the U.S. Any applicant who does not meet this criterion should have (in addition to an honors or bachelor’s degree) significant professional work experience and approval of the program committee. Additionally, applicants must have a high level of proficiency in English, demonstrated by completion of a university qualification studied in the English language, or by meeting one of the following English language requirements: an IELTS score of 7.0, a TOEFL score of 600 (paper-based) or 260 (computer-based), or Grade C or above in GCSE English.

Through a collaborative program between VCU, King’s College London and the University of Adelaide in Australia, students complete a 12-month full-time program of study using distance-learning technologies to obtain a Master of Science in Addiction Studies (M.S.) degree. The program is designed to prepare students for local, national and international policy positions; prevention/treatment program management and other leadership positions in the addictions field.

Prospective students apply to the program electronically through the University of Adelaide’s IPAS Web site, www.adelaide.edu.au/addiction. Once accepted, students are enrolled in all three universities and have access to the resources associated with all three schools. No on-campus classroom time is required to complete the degree.

Students are required to complete 36 credit hours over the course of three semesters. Six of these credits are assigned to a final research project examining a relevant addictions-related topic. Completion of the final research project is required for the M.S. degree. VCU, King’s College London and the University of Adelaide confer degrees jointly through a single diploma.
Admission requirements summary

Anatomy and Neurobiology, Certificate in (Post-baccalaureate graduate certificate, Pre-medical Basic Health Science)

<table>
<thead>
<tr>
<th>Degree: Certificate</th>
<th>Semester(s) of entry: Fall</th>
<th>Deadline dates: No deadline.</th>
<th>Test requirements: GRE, MCAT or DAT</th>
</tr>
</thead>
</table>

Special requirements:
MCAT or DAT acceptable in lieu of GRE for combined professional/academic degree programs

The Post-baccalaureate Graduate Certificate in Anatomy and Neurobiology, one of six pre-medical basic health sciences programs of the VCU School of Medicine, offers the opportunity for advanced grade-level training for individuals seeking to enhance their background in anatomy and neurobiology prior to entry into professional school. The curriculum defines an intensive program of study intended for completion in two successive academic semesters. Admission to the program is competitive. As a guide, applicants should anticipate meeting the minimum expectations of performance and achievement described. However, individual departments should be contacted for detailed information on prerequisites, as there may be additional prerequisites beyond those listed. For additional information please visit the Web site www.vcu.edu/anatomy/.

Admission requirements

Applicants should have successfully completed undergraduate training and hold a baccalaureate degree. Training in chemistry through completion of course work in organic chemistry is required. Admissions to the program are generally drawn from applicants with an undergraduate grade point average above 2.80 (on a 4.0 scale or equivalent), a performance on the Graduate Record Examination above a combined score of 1100 (V+Q), and a performance above a score of 3.5 on the analytical section or a quantitative score on the MCAT examination greater than 22. Applicants holding an undergraduate degree from recognized foreign institutions must display an acceptable level of English proficiency by achieving a score of 250 on the computer-based TOEFL examination or 600 on the written version.

Degree requirements

Students must complete a minimum of 27 credit hours of course work with a cumulative grade point average of 3.0 (on a 4.0 scale) or better. The curriculum should be completed in successive full academic terms (typically the fall and spring semester). Completion of the program does not afford a guarantee of admission to professional training programs at VCU. On completion of the program, individuals may elect to seek admission to advanced-degree (M.S., Ph.D.) programs. The curriculum has been developed so as to satisfy didactic requirements of these programs. Individuals interested in exploring the requirements for admission to advanced-degree training should consult with the program directors listed in this bulletin.

This program is designed for students seeking a doctoral degree with emphasis on the study of anatomical sciences — gross anatomy, embryology, histology and neuroanatomy — whose career objectives include teaching the anatomical disciplines in an academic medical center. The curriculum consists of two years of course work (including a required elective in biochemistry, cell and molecular biology) followed by two to four years of research on an original research project under the supervision of a faculty adviser. For additional information please visit www.vcu.edu/anatomy/.

Curriculum

Fall 1

| ANAT 611 Histology | 5 |
| ANAT 690 Anatomy and Neurobiology Seminar | 1 |
| BIOC/MICR 503 Biochemistry, Cell and Molecular Biology | 5 |

Spring 1

| ANAT 610 Neuroanatomy | 5 |
| ANAT 630 Research Presentations | 1 |
| ANAT 690 Anatomy and Neurobiology Seminar | 1 |
| ANAT 697 Directed Research (laboratory presentations) | 3 |
| BIOC/MICR 503 Biochemistry, Cell and Molecular Biology | 5 |
Summer 1
ANAT 697 Directed Research (in research laboratory with thesis adviser) 6

Fall 2
ANAT 690 Anatomy and Neurobiology Seminar 1
ANAT 691 Special Topics in Anatomy: Student Research Presentations 1
ANAT 697 Directed Research 3
MICR 510 Scientific Integrity 1

Spring 2
ANAT 612 Human Embryology 2
ANAT 615 Techniques in Neuroscience and Cell Biology 2
ANAT 620 Scientific Writing and Grantsmanship 2
ANAT 630 Research Presentations 1
ANAT 690 Anatomy and Neurobiology Seminar 1
ANAT 697 Directed Research 3

Students also serve as teaching assistants in histology and gross anatomy courses. Students must achieve a grade of B or better in all courses, or they will be required to repeat that course.

Electives
While no additional electives are required, students are encouraged to enroll in courses which will enhance their graduate training. Students must maintain a 3.0 overall cumulative grade point average to continue in the doctoral program. Suggested electives include:

ANAT/PHIS/NEUS/PHTX 509 Cellular and Molecular Neuroscience 4
ANAT/PHIS/NEUS/PHTX 652 Cell and Molecular Physiology 4
BIOS/STAT 543 Statistical Methods I 3
MICR 505 Immunobiology 3
MICR 607 Techniques in Molecular Biology and Genetics 2
PHIS 501 Mammalian Physiology 5
PHIS 604 Cell Physiology 4
PHIS/PHTX 620 Ion Channels in Membranes 3
PHTX 536 Principles of Pharmacology and Toxicology 5
PHTX 632 Neurochemical Pharmacology 3

Summer following second year
During the summer following the second year the student will take the required written and oral comprehensive exams. Students also register for ANAT 697 Directed Research (6 credits) and work in the research laboratory of their chosen thesis adviser.

Written comprehensive examination
The written exam consists of two parts. Part one is an open-book exam that is designed to: 1) assess the student's ability to integrate course material and 2) demonstrate critical thinking and evaluation of the literature in the basic health sciences related to the student's area of research. For part two, students will prepare an NIH-style grant proposal based on their research plan.

Oral comprehensive examination
After successful completion of both parts of the written comprehensive, the student's graduate advisory committee will administer the oral comprehensive examination, which entails an oral defense of the student's grant proposal as well as the topics covered in part one of the written comprehensive. The oral comprehensive covers: (1) course work (anatomy and other basic health sciences) related to the student's proposed research, (2) the literature cited in or related to the proposal, and (3) the hypotheses, research techniques and procedures presented in the proposal. Successful completion of the oral comprehensive exam advances the student to candidacy for the doctoral degree.

Third academic year and beyond
There is no expectation of the time required to complete the doctoral degree. Beginning with the fall semester of the third year in the graduate program students will devote their full time to conducting research in the laboratory of their advisers. Students also are required to register for 13 credits of ANAT 697 Directed Research, and one credit of ANAT 690 Anatomy and Neurobiology Seminar and one credit of ANAT 630 Research Presentations each semester. During the summer, students register for six credits of ANAT 697.

At the appropriate time in their research, the student will prepare a dissertation and schedule a final oral defense of the thesis. The final oral examination (defense of the dissertation) will be limited to the subject of the candidate's dissertation and related basic science.

</tr>
</tbody>
</table>

The Department of Anatomy and Neurobiology and the Department of Physiology and Biophysics of the School of Medicine, together with the Department of Physical Therapy of the School of Allied Health Professions offers Ph.D. programs in anatomy and neurobiology and physiology with physical therapy tracks. The goals of the doctoral programs are to train students in research and educational skills in preparation for students to function as physical therapy faculty members. Application is made to either the Department of Anatomy and Neurobiology or the Department of Physiology and Biophysics. Acceptance into either of the programs requires approval by the admission committees of the cooperating departments. Graduates receive either the Ph.D. in Anatomy and Neurobiology or the Ph.D. in Physiology.

Students in the physical therapy track of the anatomy and neurobiology doctoral program take required courses within the departments of Anatomy and Neurobiology and Physical Therapy. Students in the physical therapy track of the physiology program take required courses within the departments of Physiology and Biophysics and Physical Therapy. (Other courses may be required by the students dissertation committee.) In both programs, the student plans and conducts a research study generally under the direction of a faculty member of the Department of Physical Therapy; however, the dissertation adviser may be from either of the two primary departments. In addition, the student is required to assist in teaching three courses.

In addition to the requirements listed above, admission to either of the programs requires:
- A minimum of a bachelor’s degree.
- Graduation from an accredited program in physical therapy (or equivalent, if trained outside the United States).
- Demonstrated clinical experience in physical therapy.

Applicants to the physical therapy track of the physiology program also are encouraged to have completed at least one course in organic chemistry. Applicants should refer to the departmental Web site for more information or contact:
A typical course plan follows:

**Curriculum**

The Master of Science in Anatomy and Neurobiology takes approximately two years and requires the same first-year curriculum as that completed by pre-doctoral students with an additional basic health science course offered outside the Department of Anatomy and Neurobiology. Students conduct an original laboratory research project, which is written into a thesis and defended in a final oral exam. A typical course plan follows:

PHIS 501 Mammalian Physiology
PHIS 604 Cell Physiology
PHIS/PHTX 620 Ion Channels in Membranes
PHTX 536 Principles of Pharmacology and Toxicology
PHTX 632 Neurochemical Pharmacology

Students must pass all courses with a grade of B or better or they will be required to repeat the course. The student must maintain a 3.0 overall cumulative grade point average to continue in the master's program.

There is no expectation of the time required to complete the master's degree; usually two years of study are necessary to complete the requirements. At the appropriate time in their research, students will prepare a thesis and schedule a final oral defense of the thesis. The final oral examination (defense of the thesis) will cover the subject of the candidate's dissertation and related basic science course work.

**Neurobiology track**

This program is designed for students seeking a master's degree with emphasis on the study of neuroscience. The majority of students in this program will have first completed the one-year Pre-medical Basic Health Science Certificate curriculum, the courses of which meet the prerequisites for the master’s program. Students then spend an additional one to two years pursuing laboratory research on an original project under the supervision of a faculty adviser, a funded neuroscience investigator. For additional information please visit www.vcu.edu/anatomy.

**Curriculum**

The Master of Science in Anatomy and Neurobiology takes approximately two years and requires the same first three-semester curriculum as that completed by pre-doctoral students. Students conduct an original laboratory research project, which is written into a thesis and defended in a final oral exam.

Special requirements: MCAT or DAT acceptable in lieu of GRE for combined professional/academic degree programs

The Ph.D. Program in Biochemistry prepares students for research-oriented careers as independent scientists in academia, government and biotechnology. The core of this degree program is an original independent research project under the supervision of a faculty adviser. The Department of Biochemistry and Molecular Biology has research efforts of international stature in several areas, including cellular and molecular signaling, tumor biology, structural biology, eukaryotic molecular biology, lipid and membrane biochemistry, and molecular genetics, using state-of-the-art approaches in enzymology, genomics, proteomics and lipidomics. While emphasizing independent research in biochemistry and molecular biology and training in the responsible conduct of research, the program also provides a background of courses designed to match the needs and interests of each student. An example of a schedule of courses is shown below. Ph.D. students are expected to enroll as full-time graduate students. During the first year, students pursue research rotations, take formal course work and become familiar with current research topics through seminars, discussion groups and lectures by distinguished scientists. By the end of the first year, students choose a faculty adviser and begin dissertation research. Following completion of the research project and defense of the doctoral dissertation, graduates are equipped to participate in virtually any area of current biomedical research in the most prestigious laboratories. For more detailed information on the program, please visit www.vcu.edu/biochem/students/phd.shtml.

**Curriculum**

A typical course plan for the full-time student is described below.

**First fall semester**

- BIOC/MIRC 503 Biochemistry, Cell and Molecular Biology 5
- BIOC 505 Experimental Biochemistry (laboratory rotation) 2
- BIOC 690 Biochemistry Seminar 1
- BIOC 691 Special Topics in Biochemistry: Critical Scientific Thinking 1
- MICR 512 Laboratory Safety 1

**First spring semester**

- ANAT 615 Techniques in Neuroscience and Cell Biology 2
- BIOC/MIRC 504 Biochemistry, Cell and Molecular Biology 5
- BIOC 506 Experimental Biochemistry (laboratory rotation) 2
- BIOC 602 Physical Properties of Macromolecules 1
- Students will select modules from 602 and 604 to get four credits (at least one from each) 1
- BIOC 690 Biochemistry Seminar 1
- BIOC 691 Special Topics in Biochemistry: Critical Scientific Thinking 1

**Second fall semester**

- BIOC 604 Enzymology 1
- Students will select modules from 602 and 604 to get four credits (at least one from each) 1
- BIOC 605 Molecular Biology 3
- BIOC 690 Biochemistry Seminar 1
- BIOC 691 Special Topics in Biochemistry: Student Seminar 1
- BIOC 697 Directed Research in Biochemistry variable

Special requirements: MCAT or DAT acceptable in lieu of GRE for combined professional/academic degree programs

The M.S. Program in Biochemistry prepares students for research-oriented careers in academia, government and biotechnology. The core of this degree program is an original independent research project under the supervision of a faculty adviser. The Department of Biochemistry and Molecular Biology has research efforts of international stature in several areas, including cellular and molecular signaling, tumor biology, structural biology, eukaryotic molecular biology, lipid and membrane biochemistry, and molecular genetics, using state-of-the-art approaches in enzymology, genomics, proteomics and lipidomics. While emphasizing independent research in biochemistry and molecular biology and training in the responsible conduct of research, the program also provides a background of courses designed to match the needs and interests of each student. An example of a schedule of courses is shown below. During the first year, students pursue research rotations, take formal course work and become familiar with current research topics through seminars, discussion groups and lectures by distinguished scientists. By the end of the first year, students choose a faculty adviser and begin thesis research. Following completion of the research project and defense of the masters thesis, graduates are equipped to participate in virtually any area of current biomedical research in the most prestigious laboratories. For more detailed information on the program, please visit www.vcu.edu/biochem/students/ms.shtml.

**Curriculum**

A typical course plan for the full-time student is described below.

- BIOC 510 Scientific Integrity 1
- MICR 607 Techniques in Molecular Biology and Genetics 2

**Second spring semester**

- BIOC 690 Biochemistry Seminar 1
- BIOC 691 Special Topics in Biochemistry: Student Seminar 1
- BIOC 697 Directed Research in Biochemistry variable
Biostatistics, Doctor of Philosophy (Ph.D.)

Admission requirements summary

<table>
<thead>
<tr>
<th>Degree: Biostatistics, Doctor of Philosophy (Ph.D.)</th>
<th>Semester(s) of entry: Fall preferred</th>
<th>Deadline dates: Applications received prior to Jan 7 given priority consideration</th>
<th>Test requirements: GRE, MCAT or DAT</th>
</tr>
</thead>
</table>

Special requirements:
- Applicants must complete the verbal, quantitative and analytical writing sections of the Graduate Record Exam. The following mathematics courses or their equivalents are required for admission: MATH 307 Multivariate Calculus, MATH 309 Introduction to Probability Theory, MATH 310 Linear Algebra, STAT 213 Introductory Statistics.
- The Department of Biostatistics at Virginia Commonwealth University offers the M.S. and Ph.D. degrees in Biostatistics. It is part of the School of Medicine on the university’s MCV Campus.
- While committed to excellence in biostatistical research and in its graduate program, the department also collaborates in biomedical research with other departments on the MCV Campus. Its faculty members are nationally recognized for their biostatistical work in the areas of clinical trials, pharmacology and toxicology. The department continues to emphasize scholarship and graduate education, and its graduates are in demand for jobs throughout the country in government, academia and the private sector.

The program is committed to diversifying the racial and ethnic composition of people who become biostatisticians. Individuals from all racial or cultural backgrounds are encouraged to apply.

Complete program requirements and other information are found at www.biostatistics.vcu.edu.

Biostatistics, Master of Science (M.S.)

</tr>
</thead>
</table>

Special requirements:
- Program requirements and other information are found at www.biostatistics.vcu.edu.
- M.S. students register for BIOC 690 and BIOC 691.901 for the duration of their tenure in the program. The core set of courses can be supplemented with elective courses offered by the Department of Biochemistry and Molecular Biology or other departments. Students are encouraged to take additional courses that relate to their personal projects. Electives may include courses in techniques of molecular biology and genetics, bioinformatics, statistics, immunology, microbiology, molecular genetics, mammalian physiology, and advanced organic and physical chemistry, among others.

M.P.H. or equivalent M.S. degree

Epidemiology, Doctor of Philosophy (Ph.D.)

Admission requirements summary

- The program is committed to diversifying the racial and ethnic composition of people who become biostatisticians. Individuals from all racial or cultural backgrounds are encouraged to apply.

Complete program requirements and other information are found at www.biostatistics.vcu.edu.
The Ph.D. program in epidemiology, the only one of its kind in Virginia, prepares students for research-oriented careers in the areas of clinical and population-based research. The program includes a foundation of 41 credits of epidemiology and biostatistics course work whereby students learn methods for studying disease etiology and prevention in populations. Students then implement such methods in an original research project under the supervision of an experienced faculty adviser.

*Offered every other year

The straddling of the student and professional roles is a lifelong process in the changing field of human genetics and genetic counseling. Graduates of this program will be contributing members of the clinical genetics team of counselors, physicians and basic scientists.

**Admission requirements**

Applicants should have successfully completed undergraduate training and hold a baccalaureate degree. Training in chemistry through completion of course work in biochemistry is required. Admissions to the program are generally drawn from applicants with an undergraduate grade-point average minimum of 3.0 (on a 4.0 scale or equivalent), a performance on the Graduate Record Examination above a combined score of 1000 (V+Q) and a performance above a score of 3.5 on the analytical section. Applicants holding an undergraduate degree from foreign institutions must display an acceptable level of English proficiency by achieving a score of 250 on the computer-based TOEFL examination or 600 on the written version.

**Genetic Counseling, Master of Science (M.S.)**

The Master of Science in Genetic Counseling program is accredited by the American Board of Genetic Counseling. The master’s degree requires four semesters of study for students entering with a bachelor’s degree, and it must be completed within five years. The student working toward the Master of Science has an integrated and progressively complex classroom and supervised clinical experience. The program requires an original research project under the supervision of a faculty adviser.
The curriculum defines an intensive program of study intended for enhancing their background in human genetics prior to entry into professional opportunity for advanced graduate-level training for individuals seeking to.

The Post-baccalaureate Graduate Certificate in Human Genetics, one of six pre-professional programs, but not for dual degree academic programs.

The Department of Human and Molecular Genetics offers training that combines preparation for a career as a genetic counselor with research-based doctoral training in a coordinated program that integrates the complementary aspects of these two degree categories.

The Master of Science in Genetic Counseling program is accredited by the American Board of Genetic Counseling. The master’s degree requires four semesters of study for students entering with a bachelor’s degree, and it must be completed within five years. The student working toward the Master of Science has an integrated and progressively complex classroom and supervised clinical experience. The program requires an original research project under the supervision of a faculty adviser. In this dual degree program, clinical exposure/experience will begin in year 3.

The straddling of the student and professional roles is a lifelong process in the changing field of human genetics and genetic counseling. Graduates of this program will be contributing members of the clinical genetics team of counselors, physicians and basic scientists.

For additional information on the program and required prerequisites, please visit www.gen.vcu.edu.

### Admission requirements
Applicants should have successfully completed undergraduate training and hold a baccalaureate degree. Training in chemistry through completion of course work in organic chemistry is required. Admissions to the program are generally drawn from applicants with an undergraduate grade point average above 2.80 (on a 4.0 scale or equivalent), a performance on the Graduate Record Examination above a combined score of 1100 (V+Q), and a performance above a score of 3.5 on the analytical section or a quantitative score on the MCAT examination greater than 22. Applicants holding an undergraduate degree from recognized foreign institutions must display an acceptable level of English proficiency by achieving a score of 250 on the computer-based TOEFL examination or 600 on the written version.

### Degree requirements
Students must complete a minimum of 27 credit hours of course work with a cumulative grade point average of 3.0 (on a 4.0 scale) or better. The curriculum should be completed in successive full academic terms (typically the fall and spring semester). Completion of the program does not afford a guarantee of admission to professional training programs at VCU. On completion of the program, individuals may elect to seek admission to advanced-degree (M.S., Ph.D.) programs. The curriculum has been developed so as to satisfy didactic requirements of these programs. Individuals interested in exploring the requirements for admission to advanced-degree training should consult with the program directors listed in this bulletin.

### Curriculum

#### Fall – required courses
- BIOC/MICR 503 Biochemistry, Cell and Molecular Biology 5
- BIOS/STAT 543 Statistical Methods I 3
- HGEN 501/BIOL 530 Human Genetics 3
- HGEN 690 Genetics Research Seminar 1
- HGEN 691 Special Topics in Genetics – Classic Papers 1

#### Spring – required courses
- BIOC/MICR 504 Biochemistry, Cell and Molecular Biology 5
- HGEN 502 Advanced Human Genetics 3
- HGEN 690 Genetics Research Seminar 1
- HGEN 691 Special Topics in Genetics – Introduction to Clinical Genetics 1

#### Example electives
- HGEN/Biol 516 Population Genetics 3
- HGEN 600 Clinical Genetics 3
- HGEN 617 Genetic Analysis and Complex Traits 3
- HGEN 619 Quantitative Genetics 3
- HGEN 620 Principles of Human Behavioral Genetics 3

### Human Genetics, Certificate in (Post-baccalaureate graduate certificate, Pre-medical Basic Health Science)

The Post-baccalaureate Graduate Certificate in Human Genetics, one of six pre-medical basic health sciences programs of the VCU School of Medicine, offers the opportunity for advanced graduate-level training for individuals seeking to enhance their background in human genetics prior to entry into professional school. The curriculum defines an intensive program of study intended for completion in two successive academic semesters. Admission to the program is competitive. As a guide, applicants should anticipate meeting the minimum expectations of performance and achievement described. However, individual departments should be contacted for detailed information on prerequisites, as there may be additional prerequisites beyond those listed.

### Admission requirements
Applicants should have successfully completed undergraduate training and hold a baccalaureate degree. Training in chemistry through completion of course work in organic chemistry is required. Admissions to the program are generally drawn from applicants with an undergraduate grade point average above 2.80 (on a 4.0 scale or equivalent), a performance on the Graduate Record Examination above a combined score of 1100 (V+Q), and a performance above a score of 3.5 on the analytical section or a quantitative score on the MCAT examination greater than 22. Applicants holding an undergraduate degree from recognized foreign institutions must display an acceptable level of English proficiency by achieving a score of 250 on the computer-based TOEFL examination or 600 on the written version.

### Degree requirements
Students must complete a minimum of 27 credit hours of course work with a cumulative grade point average of 3.0 (on a 4.0 scale) or better. The curriculum should be completed in successive full academic terms (typically the fall and spring semester). Completion of the program does not afford a guarantee of admission to professional training programs at VCU. On completion of the program, individuals may elect to seek admission to advanced-degree (M.S., Ph.D.) programs. The curriculum has been developed so as to satisfy didactic requirements of these programs. Individuals interested in exploring the requirements for admission to advanced-degree training should consult with the program directors listed in this bulletin.

The Department of Human and Molecular Genetics offers a comprehensive program in graduate study leading to a Doctor of Philosophy (Ph.D.) in Human Genetics. The program includes the completion of an original research project under the supervision of a faculty adviser and a background/foundation of courses that prepare students for research-oriented careers in the rapidly expanding field of human genetics. Major areas of study available to Ph.D. students in the program include clinical and molecular cytogenetics, molecular genetics, developmental genetics, cancer genetics, behavior genetics, population and quantitative genetics, genetic epidemiology, clinical genetics, and genetic counseling. Once core course work requirements have been completed, the students course plan is tailored to meet individual needs with regard to the area of research focus. A track in genetic epidemiology is available for those planning a career in this area. For more detailed information on the program please visit www.gen.vcu.edu/phd.

</thead>
<tbody>
<tr>
<td>Certificate</td>
<td></td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

Special requirements:
- MCAT score of 22 or greater, DAT of 18 or greater
- MCAT or DAT acceptable in lieu of GRE for combined professional/academic degree programs

The Post-baccalaureate Graduate Certificate in Microbiology and Immunology, one of six pre-medical basic health sciences programs of the VCU School of Medicine, offers the opportunity for advanced graduate-level training for individuals seeking to enhance their background in microbiology and immunology prior to entry into professional school. The curriculum defines an intensive program of study intended for completion in two successive academic semesters. Admission to the program is competitive. As a guide, applicants should anticipate meeting the minimum expectations of performance and achievement described. However, individual departments should be contacted for detailed information on prerequisites, as there may be additional prerequisites beyond those listed.

**Admission requirements**

Applicants should have successfully completed undergraduate training and hold a baccalaureate degree. Training in chemistry through completion of course work in organic chemistry is required. Admissions to the program are generally drawn from applicants with an undergraduate grade point average above 2.80 (on a 4.0 scale or equivalent), a performance on the Graduate Record Examination above a combined score of 1100 (V+Q), and a performance above a score of 3.5 on the analytical section or a quantitative score on the MCAT examination greater than 22. Applicants holding an undergraduate degree from recognized foreign institutions must display an acceptable level of English proficiency by achieving a score of 250 on the computer-based TOEFL examination or 600 on the written version.

**Degree requirements**

Students must complete a minimum of 27 credit hours of course work with a cumulative grade point average of 3.0 (on a 4.0 scale) or better. The curriculum should be completed in successive full academic terms (typically the fall and spring semester). Completion of the program does not afford a guarantee of admission to professional training programs at VCU. On completion of the program, individuals may elect to seek admission to advanced-degree (M.S., Ph.D.) programs. The curriculum has been developed so as to satisfy didactic requirements of these programs. Individuals interested in exploring the requirements for admission to advanced-degree training should consult with the program directors listed in this bulletin.

**Curriculum**

**Fall – required courses**

- BIOC/MICR 503 Biochemistry, Cell and Molecular Biology 5
- MICR 505 Immunology 3
- MICR 515 Principles of Molecular Microbiology 3

**Example electives**

- HGEN 501/BIOL 530 Human Genetics 3
- MICR 607 Techniques in Molecular Biology and Genetics 2
- PHIS 501 Mammalian Physiology 5
- PHTX/ANAT/PHIS/NEUS 509 Cellular and Molecular Neuroscience 4

**Spring – required courses**

- BIOC/MICR 504 Biochemistry, Cell and Molecular Biology 5
- MICR 616 Mechanisms of Viral and Parasite Pathogenesis 3
- or MICR 618 Molecular Mechanisms of Bacterial Pathogenesis 3

**Example electives**

- PHIS 604 Cell Physiology 4
- PHTX 556 Principles of Pharmacology and Toxicology 5

**Microbiology and Immunology, Doctor of Philosophy (Ph.D.)**

Special requirements:
- Combined GRE Verbal and Quantitative Score of 1200 or greater, MCAT score of 26 or greater

International applicants must score great than 600 (paper), greater than 250 (computer) on TOEFL

MCAT acceptable in lieu of GRE for combined professional/academic degree programs

The Department of Microbiology and Immunology has an outstanding faculty with diverse research interests that include cell and molecular biology, molecular genetics, molecular pathogenesis, bacteriology, immunology, immunotoxicology, virology, parasitology, mycology, and oncology. The goal of the graduate program is to prepare students to become creative problem solvers and leaders in scientific research. The Ph.D. degree is offered, as well as an M.D./Ph.D. degree for medical students interested in academic or research careers.

The research experience is complemented with excellent course offerings, seminar programs, teaching opportunities, presentations at scientific meetings and writing of grant applications and scientific papers. Graduate students acquire a wide range of research experience in the first year through exposure to a variety of research laboratories and investigators. The student chooses a research adviser and then
carries out an original, independent research project under the direction of the adviser. The project falls under the review of an advisory committee, and a written dissertation is defended in a final oral examination. For more detailed information on the program please visit www.vcu.edu/micro.

-orno
The molecular biology and genetics curriculum is an integrated interdisciplinary program of study that builds on the graduate programs of participating departments in the School of Medicine. The core curriculum is specifically designed to provide a strong foundation in biochemistry, cell biology and molecular genetics, culminating in the conduct of an original research project under the supervision of a faculty adviser. Electives drawn from various departments allow individual specialization. The departments through which a Ph.D. with a concentration in molecular biology and genetics can be pursued include Anatomy and Neurobiology, Biochemistry and Molecular Biology, Human and Molecular Genetics, Microbiology and Immunology, and Pharmacology and Toxicology. Participating faculty are associated not only with programs and departments within the School of Medicine, but also VCU Massey Cancer Center, Philips Institute for Oral and Craniofacial Molecular Biology (School of Dentistry), Institute of Structural Biology and Drug Discovery (School of Pharmacy) and the VCU Center for the Study of Biological Complexity (VCU Life Sciences) and VCU’s School of Engineering. The interdisciplinary approach to the solution of biological problems provided by this training is designed to teach students the flexibility and problem-solving skills necessary for success in a variety of scientific research-oriented career opportunities.

All students are required to satisfy the core curriculum requirements, which are supplemented with electives appropriate to the individual research program area and with directed research under the supervision of the thesis adviser. Some departments may require specific electives. The core curriculum consists of the following courses, most of which are taken during the first two years of graduate study.

### Molecular biology and genetics, interdisciplinary master’s curricula with Anatomy and Neurobiology, Biochemistry and Molecular Biology, Human Genetics, Microbiology and Immunology, and Pharmacology and Toxicology M.S. programs

The molecular biology and genetics curriculum is an integrated interdisciplinary program of study that builds on the graduate programs of participating departments in the School of Medicine. The master’s program is designed to be an intensive course of study that will prepare students for research-oriented careers in biotechnology or provide the foundation for further graduate study toward a Ph.D. It is expected that the program should be completed in approximately two to two-and-one-half years. The curriculum includes core, specialization and elective courses. Electives drawn from various departments allow individual specialization. The final three semesters include a research project conducted under the guidance of a selected faculty mentor and culminates in the presentation and defense of a masters thesis.

The departments through which an M.S. with a concentration in molecular biology and genetics can be pursued include Anatomy and Neurobiology, Biochemistry and Molecular Biology, Human Genetics, Microbiology and Immunology, and Pharmacology and Toxicology M.S. programs.
and Molecular Biology, Human and Molecular Genetics, Microbiology and Immunology, and Pharmacology and Toxicology. Participating faculty are associated not only with programs and departments within the School of Medicine, but also VCU Massey Cancer Center, Philips Institute for Oral and Craniofacial Molecular Biology (School of Dentistry), Institute of Structural Biology and Drug Discovery (School of Pharmacy) and the VCU Center for the Study of Biological Complexity (VCU Life Sciences). The interdisciplinary approach to the solution of biological problems provided by this training is designed to teach students the flexibility and problem-solving skills necessary for success in a variety of scientific career opportunities or further graduate study.

Neuroscience, interdisciplinary doctoral curricula with Anatomy and Neurobiology, Biochemistry, Physiology, and Pharmacology and Toxicology Ph.D. programs

The graduate program in neuroscience at VCU is an interdisciplinary curriculum involving the departments of Anatomy and Neurobiology, Biochemistry and Molecular Biology, Pharmacology and Toxicology, and Physiology and Biophysics. To obtain a sound background in neuroscience, students complete required core courses covering neuroanatomy, neurophysiology, biochemistry and molecular biology, and a series of electives. The curriculum also includes laboratory rotations and research seminars. Once a dissertation adviser is selected from an interdepartmental roster, the student completes his or her degree in the adviser’s home department. The goal of the graduate program in neuroscience is to provide students with a core of knowledge of the basic structure and function of the central nervous system, while allowing flexibility in the choice of their advisers, electives and areas of research specialization. Written and oral comprehensive exams and the preparation of a research proposal are required to advance to candidacy. Completion of an original research dissertation is required to successfully complete the Ph.D. degree.

MCAT acceptable in lieu of GRE for combined professional/academic degree programs

---
The Ph.D. program in Pathology seeks to provide conceptual research training in order to prepare our students for the challenges of integrating knowledge of the molecular and cellular bases of pathology with the medical and social significance of these diseases.

Opportunities exist for graduate study in molecular and cellular aspects of carcinogenesis and experimental tumor biology within the genomics, proteomics and molecular diagnostics programs. Additional areas of study include clinical/forensic toxicology, medical informatics and clinical chemistry. In addition to rigorous training directed by internationally known research scientists, the student that earns a Ph.D. in pathology also has access to expertise and knowledge of human disease processes, which can only be gained by interacting with surgical pathologists, clinical pathologists and others engaged in the practice of this specialty.

Further information about specific aspects of our graduate program can be found on the Department of Pathology Web page at www.pathology.vcu.edu.

Pharmacology and Toxicology, Certificate in (Post-baccalaureate graduate certificate, Pre-medical Basic Health Science)
A typical course plan for the full-time doctoral student is described below.

### Fall 1
- BIOC/MICR 503 Biochemistry, Cell and Molecular Biology* 5
- PHIS 501 Mammalian Physiology* or PHTX 691 Special Topics in Pharmacology 5 or 3
- PHTX 597 Introduction to Pharmacological Research 4 or 6
- PHTX 690 Pharmacology Research Seminar** 1

### Spring 1
- BIOC/MICR 504 Biochemistry, Cell and Molecular Biology 5
- PHTX 536 Principles of Pharmacology and Toxicology 5
- PHTX 597 Introduction to Pharmacological Research 4
- PHTX 690 Pharmacology Research Seminar 1

### Summer 1
- PHTX 697 Directed Research in Pharmacology 6

### Fall 2
- PHTX 537 Principles of Pharmacology and Toxicology 5

### General course requirements
Students in the doctoral program in pharmacology and toxicology rarely take courses designed for students in the professional programs offered by the schools of Allied Health Professions, Medicine, Nursing, and Pharmacy, and they are rarely allowed to apply PHTX courses designed for these students toward their degrees. A full-time course load is 15 credits in the fall and spring semesters and six credits in the summer. Students in the program must achieve a 3.0 GPA on all graduate courses and at least a 3.0 GPA in PHTX courses in order to graduate.

The following courses are generally taken before administration of the comprehensive examination:

- BIOC/MICR 503 Biochemistry, Cell and Molecular Biology 5
- BIOC/MICR 504 Biochemistry, Cell and Molecular Biology 5
- PHIS 501 Mammalian Physiology or PHTX 691 Special Topics in Pharmacology 5 or 3
- PHTX 536 Principles of Pharmacology and Toxicology 5
- PHTX 537 Principles of Pharmacology and Toxicology 5
- PHTX 597 Introduction to Pharmacological Research variable
- PHTX 690 Pharmacology Research Seminar 1
- PHTX 697 Directed Research in Pharmacology 4

Two additional advanced graduate courses also must be taken prior to eligibility for the comprehensive examination. One of the courses must be chosen from the following list. The second advanced course must be taken from this list or from the additional advanced courses in the table below, as deemed appropriate by the students advisory committee.

### Advanced PHTX courses

- PHTX/ANAT/PHIS/NEUS 509 Cellular and Molecular Neuroscience 3
- PHTX 614 Foundation of Psychoneuroimmunology 3
- PHTX/PHIS 620 Ion Channels in Membranes 3
- PHTX 625 Cell Signaling and Growth Control 3
- PHTX 632 Neurochemical Pharmacology 3
- PHTX 633 Behavioral Pharmacology 3
- PHTX 637 Cellular Pharmacology 3
- PHTX 638 Cellular Mechanisms of Toxicology 3
- PHTX 644 Forensic Toxicology 3
Advanced courses in other disciplines may include, but are not limited to:

- ANAT 610 Neuroanatomy 4
- BIOC 601 Membranes and Lipids 3
- BIOC 602 Physical Properties of Macromolecules 3
- BIOC 605 Molecular Biology 3
- EGRB 603 Biomedical Signal Processing 3
- EGRB 610 Microprocessor Interfacing for Biomedical Instrumentation 3
- CHEM 504 Advanced Organic Chemistry I 3
- MEDC 541 Survey of Molecular Modeling Methods 3
- MEDC 601 Advanced Medicinal Chemistry I 1
- MEDC 630 Theoretical Methods in Drug Design 2
- MICR 505 Immunobiology 3
- MICR/BNFO 653 Advanced Molecular Genetics: Bioinformatics 3
- PHYS 604 Cell Physiology 4
- PHYS 615 Signal Detection in Sensory Systems 3
- PHYS 617 Cellular Signaling 3

**Pharmacology and Toxicology, Master of Science (M.S.)**

The Department of Pharmacology and Toxicology offers a graduate program leading to the Master of Science degree. This is a research-oriented degree program comprised of graduate course work and supervised research leading to a master’s thesis. The M.S. program will be of interest to individuals planning on technical positions in pharmacology or toxicology research or testing; students interested in the health professions, such as medicine or dentistry, who desire additional research training; and for those interested in a government position, such as those offered with regulatory agencies, who seek training in pharmacology and toxicology.

**Curriculum**

A typical course plan for the full-time master’s student is described below.

### Fall 1

- BIOC/MICR 503 Biochemistry, Cell and Molecular Biology* 5
- PHIS 501 Mammalian Physiology* or PHTX 691 Special Topics in Pharmacology 5 or 3
- PHTX 690 Pharmacology Research Seminar** 1
- PHTX 697 Directed Research in Pharmacology 4 or 6

### Spring 1

- BIOC/MICR 504 Biochemistry, Cell and Molecular Biology 5
- PHTX 536 Principles of Pharmacology and Toxicology 5
- PHTX 690 Pharmacology Research Seminar 1
- PHTX 697 Directed Research in Pharmacology 4

### Summer 1

- PHTX 697 Directed Research in Pharmacology 6

### Fall 2

- PHTX 537 Principles of Pharmacology and Toxicology 5
- PHTX 690 Pharmacology Research Seminar 1
- PHTX 697 Directed Research in Pharmacology 3
- Advanced PHTX elective 3
- Advanced elective 3

### Spring 2

- PHTX 690 Pharmacology Research Seminar 1
- PHTX 697 Directed Research in Pharmacology variable
- Advanced elective (if desired) 3

### Summer 2

- PHTX 697 Directed Research in Pharmacology 6

* These are typical requirements. Less advanced courses may be substituted depending on situation.

** M.S. students are required to give a seminar. A student must take an advanced graduate course in their specialty.

### Advanced courses in other disciplines may include, but are not limited to:

- ANAT 610 Neuroanatomy 4
- BIOC 601 Membranes and Lipids 3
- BIOC 602 Physical Properties of Macromolecules 3
- BIOC 605 Molecular Biology 3
- EGRB 603 Biomedical Signal Processing 3
- EGRB 610 Microprocessor Interfacing for Biomedical Instrumentation 3
- CHEM 504 Advanced Organic Chemistry I 3
- MEDC 541 Survey of Molecular Modeling Methods 3
- MEDC 601 Advanced Medicinal Chemistry I 1
- MEDC 630 Theoretical Methods in Drug Design 2
- MICR 505 Immunobiology 3
- MICR/BNFO 653 Advanced Molecular Genetics: Bioinformatics 3
- PHYS 604 Cell Physiology 4
- PHYS 615 Signal Detection in Sensory Systems 3
- PHYS 617 Cellular Signaling 3

**Physiology, Certificate in (Post-baccalaureate graduate certificate, Pre-medical Basic Health Science)**
Graduate and Professional Programs Bulletin 2008-09

Admission requirements summary

</tbody>
</table>

Special requirements:
MCAT or DAT acceptable in lieu of GRE for combined professional/academic degree programs

The Post-baccalaureate Graduate Certificate in Physiology, one of six pre-medical basic health sciences programs of the VCU School of Medicine, offers the opportunity for advanced graduate-level training for individuals seeking to enhance their background in physiology prior to entry into professional school. The curriculum defines an intensive program of study intended for completion in two successive academic semesters. Admission to the program is competitive. As a guide, applicants should anticipate meeting the minimum expectations of performance and achievement described. However, individual departments should be contacted for detailed information on prerequisites, as there may be additional prerequisites beyond those listed.

Admission requirements

Applicants should have successfully completed undergraduate training and hold a baccalaureate degree. Training in chemistry through completion of course work in organic chemistry is required. Successful completion of college physics and math through calculus are also required. Admissions to the program are generally drawn from applicants with an undergraduate grade point average above 3.0 (on a 4.0 scale or equivalent), a performance on the Graduate Record Examination above a score of 3.5 on the analytical section or a quantitative score on the MCAT examination greater than 1100 (V+Q), and a performance above a score of 3.5 on the section or equivalent), a performance on the Graduate Record Examination above a score of 3.5 on the analytical section or a quantitative score on the MCAT examination greater than 24. Applicants holding an undergraduate degree from recognized foreign institutions must display an acceptable level of English proficiency by achieving a score of 250 on the computer-based TOEFL examination or 600 on the written version.

Degree requirements

Students must complete a minimum of 27 credit hours of course work with a cumulative grade point average of 3.0 (on a 4.0 scale) or better. The curriculum should be completed in successive full academic terms (typically the fall and spring semester). Completion of the program does not afford a guarantee of admission to professional training programs at VCU. On completion of the program, individuals may elect to seek admission to advanced-degree (M.S., Ph.D.) programs. The curriculum has been developed so as to satisfy didactic requirements of these programs. Individuals interested in exploring the requirements for admission to advanced-degree training should consult with the program directors listed in this bulletin.

Graduation from an accredited program in physical therapy (or equivalent, if demonstrated clinical experience in physical therapy.

No minimum of a bachelor’s degree.

Demonstrated clinical experience in physical therapy.

A minimum of a bachelor’s degree.

Graduation from an accredited program in physical therapy (or equivalent, if trained outside the United States).

Demonstrated clinical experience in physical therapy.

The student would be expected to stand for his qualifying exam at the completion of the second year.

The Department of Anatomy and Neurobiology and the Department of Physiology and Biophysics of the School of Medicine, together with the Department of Physical Therapy of the School of Allied Health Professions offers Ph.D. programs in anatomy and neurobiology and physiology with physical therapy tracks. The goals of the doctoral programs are to train students in research and educational skills in preparation for students to function as physical therapy faculty members. Application is made to either the Department of Anatomy and Neurobiology or the Department of Physiology and Biophysics. Acceptance into either of the programs requires approval by the admission committees of the cooperating departments. **Graduates receive either the Ph.D. in Anatomy and Neurobiology or the Ph.D. in Physiology.**

Students in the physical therapy track of the anatomy and neurobiology doctoral program take required courses within the departments of Anatomy and Neurobiology and Physical Therapy. Students in the physical therapy track of the physiology program take required courses within the departments of Physiology and Biophysics and Physical Therapy. (Other courses may be required by the students dissertation committee.) In both programs, the student plans and conducts a research study generally under the direction of a faculty member of the Department of Physical Therapy; however, the dissertation adviser may be from either of the two primary departments. In addition, the student is required to assist in teaching three courses.

In addition to the requirements listed above, admission to either of the programs requires:

- A minimum of a bachelor’s degree.
- Graduation from an accredited program in physical therapy (or equivalent, if trained outside the United States).
- Demonstrated clinical experience in physical therapy.

The Student would be expected to stand for his qualifying exam at the completion of the second year.

For additional information see the departmental Web site at www.vcu.edu/physio.

### Physiology, Master of Science (M.S.)

**Admission requirements summary**

<table>
<thead>
<tr>
<th>Degree: Physiology, Master of Science (M.S.)</th>
<th>Deadline dates: None. Generally applications accepted through June for admission the following fall.</th>

<tr>
<td>M.S.</td>
<td>Fall preferred</td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

The department offers courses of study leading to two graduate degrees in physiology, the Master of Science (M.S.) and the Doctor of Philosophy (Ph.D.). A combined M.D./Ph.D. degree program also is available through this department and the School of Medicine. It is generally recommended that students intending to pursue careers as professional physiologists should attempt to earn the Ph.D. Work done in partial or complete fulfillment of the requirements for the master’s degree may be applied toward the Ph.D. provided that it is of adequate quality.

Graduate education in physiology is a highly individualized enterprise, of which the formal course requirements comprise only a portion. The degree program described here provides an opportunity for apprenticeship in research and, through this, the development of a capacity for scholarship. The essence of this type of education lies in the development of a close relationship between the student and the faculty adviser. The adviser and the student, jointly and with the approval of the department chair and the associate dean of medicine for graduate education, select the student’s graduate advisory committee.

The Master of Science includes a year of course work and a second year largely devoted to completion of an independent research project, writing a thesis based on this work and a successful oral defense of this thesis and completed course work.

**Spring 1**
There are five tracks within the M.P.H. program: addiction studies, environmental health, epidemiology, generalist and social and behavioral science.

**Addiction studies track**

This track is designed for persons interested in learning more about the impact of addiction on the health of populations. Study in this track focuses on addiction issues and how data are used to develop policy and prevention planning.

The M.P.H. specializing in addiction studies requires a minimum of 45 credits.

Under the guidance of a faculty adviser and/or preceptor, each student must conduct an epidemiologic scientific investigation on a topic relevant to public health. The student must prepare a report of the results of this research. Upon approval of the research document by the adviser and preceptor, the student will give a final oral presentation to the department. The student’s adviser will submit a final grade to the department.

The Master of Public Health program is a four-semester course of study that leads to a Master of Public Health (M.P.H.) degree. The first M.P.H. program in Virginia, it is fully accredited by the Council for Education in Public Health.

The program is closely linked with local, state and national public health agencies, organizations and professionals in order to enhance the student's appreciation and understanding of the application of public health principles to practice. Under the guidance of a faculty adviser, each student must conduct a scientific investigation on a topic relevant to public health and prepare and report the results of this research. The program provides students with the skills for employment in a broad range of positions in local, state and national public health agencies.

**Generalist track**

This track gives students a broad overview of public health issues and training in epidemiologic and biostatistical methods commonly used by public health professionals. Students in this track also can design a curriculum in a focused area of interest for which there is no track currently available.

The M.P.H. generalist track requires a minimum of 45 credits.

Under the guidance of a faculty adviser and/or preceptor, each student must conduct an epidemiologic scientific investigation on a topic relevant to public health. The student must prepare a report of the results of this research. Upon approval of the research document by the adviser and preceptor, the student will give a final oral presentation to the department. The student’s adviser will submit a final grade to the department.

**Social and behavioral science track**

The M.P.H. track specializing in social and behavioral science is designed for persons who wish to learn about social and behavioral factors that affect public health and disease outcomes. Students will also discover how new knowledge about these factors is gained and addressed. The track emphasizes the collection and use of data to inform public health policy, program planning and clinical practice, with additional emphasis on health communication.

The program requires 45 semester credits, including a scientific investigation of a topic relevant to social and/or behavioral factors that impact health. As part of the program, students complete an internship to learn more about public health or clinical applications of social and behavioral science.

**Combined Doctor of Medicine (M.D.) and Master of Public Health (M.P.H.)**

Note: Students applying to the joint M.D./M.P.H. program should be accepted to the VCU School of Medicine prior to applying to the M.D./M.P.H. program. MCAT or DAT acceptable in lieu of GRE for combined professional/academic degree programs.

The Department of Epidemiology and Community Health in the School of Medicine offers a program for VCU medical students to obtain a Master of Public Health degree in conjunction with their medical training. The M.D./M.P.H. dual-
degree program provides an opportunity for medical students who wish to pursue a public health or research career to graduate from medical school trained in both clinical and preventive, population-oriented medicine.

The objective of the dual-degree M.D./M.P.H. program is to provide high quality and in-depth training in public health to qualified medical students. The five-year program includes four years of medical school and one year of study in the M.P.H. program. During the M.P.H. year students take a minimum of 30 credits of didactic courses. To complete the M.P.H. requirements, students receive 12 credits for successful academic work during the first two years of medical school and take a minimum of one public health elective during the fourth year. Students may register for the M.P.H. year either prior to entering medical school or after the M-III year and prior to M-IV electives. Enrollment in the dual-degree program requires admission into both the School of Medicine and the Graduate School. Students must successfully complete all required course work to receive both degrees at the completion of the five years.

### Combined Master of Science in Nursing (M.S.) and Master of Public Health (M.P.H.)

See the individual program pages for admission requirements specific to the separate degrees.

The Department of Epidemiology and Community Health and the School of Nursing jointly offer the dual degree program in public health and nursing that leads to two degrees, a Master of Public Health and a Master of Science in Nursing with a focus in community health. This dual degree program is tailored to meet the needs of students who want to have a public health degree in conjunction with a clinical degree.

### Combined Doctor of Pharmacy (Pharm.D.) and Master of Public Health (M.P.H.)

The School of Pharmacy and the Department of Epidemiology and Community Health in the School of Medicine offer a dual degree program that results in a Pharm.D. and M.P.H. This dual degree program offers students the opportunity to achieve a doctorate in pharmacy while also learning about research and the importance of population health. This five-year program requires students to spend their fourth year pursuing the M.P.H. degree and transition back to pharmacy for advanced practice experiences. The students will be required to take 36 of the 45 credits required for the M.P.H. The field study requirement will be satisfied by Pharm.D. special advanced practice experiences in community health during the fifth year of the program.

Combined Master of Social Work (M.S.W.) and Master of Public Health (M.P.H.)

See the individual program pages for admission requirements specific to the separate degrees.

Through a collaborative program between the VCU School of Social Work and the Department of Epidemiology and Community Health in the School of Medicine, students complete a three-year full-time program of study, including summer course work, to obtain the Master of Social Work and Master of Public Health degrees. The purpose of this dual-degree program is to prepare graduates to work with individuals, families, groups, communities and/or organizations; advocate for social, health care and economic justice in a diverse and multicultural society; and promote physical and mental health across the life course.

Prospective students are required to apply separately to both programs through the Graduate School and must meet both sets of admission requirements. Once admitted to both programs, the student is assigned an adviser from each to develop a plan of study, typically starting with the M.S.W. course work. It is preferable that students apply to both programs at the same time so that the structured dual-degree curriculum can be optimally planned. Students in one program may also apply to the second program during the first year of study. After admission to both programs, students are assigned an adviser from each to develop a plan of study.

Students are required to complete a minimum of 45 M.S.W. credits and a minimum of 33 M.P.H. credits, for a total of 78 semester credit hours. During the third and last year of study, the dual-degree students are placed in internships through the School of Social Work that focus on public health; the program is approved by both the M.P.H. program director and the director of social work field instruction. A final research project that examines a relevant public health topic is required for the M.P.H.

Curriculum

**Year 1, fall**
- SLWK 601 Human Behavior in the Social Environment I
- SLWK 602 Policy, Community and Organizational Practice I
- SLWK 603 Social Work and Social Justice
- SLWK 604 Social Work Practice with Individuals, Families and Groups I
- SLWK 693 Foundation Field Instruction I

**Year 1, spring**
- SLWK 605 Social Work Practice with Individuals, Families and Groups II
- SLWK 606 Policy, Community and Organizational Practice II
Rehabilitation and Movement Science, Doctor of Philosophy (Ph.D.)

Admission requirements summary

<table>
<thead>
<tr>
<th>Degree: Rehabilitation and Movement Science, Doctor of Philosophy (Ph.D.)</th>
<th>Semester(s) of entry: Ph.D.</th>
<th>Deadline dates: Applications received prior to Jan 9 will be given priority consideration</th>
<th>Test requirements: GRE</th>
<th>Test scores: required, a minimum of 600 is expected (250 on the computer-based test)</th>
</tr>
</thead>
</table>

The Ph.D. in Rehabilitation and Movement Science is an interdisciplinary degree program developed through a collaborative partnership of the departments of Health and Human Performance, Physical Therapy, and Physical Medicine and Rehabilitation. The mission of this collaborative degree program is to prepare applied scientists capable of approaching multifaceted health care, preventive medicine and rehabilitation initiatives from an integrative rather than competitive perspective, and to prepare graduates to assume leadership positions in higher education teaching, research and management within rehabilitation and movement science.

There are two program tracks: exercise physiology and neuromusculoskeletal dynamics. The exercise physiology track prepares individuals for teaching, research and clinical initiatives associated with the identification and rehabilitation of movement disorders.

Admission requirements

Admission decisions are made by an admissions committee comprised of faculty members from each of the major collaborating departments: Exercise Science, Physical Therapy and Physical Medicine and Rehabilitation. Applicants must have completed at least one of the following: a master’s degree in a related area, 30 hours of postbaccalaureate work (e.g. course work at 500 level or greater), or a first professional degree program. Admission decisions are made only on the basis of a completed application packet.

Applicants for admission to the program must complete an application packet that includes the VCU Application for Graduate Study as well as supplementary program materials. Admission packets are available from:

Graduate School
Virginia Commonwealth University
Moseley House
P.O. Box 843051
Richmond, VA 23284-3051
(804) 828-6916
www.grad.vcu.edu

or

Office of Doctoral Studies
Virginia Commonwealth University
P.O. Box 842020
Richmond, VA 23284-2020
(804) 827-2657
www.soec.vcu.edu

The entrance requirements fall into the following three categories. All criteria must be completed for consideration for admission.

Academic criteria

- A completed VCU Graduate School Application.
- Two official and up-to-date copies of all transcripts of the applicant’s undergraduate and graduate record indicating that the applicant has completed the minimum required prerequisite course work.
- Official and current scores (within the past five years) for the general test of the GRE. Older scores may be submitted and consideration will be based upon the time elapsed since last formal schooling, occupation success and research ability.
- Priority for admission will be given to the applicants who have attained at least 3.5 in all graduate work attempted and a combined verbal and quantitative score on the GRE of a minimum of 1,000. If the TOEFL is required, a minimum of 600 is expected (250 on the computer-based test).

External criteria

- A professional resume indicating an applicant’s educational and career experience as well as evidence of research potential.
- Completed reference forms from three individuals capable of evaluating the applicant’s academic and research potential.

Written expression

- A personal statement in which the applicant discusses his or her personal career goals and the manner in which this doctoral program would enhance those goals.
- A summary of motivation, education and aims in pursuing an interdisciplinary degree in rehabilitation and movement science.

Applicants being considered for admission must complete an interview with a Ph.D. admissions committee representative and/or research faculty member with whom the student would like to work.

The applicant is encouraged to check the status of his or her application packet to ensure that all components of the packet have been received. Inquiries should be made to the Office of Doctoral Studies. The Admissions Committee will not review incomplete packets.
Transfer credit

Students in the program may transfer up to nine credit hours into the program, including courses taken at VCU prior to being admitted to the program. Note that credits earned for one degree cannot be applied to another degree.

Curriculum

The Ph.D. in Rehabilitation and Movement Science will require a minimum of 38 credit hours of course work and 12 credit hours of dissertation research. Students will be required to complete:

- 12 credit hours of research core courses comprised of a research design class, two classes in statistical application and an elective in the area of research design or statistics.
- 18 credit hours in a concentration comprised of a focus on course work in a specific discipline formulated with the major adviser and approved by the Admissions Committee of the degree program.
- Three credit hours comprised of laboratory rotations in a minimum of two laboratories within the Rehabilitation and Movement Science program; each credit hour requires a minimum of 50 contact hours in the laboratory selected.
- Five credit hours minimum of professional development comprised of an interdisciplinary research/journal club seminar (0.5 credit hour per semester), a teaching practicum (one credit hour) and a presentation delivered at a regional, national or international conference of a related discipline (one credit hour).
- 12 credit hours of dissertation research comprised of a focused line of research over a three-to-four-year period of doctoral work.

Advisory committee

Adviser

Incoming students will identify a faculty member in the program with whom they would like to pursue their academic program and research endeavors. Every effort will be made to accommodate the student’s first choice of a faculty adviser. If the student is unsure of a research interest and adviser selection, the Admissions Committee will assign an adviser. Within the first two semesters of attendance, a permanent adviser should be identified. The adviser, together with the student, will develop a plan of study for the student’s didactic and scholarly program and will be responsible for guiding the student’s academic progress such that the adviser will supervise the student’s research work and dissertation preparation.

Advisory committee

The student, in consultation with the adviser, will identify faculty members to serve on the advisory committee. The committee shall be appointed no later than the end of the spring semester following matriculation into the program. The student’s advisory committee shall be comprised of five faculty members to include the adviser, two members from the rehabilitation and movement science faculty and two faculty members from other related departments. The student’s adviser, who is active in the field of research the student has selected, will chair the committee.

Comprehensive examination

Once core courses are successfully completed, students must pass written and oral comprehensive examinations before transitioning to candidacy. These examinations will test students on their basic knowledge of rehabilitation and movement science principles (primarily in their chosen track) and research methods as obtained through core, research and elective courses of the curriculum.
The student must demonstrate a firm grasp of the material and the potential to become an independent researcher.

The written exam will be given to students during their second spring semester in the program. The written exam will consist of an area paper pertinent to the student’s area of interest. The student’s adviser and advisory committee must approve the topic and an outline of the area paper. The student’s adviser is responsible for grading the area paper. If a student receives a less than satisfactory grade on the area paper, he/she will be afforded the opportunity to make appropriate revisions. Students will only be allowed to revise the area paper once. The area paper should be a minimum of 15 double-spaced pages in 12-point font. The area paper must be in a form suitable for submission for publication to a journal whose content addresses topics consistent with the area paper. The student’s adviser and advisory committee must approve the journal selection and manuscript prior to submission. A passing grade on the written exam is not contingent upon the manuscript being accepted for publication.

Following acceptance of the area paper, the student will write a research proposal. The structure of the proposal will follow federal grant submission guidelines such as those specified by the National Institutes of Health or the Centers for Disease Control. The analytical research proposal must be submitted to and approved by the student’s advisory committee prior to the oral examination.

The oral exam should be conducted within three to six months of successful completion of the written exam with the goal of proceeding to candidacy by the end of the fall semester of the student’s third year. The oral exam will be based on, but not primarily limited to, the student’s proposed analytical research project. The student must receive a satisfactory grade from each committee member to pass the oral exam. The student may proceed to candidacy and begin the research outline in the proposal once successful completion of the oral examination is achieved.

Exit requirements

Dissertation defense

Upon completion of all required course work and the research project, the student must prepare a dissertation to describe the research. A dissertation manual is available for download from the VCU Web site. Students are highly encouraged to become familiar with this manual and use it as a guide for preparation of their dissertation. All committee members must approve the written dissertation and the student must orally defend this dissertation in a publicly advertised seminar prior to graduation.

Students are expected to meet all university graduate school requirements regarding minimal GPA and limitation on credits achieved with a grade of “C” or below.

Time to degree

The doctoral degree must be obtained within seven years of matriculation. It is expected that full-time students will satisfy all requirements within four to five years. Part-time students may take the full seven years to complete all courses and the research project.
The School of Nursing originated in 1893 as part of the University College of Medicine. Since then, the educational program has evolved from a basic diploma program to multiple programs at the baccalaureate-, master’s- and doctoral-degree levels. Additionally, the School of Nursing offers post-master’s certificate programs. The School of Nursing takes pride in its long history of service to the profession of nursing and continues to be a leader in nursing education in Virginia.

Professor and Associate Dean for Academic Programs

Anthony J. DeLellis
Assistant Dean for Administration

Accreditation
The baccalaureate and master’s degree programs in nursing are accredited by the National League for Nursing Accrediting Commission, 61 Broadway, 33rd Floor, New York, NY 10006, (800) 669-1656, ext. 153. The undergraduate program is approved by the Virginia Board of Nursing, and graduates are eligible to take the NCLEX RN registered nurse licensing examination.

Programs
The School of Nursing offers Bachelor of Science, Certificate, Master of Science, Post-Master’s Certificate and Doctor of Philosophy programs. Curricula and admissions information pertaining to all of these programs is available on this Web site and may be accessed using the Program search feature at the top of this page. Further information may be obtained by visiting the School of Nursing Web site at www.nursing.vcu.edu or by writing to Virginia Commonwealth University, School of Nursing, Office of Enrollment and Student Services, P.O. Box 980567, Richmond, VA 23298-0567.

Facilities and resources
The faculty and administrative offices of the school are housed at 1100 E. Leigh St. Additionally, this building has a nursing clinical resource laboratory, computer laboratory and classrooms equipped with a full range of audiovisual equipment. Both graduate and undergraduate courses are also scheduled in other classrooms on campus.

The clinical laboratories for nursing courses are conducted at the VCU Medical Center and in numerous other urban and rural hospitals and health agencies in the area, including community medical centers and state hospitals, public health services, private clinics and offices, and federal and state centers and departments. These facilities provide generalized and specialized inpatient and ambulatory services. Students are given a range of diverse experiences in hospital and community-oriented nursing. Selection of specific facilities for student experience is based upon curricular and advanced-practice certification requirements, the educational needs of the individual student and the services available.

School honors, scholarships and awards
Applications for financial assistance must be filed for all forms of financial assistance, including traineeships. A Free Application for Federal Student Aid may be obtained from the Office of Financial Aid, Virginia Commonwealth University, Richmond, VA 23298-0244.

Limited financial assistance is available through traineeships and scholarships administered by the School of Nursing. An application for financial assistance from School of Nursing sources will be made available to applicants and enrolled students. The school form must be completed in addition to the FAFSA submitted to the Office of Financial Aid.

For detailed information on Sigma Theta Tau, the nursing honor society, as well as scholarships and awards available to all nursing students, visit the School of Nursing Web site at www.nursing.vcu.edu/scholarships.shtml.

Departments

Department of Adult Health and Nursing Systems
D. Patricia Gray
Associate Professor and Department Chair

Department of Family and Community Health Nursing
Rita H. Pickler
Associate Professor and Department Chair

Nursing courses
Descriptions for all courses offered by the university may be accessed through the online courses database at www.pubapps.vcu.edu/vucocourses. You may search by unit, subject or keyword, as well as by degree level. Follow this link to nursing (NURS) courses.

Graduate information

Nondegree-seeking students
Students who have not been admitted to a graduate program in nursing may be permitted, at the discretion of the School of Nursing, to enroll in individual courses. Only six credits earned as a nondegree-seeking student can be applied to the post-master’s certificate.

Enrollment
Students may begin study during summer and fall semesters. Students will have an academic adviser appointed and will follow the standard program of study. Once admitted, students are expected to abide by enrollment policies of the Graduate School.

Transfer credit
Students may take 12 of the required credits for the respective program at another institution and transfer them to VCU. The School of Nursing will determine the acceptability of courses for transfer credit. Transcript evidence and description of courses are required for review of transfer credit.

</tr>
</tbody>
</table>

This program is available in nine concentration areas:
- adult health (acute and primary care)
- child health
- family health
- integrative psychiatric mental health nursing
- nurse practitioner residency in tertiary care
- nursing administration and leadership
- nursing education
• nursing in faith communities
• women’s health

Applicants’ previous master’s course work will be evaluated individually to determine the number of credits required to meet overall program requirements.

Admission requirements
Requirements for admission to the post-master’s certificate program include:
• A master’s degree or doctoral degree in nursing or an international equivalent.
• Current license to practice as a registered nurse in Virginia (professional liability insurance is recommended).
• Three references from the applicant’s graduate program and from employers/supervisors.
• A personal interview may be requested.
• A complete graduate application filed with the Graduate School. Admission forms and instructions for applying to all graduate programs are available on the Graduate School Web site at www.gradient.vcu.edu/admission/prospective/domestic.

Graduation requirements
To be a candidate for the post-master’s certificate, students must be recommended by the faculty and must:
• meet academic requirements of the Graduate School,
• complete all requirements for the prescribed curriculum within five calendar years of the first registration for work to be credited toward the certificate,
• earn at least a “B” or pass grade in all nursing courses,
• earn at least a cumulative grade-point average of 3.0 on a 4.0 scale in all work presented for graduation and
• conform to School of Nursing policies in respect to pass/fail grading for course work.

Academic requirements
• A student may not proceed in the program with a GPA of less than 3.0 on a 4.0 scale or with a grade of less than “B” in any nursing course. Students earning less than “C” are referred to policy 6.4.1 in the School of Nursing Policy and Information Handbook on the Web: http://www.nursing.vcu.edu/faculty/policy.htm.
• An adviser for each student is appointed by the department chair. That adviser will assist the student in program and career planning, registration procedures, and certification for graduation.
• The departments of Adult Health Nursing, Integrative Systems and Maternal Child Health Nursing will assist respective students with advanced practice certification.

Curriculum design
The School of Nursing recognizes that applicants to the post-master’s certificate program bring a background of a master’s or doctoral degree in nursing or are currently enrolled in a doctoral program. The curriculum for each concentration builds upon the knowledge gained in a previous master’s degree including advanced practice, research and theory, and nursing specialty content. The post-master’s certificate program allows students to enroll in an advanced practice specialty to pursue additional competencies or a certificate. The curriculum in the post-master’s certificate program meets the standards of specialty organizations and the requirements for certification as an advanced practice nurse (nurse practitioner, clinical nurse specialist or other advanced practice roles).

When applicants are admitted, an evaluation of the transcript is conducted. Each required course in the relevant concentration is compared to the applicant’s transcript and a judgment is made whether those course objectives have been fully or partially completed in prior master’s or doctoral work. Prior courses that are accepted as evidence of full or partial completion are listed on the program plan. The curriculum plan varies according to clinical focus. This plan will be signed by the student, the student’s adviser and the associate dean for the master’s program before the student actually enrolls in the program. Thus, the program of study is agreed upon in advance.

**Nurse practitioner residency in tertiary care**

A post-master’s nurse practitioner residency program is offered in cooperation with the VCU School of Medicine and the VCU Medical Center. The experience occurs as a component of full-time employment with the VCU Medical Center’s MCV Hospitals or another partnering hospital. The residency consolidates skills for application in a complex, tertiary clinical environment such as the VCU Medical Center. Students obtain assistance in the transition of their research skills to evidence-based practice clinical environments. The anticipated outcome for the student is to move from a beginning clinician to a very competent clinician. The increased competence will occur in aspects of disease management, working with patients of diverse cultures and backgrounds, and working more effectively with a health care team. Further outcomes will be the student’s integration of the knowledge and practice of both nursing and disease management. The student also will acquire skills of assessing clinical outcomes attributable to the student’s performance and some experience teaching less experienced students.

The credit hours allocated for the post-master’s courses leading to a certificate represent that part of the time conceptualized as devoted to new learning at a more advanced level. The remaining time is conceptualized as employment, for which there are assigned, related duties and supervised practice opportunities. Employment at the VCU Medical Center offers the benefit of tuition reimbursement for six credit hours per semester at VCU.

---

**Nursing education**

The Post-master’s Certificate in Nursing Education is designed to meet the needs of current and potential nursing faculty whose graduate preparation is clinically focused. Students will be advised as to which university courses they should take based on their individual backgrounds, goals and employment settings. Components of the didactic content will be presented online in order to meet the needs of potential faculty across the state.

Applicants who have completed a graduate degree and who meet our general requirements for graduate admission are eligible for admission. Further, students concurrently enrolled in the master’s or doctoral program and have completed at least 18 credit hours in graduate nursing courses are eligible for admission.

Special requirements:
See the School of Nursing Web site for areas of study.

The goal of the doctoral program in nursing is the preparation of scholars to develop knowledge in the discipline of nursing. The program examines knowledge development in nursing through an understanding of the impact of a wide range of historical influences on the discipline and through analysis of how emerging societal issues influence knowledge development. Knowledge in the humanities and social sciences and an understanding of knowledge development in other disciplines is viewed as foundational to a full understanding of knowledge development in nursing. Methodologic competency (i.e., knowledge of research designs, methodologies and tools) is also essential to a full understanding of the scope, range and path of knowledge development and the relevance to nursing practice.

Program outcomes
At the completion of the doctoral program, the student will be able to:

1. apply, transmit and generate knowledge in the discipline of nursing,
2. construct, test and modify theories for nursing in the context of social, ethical, scientific, cultural and economic influences,
3. analyze and synthesize knowledge from related disciplines for use in nursing,
4. exhibit scientific integrity in scholarly inquiry, and
5. engage in interdisciplinary collaboration in knowledge development and dissemination.

Admission
All applicants to the Ph.D. Program in Nursing must meet the following admission requirements:

1. Applicants must have both a baccalaureate and a master’s degree, one of which must be in nursing. The degree in nursing must be from an accredited school or international equivalent.
2. Applicants must have a master’s GPA of 3.0 or better on a 4.0 scale.
3. Applicants must have acceptable scores on the General Test of the Graduate Record Exam.
4. Applicants must have a three-credit statistics course or equivalent with a passing grade of “B” or better.
5. Applicants must have licensure as a R.N. International applicants must have an equivalent credential.

All applicants must complete and submit the following materials:

1. Application forms and instructions for applying to all graduate programs are available on the Graduate School Web site at www.granduate.vcu.edu/admission/prospective/domestic.
2. Official transcripts from all previous universities and colleges attended for all graduate and undergraduate work.
3. A typed, personal statement from the applicant summarizing professional and academic experience including prior research experience, research interests, immediate and long-range professional goals, and rationale for pursuing advanced study (see guidelines for writing the personal statement for doctoral admissions).
4. A resume that includes applicant’s name and address, past educational degrees, past work experiences, professional affiliations, certifications, honors and awards, presentations, and publications.

5. References from three persons who can knowledgeably comment upon applicant’s ability to succeed in an academic program (i.e., former faculty) or who can evaluate applicant’s ability to be successful in nursing research. Avoid getting references from ministers or others who are not familiar with professional and academic abilities; from friends, either professional or personal; or from personal health care providers.

6. A personal interview is required.

**Post B.S.-Ph.D. entry option**

All applicants to the Post B.S.-Ph.D. entry option must meet the following admission requirements:

- Applicants must have a baccalaureate degree in nursing. The degree must be from an accredited school or international equivalent.
- Applicants must have a GPA of 3.0 or better on a 4.0 scale.
- Applicants must have acceptable scores on the General Test of the Graduate Record Exam.
- Applicants must have the R.N. licensure. International applicants must have an equivalent credential.

**Admission to candidacy**

Before admission to candidacy for the doctorate, students must have (1) satisfied the language requirement, if applicable, (2) completed all required course work, (3) successfully completed the comprehensive examination and (4) fulfilled any additional requirements.

**Comprehensive examinations**

The student will request to take the comprehensive examination at the first available testing date following completion of the doctoral course work for the Ph.D. program (approximately six weeks after the last day of class). The dates for the examination will be posted for the year and will be offered in February, June/July and September/October. The student will request the exam through completion of the Ph.D. Comprehensive Examination Request Form available from the Office of the Associate Dean for Academic Programs or by downloading it from the Web. The student is required to obtain a signature from the adviser who verifies that the student has completed all required courses before submitting the form to the associate dean.

A six or seven member committee of faculty appointed by the associate dean for academic programs will write and evaluate the exam questions. The committee is composed of faculty for philosophy and theory, research design and methods, and the area of study, including the faculty adviser. The examination will have four questions and will not be available to the students beforehand. The examination is an in-class examination (open book), one question per day. All students will answer the same questions for the exam period.

The administration of the examination is managed through the Office of the Associate Dean and a computer will be available for each student’s use in the testing site. Upon completion of each question, the answer is submitted to the associate dean’s office. At the end of the allotted time period each day, the student will submit a disk with the response to the examination question (with the social security number at the top of each page) to the Office of the Associate Dean. No names will be included on the examination. The associate dean designee will print the copy of the answers in the student’s presence. There will be a written examination only, with no oral clarification of results.

**Curriculum**

**Core content (all students)**

**Philosophy and theory courses**

NURS 703 Philosophy of Human Sciences
NURS 704 Theoretical Structures for Nursing Knowledge

**Research methods and statistics**

(required of all students)

NURS 770 Quantitative Research Design
NURS 772 Qualitative Research Design
NURS 773 Perspectives on Research Design
NURS 774 Qualitative Data Analysis
BIOS/STAT 543 Statistical Methods I
BIOS/STAT 544 Statistical Methods II
MICR 510 Scientific Integrity

**Focus of inquiry (12 credits)**

Choose courses designed to support the area of study. May also include advanced methods/statistics courses.

**Research training**

NURS 776, 777, 778 Research Program Development I, II, III
NURS 796 Directed Research
NURS 797 Research Practicum

**Dissertation**

NURS 898 Dissertation

---

**Dissertation**

The student must conduct a substantial independent investigation and prepare a dissertation reporting the results of this research and analyzing its significance in relation to existing scientific knowledge. Satisfactory completion of the comprehensive examination and a satisfactory oral defense of the dissertation proposal are required prior to commencement of actual work outlined in the proposal. Once approved, the dissertation proposal is similar to a formal contract between the student and dissertation committee about the nature of the dissertation. The dissertation committee must consist of a minimum of four members. Any member of the graduate faculty of the School of Nursing may chair the dissertation committee. Other committee members must include one faculty member from the student’s focus area and one member from outside the School of Nursing. The dissertation committee is approved by the Associate Dean for Academic Programs in the School of Nursing. (The required form is available at www.nursing.vcu.edu). An oral defense of the dissertation is conducted by the student’s dissertation committee. The student is responsible for preparing the dissertation in accordance with the most current version of the Graduate School Thesis and Dissertation Manual on the Web at www.graduate.vcu.edu/pdfs/thesis.pdf.

**Nursing, Master of Science (M.S.)**
Admission requirements summary

Nursing, Master of Science (M.S.)
Indicate specialization: adult health (indicate acute or primary NP or CNS as track), child health, clinical nurse leader, community health, family health, nursing administration and leadership, nurse educator, integrative psychiatric mental health nursing or women’s health

List as track: Traditional M.S. (for R.N. with B.S. in Nursing); Non B.S.N.-M.S. program (for R.N. with B.S./B.A. in another discipline); or R.N.-M.S. (for R.N. with Associate’s or Diploma in Nursing)

Entry-level program for the qualified non-R.N. student who has earned a bachelor’s degree in another discipline
Indicate specialization: adult health (indicate acute or primary as track), child health, family health, nurse executive, psychiatric mental health, women’s health; list Accelerated Master’s as track

Entry-level program | Summer only | Applications received by Dec 1 | given priority consideration

The graduate program in nursing is based on the goals and the philosophy of the university and the School of Nursing. Differentiation between the undergraduate and the graduate programs is reflected in the philosophy and purpose of graduate education, the characteristics of the graduates and the program objectives. The graduate program is designed to respond to national nursing needs through creative, flexible approaches to graduate nursing education.

Graduate education is professionally oriented and has three major thrusts: (1) integration of three processes including transmission, utilization and development of knowledge in an advanced practice area, (2) development of increased skill in application of knowledge to advanced practice and (3) development of an awareness of the interaction between social, cultural, political and economic forces that have an impact on nursing practice in complex health care delivery systems. Advanced study emphasizes analysis and synthesis of knowledge from nursing and related disciplines with systematic investigation of underlying concepts. Graduates of this program should integrate this new knowledge into nursing practice. Graduates should occupy pivotal roles to improve health care and influence health policy in political arenas. With these three thrusts, graduates of this program have a knowledge base for further research and doctoral study.

Graduate education is directed toward professional practitioners who are self-directed in setting educational goals and in determining learning strategies best suited for their cognitive styles. With guidance and direction, adult learners should be able to integrate past experiences with current learning situations to expand their approaches to problem solving. Graduate education permits greater autonomy in more diverse environments for learning and practice including the political arena, all levels of the health care delivery system and community agencies whose missions are directed toward meeting the health needs of their clients. The graduate program in nursing:

- Prepares nurses for advanced practice in an area of specialization utilizing their own conceptual framework, constructed through advanced study.
- Prepares nurses for advanced practice in an increasingly technological society.
- Develops leadership skills in an advanced practice area.
- Provides a foundation for further research and scholarly study.

The School of Nursing offers programs of study leading to the Master of Science degree. Concentrations combining major study in advanced practice nursing are:

Admission requirements and procedures

The purpose of the following admission requirements and procedures is to encourage applications from competent students and to ensure selection of those whose ability, education and motivation qualify them to pursue successful graduate study in nursing.

To be considered for admission, an applicant must have:

- a Bachelor of Science in Nursing from an NLN-accredited school or a baccalaureate degree in another field with a lower division nursing education (associate degree or diploma). Applicants who hold a baccalaureate degree in another field who are not registered nurses are eligible for admission to the accelerated second degree program (entry-level master’s program). Applicants for this track are admitted to the graduate program and pay graduate fees.
- transcripts reflecting completion of undergraduate courses in statistics and health assessment (health assessment not required for accelerated second degree students and nursing administration and leadership students). In addition, all nursing administration and leadership students are required to have undergraduate courses in accounting, economics or microeconomics. Economics or microeconomics and accounting may be taken after admission to the graduate program. Students should consult with their advisers regarding specific course selection. Additional prerequisites for the accelerated second degree option are five to eight credit hours of anatomy and physiology, three credit hours of developmental psychology and six credit hours of English composition (or satisfactory completion of the writing requirements of the student’s undergraduate program).
- acceptable scores on the Graduate Record Examination (GRE) general test.
- a current unrestricted registered nurse license in a state, Washington, D.C., or a U.S. possession or territory, or an international equivalent. For accelerated second degree students, license is required within 90 days after completion of baccalaureate degree in nursing in order to remain enrolled in graduate courses.
- passing scores on the Qualifying Exam of the Commission on Graduates of Foreign Nursing Schools (CGFNS) prior to application if he or she is a graduate of a foreign nursing school licensed outside of the United States. (Include the exam report in the application materials.)
- references from the applicant’s undergraduate program and from employers/supervisors.
- a personal interview (if requested).

Professional liability insurance is highly recommended.

Application forms and instructions for applying to all graduate programs are available on the Graduate School Web site at www.graduate.vcu.edu.

Additional program information and advisement can be obtained through the Office of Enrollment and Student Services, 1220 E. Broad St., P.O. Box 980567, Richmond, VA 23298-0567; phone (804) 828-5171 or toll free (800) 828-9451; fax (804) 828-7743; e-mail: vcu_nurse@hsc.vcu.edu or visit the School of Nursing Web site: www.nursing.vcu.edu.

Applications are reviewed by the School of Nursing. Applicants will be notified of action by the dean of the Graduate School. Applicants who are granted provisional
admission are responsible for satisfying the provision or may be subject to dismissal. Applicants should accept an admission offer in writing and submit a tuition deposit as instructed in their admission letters. The tuition deposit is not refundable, but will be applied to tuition during the first semester of enrollment in courses.

Graduation requirements
To be a candidate for the degree of Master of Science in Nursing, students must be recommended by the faculty and must:

• meet academic requirements of the Graduate School,
• complete all requirements for the prescribed curriculum within five calendar years of the first registration for work to be credited toward the degree,
• earn at least a “B” or pass grade in all nursing courses,
• earn at least a cumulative grade-point average of 3.0 on a 4.0 scale in all work presented for graduation and
• conform to School of Nursing policies in respect to pass/fail grading for course work or thesis study.

The degree will be granted only after all requirements have been fulfilled, all fees to the university have been paid and bound copies of the thesis have been submitted. Degrees are not granted in absentia unless written request is made to the dean and permission is granted.

Academic requirements

• A student may not proceed in the program with a GPA of less than 3.0 on a 4.0 scale or with a grade of less than “B” in any nursing course. In exceptional circumstances, an appeal for progression may be made to the Graduate Curriculum and Evaluation Committee. Students earning less than a “C” are referred to policy 6.4.1 in the School of Nursing Policy and Information Handbook (http://www.nursing.vcu.edu/faculty/policy.htm).
• An adviser for each student is appointed by the department chair. That adviser will assist the student in program and career planning, registration procedures, and certification for graduation.
• The departments of Adult Health Nursing, Integrative Systems and Maternal Child Health Nursing will assist respective students with advanced practice certification.
• Following are the requirements for students electing the thesis option:

Committee formation:
◦ With the approval of the department chair, the student selects a thesis committee of not fewer than three university faculty. One member must be outside the major department and may be outside the School of Nursing.
◦ The student selects the committee chair from School of Nursing graduate faculty, but not necessarily from the student’s major department.
◦ The student provides each member of the committee with a copy of the thesis in accordance with the Graduate School Thesis and Dissertation Manual.

Committee responsibilities:
◦ The committee monitors the design and conduct of the research and the preparation of the thesis.
◦ The committee serves as the examining committee for the thesis.
◦ Committee members read and approve the thesis and participate in the final oral examination of the student. The final examination is open to faculty and students. The time and place, together with the candidate’s name, department and thesis title, shall be announced in the School of Nursing 10 days in advance of the examination.

Outcome:
◦ Each member of the examining committee will attend and cast a vote.
◦ A favorable vote of the examining committee with no more than one negative vote shall be required to pass the oral examination.

Accelerated master’s program
In response to the growing number of individuals with baccalaureate degrees in other disciplines who are now seeking a career in nursing, the School of Nursing offers a graduate program whereby an individual can earn a baccalaureate and master’s degree in nursing. Students in the Accelerated Master’s Program take courses in the undergraduate and master’s programs until licensure as an R.N. is obtained. It is anticipated that this will occur at the end of the fifth semester. The master’s degree is awarded after two to four semesters of additional study depending on the area of concentration. This program begins in the summer. See the School of Nursing Web site for details. www.nursing.vcu.edu/program_masters_2ndegree.shtml.

### Adult Health

The adult health concentrations include acute and primary care. Students also may select a role; current role options are the nurse practitioner or the clinical nurse specialist. The nurse practitioner role focuses on the provision of advanced independent nursing care integrated with delegated medical diagnostic and management activities. The adult primary care nurse practitioner has a practice located in an ambulatory care setting and focuses on health promotion, risk reduction and evidence-based primary care to individual patients. The adult acute care nurse practitioner generally works in an acute care setting, often within a multidisciplinary team focused on the provision of evidence-based care to adults who are acutely ill. The sphere of influence of the nurse practitioner is that of the patient. The clinical nurse specialist focuses on advanced nursing care to a specific population of adults. The clinical nurse specialist is responsible for ensuring excellence in the delivery of nursing care to patients within that population. This includes consultation with individual patients as well as with nurses who provide care to the patient in an acute care setting, and overall systems management to facilitate care. The site of practice is determined by the location of the patient population of interest — it may be in a primary care setting, for example, people undergoing chemotherapy. The sphere of influence of the clinical nurse specialist is threefold: patient, nursing personnel and systems/organizations. In addition to the core course requirements, the following concentration courses are required.

### Clinical Nurse Leader

The clinical nurse leader is an advanced generalist clinician with education at the master’s degree level. The CNL brings clinical competence and knowledge to the point of care and serves as a resource for the nursing team. In practice, the CNL oversees the care coordination of a distinct group of patients and actively provides direct patient care in complex situations by putting evidence-based practice into action to ensure that patients benefit from the latest innovations in care delivery. The CNL evaluates patient outcomes, assesses cohort risk and has the decision-making authority to change care plans when necessary. The CNL is a leader in the health care system, and the implementation of this role will vary across settings.
Community health

The School of Nursing offers a concentration in community health for nurses who already have a Master of Public Health degree that leads to a Master of Science in Nursing with a focus in community health. This program requires 31 credits over three semesters of full-time study. Students may enroll for part-time study. Applicants must successfully meet the admission requirements of the M.S. in Nursing program. In addition, applicants must show evidence of a Master of Public Health degree from an accredited program.

Applications should be sent to the Graduate School. Application will be reviewed by the School of Nursing and advisers will be assigned from the School of Nursing. In addition to the core course requirements, the following concentration courses are required.

<table>

Combined Master of Science in Nursing (M.S.) and Master of Public Health (M.P.H.)

See the individual program pages for admission requirements specific to the separate degrees.

The Department of Epidemiology and Community Health and the School of Nursing jointly offer the dual degree program in public health and nursing that leads to two degrees, a Master of Public Health and a Master of Science in Nursing with a focus in community health. This dual degree program is tailored to meet the needs of students who want to have a public health degree in conjunction with a clinical degree.

**Curriculum**

Typical course plan for M.P.H. year:

**Fall 1**

</tr>
</tbody>
</table>

**Computer competency for nursing administration and leadership**

Familiarity with basic microcomputer applications, including word processing and spreadsheets, is essential to successful completion of the nursing administration and leadership concentration. Students lacking these skills are strongly urged to develop them prior to enrollment or early in their program of study. While access to the Internet is available on campus, it is generally advantageous for students to have access at home. Basic skills are required prior to enrollment in NURS 505 Advanced Practice Nursing: Foundations in Health Care Finance and NURS 690 Application of Financial Concepts.

**R.N.-M.S. track**

The School of Nursing offers a track in the master’s program designed for students who have their R.N. licensure but have not completed the baccalaureate degree. The track includes elements of the R.N.-B.S. program and moves the student expeditiously into M.S. program course work. The student completes the general education requirements for the baccalaureate degree prior to entering the R.N.-M.S. track. The track provides the additional courses in the major required for the degree and a B.S. degree is awarded after the completion of 30 credit hours of specified course work. All concentrations in the master’s program are available to students admitted to this track.

**Admission requirements**

To be considered for admission, applicants must hold the following credentials:

- An associate degree in nursing or a diploma in nursing, accredited by NLNAC or CCNE.
- Transcripts reflecting the completion of a community health nursing course comparable to NURS 415.
- Acceptable scores on the GRE General Test.
- A current, unrestricted registered nurse license in a U.S. state, the District of Columbia, or a U.S. possession or territory, or an international equivalent.
- Passing scores on the Qualifying Exam of the Commission on Graduates of Foreign Nursing Schools (CGFNS) prior to application if a graduate of foreign nursing schools that are licensed outside of the United States (include the exam report with their application materials).
- Professional liability insurance (highly recommended).

**Prerequisite courses**

The following course will be accepted in transfer, only upon a rigorous evaluation for comparability to the B.S. course using defined criteria developed by expert faculty in community health. Applicants must provide a copy of the course syllabus and a written statement of how the course met the objectives of the VCU course. VCU course objectives will be provided to applicants. Otherwise the course will be taken as a prerequisite for beginning the R.N.-M.S. track:

- NURS 415 Community Health Nursing or comparable course (5 credits)

**General education requirements (taken prior to admission to the R.N.-B.S. track)**

Total master’s credits applied to B.S. degree

23*

* Not all of these courses are required in each master’s program concentration; however, a student must take at least 17 of these credits to meet the B.S. degree requirements.

The remainder of the curriculum (at least 30 credits) is consistent with all requirements of the current M.S. program and is specific to the concentration chosen.

Nurse educator

The nurse educator track prepares students for roles in nursing education. These roles focus on the facilitation of learning through curriculum design, teaching, evaluation, advisement and other activities undertaken by faculty in schools of nursing.

Nursing education may take place in a variety of settings, including hospitals, colleges and universities. The implementation of the faculty role may be in traditional classroom-based environments or in nontraditional environments. Nurse educators engage in a number of roles and functions, each of which reflects the core competencies of nursing faculty. Those competencies include:

1. Facilitate student learning.
2. Facilitate learner development and socialization.
3. Use assessment and evaluation strategies.
4. Participate in curriculum design and evaluation of program outcomes.
5. Function as a change agent and leader.
6. Pursue continuous quality improvement in the nurse educator role.
7. Engage in scholarship.
8. Function within the educational environment.

The extent to which a specific nurse educator implements these competencies varies according to many factors, including the mission of his or her institution, rank, academic preparation and type of program in which teaching takes place. After completion of the nurse educator track and two years or more of full-time employment in the academic faculty role, graduates are eligible to sit for the Nurse Educator certification exam.

The School of Pharmacy was established officially in 1898; the University College of Medicine had a school of pharmacy when it opened in 1893. The two-year curriculum gave way to a three-year program in 1925, and in 1932 the school required four years of college work and a Bachelor of Science degree was awarded. In 1960, the program lengthened to a five-year course leading to a Bachelor of Science in Pharmacy degree. In 1975, authority was granted to offer to selected students a six-year program leading to the Doctor of Pharmacy degree and this program was adopted as the only professional offering by the school in 1995. The School of Pharmacy currently enrolls students in a four-year professional Doctor of Pharmacy program following completion of at least three years of pre-professional studies taken at VCU or elsewhere. In 1996 a part-time program was offered that permits current Bachelor of Science in Pharmacy degree holders to earn the Doctor of Pharmacy degree in a nontraditional format requiring students to come to campus infrequently. This program is in the process of being phased out and no longer accepts students for enrollment. Since 1971, all pharmacy students have participated in a clerkship program. Students spend their final year in a variety of practice settings under the supervision of highly qualified faculty preceptors.

The authority to award graduate degrees in the pharmaceutical sciences was granted by the Graduate Council in 1952. Departments in the school have the responsibility for administering a graduate program leading to the M.S. and Ph.D. in Pharmaceutical Sciences. This program includes areas of specialization in medicinal chemistry, pharmacetics, pharmacotherapy and pharmacy administration. These programs provide the preparation and research experience for academic, governmental and industrial careers. Graduate degrees in pharmaceutical sciences do not provide eligibility for licensure as a pharmacist.

Students may elect to pursue a joint Pharm.D./M.S. or Pharm.D./Ph.D. program. Such students must apply to, and be accepted by, both programs separately.

Accreditation and Complainant policy
Pharmacy (Pharm.D.) accreditation
The Doctor of Pharmacy degree program at the Virginia Commonwealth University School of Pharmacy is fully accredited by the Accreditation Council for Pharmacy Education (ACPE), 20 North Clark Street, Suite 2500, Chicago, IL 60602-5109. Accreditation standards are available in the schools Office of Admissions and Student Services and via the ACPE Web site at www.acpe-accredit.org. Additionally, the school is a member of the American Association of Colleges of Pharmacy.

Complainant policy
ACPE has an obligation to assure itself that any institution that seeks accreditation status for its professional degree program conducts its affairs with honesty and frankness. Students who have complaints about the schools ability to meet accreditation standards or adhere to ACPE policies and procedures shall be submitted in writing to the Associate Dean for Admissions and Student Services, VCU School of Pharmacy, 410 North 12th Street, Room 155, Richmond, VA 23298-0581. The complainant is welcome to make an appointment to meet with school administrators to discuss his or her complaints and options for resolution. If they are not satisfied with the response by the schools representative/s, then complainants may contact ACPE at 20 N. Clark Street, Suite 2500, Chicago, IL 60602-5109 or www.acpe-accredit.org/complaints with a complaint. A record of written complaints about the schools adherence to ACPE accreditation standards or policies and procedures will be maintained for ACPE to review at the time of an accreditation site visit.

Statement of purpose
The School of Pharmacy at Virginia Commonwealth University exists to provide exceptional programs benefiting the commonwealth of Virginia and society by offering the highest quality education and training for the development of health care practitioners, scientists, professional leaders and responsible citizens. These individuals are committed to shaping the health care world of tomorrow while serving society’s health care needs today.

Mission statement
The mission of the VCU School of Pharmacy fully supports the mission and goals of the university and the Medical College of Virginia Campus. The school’s mission is to provide professional, graduate and postgraduate education, conduct pharmaceutical and biomedical research, and provide patient care and public service.

The school strives to provide an educational environment that encourages the following:
• Excellence in scholarship
• Excellence in teaching
• Diversity and respect among students and faculty
• Commitment to the various needs of students
• Commitment to service within the school, the university, the profession and the community
• Quality direct patient care experiences within the curriculum
• Commitment to fostering the concept and importance of lifelong learning

Therefore, the school shares with teaching, the interdependent and almost inseparable objectives of research, service and patient care.

Philosophy
In developing the curriculum of the School of Pharmacy, the faculty recognizes that an educated person should be prepared to assume a responsible and rewarding role in society. The new paradigm of pharmaceutical care guides the school’s curriculum committee and faculty in the design and implementation of the curriculum. Pharmaceutical care is the responsible provision of drug therapy by the pharmacist for the purpose of achieving definite outcomes that improve a patient’s quality of life. In professional practice pharmaceutical care focuses on the pharmacist’s attitudes, behaviors, commitment, concerns, ethics, functions, knowledge, responsibilities and skills in the provision of drug therapy, which achieve outcomes that yield improvement in a patient’s quality of life. The educational program is designed to provide a sound, scientific and professional background for both those who will enter the practice of pharmacy directly and those who wish to continue graduate education in the pharmaceutical sciences. It also includes courses in the arts and humanities in order to provide the student with a broad educational base that will permit participation in community life, not only as a professional, but also as an informed, concerned citizen. The professional curriculum is rigorous and highly demanding of the student’s time; employment must not be allowed to interfere with the educational process. The faculty has adopted a document entitled “Expected Competencies of Doctor of Pharmacy Graduates” and has expanded these competencies into knowledge, skills and attitudes that have been implemented in the curriculum.
Career opportunities
Graduation from the School of Pharmacy with a professional degree affords the opportunity to pursue one of several career paths. The most familiar role is as a provider of pharmaceutical care to ambulatory patients in a community setting. In this setting the pharmacist may be self-employed or may be an employee of an organization such as an independent pharmacy, a corporate chain of pharmacies or a managed care pharmacy in a health maintenance organization.

Many pharmacists also practice in institutional settings such as hospitals or other health care institutions.

The pharmaceutical industry also employs pharmacists in several areas including manufacturing, quality control, research, sales and as medical service representatives who call on physicians. Opportunities also are available in various government services, such as public health and veterans affairs, as well as in government-operated laboratories.

In most cases, those who aspire to engage in independent research or to teach seek graduate degrees in the pharmaceutical sciences or in specialty fields related to pharmacy.

The American Pharmacists Association Pathway Evaluation Program provides information about the many areas of pharmacy practice. The program offers an interactive assessment tool and extensive background information about the pharmacy profession. Individuals interested in learning more about the profession are encouraged to select the Careers menu on the APhA Web site at www.pharmacist.com.

Facilities
The School of Pharmacy is located in the Robert Blackwell Smith Building at 12th and East Clay streets. This building — named in honor of a distinguished former dean of pharmacy, former president of the Medical College of Virginia and former provost of the MCV Campus — was completed in 1984 with the help of contributions from many alumni and friends of the School of Pharmacy. Classes for students in pharmacy also are conducted in Sanger Hall, located between 11th and 12th streets on East Marshall Street, and McGuire Hall, located at the corner of 12th and Clay streets. In conjunction with the VCU Health System, students receive clinical experience in the VCUHS’s MCV Hospitals and clinics. Other facilities available for teaching include area hospitals and pharmacies. The major library holdings are in the Tompkins-McCaw Library at 12th and East Clay streets.

Location in a major health sciences center provides excellent opportunities for interdisciplinary research and access to clinical facilities. The school is well equipped for graduate research and provides leadership to the VCU Institute for Structural Biology and Drug Discovery at the Virginia BioTechnology Research Park. The institute makes use of synthetic medicinal chemistry, X-ray crystallography, NMR, protein and nucleic acid chemistry, bacterial enzymology, and molecular pharmacology to promote drug development. Several businesses have been spawned through the institute and two new drugs have entered clinical trials.

The Department of Pharmacy supports the Center for Drug Studies (CDS), a fully staffed facility for conducting Phase I-III research in humans.

Honors and awards for graduate students

Rho Chi
This national honorary pharmaceutical society established the Lambda Chapter at the School of Pharmacy in 1929. Charters for chapters of this organization are granted only to groups in colleges that are members in good standing of the American Association of Colleges of Pharmacy. Election to membership in the society is based on scholarship, character, personality and leadership. Students become eligible for consideration during the second professional year of the pharmacy program.

Lambda Chapter annually awards certificates in recognition of outstanding scholarship to students who have completed the pre-pharmacy and first professional year pharmacy curriculum.

Phi Lambda Sigma
This national pharmacy leadership society established a Beta Nu Chapter at the School of Pharmacy in 2000. Charters for chapters of this organization are granted only to groups in colleges that are members in good standing of the American Association of Colleges of Pharmacy and which are accredited by the American Council of Pharmaceutical Education.

Election to membership in the society is based on the demonstration of dedicated service and leadership in the advancement of pharmacy and evidence of high moral and ethical character.

Academic Excellence Award
This award recognizes excellence in academics.

APhA-ASP Professionalism Award
This award recognizes the ideals of professionalism and excellence in patient care in all aspects of the recipient’s academic pharmacy career. The recipient must have demonstrated exceptional service and commitment to the profession through involvement in professional organizations and other extracurricular learning opportunities.
Award of Excellence in Clinical Communication
This award recognizes high academic achievement and outstanding communication skills.

Award of Excellence in Nonprescription Medication Studies
This award recognizes demonstrated academic achievement in the study of nonprescription drug therapy.

Clinical Research Award
This award recognizes a demonstrated contribution to clinical research.

Community Practice Achievement Award
This award recognizes a recipient’s demonstrated interest in pursuing a career in community pharmacy.

Dean’s Award
This award recognizes a student’s outstanding achievement and unselfish devotion to his or her class, the school, the university and the profession.

Distinguished Service Award
This award recognizes a student with demonstrated academic excellence, leadership and a service commitment to the university and greater community.

Excellence in Advocacy and Health Policy
This award recognizes a student with demonstrated excellence and commitment to advocating for the profession of Pharmacy.

Excellence in Pharmacy Award
This award recognizes high academic achievement and professional motivation.

Health-System Practice Award
This award recognizes an individual with a demonstrated commitment to health-system pharmacy practice.

Leadership Achievement Award
This award recognizes an individual with demonstrated leadership qualities.

Outstanding Leadership Award
This award recognizes an individual with demonstrated qualities and abilities necessary to practice community pharmacy.

Outstanding Student Award
This award recognizes a student leader with demonstrated excellence in academic performance.

Patient Care Award
This award recognizes an individual with the ability to apply clinical knowledge into practical patient care.

Pharmacy Communications Award
This award recognizes an individual with demonstrated effectiveness in pharmacist/patient communication.

Phi Lambda Sigma Student Leadership Award
This award is a peer-recognition award for a member with demonstrated contributions to Phi Lambda Sigma.

Research Excellence Award
This award recognizes excellence in research by a student completing a dual degree.

SNAPhA Leadership Award
This award is a peer recognition award for a member with demonstrated contributions to SNAPhA.

Technology Excellence Award
This award recognizes an individual with demonstrated excellence in the application of technology to enhance the profession.

VASP Senior Recognition Award
This award is a peer-recognition award for a member with demonstrated contributions to VASP.

VSHP Excellence in Health-system Pharmacy Award
This award recognizes an individual with demonstrated leadership experience and interest in health-system pharmacy practice.

Named scholarships for professional degree students

Henry Addington Academy of Independent Pharmacy Scholarship
This scholarship is awarded annually to a student who has completed one full year of study in the School of Pharmacy, expresses a formal intention to practice in independent pharmacy upon graduation, has experience working in an independent community pharmacy practice, provides a letter or letters of recommendation from an independent pharmacist and has maintained a satisfactory academic record in the School of Pharmacy.

Berkowitz Independent Community Pharmacy Scholarship
This scholarship is presented to any natural born U.S. citizen who has completed two years of the Doctor of Pharmacy degree program and is ranked within the top third of his or her class. The recipient must have an expressed interest to practice independent community pharmacy.

Lindsay W. and Laura Butler Memorial Scholarship
This scholarship is awarded annually to a pharmacy student who has demonstrated financial need and academic achievement.

Class of 1953 Scholarship Fund
This scholarship is available to any P-2, P-3 or P-4 student in good academic standing.

Carolyn Coleman (Stone) Scholarship
This scholarship is awarded annually to a pharmacy student who has demonstrated financial need and academic achievement.

William S. Cooper Scholarship
This scholarship is awarded annually to an African-American student who is in the upper half of their class academically and who has a demonstrated financial need.

Ronald G. Davis and David L. Williams Scholarship
This scholarship is awarded annually to a pharmacy student with demonstrated financial need.

Russell Fiske Scholarship Fund
This scholarship is awarded annually to a pharmacy student in financial need who demonstrates service to the community and pharmacy profession and is involved in activities that benefit the school and/or university.

William W. and Patsy Gray Scholarship
This scholarship is awarded annually to a pharmacy student who has demonstrated scholastic performance and leadership qualities by involvement in professional extracurricular activities.
Linda Nixon Harvey Memorial Scholarship
This scholarship is presented annually to a rising fourth professional year student who has maintained high academic standards while exhibiting leadership, professional integrity and outstanding personal qualities.

John W. Hasty and Kelly Kale Scholarship
This scholarship is available to a student who demonstrates scholastic ability and has financial need. Applicants must be from one of the following areas: the counties of Caroline, Charles City, Essex, Gloucester, James City, King and Queen, King William, Lancaster, Mathews, Middlesex, New Kent, Rappahannock, York and the cities of Williamsburg, Newport News and Poquoson.

Richard Jacobs Memorial Scholarship
This scholarship is available annually to a student who has demonstrated financial need and academic achievement.

David D. Marshall Memorial Scholarship
This scholarship is presented annually to a married fourth professional year student who ranks academically in the top half of the class and who has demonstrated financial need and academic achievement.

Nancy L. and Ronald H. McFarlane Scholarship
This scholarship is awarded to a student who has demonstrated academic achievement and financial need.

Nick G. Nicholas Memorial Award
This scholarship is awarded annually to a pharmacy student who has demonstrated financial need and academic achievement.

Camilla Jeffries Patton Scholarship
This scholarship is awarded to a student with demonstrated financial need.

Phi Delta Chi Scholarship in the Memory of Daniel A. Herbert
This scholarship is awarded to an active member of Phi Delta Chi who has demonstrated academic achievement and financial need.

Clara and Tom Rorrer, Sr. Scholarship
This scholarship is awarded to student with demonstrated financial need.

Katherine Merryman Rorrer Scholarship
This scholarship is awarded to student with demonstrated financial need.

M. Bruce Rose Scholarship
This scholarship is presented annually to a student who demonstrates scholastic ability and financial need. Preference shall be given to applicants from the Virginia Pharmacists Association Fourth District (i.e., the counties of Dinwiddie, Prince George, Surry and Sussex and the cities of Colonial Heights, Hopewell and Petersburg).

Samuel and Gilbert Rosenthal Foundation Scholarship
This scholarship is awarded annually to a pharmacy student who has demonstrated financial need, academic achievement and a commitment to service.

George Schlosser Scholarship
This scholarship is awarded annually to a student in financial need who demonstrates service to the community and pharmacy profession and is involved in activities that benefit the school and/or university.

Harry and Zachia Shaia Pharmacy Scholarship
This scholarship is awarded annually to a first-year pharmacy student based principally on financial need with strong consideration for academic performance and an established record of community service. The recipient will receive the same scholarship each year thereafter until graduation, assuming their need and merit remain unchanged.

W. Roy Smith Memorial Scholarship
This scholarship is awarded annually to a senior pharmacy student demonstrating academic talent, strong leadership ability and involvement in community activities. A separate application must be completed, including reference letters.

Glenn B. Updike Sr. Scholarship
This scholarship is available annually to a student who demonstrates scholastic ability and has financial need. Preference shall be given to applicants who are from the Danville, Va. area.

Warren E. Weaver Scholarship
This scholarship is awarded annually to a student who is determined to be outstanding in character, leadership and academic performance.

C. Eugene White Scholarship
This scholarship is awarded annually to a senior pharmacy student in financial need who demonstrates service to the community and pharmacy profession and is involved in activities that benefit the school and/or university.

Edward E. Willey Pharmacy Scholarship Award for Outstanding Scholarship and Leadership
This scholarship is awarded annually to a rising fourth professional year student who is determined to be outstanding in character, as judged by faculty and classmates; leadership ability, as demonstrated by participation in and leadership of student organizations; and academic performance, as demonstrated by the attainment of a 3.75 grade-point average during the first three years in pharmacy school. A separate application must be completed, including reference letters.

Robert J. and Florence E. Woods Scholarship
This scholarship is awarded annually to student with demonstrated financial need.

Organizations for graduate students

Student chapter of the International Society for Pharmacoeconomics and Outcomes Research
This organization fosters interest among professional and graduate students in pharmacoeconomics and health outcomes assessment.

American Association of Pharmaceutical Scientists Virginia Commonwealth University Chapter
The AAPS-Virginia Commonwealth University Student Chapter was established in April 2004. Since its start, student membership has grown tremendously, with the chapter attracting students from various biological and related health fields. The chapters mission is to provide an educational outreach program for VCU students with an interest in the pharmaceutical sciences.

Organizations for professional degree students

Virginia Academy of Students of Pharmacy
Students in the School of Pharmacy have an opportunity to become members of this organization that is affiliated with the Virginia Pharmacists Association and the American Pharmaceutical Association. The group meets regularly presenting programs of interest to the student body.

Student Chapter Virginia Society of Health-System Pharmacists
Pharmacy students who are interested in the practice of pharmacy in organized health care settings may become members.

Student National Pharmaceutical Association
This student subdivision of the National Pharmaceutical Association works to define the future role of minority health professionals in the community.
Student Association of Community Pharmacists
This student organization focuses on issues of interest to students who plan to pursue careers in community pharmacy. It is affiliated with the National Community Pharmacists Association.

Student Chapter of the Academy of Managed Care Pharmacists
This student organization serves the interests of students who plan to pursue a career in the managed care practice environment.

Student Chapter of the International Society for Pharmacoeconomics and Outcomes Research
This organization fosters interest among professional and graduate students in pharmacoeconomics and health outcomes assessment.

Christian Pharmacists Fellowship International
This student organization focuses on helping student pharmacists to grow spiritually and promote fellowship within the profession.

Fraternities for professional degree students
Chapters of Kappa Epsilon, Kappa Psi, and Phi Delta Chi are active within the student body. These fraternities extend invitations, according to the rules of the Interfraternity Council, to pharmacy students to become members. Eligibility for consideration is based upon academic achievement as determined by the Interfraternity Council and the dean’s office.

Pharmaceutical Sciences, Doctor of Philosophy (Ph.D.)

Admission requirements summary
Pharmaceutical Sciences, Doctor of Philosophy (Ph.D.)
Indicate specialization:

The school offers programs of graduate study leading to the degree of Doctor of Philosophy. Students may specialize in pharmaceutics, medicinal chemistry, pharmacotherapy or pharmacy administration.

Academic regulations
Registration
While most students register for the first semester beginning in August, arrangements may be made to initiate graduate work at other times during the academic year.

Financial assistance
Graduate students in the pharmaceutical sciences may receive support via teaching assistantships, research assistantships or fellowships. The American Foundation for Pharmaceutical Education provides support to eligible applicants for graduate study in the pharmaceutical sciences. Students pursuing the master’s degree will not be supported by university teaching assistantships.

The student’s adviser and the advisory committee
The departmental graduate program will advise students until a permanent adviser has been chosen. During their first semester, new graduate students are required to arrange interviews with each graduate faculty member of their major department to discuss research projects. The selection of an adviser and a research project are made in accordance with the rules and procedures of the student’s department. The adviser will arrange for the appointment of the student’s advisory committee. The responsibilities of the adviser and the advisory committee are described in the School of Pharmacy section of this bulletin.

Requirements for graduate degrees
Graduate students in the pharmaceutical sciences must satisfy the graduate degree requirements described in the School of Pharmacy section of this bulletin. In some cases, more stringent requirements are imposed. These are described in detail in departmental graduate student/rule handbooks, which are issued to all students.

All graduate students are required to attend seminars in their own discipline and are encouraged to attend seminars of interest in other departments. Students are required to present seminars satisfactory to the faculty.

Graduate students are expected to devote maximum effort to the pursuit of their education. During normal working hours, graduate students are expected to be working on their research projects when they are not in class. Graduate students who are progressing satisfactorily may be granted permission to take outside employment during evenings or weekends.

Graduate program admission requirements
General requirements pertaining to the graduate program in pharmaceutical sciences follow the same guidelines for graduate studies at VCU.

Admission to the graduate program in pharmaceutical sciences is open to students having a Doctor of Pharmacy degree, or bachelor’s degree in pharmacy, chemistry, biochemistry, biology, premed, engineering or a related science. Exceptions to this statement may apply to students enrolled in the Pharm.D. curriculum who wish to apply for the combined Pharm.D. and Ph.D. degree. Acceptance is based upon undergraduate performance, satisfactory scores on the Graduate Record Examination (GRE), letters of recommendation and, where applicable, TOEFL scores. The current requirement for the GRE exam is that all applicants take the General Test containing the Mathematical Reasoning portion.

Application forms and instructions for applying to all graduate programs are available on the Graduate School Web site at www.graduate.vcu.edu/admission/prospective/domestic.

Graduate curriculum
Pharmaceutical sciences core
The following courses or course areas are required of all graduate students enrolled in the pharmaceutical sciences graduate program prior to graduation. Courses and course areas that are similar to those listed and have been taken prior to entry in the program may satisfy the requirement and courses other than those listed may be substituted. The appropriate graduate program director and department chair must approve acceptance of courses and course areas that are not on the following list.

1. PCEU/MEDC 607-608 Introduction to Pharmaceutical Sciences
2. MICR 512 Laboratory Safety (pharmacy administration graduate students are not required to take this course)
3. Ethics (MICR 510)
4. Seminar (MEDC 690, PCEU 690, PHAR 690)
5. Directed research (MEDC 697, PCEU 697, PHAR 697)

Special requirements:
International applicants must complete the TOEFL and international admissions application.

Medicinal chemistry, an amalgamation of chemistry and the life sciences, is a multidisciplinary field that applies chemical (i.e., synthetic, analytical, theoretical and/or physical chemistry) principles to investigations of biologically active substances that include therapeutically useful drugs, natural products, toxins and drugs of abuse. Investigations may be focused on identification of biological mechanisms of action, rational drug design and synthesis, metabolism studies, identification of pharmacological tools, or the development of techniques necessary to perform such studies. The discipline requires an understanding of both the chemical and biological processes involved; thus, in addition to a solid background in chemistry, the medicinal chemist is required to be versed in biological sciences such as biochemistry, pharmacology, toxicology, molecular biology, enzyme mechanisms, receptor theory and/or neurochemistry, depending upon the student’s interests.
In addition to research, the curriculum consists of two general components: core courses and elective courses. All doctoral students are required to take core courses that include: medicinal chemistry (MEDC 591 and 601), advanced medicinal chemistry (MEDC 610 or 620), research techniques (MEDC 526), seminar (MEDC 690), biochemistry (BIOC 503 or 504), pharmacology (PHTX 691), advanced organic chemistry (CHEM 604) and molecular modeling (MEDC 541). Specific courses may be recommended on the basis of the result of placement exams administered during the first week of enrollment. Doctoral students also are required to present two non-thesis seminars and a final seminar on their research. Depending upon their interests, and in consultation with their chosen dissertation adviser, students select from a variety of elective courses such that their graduate program can be specifically tailored to their future research or career goals. Doctoral students are required to pass a series of cumulative examinations in order to become eligible to take an oral comprehensive examination based on an original (i.e., non-thesis) research proposal. Most graduate students begin their research during their first year and are encouraged to present the results of their research in oral and poster format at various local, state and other scientific meetings. Most advanced graduate students also participate in laboratory and classroom teaching, and some as tutors, to enhance their teaching proficiency and presentation technique. Well-prepared students, depending upon the nature of their research, should be able to complete all degree requirements in less than two and a half years for a master’s degree or within about four and a half years for a doctoral degree.

Research resources include state-of-the-art molecular modeling facilities, synthetic organic chemistry laboratories, X-ray crystallographic equipment and access to high-field nuclear magnetic resonance spectrometers. The department’s research interests are closely interwoven with the VCU Institute for Structural Biology and Drug Development, which is housed on the campus and to which many departmental faculty belong. At present, the research interests of the department include synthesis and biological evaluation of new compounds; molecular-graphics assisted drug design; determination of relationships between chemical structure and biological activity; studies of drug action; receptor binding studies; theoretical studies on structure-activity relationships of drugs, including the use of molecular orbital theory, X-ray crystallography, computational chemistry and molecular connectivity; and rational design of new drugs and studies on drug metabolism.

Special requirements: International applicants must complete the TOEFL and international admissions application.

Pharmaceutics can be classically defined as the profession concerned with the art and science of formulating medicines into vehicles (tablets, suspensions, aerosols, etc.) that are optimal for the prevention and treatment of disease. This field has become multidisciplinary with increasing knowledge of the variety of factors involved. The study of the time-course disposition of drugs to a host biologic system has emerged as the discipline of pharmacokinetics and is often studied in close conjunction with the related discipline of pharmacodynamics, in which the time course of drug effects is studied. Biopharmaceutics entails the study of the means and mechanisms by which drugs enter biological systems, while drug metabolism involves study of the rate and specificity of enzymatic chemical conversion of drugs. The sciences of pharmaceutical and biopharmaceutical analysis are concerned with the investigation of chemical and instrumental systems for qualitative and quantitative measurement of drugs. All of these related disciplines can collectively be referred to as modern pharmaceutics, which requires a knowledge and interest in mathematics, chemistry, biological sciences and physical sciences. The curriculum includes core course requirements in statistics, biopharmaceutics, drug metabolism, pharmacokinetics, physical pharmacy, pharmaceutical analysis and seminars in drug development. Depending on the student’s interests and major adviser, prerequisites in mathematics, chemistry and pharmacology also may be required. In addition to the core course work, a variety of elective courses are available including biotechnology, advanced courses in pharmacokinetics and pharmaceutical analysis, chemical separations, physiology, spectroscopy, biochemistry, immunology and many others that may be selected in consultation with the student’s major adviser. Doctoral students take written and oral comprehensive examinations after completion of their required course work. The highlight of graduate study is conducting the research project. This project involves laboratory or clinical research, and completion is indicated by successful defense of the project.

Funding for research includes both federal and industrial sponsorship and provides a number of resources that are similar to industrial standards. A cell culture and microscopy lab, an aerosol research facility, a 72-bed clinic and a biopharmaceutical analysis laboratory are among the many resources available to students. A state-of-the-art computer laboratory is available and a temporary animal housing facility also is present in the building. Examples of research equipment available to students include: laser light scattering, laser-induced fluorescence, scintillation and gamma counters, atomic spectroscopy, chromatography, mass spectrometry, brain mapping, and differential scanning calorimetry.

Pharmacotherapy and pharmacy administration specializations

Special requirements: International applicants must complete the TOEFL and international admissions application.

The Department of Pharmacy offers two areas of specialization: Pharmacotherapy (the safe and effective use of drugs in humans) and Pharmacy Administration (the evaluation of the social and economic impact of drug therapy in humans and in health care systems). Upon admission, graduate students will generally choose one of these two areas of emphasis to study.

Students in Pharmacotherapy usually will elect to study in the areas of gerontology (the study of the aging process), clinical trials and drug development, pharmacogenomics (the study of genetic variability in drug development and prescribing), infectious disease, or mental health. Students in Pharmacy Administration may elect to study pharmacoconomics (the study of the costs and consequences of the use of pharmaceuticals), pharmacoepidemiology (the study of the utilization and effects of drugs in large numbers of people), or pharmaceutical marketing. Graduate students also may take suitable courses outside of the department in areas of statistics, clinical trials research, health care administration, pharmacology, economics, computer sciences, public health, public policy, marketing and epidemiology. The selection and scope of the external course work will depend on student needs and research interests.

Currently, research interest in the faculty include nephrology and dialysis, geriatric pharmacokinetics, pharmacoepidemiology, pharmacoconomics, drug prescribing, gerontology, health education, infectious disease, critical care, cardiology, pharmaceutical marketing, geriatrics, pharmacogenomics, women's health, rheumatology, and critical care. Resources available to student include the VCU Health System, the Center for Drug Studies, several large medical databases and the university.

The Master of Pharmaceutical Sciences (M.P.S.) is a professional masters degree designed for those students who may not need or desire the laboratory or clinical research portion of the traditional Master of Science in Pharmaceutical Sciences degree. The program normally requires two years to complete. Students may focus on any of the various areas of specialization within the School of Pharmacy that are offered to M.S. students.
Admission, course requirements and other procedures are as described for the M.S. in Pharmaceutical Sciences, with the difference between the programs being the form of the final project. The M.P.S. replaces the traditional clinically or laboratory-based research project with a capstone literature-based review. This capstone literature requirement will consist of a review of current literature in a specialty area that is chosen in conjunction with the students adviser and followed by completion of a literature review manuscript suitable for publication.

Research resources include state-of-the-art molecular modeling facilities, synthetic organic chemistry laboratories, X-ray crystallographic equipment and access to high-field nuclear magnetic resonance spectrometers. The department’s research interests are closely interwoven with the VCU Institute for Structural Biology and Drug Development, which is housed on the campus and to which many departmental faculty belong.

At present, the research interests of the department include synthesis and biological evaluation of new compounds; molecular-graphics assisted drug design; determination of relationships between chemical structure and biological activity; studies of drug action; receptor binding studies; theoretical studies on structure-activity relationships of drugs, including the use of molecular orbital theory, X-ray crystallography, computational chemistry and molecular connectivity; and rational design of new drugs and studies on drug metabolism.

**Pharmaceutics specialization**

**Admission requirements summary**

Special requirements: International applicants must complete the TOEFL and international admissions application.

Pharmaceutics can be classically defined as the profession concerned with the art and science of formulating medicines into vehicles (tablets, suspensions, aerosols, etc.) that are optimal for the prevention and treatment of disease. This field has become multidisciplinary with increasing knowledge of the variety of factors involved. The study of the time-course disposition of drugs to a host biologic system has emerged as the discipline of pharmacokinetics and is often studied in close conjunction with the related discipline of pharmacodynamics, in which the time course of drug effects is studied.

Biopharmaceutics entails the study of the means and mechanisms by which drugs enter biological systems, while drug metabolism involves study of the rate and specificity of enzymatic chemical conversion of drugs. The sciences of pharmaceutical and biopharmaceutical analysis are concerned with the investigation of chemical and instrumental systems for qualitative and quantitative measurement of drugs. All of these related disciplines can collectively be referred to as modern pharmaceutics, which requires a knowledge and interest in mathematics, chemistry, biological sciences and physical sciences.

The curriculum includes core course requirements in statistics, biopharmaceutics, drug metabolism, pharmacokinetics, physical pharmacy, pharmaceutical analysis and seminars in drug development. Depending on the student’s interests and major adviser, prerequisites in mathematics, chemistry and pharmacology also may be required. In addition to the core course work, a variety of elective courses are available including biotechnology, advanced courses in pharmacokinetics and pharmaceutical analysis, chemical separations, physiology, spectroscopy, biochemistry, immunology and many others that may be selected in consultation with the student’s major adviser. The highlight of graduate study is conducting the research project. This project involves laboratory or clinical research, and completion is indicated by successful defense of the project.

Funding for research includes both federal and industrial sponsorship and provides a number of resources that are similar to industrial standards. A cell culture and microscopy lab, an aerosol research facility, a 72-bed clinic and a biopharmaceutical analysis laboratory are among the many resources available to students. A state-of-the-art computer laboratory is available and a temporary animal housing facility also is present in the building. Examples of research equipment available to students include: laser light scattering, laser-induced fluorescence, scintillation and gamma counters, atomic spectroscopy, chromatography, brain mapping, and differential scanning calorimetry.

**Pharmacy, Doctor of (Pharm.D.)**

The school offers the Doctor of Pharmacy degree as a professional degree program. Students must complete a minimum of three years of prerequisite course work prior to admission. The Doctor of Pharmacy degree is awarded after four years of study.

**Accreditation and Complainant policy**

The Doctor of Pharmacy degree program at the Virginia Commonwealth University School of Pharmacy is fully accredited by the Accreditation Council for Pharmacy Education (ACPE), 20 North Clark Street, Suite 2500, Chicago, IL 60602-5109. Accreditation standards are available in the schools Office of Admissions and Student Services and via the ACPE Web site at www.acpe-accredit.org. Additionally, the school is a member of the American Association of Colleges of Pharmacy.

**Complainant policy**

ACPE has an obligation to assure itself that any institution that seeks accreditation status for its professional degree program conducts its affairs with honesty and frankness. Students who have complaints about the schools ability to meet accreditation standards or adhere to ACPE policies and procedures shall be submitted in writing to the Associate Dean for Admissions and Student Services, VCU School of Pharmacy, 410 North 12th Street, Room 155, Richmond, VA 23298-0581. The complainant is welcome to make an appointment to meet with school administrators to discuss his or her complaints and options for resolution. If they are not satisfied with the response by the school’s representative/s, then complainants may contact ACPE at 20 N. Clark Street, Suite 2500, Chicago, IL.
Three letters of reference are required. These include a reference from a science professor, a health professional (pharmacist preferred) and an employer.

A. Three letters of reference are required. These include a reference from a science professor, a health professional (pharmacist preferred) and an employer.

B. An official transcript from the student’s primary college and all colleges attended must be supplied. Applications are considered by the Admissions Committee only after transcripts on file show completion of no less than four semesters or six quarters of college work. When offered, an acceptance is contingent upon satisfactory completion of specific work that may be in progress.

C. Applicants must present the required credits in the following subject areas for a total of at least 90 semester hours.

<table>

Minimum 90

* One hour of lab in these subjects also preferred

D. Due to the importance of a strong biomedical science foundation for success in the Doctor of Pharmacy program, some or all of the courses listed below are recommended.

E. The electives will comprise a balanced program in social sciences, arts and humanities. Electives in computer science, economics, psychology and sociology are highly recommended. Others include political science, anthropology, history, foreign languages, philosophy and religious studies.

F. Credits earned through Advanced Placement Tests of the College Board or International Baccalaureate are not acceptable in meeting the total semester-hours requirement. Such AP credits may excuse a student from taking a specific non-science course such as English, but the credits must be made up through additional electives. AP credits in science (e.g., biology, chemistry) or mathematics (e.g., calculus) must be made up with courses in kind. Generally, this requirement is achieved by taking advanced-level courses (e.g., physical chemistry as a substitute for AP/IB credit in general chemistry).

G. Dual-credit courses taken during high school may be considered acceptable for transfer credit pending review of college transcripts.

H. Applicants must have earned a creditable average (C or better) overall, and in the courses specified, to meet minimum academic requirements for admission.

I. Applicants for admission must apply online through PharmCAS, a centralized application service for pharmacy schools. The PharmCAS Web site at www.pharmcas.org provides further details.

J. An on-campus interview is mandatory for admission consideration.

K. Applicants are required to take the Pharmacy College Admission Test (PCAT) before admission.

L. Applicants whose first language is not English should submit scores from the Test of English as a Foreign Language, the Test of Spoken English or other proof that their command of English is sufficient to allow successful completion of all requirements of the program.

M. Students are admitted only at the start of the academic year. An applicant must complete two full years of the academic prerequisites before an application can be reviewed. The Admissions Committee begins reviewing applications during September of the year preceding admission. It is to the applicant’s advantage to apply during the fall of the year before expected enrollment in the School of Pharmacy. Applicants are accepted pending satisfactory completion of all prerequisite courses. Notification usually occurs in early spring.

N. Prior to enrolling, successful applicants must meet the immunization requirements set forth in the “Professional study” section of this bulletin. Prior to entering the fourth professional year, students must satisfy all university immunization requirements.

O. Applicants exercising the early decision option for admission to the VCU School of Pharmacy must submit their fee and official transcript from all postsecondary institutions ever attended to PharmCAS by Aug. 31, 2008 and the electronic application by Sept. 3, 2008. Applicants whose materials are not received or whose applications are incomplete by these deadlines will be ineligible for the early decision option, and they will be deferred to regular admission status. Early decision applicants will receive an admission decision from the school by Oct. 24, 2008. Applicants exercising the early decision option are expected to make a commitment to attend the VCU School of Pharmacy if accepted. If an acceptance offer is not made under the early decision option, the applicant is then moved to regular admission status. Early decision applicants will receive an admission decision from the school by Oct. 24, 2008. Applicants exercising the early decision option are expected to make a commitment to attend the VCU School of Pharmacy if accepted. If an acceptance offer is not made under the early decision option, the applicant is then moved to regular admission status and continues to be evaluated for admission during the remainder of the admission cycle. The applicant is then free to apply to other schools of pharmacy under the regular admission procedure.

P. Applicants pursuing “regular admission” to the VCU School of Pharmacy must submit the electronic application, letters of reference and transcripts to PharmCAS by March 2, 2009. Applicants who do not meet these PharmCAS deadlines will be ineligible for fall 2009 admission to the VCU Doctor of Pharmacy degree program.

The following criteria are considered in judging applicants:
• College attended
• Academic workload carried
• College overall GPA
• Chemistry, biology and math proficiency
• Outside activities and achievements in high school and college
• PCAT scores
• Written and oral communication skills
• Extent of exposure to pharmacy practice
• Extent of exposure to other health disciplines
• Personal interview

Time demands for this full-time program are rigorous. In general, the first three years require a Monday – Friday (8 a.m. – 6 p.m.) commitment for lectures, conferences, laboratories and off-campus visits to area pharmacy practice sites. The fourth year is devoted to experiential learning at sites located throughout Virginia. Students enrolling in the four-year professional degree program must agree to the possibility of being assigned to sites beyond the Richmond metropolitan area (e.g., eastern, northern or western Virginia). Candidates must assess personal obligations prior to seeking application.

VCU does not discriminate against qualified applicants for admission who have disabilities, and seeks to provide reasonable accommodation to applicants and admitted students who identify themselves as having disabilities. Academic requirements essential to the program or to directly related licensing requirements will not be substituted. Upon acceptance into the program, students in need of accommodation may contact the MCV Campus coordinator for students with disabilities at (804) 828-9782 to discuss their needs.

Further information may be obtained by writing to the Chair, Admissions Committee, School of Pharmacy, Virginia Commonwealth University, P.O. Box 980581, Richmond, VA 23298-0581. Applicants also may call a toll-free telephone number, (888) 212-9287 for assistance.

Absences may be excused under certain conditions. Requests for excuses for attendance at laboratory and prelaboratory classes is mandatory. Students must take tests (e.g., quizzes, laboratory practicals, examinations) and complete all other assignments at the time designated by the course syllabus. Students who miss any test in any course without an excused absence from the dean's office will receive a grade of zero for the specific component in the successful acquisition of knowledge and skills required of students during the fourth year of the professional program must complete all required and elective advanced pharmacy practice experiential rotations at sites within the VCU School of Pharmacy system and the preceptor must have a current faculty appointment. Students are expected to discontinue any outside employment during the academic year. Students are not permitted to represent the school in extracurricular activities (e.g., representation at a local, regional or national association meeting, or other professional event). Students are expected to discontinue any outside employment during the academic year. Students are not permitted to represent the school in extracurricular activities (e.g., representation at a local, regional or national association meeting, or other professional event). Students are expected to discontinue any outside employment during the academic year. Students are not permitted to represent the school in extracurricular activities (e.g., representation at a local, regional or national association meeting, or other professional event). Students are expected to discontinue any outside employment during the academic year.

### Academic regulations

Matriculation in the School of Pharmacy implies a willingness on the part of students to comply with university rules and regulations and to conduct themselves in a manner befitting members of the profession the students seek to enter. The program of study and regulations regarding courses of study, student conduct, etc. are subject to modification without notice. All rules and regulations set forth in this bulletin, as well as other statements issued by administrative officers of the university, apply until further notice.

#### Probation

Students may be placed on probation by either the Admissions Committee or the Academic Performance Committee. Probation is a status indicating that the student’s scholarship is deficient and is expected to be improved to a level considered to be satisfactory by the faculty. Students who fail to meet probationary stipulations may expect to have their normal progress through school interrupted. They may be required to remediate course work in the summer, to repeat a year or to withdraw. Students on probation during the first three years of the professional program are neither allowed to hold an elected office in a student association nor be eligible for nomination as an officer in a student association. Students are not permitted to represent the school in extracurricular activities (e.g., representation at a local, regional or national association meeting, or other professional event). Students are expected to discontinue any outside employment during the academic year. Students are not permitted to represent the school in extracurricular activities (e.g., representation at a local, regional or national association meeting, or other professional event). Students are expected to discontinue any outside employment during the academic year. Students are not permitted to represent the school in extracurricular activities (e.g., representation at a local, regional or national association meeting, or other professional event). Students are expected to discontinue any outside employment during the academic year.

### Outside work

In general, the faculty believes that students should give first priority to their school work. Students able to maintain academic standing are not restricted with respect to outside employment. Students in academic difficulty will be advised to cease or drastically curtail any outside employment.

### Honor code

All students are governed by the honor code and regulations of the VCU Honor System. The VCU Honor System is based on the foundation that Virginia Commonwealth University recognizes that honesty, truth and integrity are values central to its mission as an institution of higher education. In a community devoted to learning, a foundation of honor must exist if that community is to thrive with respect and harmony. Therefore, members of the academic community are required to conduct themselves in accordance with the highest standards of academic honesty and integrity. Additional information is available at www.students.vcu.edu/judicialaffairs/honorfaqs.

#### Advising program

Students in the School of Pharmacy seek assistance with academic and personal problems through the school’s Office of Admissions and Student Services. Students are provided with information about accessing resources within the school, university and professional community. Also, faculty members serve as mentors to students throughout the four year curriculum.

There is a faculty adviser to the Interfraternity Council as well as an adviser for each of the professional pharmacy fraternities. Each of the student chapters of professional pharmacy organizations within the school also have a designated faculty adviser.

#### Attendance regulations

The following regulations apply specifically to students enrolled in the Doctor of Pharmacy program in all of their required and elective courses offered by departments in the School of Pharmacy.

1. The faculty considers class attendance at lectures to be an important component in the successful acquisition of knowledge and skills required of the Doctor of Pharmacy candidate. Students are strongly encouraged to attend all classes and conferences. An individual faculty member may require attendance in his or her course and establish penalties for those who are absent without an excuse from the dean’s office.

2. Attendance at laboratory and prelaboratory classes is mandatory. Students must complete all laboratory assignments before a passing grade can be assigned. An excused absence from the dean’s office is required for missing a laboratory or prelab class with the ability to make up the work with credit. Students without an approved absence are still required to make up the work but will not receive credit toward their course grade.

3. Students must take tests (e.g., quizzes, laboratory practicals, examinations) and complete all other assignments at the time designated by the course coordinator. Students must recognize that faculty may give unannounced tests at any time during a course, consistent with documentation in a course syllabus. Students who miss any test in any course without an excused absence from the dean’s office will receive a grade of zero for the specific test.

4. Attendance during each assigned clerkship period is mandatory. If a student is unable to attend to required clerkship responsibilities because of illness or other exceptional circumstances, the preceptor must be notified immediately. It is the responsibility of the student to also notify the clerkship coordinator concerning a plan to make up the absence, with the approval of the preceptor. Documentation of the absence and approval to make up the absent time will be maintained in the student’s record.

5. Absences may be excused under certain conditions. Requests for excuses for unavoidable absences must be submitted to the dean’s office, on an Absence Record form, within 24 hours of returning to the School of Pharmacy. The student must complete the Absence Record form with an explanation for the absence. Further explanation, if necessary, may be provided to the associate dean for admissions and student services. It is a violation of the honor code to make false or misleading statements on the Absence Record form. In the event of an unexcused absence, the student is responsible for all work missed.

6. A guiding principle in determining whether or not an absence will be excused is that the absence is caused by circumstances beyond the student’s control. The following are considered valid excuses for being absent from a class or clerkship.

   a. Illness, a medical emergency, a dental emergency. The school normally accepts the student’s judgment that the condition was serious enough to justify the absence from class; however, the school reserves the right to require a medical opinion, particularly if the period of absence is

* Course will be taught as a module.
Students are recommended and approved for the Doctor of Pharmacy degree by the faculty of the School of Pharmacy. Candidates must meet the following requirements:

1. Be of good moral character
2. Satisfactorily complete all the required work in a timely fashion, which will not normally exceed five years from the date of initial enrollment
3. Pay all fees
4. Complete the last year’s work for the degree in residence in this school
5. Be present at the commencement-related exercises unless excused in writing and in advance by the dean
6. Satisfactorily complete the minimum number of required advanced practice experience rotations and demonstrate the attainment of minimum competencies

Financial aid

See the Professional studies section of this bulletin.

Courses of instruction
Enrollment in courses included in the Doctor of Pharmacy curricula summarized on the preceding pages requires the approval of the dean of the School of Pharmacy unless the student has been admitted to the Doctor of Pharmacy Program.

**Combined Doctor of Pharmacy (Pharm.D.) and Master of Business Administration (M.B.A.)**

The Pharm.D./M.B.A. program seeks to prepare pharmacists for careers that encompass pharmacy and business theories and principles. The program is designed to take advantage of efficiencies and electives in both the Pharm.D. and M.B.A. programs. Students in the combined program can earn both degrees and save as much as one year or more over the time required for enrolling in the programs separately.

Students may be admitted in the program during their first year of enrollment in the Pharm.D. program. Applicants must be an enrolled student in the Pharm.D. program, have demonstrated a good academic record and have successfully completed the Graduate Management Admission Test (GMAT).

To get both degrees, students will take all pharmacy courses unless waived, the seven business foundation courses, the nine M.B.A. core courses and three elective courses. The elective M.B.A. courses may be taken from pharmacy administration courses at the 600 level, and a combination of a business seminar course and an elective advanced pharmacy practice experience in pharmacy management. The business foundation courses can be taken during the first two years in the pharmacy program with summer session(s). The M.B.A. core courses can be taken during the third and fourth years in the pharmacy program. The business electives can be taken during the fourth and fifth years in the combined program.

Students interested in pursuing the Pharm.D./Master of Business Administration dual degree program must first obtain admission to the Pharm.D. program. Admitted Pharm.D. students who desire to add the M.B.A. degree to their program then must apply to the M.B.A. program. Upon admission to the M.B.A. program, a Pharm.D. student will be considered a dual-degree seeking student. Students generally will register for a mix of School of Business courses and School of Pharmacy courses in their fourth, fifth and sixth semesters of the pharmacy program.

Students categorized as a Pharm.D. student will be charged tuition and fees from the School of Pharmacy and will be eligible to receive financial aid awards as a Pharm.D. student. When categorized M.B.A. (graduate) a student will be charged the graduate tuition and fee rate of the Monroe Park Campus and will be eligible to receive financial aid awards as a graduate student.

**Curriculum requirements**

To earn both degrees, students will complete the following requirements. For the Pharm.D. program, all required Pharm.D. prerequisite and required courses must be taken unless waived by the appropriate representative of the School of Pharmacy. For the M.B.A. program requirements, the foundation courses listed below must be taken. Courses may be waived for students who have taken the equivalent material at the undergraduate level.

- ACCT 507 Fundamentals of Accounting
- ECON 500 Concepts in Economics
- FIRE 520 Financial Concepts of Management
- MGMT 524 Statistical Elements of Quantitative Management
- MGMT 530 Fundamentals of the Legal Environment of Business
- MGMT 540 Management Theory and Practice
- MKTG 570 Concepts and Issues in Marketing

The following nine courses of the M.B.A. Advanced Program will be required for each student:

**Semester one:** (to be taken at same time)
- INFO 661 Information Systems for Managers
- MGMT 641 Organization Leadership and Project Team Management

**Semester two:** (to be taken at same time)
- MGMT 675 Operations Management 3
- One of the following courses: 3
- ECON 610 Managerial Economics
- INFO 644 Emerging Information Technologies
- MKTG 671 Marketing Management

**Remainder of the Advanced Program (including courses not taken in semester two)**

- ACCT 608 Managerial Accounting 3
- ECON 610 Managerial Economics 3
- FIRE 621 Cases in Financial Management 3
- INFO 664 Emerging Information Technologies 3
- MGMT 642 Business Policy (to be taken after completion of 15 credits of advanced program) 3
- MRBL 671 Marketing Management

**Electives**
- Three M.B.A. elective courses may be taken in the School of Business or by completing approved Pharm.D. electives and/or an applied pharmacy practice experience in pharmacy management, as individually approved by the director of graduate programs in the School of Business.

The key to successful completion of the Pharm.D./M.B.A. dual degree program will be timely and continuing advising from both the appropriate School of Pharmacy adviser and the director of graduate programs in the School of Business. For this reason, students are encouraged to seek admission to the dual degree program as early in their Pharm.D. program as possible.

**Combined Certificate in Aging Studies (Post-baccalaureate graduate certificate) and Doctor of Pharmacy (Pharm.D.)**
The Department of Gerontology in cooperation with the School of Pharmacy provides an opportunity for students in the Doctor of Pharmacy program to complete the certificate. This 21-credit program is designed to integrate the required independent study project in gerontology into the Pharm.D. curriculum’s clerkship assignment.

### Combined Doctor of Pharmacy (Pharm.D.) and Doctor of Philosophy (Ph.D.)

In their first two years (P-1 and P-2), the Pharm.D./Ph.D. students will complete the required Pharm.D. curriculum while attending research seminars, and possibly pursue graduate courses as electives. After admission into the graduate program, the students will take required graduate courses in lieu of Pharm.D. courses during their P-3 (G-1) year followed by graduate research during the summer. During their G-2 through G-4 years, the students will complete the graduate course requirements and their required Pharm.D. clerkships and work on their graduate research project. Stipends and tuition may be provided for students serving as graduate teaching or research assistants. During that period, the student will follow procedures prescribed to Ph.D. students in Pharmaceutical Sciences.

Students can focus on the following research areas within the School of Pharmacy: pharmacology, pharmacokinetics, biopharmaceutical analysis, pharmacokinetics/physical pharmacy, pharmacy administration and medicinal chemistry. Also, students may focus on the following research areas within the School of Medicine: pharmacology and toxicology. The choice of research area determines the required graduate course work.

The combined Pharm.D./Ph.D. program in the School of Pharmacy is a full-time program of professional education while offering an opportunity for advanced study in pharmaceutical sciences. The program recognizes the need for pharmacy practitioners with excellent research skills in clinical, academic, industrial and regulatory environments. The programs are designed to take advantage of efficiencies in both the Pharm.D. and the M.S. or Ph.D. programs, and allow students in the combined programs to complete the program requirements of both programs after five or six years with both degrees being awarded at the same graduation ceremony.

Students may be admitted into the program before or during their first two years of enrollment in the Pharm.D. program. Applicants must demonstrate a good academic record, experience in research (e.g., during summer research fellowships with the school’s graduate faculty) and successful completion of the Graduate Record Examination (GRE). Additionally, their application must be sponsored by a graduate faculty member.

### Combined Doctor of Pharmacy (Pharm.D.) and Master of Public Health (M.P.H.)

The School of Pharmacy and the Department of Epidemiology and Community Health in the School of Medicine offer a dual degree program that results in a Pharm.D. and M.P.H. This dual degree program offers students the opportunity to achieve a doctorate in pharmacy while also learning about research and the importance of population health. This five-year program requires students to spend their fourth year pursuing the M.P.H. degree and transition back to pharmacy for advanced practice experiences. The students will be required to take 36 of the 45 credits required for the M.P.H. The field study requirement will be satisfied by Pharm.D. special advanced practice experiences in community health during the fifth year of the program.

### Typical course plan for dual degree:

Ronald E. Polk
Professor and Department Chair
The oldest of its kind in the South, Virginia Commonwealth University’s School of Social Work was established in 1917 as the Richmond School of Social Economy. Later renamed the School of Social Work and Public Health, it became the first unit of Richmond Professional Institute. The school was created initially in response to community needs in working with World War I veterans and their social and health problems. Subsequent development of the school has expanded activity into all areas of human service.

With the creation of VCU in 1968, the School of Social Work became a unit of what is now the university’s Monroe Park Campus. The school offers baccalaureate-, master’s- and doctoral-level programs in Richmond, and the capital provides educational opportunities in many state government agencies. VCU’s School of Social Work also offers an off-campus M.S.W. program in Northern Virginia. Located in Alexandria, its proximity to Washington, D.C., allows additional field opportunities with federal agencies and national organizations.

Social work education at VCU is highly individualized and is characterized by a close relationship between faculty and students. Faculty members help students learn the form and method of social work practice, and students are encouraged to discover their own unique style of helping others. The school’s educational programs are designed to prepare students for practice in many different kinds of social agencies. A combination of classroom courses and concurrent fieldwork experiences facilitates integration of knowledge, attitudes and skills necessary for professional practice. The integrated class and fieldwork curriculum offers students the opportunity to acquire a substantial base in social work practice, patterns of human behavior and development, organization and operation of social welfare programs and policies, the methods of scientific inquiry in social work, and the needs of special populations.

The profession of social work

The goals of the profession of social work are to provide services to persons who are vulnerable due to a lack of personal, social and/or institutional resources to meet their emotional, health and economic needs. Social work practice is the application of professional knowledge, skills and values across a range of settings and populations. The focus of practice is on individuals, couples, families, groups and communities. In addition to direct clinical social work practice, social workers are involved in the administration of human service programs, social planning, the development of social policies, research and evaluation, and teaching.

In order to achieve the goals of promoting social justice and enhancing well-being for individuals, families, groups and communities, social workers provide a variety of services primarily in public and nonprofit organizational contexts. Examples of the range of settings in which social workers practice include community centers, public social services, child welfare, residential treatment facilities, schools, community mental health agencies, family and children’s service agencies, psychiatric and acute care hospitals, substance abuse treatment facilities, services for the elderly, court services and adult and juvenile rehabilitation facilities.

Professional education for social work practice dates to the early 1900s. The contributions of the profession are evidenced in health and mental health care, the well-being of children and families, the development and implementation of social policies, the planning, delivery and evaluation of human services, and a broad base of research on the human condition. The knowledge base of the profession and the integration of related social, behavioral and biological sciences acquired through professional education facilitates the contributions of social workers in multidisciplinary contexts.

Social work practice is designed to enrich quality of life by enabling individuals, groups, communities and organizations to achieve their greatest potential development. The goal of the School of Social Work at VCU is to provide professional education in response to these needs.

Accreditation

VCU’s Bachelor of Social Work and Master of Social Work programs are accredited by the Commission on Accreditation of the Council on Social Work Education — the accrediting body for all schools of social work at both the baccalaureate and master’s levels. Copies of the Accreditation Standards and Curriculum Policy Statement are available in the Office of the Dean.

Financial assistance

Although financial assistance is limited, some funds are available from a variety of sources. No prospective student should refrain from seeking admission to the school for financial reasons alone. Besides the federal financial aid programs outlined in the undergraduate or graduate study areas of the bulletin, the university and the school also offer scholarships and/or teaching assistanceships at all degree levels.

The H. H. Hibbs Loan Fund was established by the School of Social Work Alumni Association for short-term emergency needs. Enrolled students who wish to apply for a loan should discuss this with their faculty adviser and the associate dean.

For more information on these financial aid opportunities, visit the School of Social Work Web site at www.vcu.edu/slwweb/currentstudents/financial_support.html.

Continuing education

Continuing education is a vital part of professional development. The School of Social Work offers institutes and workshops as part of the school’s commitment to enhance social work practice and broaden educational experiences for students, social workers, field instructors and others in social service delivery systems.

State, regional and local agencies and institutions frequently identify educational and training needs in content or skill areas for selected staff members. The school, through contractual arrangements, contributes expertise in designing and implementing short-term training courses and materials.

Offerings are planned throughout the year. For further information about specific continuing education courses, visit the School of Social Work Web site at www.vcu.edu/slwweb/alumni/continuinged.html or address inquiries to the Director of Continuing Education, School of Social Work, Virginia Commonwealth University, 1001 W. Franklin St., Richmond, VA 23284-2027.

Associations and student interest groups

Alumni Association

The School of Social Work Alumni Association supports the school, its students and faculty. All graduates of the School of Social Work are members of the alumni association. The association falls under the umbrella of the VCU Alumni Association.

B.S.W. Student Association

The Baccalaureate Social Work Student Association, an organization of students in the Bachelor of Social Work Program, was established to facilitate communication among students and between the student body and the school faculty and staff. This organization plays a vital role in the educational process. Through student representation on committees within the school, BWSA...
members participate in decision-making processes. In addition, the association enables students to conduct a variety of social and professional activities throughout the year.

**M.S.W. Student Association**

The Master of Social Work Student Association is the organization of M.S.W. students enrolled in the school. Established for the purposes of facilitating communication among students and between the student body and the school, the association provides a means by which student concerns and ideas can be formulated and acted upon. It also enables students to conduct a variety of social, civic and educational activities throughout the year.

This organization plays a vital role in the educational process. Student contributions to the governance and curriculum of the school are of value to both the institution and the students. Participation in the decision-making process is accomplished through student representation on committees. Faculty and students work closely together throughout the year to meet the needs of graduate social work education. Students participate as full members of committees within the school.

**Association of Black Social Workers – VCU Chapter**

The Association of Black Social Workers was established to create and maintain an atmosphere of unity and support among black students in the School of Social Work. It serves to assist students in their personal and professional growth and development. Membership in this organization helps students to develop a keen awareness of the acute needs of the black community and the active role that must be assumed by the dedicated black professional social worker in promoting the general welfare of black citizens. To attain these goals, the organization utilizes the educational process and related experiences of students at the school and in fieldwork. Students are encouraged to participate in all phases of the academic environment.

**International Student Association (Northern Virginia Campus)**

The International Student Association provides a forum for discussion and serves as a resource for information regarding all aspects of international social work. The association sponsors lectures, speakers and open discussions. All students, faculty or alumni who are interested in international social work are invited to become members or to attend meetings.

**Doctoral Student Association**

The Doctoral Student Association is a collegial association available to all doctoral students regardless of full- or part-time status. Its primary purpose is to provide information, resources, advocacy and support to students throughout the doctoral program experience. Governance of the association is conducted on a rotating leadership and consensual basis. The Doctoral Student Association provides doctoral student representatives to various committees of the school governance structure.

**Other student interest groups**

The School of Social Work supports the development of groups that address a variety of student needs and interests.

**Social work courses**

Descriptions for all courses offered by the university may be accessed through the online courses database at www.pubapps.vcu.edu/vcucourses. You may search by subject or keyword, as well as by degree level.

Follow this link to undergraduate- and master’s-level social work (SLWK) courses.

This link will take you to a list doctoral-level courses in social work (SWKD).

**B.S.W. Program**

Humberto Fabelo
Director, B.S.W. Program
hfabelo@vcu.edu
(804) 828-0933

The B.S.W. Program administers the undergraduate offerings of the School of Social Work, including the Bachelor of Social Work and the minor in social welfare.

Guided by the principle of promoting social justice, the goals of the B.S.W. Program are:

1. To provide an integrated curriculum based on the knowledge, skills, ethics and values essential for beginning generalist social work practice.
2. To offer an educational experience that facilitates the critical analysis of social work knowledge and practice.
3. To provide classroom and field instruction experiences designed to promote culturally sensitive practice with diverse and oppressed groups.
4. To provide an environment that encourages lifelong learning and prepares students for professional growth and development.

**M.S.W. Program**

Special requirements:
If applying for off-campus, indicate location in item 5 on application

The school offers a graduate professional curriculum accredited by the Commission on Accreditation of the Council on Social Work Education leading to the Master of Social Work degree. The M.S.W. is offered on the Monroe Park Campus in Richmond and at an off-campus site in Northern Virginia.

The purpose of the M.S.W. program at VCU is to educate persons for advanced practice in either clinical social work or social work administration, planning and policy practice. The guiding principle in educating students is the promotion of a more just society that includes a commitment to the value of diversity and social work practice in a multicultural society. The VCU School of Social Work emphasizes critical thinking, self-awareness, data-based decision making and ethical integrity.

Graduates of this program will be able to address personal and social problems; formulate, implement and evaluate policies and programs; engage in knowledge development for the profession; and influence community decision making. The educational program focuses on service to and empowerment of people who
experience oppression or vulnerability due to inadequate or inequitable distribution of personal, social or institutional resources.

Within this context, social work practice is defined as the application of professional knowledge, skills and values across a range of settings and populations for the prevention and amelioration of personal and social problems. The interactions among persons and their environments are the primary targets of social work practice. Services provided by social workers include the restoration, rehabilitation, maintenance and enhancement of optimal functioning of individuals, families, groups, communities and organizations.

Knowledge for social work practice is based on analysis and critical application of qualitative and quantitative research from within the profession and related social, behavioral and biological sciences. Skill in professional practice is based on the differential application of theories and research findings about people in their sociocultural and organizational contexts. Skill is developed by the social worker through the educational process, self-critical practice and the use of supervision and consultation. Values in social work practice are articulated in the profession’s code of ethics and reflect the core values of service, social justice, dignity and worth of each individual, importance of human relationships, integrity, and competence.

**Admission**

Full-time or structured part-time program applicants are admitted to begin study in the fall semester only. Advanced standing program applicants are admitted for the summer session only. At the time of application, applicants may apply for only one of the following: full time on-campus Richmond, full time off-campus Northern Virginia, part time on-campus Richmond, part time off-campus Northern Virginia, or advanced standing. Application deadlines are Feb. 1 for full-time or part-time programs and Dec. 1 for the Advanced Standing Program. Application forms and instructions for applying to all graduate programs are available on the Graduate School Web site at www.graduate.vcu.edu/admission/prospective/
domestic.

**General admission requirements**

Within the policies established by the University Graduate Council, the School of Social Work has established the following minimum criteria for admission to the 60-credit full-time or part-time program:

- A bachelor’s degree from an accredited college or university.
- A cumulative GPA of 2.7 on a 4.0 scale for all undergraduate course work and a 3.0 (“B”) for the last 60 credits.
- A broad liberal arts background. Applicants must have completed a minimum of 30 semester credits in the liberal arts. Applicants must have completed at least one course (unless otherwise specified) in each of the following four areas:
  - Humanities: English composition, literature, art history, music appreciation, philosophy, languages, religious studies, multicultural studies.
  - Social and behavioral sciences: psychology, sociology, anthropology, history, political science, economics (with at least three credits in psychology and three credits in sociology).
  - Biology and physical sciences: anatomy/physiology, botany, general biology, zoology, chemistry, ecology, physics, geology, astronomy (with a minimum of three credits in human biology content).

Applicants who have not completed all the liberal arts prerequisites may be considered for admission but must have completed the prerequisite courses prior to enrollment and must provide official transcripts to document their completion. Courses may be completed at a community college or four-year institution. In addition to the academic requirements, the applicant must demonstrate commitment to social welfare and social justice. This should be reflected in (1) the personal statement and (2) the applicant’s academic background, social work employment, internships and volunteer work in community agencies serving vulnerable and/or oppressed populations.

**General admission procedures**

Applications will be reviewed when they are complete. This includes the application form, three letters of reference (such as from faculty, employers, colleagues who know the applicant’s academic and work/volunteer abilities), official transcripts from all undergraduate and graduate colleges and universities attended, a personal statement and an employment and volunteer experience resume. The applicant is responsible for ensuring that all materials are submitted prior to the application deadline. Applicants are encouraged to submit their materials well before the deadline.

Some early decisions will be made on very strong applications; the majority of decisions will be made after the application deadline when the entire applicant pool can be considered. The admission review process includes faculty, practitioner, and administrative review of the applications. Reviewers consider scholarship ability, academic background, writing skills, work and volunteer experience, and personal qualities that indicate potential to meet the requirements of the social work profession. The school is particularly committed to ensuring a student population that reflects the multicultural and diverse nature of American society.

**Admission to the Advanced Standing Program**

The Advanced Standing Program leads to a Master of Social Work degree upon completion of 39 credit hours. The program begins in early June, continues through the summer, and culminates with graduation the following May. The Advanced Standing Program is a full-time program only and cannot be pursued on a part-time basis.

**Transfer admits**

Applicants transferring from other CSWE-accredited M.S.W. programs must submit course syllabi, field practicum evaluations and a Statement of Good Standing from the dean or director of the program from which the student is transferring. These materials must be submitted in addition to the required application form, transcripts, personal statement, resume and reference letters. No more than 30 semester credits will be accepted in transfer, and transfer credit will be awarded in accordance with university policies governing transfer credit and time limits for degree completion.

Applicants transferring from other CSWE-accredited M.S.W. programs must submit course syllabi for transfer evaluation. A maximum of six semester credits of elective course work may be accepted in transfer from non-social work graduate programs in accordance with university policies governing transfer credit and time limits for degree completion. No course credit is given for life or work experience.

**Course waiver information for new M.S.W. students**

Students may request to be waived from courses in the M.S.W. program if they can demonstrate they have satisfactorily completed the equivalent courses. Students must present evidence of content equivalency to the M.S.W. program director and have earned an “A” or “B” grade in the courses that are the basis for the waiver request; these courses must have been completed within the last five years. A portfolio process is used to assess equivalency. Graduate students from non-M.S.W. programs, from B.S.W. programs but not in the Advanced Standing Program, and from B.A., B.S. or other undergraduate programs may be waived from no more than three foundation courses:

SLWK 609 Foundations of Research in Social Work Practice
SLWK 601 and 610 Human Behavior in the Social Environment I and II

The course waiver does not result in award of credit. Credit may be awarded only through transfer of graduate courses (see Transfer Policy). Students who are
granted waivers but not transfer credits must take elective courses to fulfill the number of credits that have been waived.

Students interested in pursuing a waiver for one or more of the specified foundation courses should contact the M.S.W. Program Office to request the Equivalency Portfolio Form(s) and instructions. Additional information concerning course waivers is available online: www.vcu.edu/slwweb/admissions/msw.html.

**Special admits**

Special admission may be granted to applicants whose GPA does not meet the minimum requirements, but who have strong practice-related experience and other exceptional qualifications. Although the GRE is not required, applicants may submit GRE scores or transcripts reflecting graduate course work completed to provide information on their capability for graduate study. Applicants admitted as provisional students (with GPAs below 2.7) must complete the first 12 credits in the program with a GPA of 3.0 or better and meet with their adviser at least three times during their first semester in the program.

**Degree requirements**

The regular standing M.S.W. degree requires the completion of 60 credits of graduate study (two years of full-time study). The first 30 credits (foundation curriculum) may be taken in one academic year on a full-time basis or may be extended to a maximum of two years in the structured part-time program in Richmond and Northern Virginia. Students select an area of concentration for the last 30 credits, which can be completed in one academic year on a full-time basis or extended to a maximum of two years in the structured part-time program. Students are usually in a field instruction practicum two days each week during the foundation curriculum and three days each week during the concentration curriculum. Students must complete all required course work for the M.S.W. degree; however, modifications to the structure of the curriculum can be made for students with special learning needs.

Course credit for work or life experience is not granted in lieu of M.S.W. course credits.

**M.S.W. curriculum**

The purpose of the Master of Social Work Program is to prepare graduate-level social workers with mastery of the knowledge, values and skills essential for advanced social work practice in a multicultural society. The school accomplishes this purpose through its full- and part-time programs of study for the M.S.W. degree in its on- and off-campus locations. The objectives of the M.S.W. Program are to:

- Provide a foundation curriculum of the knowledge, skills, ethics and values essential for work with individuals, families, groups, communities and organizations.
- Provide a concentration curriculum preparing students for advanced practice in either clinical social work practice or social work administration, planning and policy practice in a range of settings.
- Promote students’ adherence to and application of the profession’s values and ethical principles.
- Promote students’ understanding of the implications of diversity by educating them to identify cultural strengths and counteract individual and institutional prejudice, oppression and discrimination.
- Enable students to use research methods to analyze and critically evaluate professional practice, programs and service delivery systems.
- Promote students’ understanding of advocacy and involvement in advocacy to effect social and economic justice.
- Provide a learning environment that instills in students a commitment to continued learning and self-critical practice.

**The foundation**

The foundation curriculum comprises the first 30 credits of the M.S.W. program. The purpose of the foundation practice, in laying the groundwork for concentration study, is to develop the knowledge and skill base necessary to apply and carry out core competencies (relationship building, problem identification, assessment, selecting and planning interventions, implementation, and evaluation) with individuals, families, groups, communities and organizations. Foundation practice emphasizes critical thinking, client strengths, commitment to social work values and ethical principles, self-awareness, professional development, evidence-based decision making, multicultural competency, and social and economic justice. The foundation curriculum includes courses in social work practice, human behavior, social policy, social justice, research and field instruction.

**Concentration options**

After completion of the foundation year of study, M.S.W. students choose an advanced concentration in either clinical social work practice or social work administration, planning and policy practice. The concentration curriculum prepares graduates for active roles in practice and program evaluation and in the generation of knowledge for future practice, programs and policy.

Both concentration options are available in Richmond and the clinical concentration is available at the Northern Virginia off-campus site. Northern Virginia students can complete the SWAPP concentration by attending classes one to two days a week in Richmond with a field agency placement in the greater D.C. area.

**Clinical social work practice concentration**

Clinical social work practice involves a mutual problem-solving process in which multidimensional assessment, goal setting, planned intervention and evaluation are prominent components, all of which are informed by current scientific knowledge. All clinical practice is grounded in the values and purposes of the social work profession. The goal of clinical social work is to promote effective coping with life challenges and transitions. This is achieved by helping people solve problems, change dysfunctional behavior, resolve emotional and interpersonal conflicts, develop and use social networks and resources and maintain achieved capacities and strengths. This goal rests on the fundamental belief in the dignity of all human beings and in communal responsibility for all members of the multicultural society.

Clinical social work practice takes place in the context of a purposeful relationship. The conscious use of the professional self is central in building and maintaining such relationships. Interventions may involve therapeutic, supportive, educational and resource management activities. These interventions are based on a process of strengthening and reordering of organizational structures in the lives of clients: intrapersonal (including intrapsychic), interpersonal, institutional and/or social.

**SWAPP concentration**

The Social Work Administration, Planning and Policy Practice concentration prepares graduates to become leaders skilled in analyzing, formulating, implementing and evaluating policies, plans and programs. The knowledge, values and skills that are taught emphasize current theory and research through classroom and field-based experiences. Practice takes place in the context of a complex, changing environment in which communities and governmental, legislative, nonprofit and for-profit organizations advocate for, plan, and deliver social services and advocate for social change. The major themes within the integrated curriculum are social and economic justice, diversity, leadership, and advocacy.

**Field instruction**

Field instruction courses are an integral part of the curriculum of the School of Social Work. Academic credit is awarded for field instruction hours completed in a community agency under professional supervision. In the first field placement, students are expected to demonstrate in practice the professional knowledge, values and skills studied in the total foundation curriculum.

In the concentration component of the curriculum, students are placed in agencies according to their chosen concentration (clinical social work practice or social work planning and administrative practice) and their career interests. Examples of such agencies are: public social services, community mental health centers, hospitals, substance abuse treatment programs, schools, family and children’s services, and correctional facilities.

Part-time students planning to take either foundation or concentration field instruction (two semester or block option) must request placement in writing one full semester prior to the semester or summer in which they plan to begin field instruction. Such requests are to be addressed to the director of field instruction. Only one placement (foundation or concentration) may be taken in a block and the block placement option is only for students in the structured part-time program. Exceptions are sometimes granted for students with special learning needs.

Field instruction placements are generally available throughout Virginia, Washington, D.C. and in some neighboring states. Students residing in a
community outside of Richmond may request field placement in their home community. Granting of the request depends on availability of appropriate resources. Students are, however, placed in agencies for field instruction primarily on the basis of curriculum requirements. Therefore, a number of students usually are placed in agencies a distance from Richmond (or their residence). Access to a car is essential and arrangements for travel must be made by students at their own expense.

Students may propose to complete one of their two field placements in their social work agency of employment. The proposal form may be obtained from the Field Department Office and the plan must meet the school’s educational requirements. This option is not available to Advanced Standing Program students who complete only one field placement during their three semesters in the program.

Credit for work or life experience is not granted in lieu of field instruction course credits.

**Structured part-time study for the Master of Social Work degree**

The school offers a structured part-time program leading to the M.S.W. degree on the Richmond campus and at its off-campus site in Northern Virginia. Students applying for the structured part-time program must: meet the same criteria for admission as full-time students; be admitted to the university prior to enrolling in any courses in the structured part-time program; and begin the program in the fall semester only. Students in the structured part-time program also must complete six credits each fall and spring semester and are expected to complete all requirements for the degree within a four-year period, making full-time work very difficult. The structured part-time program cannot be completed entirely in night or weekend study, given field practicum requirements and the scheduling of some courses. With the exception of the field practicum, foundation courses required in the structured part-time program are available in the evening (4 and 7 p.m. classes). Students may take the concentration curriculum (last 30 credits) on a structured part-time or full-time basis at the Northern Virginia off-campus site or on campus in Richmond.

**Curriculum exceptions**

Students must complete all required course work for the M.S.W. degree; however, modifications to the structure of the curriculum may be requested by students with special learning needs. VCU has an Office of Services for Students with Disabilities. They work with students to determine academic adjustments that may be needed. They can be reached by calling (804) 828-2253 (VTDD). Students with disabilities also may call the director of student services in the School of Social Work, (804) 828-0703, to discuss their particular learning needs. The director of student services in the School of Social Work works with these students to determine potential curriculum options.

**Academic status**

A minimum GPA of 3.0 ("B") on a 4.0 scale over the entire period of study, a minimum of 60 credits in the two-year and part-time options, or 39 credits in the Advanced Standing Program, demonstrated ability in social work practice and acceptable professional behavior are required for graduation with a Master of Social Work degree.

Students must achieve a GPA of 3.0 or higher in the required foundation courses, exclusive of field instruction practicum, in order to continue in concentration study.

A student whose cumulative GPA is less than 3.0 at any point in the program after completion of the first 12 credits will be dropped from the program.

A student who receives any grade of “D” or “F” will be dropped automatically from the program without regard to GPA.

A student who earns a grade of “C” or below in more than six credits, exclusive of field instruction, will be dropped automatically and immediately from the program without regard to GPA.

Field practicum performance is graded on a pass/fail basis. The student must receive a grade of pass to continue in the program. The student who receives a grade of fail in the field practicum is dropped automatically and immediately from the program without regard to GPA.

A student who is dropped from the Master of Social Work program may petition the dean of the School of Social Work in writing for readmission to the program after a minimum absence of two semesters; readmission is not guaranteed. A student may be readmitted only once.

**M.S.W course requirements**

All students complete the same course requirements for the foundation curriculum prior to entering concentration courses. Concentration study varies according to the student’s choice of method.

M.S.W./Certificate and dual degree options

Study in the M.S.W. program combined with study in other programs or subjects can lead to students earning special certificates or additional degrees. The M.S.W. with certificate option is offered in combination with aging studies, gender violence intervention, interdisciplinary early childhood intervention and nonprofit management, as well as social work certification. Dual degree study combines the M.S.W. with law, public health, and divinity or Christian education. The certificate in aging studies and certification for school social work practice options are offered at both the Richmond and Northern Virginia campuses. Other options are available only in Richmond.

Combined Master of Social Work (M.S.W.) and Certificate in Aging Studies (Post-baccalaureate graduate certificate)

See the individual program pages for admission requirements specific to the separate degrees.

The School of Social Work in cooperation with the Department of Gerontology of the School of Allied Health Professions of VCU provides students with a unique educational opportunity in social work and gerontology. Master of Social Work students interested in work with elders or in gerontological programs may earn a Certificate in Aging Studies while completing the master’s degree requirements. Students must meet the admission requirements of the Master of Social Work program of the School of Social Work and of the Certificate in Aging Studies program in the Department of Gerontology, School of Allied Health Professions. Admission into one program does not guarantee admission into the other. In order to meet the requirements of the M.S.W. degree and the Certificate in Aging Studies, students complete a total of 65 graduate credits. All foundation and concentration courses of the Master of Social Work Program are completed, and core courses (nine credits) of the Certificate in Aging Studies Program are completed. Other requirements are met by (1) completion of M.S.W. research courses in which students undertake a project focused on aging, (2) completion of second-year field instruction practicum requirements (six credits) in a social work setting related to aging, (3) completion of an independent study course in gerontology, which integrates research and practicum courses. Additional information may be obtained from either of the following offices:

Combined Master of Social Work (M.S.W.) and Certificate in Gender Violence Intervention (Post-baccalaureate graduate certificate)

See the individual program pages for admission requirements specific to the separate degrees.

The certificate in Gender Violence Intervention is a collaborative effort between the Department of Sociology and other departments and programs at VCU, as well as community advocates working in the area of sexual and domestic violence. The certificate requires a total of 18 credit hours comprised of five required courses in the Department of Sociology and one elective.

Through a cooperative arrangement with VCU’s Department of Sociology, M.S.W. students may simultaneously earn this graduate certificate by completing two certificate-specific courses that also satisfy the elective requirements in the M.S.W. program: SOCY 510 Sexual and Domestic Violence in Social Context and SOCY 635 Theorizing Gender Violence. M.S.W. courses satisfy the other certificate requirements as follows:

<table>

</tr>
</tbody>
</table>

Students must meet the admission requirements of the Master of Social Work program of the School of Social Work and the Certificate in Gender Violence Intervention in the Department of Sociology.

Additional information may be obtained from the School of Social Work Web site at www.vcu.edu/slwweb or by writing:

School of Social Work
Virginia Commonwealth University
1001 West Franklin Street
P.O. Box 842027
Richmond, Virginia 23284-2027
Attention: M.S.W.-Gender Violence Intervention Certificate Adviser
Combined Master of Social Work (M.S.W.) and Certificate in Interdisciplinary Early Childhood Intervention

See the individual program pages for admission requirements specific to the separate degrees.

This certificate is offered by the School of Education, Project Metro Ready. Built on a strong base of advanced professional course and clinical work, students will be prepared to intervene with families and their children under the age of five who are at risk or have been identified with developmental disabilities.

In this certificate program M.S.W. students complete 60 credit hours of course work, including specialized courses in interdisciplinary work. The certificate requires that students complete a clinical concentration practicum placement in an approved infant/early childhood field site and a family mentorship experience.

Additional information may be obtained from the School of Social Work Web site at www.vcu.edu/slwweb or by writing:

School of Social Work
Virginia Commonwealth University
1001 W. Franklin St.
Richmond, VA 23284-2027
Attention: Early Childhood Intervention Certificate Adviser

Combined Master of Social Work (M.S.W.) and Certificate in Nonprofit Management (Post-baccalaureate graduate certificate)

See the individual program pages for admission requirements specific to the separate degrees.

Students seeking a Master of Social Work may pursue a Certificate in Nonprofit Management through Virginia Commonwealth University’s L. Douglas Wilder School of Government and Public Affairs.

Through a cooperative arrangement with the L. Douglas Wilder School of Government and Public Affairs, M.S.W. students pursuing the Social Work Administration, Planning and Policy Practice (SWAPPP) concentration may simultaneously earn the graduate certificate in nonprofit management offered by the L. Douglas Wilder School of Government and Public Affairs.

Certificate requirements for M.S.W. students

Social work SWAPPP concentration students are required to complete three nonprofit courses: PADM 656 Fund Development for the Nonprofit Sector (fall course); PADM 659 Financial Management for Nonprofit Organizations (spring course); and PADM 661 Nonprofit Law, Governance and Ethics (summer course) in the L. Douglas Wilder School of Government and Public Affairs.

Two social work SWAPPP courses are substituted for six credit hours of the certificate’s 15 credit hour requirement. One of these courses is SLWK 712 Social Work Planning and Administrative Practice I. The second course can be SLWK 711 Strategies for Social Work Planning and Administrative Practice or SLWK 713 Social Work Planning and Administrative Practice II.

M.S.W. clinical concentration students must complete 15 course credits in nonprofit management. Six of the PADM nonprofit credits will satisfy the M.S.W. elective requirement for either concentration.

Application process

To earn the Certificate in Nonprofit Management simultaneously with the M.S.W., it is necessary to complete a graduate school application for the certificate program; however, no supporting documents are required for students who are already enrolled in good standing in the social work master’s degree program.

Additional information may be obtained from the School of Social Work Web site at: www.vcu.edu/slwweb or by writing:

School of Social Work
Virginia Commonwealth University
1001 W. Franklin Street
Richmond, Virginia 23284-2027
Attention: Certificate in Nonprofit Management Adviser

Detailed information about the Certificate in Nonprofit Management can be obtained from Dr. Janet Hutchinson, associate professor and director of the Master of Public Administration program, (804) 828-8041 or e-mail: jhutch@vcu.edu.

Combined Master of Social Work (M.S.W.) and certification for school social work practice

See the individual program pages for admission requirements specific to the separate degrees.

Through a collaborative arrangement with the VCU School of Education, students may meet Virginia Department of Education standards for certification as school social workers in Virginia in addition to meeting requirements for the M.S.W. degree. Students interested in certification in school social work should contact their adviser during the first semester of their program. In order to meet the requirements of the M.S.W. degree and the School Social Work certification option, students complete a total of 63 graduate credits including six credit hours of approved graduate courses in education.

Additional information may be obtained from the School of Social Work Web site at www.vcu.edu/slwweb or by writing:

School of Social Work
Virginia Commonwealth University
1001 W. Franklin St.
Richmond, VA 23284-2027
Attention: Certificate for School Social Work Adviser

Combined Master of Social Work (M.S.W.) and Juris Doctor (J.D.)

Through a cooperative arrangement with the T. C. Williams Law School, selected students in either school may pursue a combined four-year curriculum of graduate study leading to the degrees of Master of Social Work and Juris Doctor. The program is established in recognition of the role of public law in social and economic life. The dual degree program prepares professionals versed in the values, knowledge and skills of both fields, bringing an integrated base of competency to the resolution of human and social problems.

Applicants must successfully meet the admission requirements of both schools and upon admission are assigned an adviser in each school. Students in dual degree study may begin the course work in either school, with the sequence of courses being determined by the point of entry.

The time normally required for completion of the integrated four-year curriculum is one academic year less than if each degree were taken separately. Elective courses will enable students to select areas in law and in social work which meet their particular interests. Application for admission must be made to each institution separately. Those interested should write both the Admissions Office of the T. C. Williams Law School, University of Richmond, VA 23173 and the Graduate School, Virginia Commonwealth University, Richmond, VA 23298-0568.

Combined Master of Social Work (M.S.W.) and Master of Arts in Christian Education (M.A.)

Cooperative program with Union Theological Seminary and the Presbyterian School of Christian Education (Union-PSCE)

This program has been developed to prepare social workers for service in church-related social services and institutions, for planning and working in inner city settings, and for other ministries. Counseling, group work and educational skills are components of both programs.

This program requires three continuous years of study and leads to a Master of Arts degree conferred by the Union Theological Seminary and Presbyterian School of Christian Education, and a Master of Social Work degree from VCU. Typically, a student completes the first year at Union-PSCE, followed by two years at the VCU School of Social Work. In the final semester at VCU, students complete an integrative seminar at Union-PSCE. Both degrees are awarded at the end of the three years of study.

Application for admission must be made to each institution separately. Those interested should write both the Graduation School, Virginia Commonwealth University, Richmond, VA 23284-3051, and Director of Admissions, Union-PSCE, 1205 Palmyra Ave., Richmond, VA 23227.
Combined Master of Social Work (M.S.W.) and Master of Divinity (M.Div.)

This four-year professional degree program is offered by Virginia Commonwealth University in cooperation with Richmond Theological Consortium schools that include Union-Presbyterian School of Christian Education, Baptist Theological Seminary at Richmond, and Samuel DeWitt Proctor School of Theology at Virginia Union University. The purpose of the dual degree program is to prepare students for service in occupations where social work and the church’s ministries intersect; to enable social workers to perform and evaluate social work practices as they relate to biblical, theological, ethical, educational and pastoral perspectives; and equip graduates for various forms of ministry in which clinical and administrative skills in social work are critical.

This program requires four continuous years of study and leads to a Master of Social Work degree conferred by VCU and a Master of Divinity degree conferred by Union-PSCE, BTSR or STVU. Permission for part-time study must be given by the dual degree adviser at VCU and the appropriate theological school dean of faculty. All degree requirements must be completed within seven years of matriculation. Students can apply simultaneously to both programs and begin study at either institution following the approved curriculum plan; or, a student may begin at either VCU or the seminary and then apply for admission to the other school during the first year of study in accordance with application deadline dates.

The M.S.W. requires 60 credits that include the required integrating seminar and one course transferred from the seminary to satisfy a three-credit M.S.W. elective requirement. The integrative seminar is taken in the final year of study and is taught by a member of the VCU School of Social Work faculty and a member of a faculty of an RTC school. The seminar enables the student to integrate theoretical, social justice, empirical, ethical and practical dimensions of social work with the biblical, theological, educational and pastoral perspectives.

Prospective students apply to the VCU School of Social Work and one of the participating theological schools, must meet both sets of admission standards, and be accepted into both programs. For the M.S.W. program, refer to the “Admission to the master’s degree program” section. For information about admission to an RTC master of divinity program, contact one of the following schools:

Baptist Theological Seminary at Richmond
3400 Brook Road
Richmond, VA 23286-3446
Telephone: (804) 345-BTSTR (2877)

Samuel DeWitt Proctor School of Theology
1500 N. Lombardy St.
Richmond, VA 23220
Telephone: (804) 257-5715

Union Theological Seminary and Presbyterian School of Christian Education
3401 Brook Road
Richmond, VA 23227
Telephone: (804) 278-4230
Toll free: (800) 229-2990

For information about the M.S.W./M.Div. program, contact the associate dean for student and academic affairs, 1001 W. Franklin St., Richmond, VA 23284-2027; (804) 828-0408. M.S.W. program applications can be obtained from the VCU Graduate School Web site at www.graduates.vcu.edu/admission/prospective/dominic.

Combined Master of Social Work (M.S.W.) and Master of Public Health (M.P.H.)

See the individual program pages for admission requirements specific to the separate degrees.

Through a collaborative program between the VCU School of Social Work and the Department of Epidemiology and Community Health in the School of Medicine, students complete a three-year full-time program of study, including summer course work, to obtain the Master of Social Work and Master of Public Health degrees. The purpose of this dual-degree program is to prepare graduates to work with individuals, families, groups, communities and/or organizations; advocate for social, health care and economic justice in a diverse and multicultural society; and promote physical and mental health across the life course.

Prospective students are required to apply separately to both programs through the Graduate School and must meet both sets of admission requirements. Once admitted to both programs, the student is assigned an adviser from each to develop a plan of study, typically starting with the M.S.W. course work. It is preferable that students apply to both programs at the same time so that the structured dual-degree curriculum can be optimally planned. Students in one program may also apply to the second program during the first year of study. After admission to both programs, students are assigned an adviser from each to develop a plan of study.

Students are required to complete a minimum of 45 M.S.W. credits and a minimum of 33 M.P.H. credits, for a total of 78 semester credit hours. During the third and last year of study, the dual-degree students are placed in internships through the School of Social Work that focus on public health; the program is approved by both the M.P.H. program director and the director of social work field instruction. A final research project that examines a relevant public health topic is required for the M.P.H.

Special requirements: In addition to GRE General test, applicants must submit a writing sample.

VCU’s Ph.D. in Social Work Program is a research-oriented educational enterprise with a mission to develop scholars and leaders for education and practice in human services. Its vision is a program that builds and nurtures students’ intellectual curiosity, creativity and courage, as well as their desire to “make a difference.” The program is built around excellence in teaching, mentorship and socialization of students, as well as collaborative involvement in the program by its diverse faculty. Graduates of the program become active in teaching, consultation, research, practice and program evaluation, staff and program development, policy analysis, and advocacy. They are employed in universities and colleges, and in human service organizations and agencies at the local, state, national and international levels. In all the program’s activities and events, emphasis is placed on the following areas:

- The development of an intellectual community that values critical and creative thinking.
- The connections among the philosophy of science, theory, research and practice.
- The analysis and integration of knowledge and values, especially their relevance to diverse populations and issues of social justice.

Educational objectives

The program’s specific educational objectives are achieved and demonstrated by the students through a number of formal and informal mechanisms: required and elective course work, independent study and directed research, a comprehensive exam process, and the dissertation process. The objectives are as follows:

- A critical understanding of multiple paradigms in the philosophy of science and the implications of these for contemporary research.
- Mastery of a range of research methodologies and data analysis strategies, and competence in conducting independent inquiry on issues of importance to the field.
- Competence in the analysis and application of a wide range of social, behavioral and practice theories.
- An ability to design and propose theoretically and empirically grounded models of social work intervention for coping with personal transitions and challenges, addressing social problems, and promoting equity and social justice.
- A critical understanding of the historical place of social work and social welfare in the evolution of social thought and cultural values.
- Expertise in a chosen substantive area related to social work, including skills related to dissemination of this knowledge.

Admission

Applicants to the program must have an earned master’s degree in social work or a closely related discipline and professional or practice-related experience relevant to their career goals. The relationship between the applicant's professional experience and her/his career objectives should be clearly articulated in the personal statement submitted with the application materials.

Applicants whose career goals include teaching in a bachelor’s- and/or master’s-level social work program should be aware that an M.S.W. degree and practice experience, along with the Ph.D., are often considered to be minimal job requirements. In addition, Council on Social Work Education accreditation standards currently require that individuals who want to teach practice courses in particular must have an M.S.W. and at least two years of post-M.S.W. practice experience.

The Graduate Record Examination taken within the past five years is required of all applicants. A combined score of 1,000 or higher on the verbal and quantitative sections is expected. Applicants with combined scores of less than that may wish to retake the GRE before submitting their scores. However, applicants should also be aware that GREs are only part of the application folder and are weighed along with other aspects of the applicant’s credentials.

Applicants for full-time and part-time study are judged by the same criteria. While it is possible to combine a limited amount of course work with outside employment, all students must complete at least one year of full-time study prior to admission to candidacy.

For application materials, contact: Dr. Kia J. Bentley, Doctoral Program Director, School of Social Work, P.O. Box 842027, Virginia Commonwealth University, 1001 W. Franklin St., Richmond, VA 23284-2027; e-mail kbentley@vcu.edu.

Curriculum

A minimum of 38 credit hours of course work beyond the master’s degree plus a minimum of 16 credit hours of dissertation research is required. The course work includes 26 credit hours of content common for all students, and 12 credit hours of concentration content in a substantive area. The Graduate School requirements for candidacy exams and dissertation committees apply to students in this program. Up to six credit hours may be granted for courses completed at another university. Full-time students ordinarily complete 18-20 credit hours per academic year. Other requirements are detailed below.

Common curriculum

Curriculum that is required of all students consists of the following courses (26 credits):

- SWKD 701 Quantitative Research Methods and Analysis I
- SWKD 702 Quantitative Research Methods and Analysis II
- SWKD 703 Philosophical Issues in Social Work Knowledge Building
- SWKD 704 Multiparadigmatic Qualitative Methods and Analysis
- SWKD 705 Multivariate Analysis in Social Work and Human Services Research
- SWKD 708 Social Science Foundations for Social Work
- SWKD 710 Social Work, Social Welfare and Social Thought
- SWKD 715 Development and Evaluation of Social Work Practice Theories and Models

Note: Many courses in the common curriculum are completed prior to moving onto more specialized concentration course work.

Concentration curriculum

The concentration curriculum allows students to specialize in a substantive area and increase their relevant research skills. This concentration consists of at least 15 hours of course work, including advanced statistics and research courses, and a directed research course designed to assist students in preparing for their dissertation research project. In addition to courses offered by the program, students are expected to enroll in appropriate courses in other schools and departments of the university with approval of their adviser.
Comprehensive exam/admission to candidacy
Upon completion of all required course work, participants will take a comprehensive exam under the supervision of a Comprehensive Examination Committee. Through the comprehensive examination, students must demonstrate the ability to integrate the whole of their educational experience by adequately addressing complex questions pertinent to the current and developing knowledge base of the human service field. Successful completion of the comprehensive exam results in candidacy status for the Ph.D. degree.

Dissertation
After admission to candidacy, students proceed to propose, complete and defend their dissertation. This is done under the supervision of a dissertation committee. Students are required to maintain continuous enrollment of at least three credit hours per semester (excluding summer) until they have attained 12 hours of dissertation credit, after which they may enroll for as few as one credit per semester. The dissertation must represent independent research and should be based on an original question or hypothesis relevant to social work. Successful defense of the dissertation completes the requirements for the degree.
VCU entered a new era when it implemented, as one of its highest priorities, a new university-wide matrix academic organization called VCU Life Sciences, created in response to the need to prepare students for the anticipated growth in new life sciences jobs in the coming decades. The skills identified for these jobs require highly interdisciplinary or multidisciplinary approaches, often falling between the boundaries of traditional academic disciplines. The way that the life sciences are understood and taught is likely to be fundamentally different, with increasing emphasis on systems biosciences as an important complement to more traditional, purely reductive approaches. The objective of Phase II of VCU’s strategic plan specifically outlines the need to bring VCU’s major academic and administrative divisions together to work on mutual initiatives that will accomplish VCU’s goal of national leadership. VCU Life Sciences is a response to that objective.

Faculty
VCU Life Sciences faculty members are drawn from departments across the university. Lists of participating faculty and academic affiliations are available on the VCU Life Sciences Web site for each program.

Facilities
VCU Life Sciences comprises the resources and interests not only of the Monroe Park Campus and the VCU Medical Center, but also the Virginia BioTechnology Research Park and the Inger and Walter Rice Center for Environmental Life Sciences, a property of 342 acres overlooking the James River in Charles City County. The $27 million Eugene P. and Lois E. Trani Center for Life Sciences houses the administrative offices, the two research centers described below, state-of-the-art laboratories and classrooms, and a climate controlled greenhouse.

VCU Life Sciences supports two university centers for its research and teaching efforts: the Center for Environmental Studies and the Center for the Study of Biological Complexity.

Graduate information

Transfer credit

Graduate-level course work completed prior to matriculation into the program, including course work taken in another program at VCU or at another institution, shall be evaluated to determine whether it can be used to fulfill degree requirements of this program. There is no limit to the number of credits that can be transferred from another program at VCU as long as they have not been previously applied toward another degree. A maximum of six credit hours earned at an institution other than VCU can be accepted for transfer into the program if not previously applied toward another degree. A minimum grade of B is required for transfer of credits.

Grade requirements
Degree candidates must maintain a GPA of 3.0 or greater. GPAs shall be based on all graduate courses attempted after acceptance into the program. The academic standing of any student who receives multiple grades of C, or a grade of D or F will be reviewed for possible termination from the program.

Integrative Life Sciences, Doctor of Philosophy (Ph.D.)

Admission requirements summary

|-------------------|-------------------|-------------------|-------------------|
| Degree: Ph.D. |
| Semester(s) of entry: |
| Fall (preferred) |
| Spring |
| Summer |
| Deadline dates: |
| Feb 1 |
| Test requirements: |
| GRE |

Special requirements: See program Web site

The Ph.D. in Integrative Life Sciences is designed for students who want to conduct research that is integrative across multiple disciplines and that takes a systems approach to emerging research questions across the many fields that comprise the life sciences. Students may opt to work with faculty members from departments on both campuses. The program provides the opportunity to conduct interdisciplinary research at multiple scales of study from the molecular to ecosystem levels with an emphasis on the concepts of systems biology and biological complexity.

Admission requirements, procedures and financial aid

The purpose of the admission requirements for the Ph.D. program is to ensure selection of outstanding students whose motivation, ability and education prepare them for interdisciplinary graduate study in the life sciences. The following requirements and procedures incorporate those of the VCU Graduate School.

1. Admission requirements
   a. Graduation from an accredited college or university or its equivalent, with a degree in a discipline, a spectrum of course work, and/or professional experience that provides an appropriate background for graduate-level study in the life sciences.
   b. An undergraduate or graduate record indicating superior performance. Applicants must have a minimum GPA of 3.0 on a 4.0 scale for at least the last 60 credits of undergraduate work or for a completed graduate degree. In very unusual cases, this requirement may be waived by approval of the dean of the Graduate School.
   c. Satisfactory scores on the Graduate Record Examination. Scores for appropriate advanced tests, in particular biology, chemistry or molecular biology/biochemistry, are recommended.
   d. For applicants whose native language is not English, satisfactory scores from a standardized test commonly used and deemed appropriate for evaluation of English language proficiency, such as the TOEFL.
   e. Letters of recommendation from three present or former instructors or other individuals qualified to evaluate the applicant’s ability to engage in graduate study in the life sciences.
   f. A written statement describing the applicant’s interests, motivation, education and goals for pursuing graduate study in the life sciences.

2. Admission procedure
   a. The above material must be sent along with a completed application form and the required application fee to the Graduate School, Virginia
Applicants may apply for admission to begin studies any semester of the year, but fall admission is recommended. Admission to graduate study in integrative life sciences requires majority approval and recommendation by the Graduate Program Committee and acceptance by the vice provost for Life Sciences and the dean of the Graduate School.

3. Types of admission
   a. Degree-seeking student: An applicant who meets all requirements for admission to the program.
   b. Provisional student: An applicant who has not fully met the requirements of the program but shows exceptional promise. Applicants with outstanding potential but who lack courses or training in specific areas deemed necessary for success in the program may be required to complete specific course work. Provisionally accepted students must remove all conditions of the provisional admission within one year of enrollment. Failure to meet these conditions will result in the student being dismissed from the program. No prerequisite courses taken as a provisional student may be applied toward the graduate degree.

4. Financial aid. In addition to need-based financial aid awarded through the Office of Financial Aid, students may be eligible to be considered for a variety of scholarships, fellowships, and teaching and research assistantships. Information regarding available financial support will accompany an offer of acceptance.

Degree requirements
Students are required to complete course work in core and elective courses and to conduct significant research. All work toward the degree must be completed within seven years of the first enrollment.

1. Credit requirements. Students in the program are required to earn a minimum of 64 hours of graduate-level credits. At least one-half of the credit hours presented for graduation must be at the 600 level or higher.

2. Grade requirement. Degree applicants must achieve an overall GPA of 3.0 (“B”) with a grade of “C” in no more than two courses. The GPA for graduation is based on all graduate courses attempted after acceptance into the program.

3. Transfer and M.S. credits. Graduate-level course work taken in another program at VCU or at another institution, shall be evaluated to determine whether it can be used to fulfill degree requirements of this program. There is no limit to the number of credits that can be transferred from another program at VCU as long as they have not been previously applied toward another degree. A maximum of six credits earned at another institution can be accepted for transfer into the program if not previously applied toward another degree. A minimum grade of “B” is required for credits transferred.

4. Research adviser and committee. New students entering the program may be initially advised by an advisory committee of faculty members to assist students with initial course selection and to provide advice concerning the program. Students should select a research adviser prior to their third semester of study. The research adviser may be chosen from among the many graduate faculty members associated with this program from either campus.

Students are required to form a research advisory committee that is headed by the research adviser and consists of a minimum of five members of the VCU graduate faculty. Individuals who are not graduate faculty members (i.e., individuals from another institution or industry) must apply to the dean of the Graduate School for temporary membership. The significant areas of the student’s research focus should be represented by the members of the research advisory committee. At least two members of the committee shall be from departments other than that of the research adviser, with one of those members being integrally associated with the student’s research to foster the interdisciplinary intent of this degree program. Students should form their committee no later than the end of their third semester of study.

5. Written and oral examinations. Before admission to candidacy for the Ph.D. degree, students must successfully complete a comprehensive written examination and an oral examination. The student’s research advisory committee will administer both exams. Students should take the written exam upon completion of all required didactic course work. It will focus on material covered in core and selected elective courses as well as fundamental knowledge relevant to the student’s research field. Upon successful completion of the written examination and submission and acceptance of a research proposal, students should take an oral examination that includes a defense of the proposed research project and other subject areas deemed appropriate by the committee. Students may retake the written and oral examinations only once.

6. Dissertation research. The dissertation research project should represent a significant contribution to the body of knowledge in its field and should be deemed suitable for publication in refereed journals. The emphasis of the research conducted by students in this program should be on interdisciplinary research, incorporating two or more disciplines and with a systems approach. Research projects may take advantage of the many research opportunities across the life sciences on both campuses. Projects may encompass multiple scales of study from molecular to ecosystem levels. Students shall prepare a written dissertation describing the completed research using the format approved by the Graduate School. An oral defense of the dissertation, under the direction of the research advisory committee and open to all faculty members, is also required. Upon successful completion of all degree requirements, students will graduate with the Ph.D. in Integrative Life Sciences.

Curriculum requirements
A minimum total of 64 credits is required and is distributed as follows:

- 12 credits in core courses
  - LFSC 510/BIOL 545 Biological Complexity
  - LFSC 520/BIOL 548 Bioinformatic Technologies
  - LFSC 630 Integrative Life Sciences Research
  - LFSC 690 Research Seminar in Integrative Life Sciences
  - MICR 510 Scientific Integrity
- a minimum of three credits in an advanced statistics, advanced mathematics or experimental design course depending on the students area of research*
  - BIOL 606 Quantitative Ecology
  - BIOS/STAT 523 Nonparametric Statistical Methods
  - BIOS 524 Biostatistical Computing
  - BIOS 572 Statistical Analysis of Biomedical Data
  - NFO/BIOL 601 Integrated Bioinformatics
  - ENVS 603 Environmental Research Methods
  - LFSC 610 Analytical Methods in Biocomplexity Analysis
  - MATH 591 Topics in Mathematics: Mathematical Biology
  - MATH 617 Applied Mathematics I
  - STAT/BIOS 544 Statistical Methods II
  - STAT 623 Discrete Multivariate Analysis
  - STAT 643 Applied Linear Regression
  - Other courses based on approval of research advisory committee
- a minimum of nine credits in elective courses based on research interest and approved by research advisory committee
- a minimum of 40 credits in directed research (LFSC 697)

* Students are expected to enter the program with a proficiency in statistics at the introductory level, as exemplified by STAT/BIOS 543 Statistical Methods. Students not at this level, as evidenced by prior course work, will be required to take STAT/BIOS 543 or an equivalent course.

Center for Environmental Studies
The undergraduate and graduate programs in environmental studies are interdisciplinary in nature, exposing students to the critical links between the areas of environmental life sciences, technology and policy.

At the undergraduate level, students gain the necessary skills for entry-level field and research positions. Class lectures and guest speakers introduce the importance of policy-making and awareness in the environmental field, while laboratory and internship experiences provide a working knowledge of the latest in environmental technology and field practices.

The graduate programs provide two options for students to further their studies in the environmental life sciences. The Master of Science in Environmental Studies...
The Center for Environmental Studies offers a Master of Environmental Studies (M. Envs.) degree. The program is designed for individuals interested in pursuing research in the environmental field. The Master of Environmental Studies (the non-thesis program) is a terminal, two-year professional degree for individuals working in the private/public sector of the environmental field.

**Environmental Studies, Master of (M. Envs.)**

The Center for Environmental Studies offers a Master of Environmental Studies (M. Envs.) degree. Applicants should have successfully completed undergraduate training and hold a bachelor's degree. Admissions to the program are generally drawn from applicants with an undergraduate GPA above 3.0 (on a 4.0 scale or equivalent) and satisfactory scores on a current standardized graduate admissions test (i.e., GRE, minimum 1500, minimum 500 each for verbal, quantitative and analytical). Applicants holding an undergraduate degree from recognized foreign institutions should display an acceptable level of English proficiency by achieving a score of 600 or above on the TOEFL examination. Application forms and other university materials can be obtained from the Graduate School, Virginia Commonwealth University, P.O. Box 843051, Richmond, VA 23284-3051, or at www.graduate.vcu.edu/admission/prospective/domestic.

**Degree requirements**

In addition to general VCU graduation requirements, students must:

- complete a minimum of 33 graduate semester credits, approved by the program director, with an overall GPA of 3.0 or above. At least 15 semester credits must be at the 600 level.
- complete three required core courses (9 credits) and complete an additional 21 credits of approved graduate electives.

**Core requirements** (3 courses/9 credits)

ENVS 601 Environmental Studies Survey
ENVS 603 Environmental Research Methods
STAT 543 Statistical Methods I (or equivalent)

**Electives** (3 courses or 21 credits; courses must represent at least two of the disciplines below)

- Environmental studies
- ENVS 550 Ecological Risk Assessment
- ENVS/ANTH 556 Historical and Cultural Landscapes
- ENVS 590 Environmental Studies Seminar

**Admission requirements**

Applicants should meet the following admission requirements:

- Complete the undergraduate requirements, both graduate and undergraduate, and the development of an appropriate plan of study.
- The requirements for the B.S. in Environmental Studies and the Master of Environmental Studies are not reduced by the accelerated program. However, 12 hours of graduate course work may be applied toward both degrees for qualified students in the program. The table below outlines the undergraduate requirements that would be fulfilled by the corresponding graduate courses. Where special circumstances exist (e.g., student has already completed a fulfilled course prior to applying to the accelerated program), another undergraduate requirement may be fulfilled by the listed graduate course with the approval of both the graduate and undergraduate program directors.

Other electives may be allowed with prior permission of major adviser and program director. Students may not apply more than three credits (total) of ENVS 692 and/or ENVS 693 to the degree without prior approval of the major adviser and program director.

Students pursuing the M.Envs. Must complete, in addition to all other degree requirements, the following requirements in lieu of the six-credit thesis requirement: three credits of ENVS 692 Independent Study or ENVS 693 Internship and three credits of approved electives, for a total of 33 graduate semester credits. In addition, the student must pass an oral comprehensive examination.

Accelerated Bachelor of Science (B.S.) and Master of Environmental Studies (M. Envs.)

The accelerated B.S. and M.Envs. Program allows qualified students with a major in environmental studies to earn both degrees in five years by completing approved graduate courses during the senior years of their undergraduate program. The program will provide students with the opportunity to expand and deepen their knowledge of environmental studies while enhancing their professional credentials for the job market. Students in the program may count up to 12 hours of graduate courses toward both the B.S. and M.Envs. degrees. Thus, the student may earn the two degrees with a minimum of 141 hours. Currently, the M.Envs. Program requires students to earn 33 graduate credits.

The accelerated program is restricted to students who have demonstrated strong interest and success in environmental studies. The minimum qualification for admittance to the program is the completion of 90 undergraduate credit hours with an overall GPA of 3.0 and a GPA of 3.3 in the environmental studies major concentration. Students also are required to provide a letter of recommendation from at least one of their major professors attesting to their interest and competence in environmental studies.

Students failing to meet the minimum standards for admission to the accelerated program due to exceptional circumstances will be allowed to appeal to the environmental studies graduate admissions committee for special admission. However, under no circumstances will students who fail to meet the graduate student standards of performance outlined in the Graduate Bulletin be admitted to the accelerated program.

The environmental studies undergraduate and graduate studies program directors jointly will provide guidance for students who are accepted into the accelerated program. This guidance will include a review of all of the program degree requirements, both graduate and undergraduate, and the development of an appropriate plan of study.

The requirements for the B.S. in Environmental Studies and the Master of Environmental Studies are not reduced by the accelerated program. However, 12 hours of graduate course work may be applied toward both degrees for qualified students in the program. The table below outlines the undergraduate requirements that would be fulfilled by the corresponding graduate courses. Where special circumstances exist (e.g., student has already completed a fulfilled course prior to applying to the accelerated program), another undergraduate requirement may be fulfilled by the listed graduate course with the approval of both the graduate and undergraduate program directors.

ENVS 591 Topics in Environmental Studies
ENVS 602 Environmental Technology
ENVS/PADM 628 Environmental Policy and Administration

Following the completion of the undergraduate requirements, the student may complete the master’s degree within one year. The recommended approach would be to complete the hands-on component of the degree (internship or independent study) during the summer following completion of the undergraduate requirements. All additional requirements could then be completed in two nine-hour semesters. However, students may also opt to postpone the hands-on component of the degree until the summer following the completion of all graduate course work.

**Environmental Studies, Master of Science (M.S.)**

The Center for Environmental Studies offers a Master of Science in Environmental Studies (thesis option).

**Admission requirements**

Applicants should have successfully completed undergraduate training and hold a bachelor’s degree. Admissions to the program are generally drawn from applicants with an undergraduate GPA above 3.0 (on a 4.0 scale or equivalent) and satisfactory scores on a current standardized graduate admissions test (i.e., GRE, minimum 1500, minimum 500 each for verbal, quantitative and analytical). Applicants holding an undergraduate degree from recognized foreign institutions should display an acceptable level of English proficiency by achieving a score of 600 or above on the TOEFL examination. Application forms and other university materials can be obtained from the Graduate School, Virginia Commonwealth University, P.O. Box 843051, Richmond, VA 23284-3051, or at www.gradschool.vcu.edu/admission/prospective/domestic.

**Degree requirements**

In addition to general VCU graduation requirements, students must:

- Complete a minimum of 33 graduate semester credits, approved by the program director, with an overall GPA of 3.0 or above. At least 15 semester credits must be at the 600 level.
- Complete three required core courses (9 credits), successfully defend a research thesis (6 credits) and complete an additional 18 credits of approved graduate electives.

**Core requirements**

- ENVS 601 Environmental Studies Survey
- ENVS 603 Environmental Research Methods
- STAT 543 Statistical Methods I (or equivalent)
The Accelerated Bachelor’s to Master’s Program in Bioinformatics permits selected students majoring in bioinformatics to earn the Bachelor of Science and master’s degrees in a minimum of five years by taking certain graduate level courses during the senior year of their undergraduate program. The program is restricted to students with strong credentials and a clear interest in a career in the field of bioinformatics.

**Admission requirements and procedures**

**Regular admission**

In order to be admitted formally into the program through the regular admissions process, a student must be a VCU bioinformatics major, must have completed 90 semester credit hours with an overall GPA of at least 3.0, including a substantial amount of collateral and core course work within the major and evidence of strong academic achievement. An application must be submitted to the Graduate School. Applicants should indicate which master’s degree program (Master of Science in Bioinformatics or Master of Bioinformatics) is of interest to them. Applications will be screened by the Bioinformatics Admissions Committee. Most students will be able to initiate the application process during the second semester of their junior year. Students provisionally accepted into the program will be notified in time to register for courses as accelerated students but will not be formally admitted into the program until they have completed all requirements listed above.

Following acceptance into the accelerated program, students must continue to meet the requirements stated above throughout the senior year, as well as the graduate student standards of performance specified in this Bulletin in order to be awarded formal acceptance into the graduate program, which typically takes place just prior to the fall semester of the fifth year.

**Guaranteed admission**

The bioinformatics master’s program participates in the Honors College Guaranteed Admission Program. This program allows highly qualified high school seniors who will be participating in the VCU Honors College to gain admission into selected VCU graduate programs without competing for that admission at a later date. In order to apply for guaranteed admission, the student must have obtained a combined score of 1910, in a single sitting, on the SATI, with neither score below 530, and have achieved a minimum 3.5 unweighted GPA (4.0 scale). Once accepted into the Guaranteed Admission Program, bioinformatics students must fulfill the requirements of the Honors College for graduation with University Honors, maintain a cumulative GPA of 3.5, progress satisfactorily in honors courses and meet course requirements of the bioinformatics graduate program in order to remain exempt from competing for admission into the master’s program. Guaranteed admission applicants will be screened by the Bioinformatics Admissions Committee.

**Shared credits for accelerated program**

1. *BNFO 620 (Bioinformatics Practicum) or BNFO 508 (Introduction to Bioinformatics Research) replaces BNFO 420 (Applications in Bioinformatics) for the M.Bin. and M.S., respectively
2. Course work taken to meet master’s cross-track requirements replaces undergraduate program electives.
3. A graduate course within the track replaces a BS-track required (if approved by adviser) or elective course.

Total shared credits

3

6

3

12

* For accelerated program students, BNFO 620 or BNFO 508 replaces BNFO 420 to meet the “oral communication” general education requirement.

**Bioinformatics, Master of (M.Bin.)**

**Admission requirements summary**

**Bioinformatics, Master of (M.Bin.)**

Indicate track:

The Master of Bioinformatics (M.Bin) represents a new type of master’s degree, the Professional Science Master’s, which is increasingly popular with students and industry employers. The M.Bin. is designed primarily for the entrepreneurial
student seeking an accelerated master’s program that blends comprehensive course work, significant but reduced research experience and a professional externship. The centerpiece of the M.Bin. option is the opportunity to exterm for a full summer at an academic, government or industry location. While this degree prepares students for a variety of careers in the life sciences, it should be particularly attractive to students interested in entry-level positions in industry.

**Admission requirements**

The purpose of the admission requirements for the graduate program in bioinformatics is to identify and select outstanding candidates whose motivation, background, potential and character have prepared them for the rigors of study required in the program. The Bioinformatics Admissions Committee will screen applications. The following requirements and procedures incorporate and fully comply with those of the VCU Graduate School.

- An undergraduate or previous graduate record indicating superior capabilities. Applicants must have a minimum GPA of 3.0 on a 4.0 scale for the last 60 credits of undergraduate work or for a completed graduate degree. This requirement may be waived by approval of the dean of the Graduate School.
- Satisfactory scores on the Graduate Record Examination (GRE). The verbal, quantitative and analytical writing sections of the GRE are required. Scores for appropriate advanced tests, in particular biology, chemistry or mathematics, are recommended.
- For an applicant whose native language is not English, satisfactory scores from a standardized test commonly used and deemed appropriate for evaluation of English language, such as the TOEFL.
- Letters of recommendation from at least three present or former instructors or other individuals qualified to evaluate the applicant's abilities to engage in graduate studies in bioinformatics.
- A written statement describing the applicant's interests, motivation, education and goals for pursuing graduate study in bioinformatics.
- Applicants must indicate which master’s degree (M.S. or M.Biof.) they intend to seek.

**Prerequisites and bridge curricula for master’s programs**

While an ideal preparation for the bioinformatics master’s programs would include substantial work in molecular biology, computer science, mathematics and statistics, the program has been designed to provide “bridge curricula” to accommodate academically strong students with majors in any one of these disciplines. These students would develop with the assistance of their adviser a “bridge curriculum” of largely undergraduate courses to meet the prerequisites for the program and prepare them for graduate-level work that emphasizes their chosen track but includes course work in the other two tracks.

Program prerequisites are listed below. In general, students will not need to address the set corresponding to their undergraduate major, but will usually need to address the other two sets. It is expected that all bridge course work will be completed during the first year.

1. Biology/genomic prerequisites: An introductory knowledge of biochemistry and molecular biology, met by taking General Chemistry I-II (e.g. CHEM 101-102), one semester of Organic Chemistry (e.g. CHEM 301), Cell Biology (e.g. BIOL 218), and Essentials of Molecular Biology in Bioinformatics (2 credit module: BNFO 507).

2. Computational science prerequisites: An introductory knowledge of discrete mathematics (e.g. MATH 211); an introductory knowledge of computer science including at least one general computer programming language, met by taking Structured Programming (e.g. CMSC 255) and Data Structures & Advanced Programming (e.g. CMSC 256). If needed, students will be advised to acquire additional prerequisite background by taking one credit of independent study in CMSC 697 (Directed Research).

3. Quantitative/statistical prerequisites: An introductory knowledge of math/statistics, met by taking Calculus with Analytic Geometry I (e.g. MATH 200) and Statistical Methods I (e.g. STAT 543).

**Curriculum**

**Core courses**

- BNFO 601 Integrated Bioinformatics
- BNFO 690 Seminars in Bioinformatics
- BNFO 620 Bioinformatics Practicum
- BNFO 700 Externship in Bioinformatics

**Cross-track course work credits**

- MICR 510 Scientific Integrity
- BNFO 620 Bioinformatics Practicum
- BNFO 700 Externship in Bioinformatics

**Total graduate program credits**

- 35

**Practicum, in the semester preceding their externship.** Under the supervision of their major adviser and Graduate Advisory Committee, the external supervisor, and the coordinator of the Bioinformatics Practicum course, each student must develop and write a short proposal outlining the plans for the externship. The project must be approved by the student’s GAC, based on a short (10-page) paper submitted by the student. This paper will include background on the project including a review of the literature, the purpose, specific aims and rationale of the project, a statement about the specific hypothesis to be investigated, and proposed methods and statistical analyses.

Research projects will be based on ongoing research in the laboratories of the participating external adviser. Students in the program may perform research on the broad range of subjects, from molecules to ecosystems, encompassing the field of bioinformatics.

In the semester following the externship experience, M.Biof. students shall prepare a written paper describing the completed research performed during their externship following the format of the Graduate School for M.S. theses. An oral defense, consisting of a public presentation of the paper and a committee meeting to discuss the results, under the direction of the GAC but open to all faculty members and the adviser of the externship, shall be scheduled to examine the student’s underlying fundamental knowledge of the disciplines encompassed by the student’s research. Announcement of the oral defense, including the candidate’s name, project title, and the day, place and time of the defense, shall be made at least 10 working days in advance of the defense.

**Advising**

All new students entering the program will be able to discuss their options with the bioinformatics program coordinator and shall be assigned a track adviser, who is a faculty member of the CSBC, to assist with initial course selection and to provide advice concerning the program. All students in the M.Biof. Program will select a major adviser prior to beginning course work of the second semester in the program.

Subsequently, a Graduate Advisory Committee, headed by the major adviser, shall direct students enrolled in the program in their course work selections. The GAC shall consist of four members, all of whom must be members of the VCU graduate faculty. Individuals who are not already graduate faculty members, e.g. from another institution or industry, must apply to the dean of the Graduate School for temporary membership. The composition of the GAC shall be such that the significant areas for the student's focus are represented. At least one member of the committee shall be from departments other than that of the major adviser, to provide a diversity of perspective on the committee. Students and their major advisers should form their committees no later than the end of their second semester of study. Final approval of the GAC membership shall be by the Bioinformatics Program Committee and the director of the Bioinformatics Program.

**Tracks**

The M.Biof. offers three tracks, each composed of 21 credits including:

1. six credits from track-specific List A,
2. six additional credits from either List A or List B and
3. nine credits of “Cross-Track” course work (i.e. from Lists A or B from the other two tracks), including at least one course from each of the two tracks.

In selecting their courses, students must keep in mind the Graduate School requirement that at least 50 percent of the courses taken to meet program requirements must be in courses restricted to graduate students.

Additional electives may be substituted in consultation with the graduate committee. If equivalent graduate courses to those listed have already been taken outside of this master’s program, the policies of the VCU Graduate School would determine the extent to which such course work could be counted toward the bioinformatics master’s degree.

Bioinformatics, accelerated bachelor’s to master’s

The Accelerated Bachelor’s to Master’s Program in Bioinformatics permits selected students majoring in bioinformatics to earn the Bachelor of Science and master’s degrees in a minimum of five years by taking graduate level courses during the senior year of their undergraduate program. The program is restricted to students with strong credentials and a clear interest in a career in the field of bioinformatics.

Admission requirements and procedures

Regular admission

In order to be admitted formally into the program through the regular admissions process, a student must be a VCU bioinformatics major, must have completed 90 semester credit hours with an overall GPA of at least 3.0, including a substantial amount of collateral and core course work within the major and evidence of strong academic achievement. An application must be submitted to the Graduate School.

Applicants should indicate which master’s degree program (Master of Science in Bioinformatics or Master of Bioinformatics) is of interest to them. Applications will be screened by the Bioinformatics Admissions Committee. Most students will be able to initiate the application process during the second semester of their junior year. Students provisionally accepted into the program will be notified in time to register for courses as accelerated students but will not be formally admitted into the program until they have completed all requirements listed above.

Following acceptance into the accelerated program, students must continue to meet the requirements stated above throughout the senior year, as well as the graduate student standards of performance specified in this Bulletin in order to be awarded formal acceptance into the graduate program, which typically takes place just prior to the fall semester of the fifth year.

Guaranteed admission

The bioinformatics master’s program participates in the Honors College Guaranteed Admission Program. This program allows highly qualified high school seniors who will be participating in the VCU Honors College to gain admission into selected VCU graduate programs without competing for that admission at a later date. In order to apply for guaranteed admission, the student must have obtained a combined score of 1910, in a single sitting, on the SATI, with neither score below 530, and have achieved a minimum 3.5 unweighted GPA (4.0 scale). Once accepted into the Guaranteed Admission Program, bioinformatics students must fulfill the requirements of the Honors College for graduation with University Honors, maintain a cumulative GPA of 3.5, progress satisfactorily in honors courses and meet course requirements of the bioinformatics graduate program in order to remain exempt from competing for admission into the master’s program. Guaranteed admission applicants will be screened by the Bioinformatics Admissions Committee.

Shared credits for accelerated program

1. *BNFO 620 (Bioinformatics Practicum) or BNFO 508 (Introduction to Bioinformatics Research) replaces BNFO 420 (Applications in Bioinformatics) for the M.Biof. and M.S., respectively
2. Course work taken to meet master’s cross-track requirements replaces undergraduate program electives.
3. A graduate course within the track replaces a BS-track required (if approved by adviser) or elective course.

Total shared credits 12

* For accelerated program students, BNFO 620 or BNFO 508 replaces BNFO 420 to meet the “oral communication” general education requirement.

Bioinformatics, Master of Science (M.S.)

Admission requirements summary

Bioinformatics, Master of Science (M.S.)
Indicate track:

The Master of Science in Bioinformatics offers a traditional research-oriented master’s degree culminating in submission and defense of a thesis. The goal of this program is to prepare students for research careers in university, foundation or industry laboratories, as well as for further research training in a Ph.D. program.

Admission requirements

The purpose of the admission requirements for the graduate program in bioinformatics is to identify and select outstanding candidates whose motivation, background, potential and character have prepared them for the rigorous study required in the program. The Bioinformatics Admissions Committee will screen applications. The following requirements and procedures incorporate and fully comply with those of the VCU Graduate School.

• An undergraduate or previous graduate record indicating superior capabilities. Applicants must have a minimum GPA of 3.0 on a 4.0 scale for the last 60 credits of undergraduate work or for a completed graduate degree. This requirement may be waived by approval of the dean of the Graduate School.
• Satisfactory scores on the Graduate Record Examination (GRE). The verbal, quantitative and analytical writing sections of the GRE are required. Scores for appropriate advanced tests, in particular biology, chemistry or mathematics, are recommended.
• For an applicant whose native language is not English, satisfactory scores from a standardized test commonly used and deemed appropriate for evaluation of English language, such as the TOEFL.
• Letters of recommendation from at least three present or former instructors or other individuals qualified to evaluate the applicant's abilities to engage in graduate studies in bioinformatics.
• A written statement describing the applicant's interests, motivation, education and goals for pursuing graduate study in bioinformatics.
• Applicants must indicate which master’s degree (M.S. or M.Biof.) they intend to seek.

Prerequisites and bridge curricula for master’s programs

While an ideal preparation for the bioinformatics master’s programs would include substantial work in molecular biology, computer science, mathematics and statistics, the program has been designed to provide “bridge curricula” to accommodate academically strong students with majors in any one of these disciplines. These students would develop with the assistance of their adviser a “bridge curriculum” of largely undergraduate courses to meet the prerequisites for the program and prepare them for graduate-level work that emphasizes their chosen track but includes course work in the other two tracks.
Program prerequisites are listed below. In general, students will not need to address the set corresponding to their undergraduate major, but will usually need to address the other two sets. It is expected that all bridge course work will be completed during the first year.

1. Biology/genomic prerequisites: An introductory knowledge of biochemistry and molecular biology, met by taking General Chemistry I-II (e.g. CHEM 101-102), one semester of Organic Chemistry (e.g. CHEM 301), Cell Biology (e.g. BIOL 218), and Essentials of Molecular Biology in Bioinformatics (2 credit module: BNFO 507).

2. Computational science prerequisites: An introductory knowledge of discrete mathematics (e.g. MATH 211); an introductory knowledge of computer science including at least one general computer programming language, met by taking Structured Programming (e.g. CMSC 255) and Data Structures & Advanced Programming (e.g. CMSC 256). If needed, students will be advised to acquire additional prerequisite background by taking one credit of independent study in CMSC 697 (Directed Research).

3. Quantitative/statistical prerequisites: An introductory knowledge of math/statistics, met by taking Calculus with Analytic Geometry I (e.g. MATH 200), Foundations and Statistical Methods I (STAT 543).

Advising

All new students entering the program will be able to discuss their options with the bioinformatics program coordinator and shall be assigned a track adviser, who is a faculty member of the CSBC, to assist with initial course selection and to provide advice concerning the program. All students in the M.S. in Bioinformatics program will select a major adviser prior to beginning course work of the second semester in the program.

Subsequently, a Graduate Advisory Committee, headed by the major adviser, shall direct students enrolled in the program in their research and course work selections. The GAC shall consist of four members, all of whom must be members of the VCU graduate faculty. Individuals who are not already graduate faculty members, e.g. from another institution or industry, must apply to the dean of the Graduate School for temporary membership. The composition of the GAC shall be such that the significant areas for the student's research focus are represented. At least one member of the committee shall be from departments other than that of the major adviser, to provide a diversity of perspective on the committee. Students and their major advisers shall form their committees no later than the end of the second semester of study. Final approval of the GAC membership shall be by the Bioinformatics Program Committee and the director of the Bioinformatics Program.

Curriculum

| Core courses* | 20 |
| Track course work credits | 12 |
| Cross-track course work credits | 9 |
| Total graduate program credits | 41 |

* Bioinformatics core
  - MICR 510 Scientific Integrity | 1 |
  - BNFO 601 Integrated Bioinformatics | 3 |
  - BNFO 690 Seminars in Bioinformatics | 1 |
  - BNFO 508 Introduction to Bioinformatics Research | 3 |
  - BNFO 697 Directed Research in Bioinformatics | 12 |

Total graduate “core” credits | 20 |

Thesis research

Students in the M.S. program must perform a credible original investigation under the supervision of their major adviser and Graduate Advisory Committee. Each student must develop and write a short proposal in consultation with his or her major adviser and GAC. The project must be approved by the student’s GAC, based on a short (10-page) paper submitted by the student. This paper will include background on the project including a review of the literature, the purpose, specific aims and rationale of the project, a statement about the specific hypothesis to be investigated, and proposed methods and statistical analyses.

Research projects will be based on ongoing research in the laboratories of faculty in the CSBC and across both campuses of VCU and the Virginia BioTechnology Research Park. Students in the program may perform research on the broad range of subjects, from molecules to ecosystems, studied by CSBC faculty.

Students shall prepare a written thesis describing the completed research performed during their tenure in the M.S. in Bioinformatics program following the format of the Graduate School. An oral defense, consisting of a public presentation of the thesis and a committee meeting to discuss the thesis, under the direction of the GAC but open to all faculty members, shall be scheduled to examine the student's research, thesis and underlying fundamental knowledge of the discipline encompassed by the student's research. Announcement of the oral defense, including the candidate's name, thesis title, and the day, place and time of the defense, shall be made at least 10 working days in advance of the defense.

Tracks

The M.S. program offers three tracks, each composed of 21 credits including:

1. six credits from track-specific List A,
2. six additional credits from either List A or List B and
3. nine credits of “Cross-Track” course work (i.e. from Lists A or B from the other two tracks), including at least one course from each of the two tracks.

In selecting their courses, students must keep in mind the Graduate School requirement that at least 50 percent of the courses taken to meet program requirements must be in courses restricted to graduate students.

Additional electives may be substituted in consultation with the graduate committee. If equivalent graduate courses to those listed have already been taken outside of this master’s program, the policies of the VCU Graduate School would determine the extent to which such course work could be counted toward the bioinformatics master’s degree.

Bioinformatics, accelerated bachelor’s to master’s

The Accelerated Bachelor’s to Master’s Program in Bioinformatics permits selected students majoring in bioinformatics to earn the Bachelor of Science and master’s degrees in a minimum of five years by taking certain graduate level courses during the senior year of their undergraduate program. The program is restricted to students with strong credentials and a clear interest in a career in the field of bioinformatics.

Admission requirements and procedures

Regular admission

In order to be admitted formally into the program through the regular admissions process, a student must be a VCU bioinformatics major, must have completed 90 semester credit hours with an overall GPA of at least 3.0, including a substantial amount of collateral and core course work within the major and evidence of strong academic achievement. An application must be submitted to the Graduation School.

Applicants should indicate which master’s degree program (Master of Science in Bioinformatics or Master of Bioinformatics) is of interest to them. Applications will be screened by the Bioinformatics Admissions Committee. Most students will be able to initiate the application process during the second semester of their junior year. Students provisionally accepted into the program will be notified in time to register for courses as accelerated students but will not be formally admitted into the program until they have completed all requirements listed above.

Following acceptance into the accelerated program, students must continue to meet the requirements stated above throughout the senior year, as well as the graduate student standards of performance specified in this Bulletin in order to be awarded formal acceptance into the graduate program, which typically takes place just prior to the fall semester of the fifth year.

Guaranteed admission

The bioinformatics master’s program participates in the Honors College Guaranteed Admission Program. This program allows highly qualified high school
seniors who will be participating in the VCU Honors College to gain admission into selected VCU graduate programs without competing for that admission at a later date. In order to apply for guaranteed admission, the student must have obtained a combined score of 1910, in a single sitting, on the SATI, with neither score below 530, and have achieved a minimum 3.5 unweighted GPA (4.0 scale). Once accepted into the Guaranteed Admission Program, bioinformatics students must fulfill the requirements of the Honors College for graduation with University Honors, maintain a cumulative GPA of 3.5, progress satisfactorily in honors courses and meet course requirements of the bioinformatics graduate program in order to remain exempt from competing for admission into the master’s program. Guaranteed admission applicants will be screened by the Bioinformatics Admissions Committee.

Shared credits for accelerated program

1. *BNFO 620 (Bioinformatics Practicum) or BNFO 508 (Introduction to Bioinformatics Research) replaces BNFO 420 (Applications in Bioinformatics) for the M.Biof. and M.S., respectively
2. Course work taken to meet master’s cross-track requirements replaces undergraduate program electives.
3. A graduate course within the track replaces a BS-track required (if approved by adviser) or elective course.

Total shared credits 12

* For accelerated program students, BNFO 620 or BNFO 508 replaces BNFO 420 to meet the “oral communication” general education requirement.
Graduate programs are administered by the individual departments, schools and centers with assistance from the Graduate School. Major coordination of the various degree programs is performed by the University Graduate Council chaired by the dean of the Graduate School. The University Graduate Council is comprised of two elected faculty members from each school and one elected faculty member from VCU Life Sciences.

The Graduate School section of the VCU Bulletins documents the official admission and academic rules and regulations that govern graduate education at the university. The University Graduate Council determines these policies.

The archived copies of current and past bulletins (catalogs) reflect all policies and procedures in effect at the beginning of the stated academic year. The online Bulletin is updated regularly to reflect changes that occur throughout the academic year.

Graduate programs

In-depth descriptions of all graduate programs at VCU are provided in the individual school and program sections of this bulletin. The Graduate School Web site (www.graduate.vcu.edu) provides links and contact information for all graduate programs offered at VCU. The Web site also provides updates that occur throughout the academic year, as well as the Application to Graduate Study and complete instructions for applying to all graduate programs.

Refer to the Program Search feature of this Web site for a complete listing of all graduate programs, as well as application deadline dates, and special admission requirements and contact information. Applicants are encouraged to contact the school/department sponsoring the intended program of study at the telephone numbers and/or e-mail addresses provided. Other important contact information is provided on the Graduate School Web site as well.

Important information for all graduate students

On behalf of the graduate faculty, I welcome you to graduate study at Virginia Commonwealth University. At VCU you will find a comprehensive array of academic programs, outstanding faculty and a supportive environment conducive to graduate study and research. The university offers nationally and internationally acclaimed graduate and research programs that meet the many needs of the commonwealth of Virginia, the United States and the world.

The University Graduate Council, chaired by the dean of the Graduate School, provides academic and administrative oversight and coordination of all graduate programs in accordance with the Graduate School’s mission: to provide leadership in all matters relating to graduate education at Virginia Commonwealth University in order to create a stimulating environment for teaching, learning, research, creative expression and public service. The VCU Graduate Bulletin Web site documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

Academic departments and schools administer individual graduate degree programs with the assistance and support of the VCU Graduate School. In-depth descriptions of all graduate programs at VCU are provided in the individual school and program sections of this bulletin.

Graduate Bulletin of record

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the Graduate Bulletin of record (the bulletin in effect at the time of official admission), as well as the academic regulations in individual school and department publications and on program Web sites; however, in all cases, the official policies and procedures of the University Graduate Council, as published on this Graduate Bulletin Web site and on the Graduate School Web site, take precedent over individual program policies and guidelines. Graduate students should contact the Graduate School at any time regarding questions relating to graduate study at VCU. Bulletins (catalogs) and course descriptions for the current and past years are archived on this site as PDF files. The online (html) Bulletins site is updated regularly to reflect changes that occur throughout the academic year.

I commend you for your decision to pursue graduate study, and I wish you every success in the pursuit of your educational goals at Virginia Commonwealth University.

Sincerely,

F. Douglas Boudinot Dean of the Graduate School

Admission to graduate study

The Board of Visitors, the administration and the faculty of VCU are committed to a policy of equal opportunity in education and employment without regard to age, race, color, national origin, gender, religion, sexual orientation, veteran’s status, political affiliation or disability.

Admission requirements

Minimum admission requirements for graduate study at VCU are outlined below. Individual departments and programs may set more stringent requirements as described in relevant sections of the Graduate Bulletin. Each department/program determines how to evaluate the individual requirements in a holistic assessment of the applicant’s potential for success in graduate study in a particular field. Additional factors, such as prior professional experience, may also be taken into consideration.

1. Graduation from an accredited college or university or its equivalent. Departments may admit graduate applicants, provisionally or fully, with three-year bachelor’s degrees (provided these three-year degrees allow the students to pursue graduate studies in their countries). Further, the department will require prerequisite/foundation courses as needed to fill in any gaps in the student’s educational background.

(Approved by University Graduate Council, Sept. 11, 2007; effective immediately.)

2. Required grade point average. For admission to graduate study at VCU, the Graduate School requires a minimum undergraduate GPA of 3.0. In cases where the undergraduate GPA is below 3.0, additional factors, including performance in the last 60 hours of course work, may be weighted more heavily in the admissions assessment. For students with earned graduate degrees from accredited institutions, the graduate GPA may be the primary basis for consideration.

3. Test scores. Standardized graduate-level test scores (less than five years old) as determined by the individual program/department. Note: Not all programs require standardized test scores. See relevant sections of the Graduate Bulletin for individual program requirements.

4. Letters of recommendation. Three letters of recommendation from instructors or professional references in the applicant’s intended field of study. Letters should address the applicant’s academic and professional abilities and preparation for graduate study.
5. **Statement of intent.** A statement of the applicant’s reasons for pursuing graduate education in the planned course of study at VCU.

6. **Such additional requirements as may be established by individual programs and schools.** These may include personal interviews, auditions, submission of a portfolio or other materials.

An exception to the general admissions requirements is made for students entering through the Guaranteed Admissions Programs of the VCU Honors College. (See the heading “Guaranteed Admission Through The Honors College” in this section.)

**Admissions appeals**
The Graduate School will hold denied applicants’ transcripts and test scores for one year. To reapply within this period, applicants should first contact the department or program. Additional materials should be supplied to strengthen the application, such as new test scores, new letters of recommendation or a new statement of intent.

**Types of admissions**
Students may be admitted to graduate study under one of the following classifications:

**Degree-seeking student**
An applicant who meets all requirements for admission to a degree program and who has been recommended by the department or school in which the applicant proposes to study may be admitted as a degree-seeking student.

**Provisional student**
An applicant who is missing an official document or test score may be admitted provisionally to a degree program, if recommended by the department and approved by the graduate dean. Pending documentation must be provided by the end of the first semester of enrollment. An applicant who has not fully met the requirements of the program or school to which admission is sought also may be admitted to that program or school as a provisional student.

Reasons for requesting a provisional admission are evaluated by the department/program and the school, and documents supporting a request of provisional admission are forwarded to the dean of the Graduate School with a request for admission. Conditions of a provisional admission for unmet academic standards must be met within one year of enrollment. No prerequisite courses taken as a provisional student may be applied toward a graduate degree. Failure to meet conditions of provisional admission will result in the student’s dismissal from the Graduate School.

**Nondegree-seeking student**
An individual who wishes to take graduate courses without formal admission to a degree program is classified as a nondegree-seeking student. There is no limit to the number of credits a nondegree-seeking student may take, as long as the student’s academic performance is credible. In courses where enrollment is limited, first priority is given to students admitted to the program, followed by other VCU graduate degree-seeking students. Nondegree-seeking students are not exempt from any prerequisite that may be specified for a course. A nondegree-seeking student who is later admitted as a degree-seeking student will not be allowed to apply toward a degree more than six credits earned as a nondegree-seeking student.

In order to enroll in graduate courses as a nondegree-seeking student, students must have graduated (or be in final term expecting to graduate) from a regionally accredited college or university or its equivalent. Information and forms certifying eligibility to take graduate courses are available at VCU Records and Registration service centers, or at the Graduate School, which is located in Moseley House on the Monroe Park Campus.

**Entrance examinations**
To supplement other evidence of preparation for graduate work, most graduate programs at VCU consider the scores from current standardized tests commonly used and deemed appropriate for a given discipline. Applicants should refer to the individual program screens of this Web site for specific test requirements. Applicants are encouraged to visit individual department and program Web sites and to contact the school/department sponsoring the intended program of study at VCU. The Graduate School will hold denied applicants’ transcripts and test scores for one year. To reapply within this period, applicants should first contact the department or program.

Schools or programs reserve the right to accept standardized test scores older than five years, as long as official test scores are available from the testing service. Any exceptions to the general requirement proposed by schools or programs must be approved by the University Graduate Council.

Individual exceptions to this requirement may be considered: (a) for students with previous graduate degrees, (b) for students with demonstrated competency (achievement of a grade “B” or above) in course work at the graduate level, preferably in the context of an advanced-degree program and (c) for students entering graduate study through the Guaranteed Admission Program of the University Honors Program. Any student considered for waiver of standardized testing requirements must meet all other requirements for full admission to the program to which he or she is applying.

Common examinations used at VCU are the Graduate Record Examination (GRE), the Graduate Management Admissions Test (GMAT), the Law School Admissions Test (LSAT), and the Miller Analogies Test (MAT). These examinations will not replace other records of achievement as a basis for admission to the Graduate School, but will offer additional evidence concerning the qualifications of students wishing to undertake graduate work.

**Guaranteed admission through The Honors College**
Active members of The Honors College may apply to The Honors College Guaranteed Admission Program for certain graduate programs either before matriculation at VCU or early in their undergraduate studies. (The specific deadline for applying is set by the program.) Upon graduation, honors students in the Guaranteed Admission Program may enter the graduate program to which they have applied, provided they have satisfied all of the program requirements.

Interested students should meet with the senior associate dean of The Honors College prior to making application for guaranteed admission to a graduate program. Following that meeting, the student must submit a completed graduate application form with three letters of recommendation to The Honors College. To be accepted into The Honors College Guaranteed Admission Program, a student must be accepted by the university, by The Honors College and by the admissions committee of the program the student wishes to enter. The admissions committee may require an interview. Final notification of guaranteed admission is made by the dean of the Graduate School.

For additional information, refer to the Honors College section of the Undergraduate Bulletin, or contact The Honors College at P.O. Box 843010, Richmond, VA 23284-3010; (804) 828-1803; or www.vcu.edu/honors.

Programs that offer guaranteed admission through The Honors College include:

- **Doctor of Dental Surgery**
- **Doctor of Medicine**
- **Doctor of Occupational Therapy**
- **Doctor of Physical Therapy**
- **Doctor of Philosophy**
  - Anatomy
  - Biochemistry
  - Biomedical Engineering
  - Biostatistics
  - Human Genetics
  - Microbiology and Immunology
  - Nursing
  - Pharmacology and Toxicology
  - Physiology
  - Psychology
  - Master of Accountancy
  - Master of Arts
  - Economics
  - History
  - Master of Bioinformatics
  - Master of Business Administration
  - Master of Education
    - Adult Learning
    - Counselor Education
    - Special Education
      - Early Childhood Special Education
      - Emotional Disturbance
Satisfactory academic achievement.
Adequate English language proficiency.

Length of stay in the United States, amount and type of formal U.S. education, Test Evidence of English language proficiency is evaluated based on factors such as university.

International applicants must provide evidence of proficiency in the English language prior to admission and/or full-time enrollment in the university. An applicant must have earned a bachelor’s degree from an accredited institution in the United States or an equivalent degree from a recognized foreign institution. Official academic records must be submitted.

International applicants must provide evidence of proficiency in the English language prior to admission and/or full-time enrollment in the university. An applicant may satisfy university English proficiency requirements by obtaining a satisfactory score on the TOEFL. The university minimum TOEFL score requirement is 550 (paper-based), 213 (computer-based) or 80 (Internet-based); however, most graduate programs prefer a minimum TOEFL score of 600 (paper-based), 250 (computer-based) or 100 (Internet-based). Some graduate programs will accept satisfactory scores on the IELTS as evidence of English proficiency. The university minimum IELTS score requirement is 6.5, but most graduate programs prefer an IELTS score of 7.0 or higher.

International applicants must provide evidence of proficiency in the English language prior to admission and/or full-time enrollment in the university. An applicant may satisfy university English proficiency requirements by obtaining a satisfactory score on the TOEFL. The university minimum TOEFL score requirement is 550 (paper-based), 213 (computer-based) or 80 (Internet-based); however, most graduate programs prefer a minimum TOEFL score of 600 (paper-based), 250 (computer-based) or 100 (Internet-based). Some graduate programs will accept satisfactory scores on the IELTS as evidence of English proficiency. The university minimum IELTS score requirement is 6.5, but most graduate programs prefer an IELTS score of 7.0 or higher.

As VCU does not generally provide financial support for graduate international students, applicants needing a student visa (F-1) or a visiting scholar visa (J-1) also must present documented evidence of available financial support to cover annual living and educational expenses while studying at VCU.

The university minimum IELTS score requirement is 6.5, but most graduate programs prefer an IELTS score of 7.0 or higher.

As VCU does not generally provide financial support for graduate international students, applicants needing a student visa (F-1) or a visiting scholar visa (J-1) also must present documented evidence of available financial support to cover annual living and educational expenses while studying at VCU.

Proof of current visa type must be submitted with the application for applicants who are in the United States on student visas. F-1 students and J-1 visiting scholars admitted to VCU must submit copies of all immigration documents to the VCU International Student Adviser prior to enrolling in classes.

Nonimmigrants (students with temporary U.S. visas)
Because of the amount of time required to process applications from international students and for international students to obtain their visas, prospective students should apply well in advance of the international application deadlines. The deadlines are April 1 for fall semester, Oct. 1 for spring semester and Feb. 1 for summer session. Students also must meet specific program deadlines that may be different from April 1, Oct. 1 and Feb. 1, respectively. The graduate dean must authorize any exception to application deadlines. All required admission documents must be submitted no later than eight weeks prior to registration if appropriate immigration documents are to be issued. Applicants who are unable to meet this credential deadline will need to defer the intended semester of entry.

Both U.S. government regulations and VCU admission policies require nonimmigrant applicants to demonstrate:

- Satisfactory academic achievement.
- Adequate English language proficiency.
- Ability to finance all educational and living expenses.

International students are advised to refer to university and program admission requirements in this bulletin for other information requested of all applicants. An applicant must have earned a bachelor’s degree from an accredited institution in the United States or an equivalent degree from a recognized foreign institution. Official academic records must be submitted.

International applicants must provide evidence of proficiency in the English language prior to admission and/or full-time enrollment in the university. An applicant may satisfy university English proficiency requirements by obtaining a satisfactory score on the TOEFL. The university minimum TOEFL score requirement is 550 (paper-based), 213 (computer-based) or 80 (Internet-based); however, most graduate programs prefer a minimum TOEFL score of 600 (paper-based), 250 (computer-based) or 100 (Internet-based). Some graduate programs will accept satisfactory scores on the IELTS as evidence of English proficiency. The university minimum IELTS score requirement is 6.5, but most graduate programs prefer an IELTS score of 7.0 or higher.

As VCU does not generally provide financial support for graduate international students, applicants needing a student visa (F-1) or a visiting scholar visa (J-1) also must present documented evidence of available financial support to cover annual living and educational expenses while studying at VCU.

Proof of current visa type must be submitted with the application for applicants who are in the United States on student visas. F-1 students and J-1 visiting scholars admitted to VCU must submit copies of all immigration documents to the VCU International Student Adviser prior to enrolling in classes.

Imigrants (permanent residents, resident aliens and asylum/refugee applicants)
Because immigrant applicants usually are in the United States at the time applications are submitted, these students are required to meet the same application deadlines as U.S. citizens.

If educated in the United States, immigrant students will be considered for admission under the same academic policies as those applied to U.S. citizens. If educated outside the United States, the same academic records are required as those for nonimmigrant students.

VCU requires detailed information concerning U.S. immigration status. Proof of current visa type must be submitted with the application for applicants who are in the United States on student visas. F-1 students and J-1 visiting scholars admitted to VCU must submit copies of all immigration documents to the VCU International Student Adviser prior to enrolling in classes.

Nonimmigrants (students with temporary U.S. visas)
Because of the amount of time required to process applications from international students and for international students to obtain their visas, prospective students should apply well in advance of the international application deadlines. The deadlines are April 1 for fall semester, Oct. 1 for spring semester and Feb. 1 for summer session. Students also must meet specific program deadlines that may be different from April 1, Oct. 1 and Feb. 1, respectively. The graduate dean must authorize any exception to application deadlines. All required admission documents must be submitted no later than eight weeks prior to registration if appropriate immigration documents are to be issued. Applicants who are unable to meet this credential deadline will need to defer the intended semester of entry.

Both U.S. government regulations and VCU admission policies require nonimmigrant applicants to demonstrate:

- Satisfactory academic achievement.
- Adequate English language proficiency.
- Ability to finance all educational and living expenses.

International students are advised to refer to university and program admission requirements in this bulletin for other information requested of all applicants. An applicant must have earned a bachelor’s degree from an accredited institution in the United States or an equivalent degree from a recognized foreign institution. Official academic records must be submitted.

International applicants must provide evidence of proficiency in the English language prior to admission and/or full-time enrollment in the university. An applicant may satisfy university English proficiency requirements by obtaining a satisfactory score on the TOEFL. The university minimum TOEFL score requirement is 550 (paper-based), 213 (computer-based) or 80 (Internet-based); however, most graduate programs prefer a minimum TOEFL score of 600 (paper-based), 250 (computer-based) or 100 (Internet-based). Some graduate programs will accept satisfactory scores on the IELTS as evidence of English proficiency. The university minimum IELTS score requirement is 6.5, but most graduate programs prefer an IELTS score of 7.0 or higher.

As VCU does not generally provide financial support for graduate international students, applicants needing a student visa (F-1) or a visiting scholar visa (J-1) also must present documented evidence of available financial support to cover annual living and educational expenses while studying at VCU.

Proof of current visa type must be submitted with the application for applicants who are in the United States on student visas. Imigrants (permanent residents, resident aliens and asylum/refugee applicants)
Because immigrant applicants usually are in the United States at the time applications are submitted, these students are required to meet the same application deadlines as U.S. citizens.

If educated in the United States, immigrant students will be considered for admission under the same academic policies as those applied to U.S. citizens. If educated outside the United States, the same academic records are required as those for nonimmigrant students.

VCU requires detailed information concerning U.S. immigration status. Proof of permanent residency or application for permanent residency must be submitted with the admission application.

Application procedures
Application forms and instructions for applying to all graduate programs are available on the Graduate School Web site at www.graduate.vcu.edu/admission/prospective/domestic.

A $50 nonrefundable application fee must accompany each application. This fee will not be credited toward tuition payment.

Completed applications and all supporting materials must be submitted according to the application guidelines provided on the Graduate School Web site and before the program deadlines specified throughout this bulletin Web site. Late applications for some programs may be considered when possible but may require provisional action.

Note: Reference letters, the statement of intent/personal essay and any other supplementary materials such as art portfolios, resume/vita or specific program-required documents should be submitted to the address specific to the program to which you are applying. However, some programs require that all application materials be sent directly to the Graduate School.

Click here for instructions on submitting application materials for graduate programs and a list of program-specific addresses for supplemental materials. Applications (paper), online application signature page, all transcripts and test scores must be submitted to the Graduate School.

Graduate students are encouraged to initiate application to graduate study by using the Graduate School’s online graduate application. Supporting materials for online applications must be submitted promptly. An application cannot be given final consideration until all required documentation has been received.

Students using the online application are encouraged to apply well before the program deadline to ensure receipt of all application materials.

Paper applications and supporting documentation submitted by mail should be addressed to the Graduate School, Virginia Commonwealth University, P.O. Box 843051, Richmond, VA 23284-3051. Applications submitted in person may be delivered to the Graduate School office at the Moseley House, 1001 Grove Ave.

Completed applications and supporting materials are reviewed by the graduate faculty of the intended program, and final official notification of acceptance is made by the dean of the Graduate School.

Admission to a graduate program may be contingent upon the successful completion of undergraduate coursework, degrees or other prerequisites that may be specified by the program or school. Remedial coursework will not apply toward a graduate degree.

Students who do not apply at least one month prior to the beginning of any semester risk their financial aid eligibility in the event that the admission process is not completed prior to the first day of classes.

General academic regulations for all graduate students

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the Graduate Bulletin of record (the bulletin in effect at the time of official admission), as well as the academic regulations in individual school and department publications and on program Web sites; however, in all cases, the official policies and procedures of the University Graduate Council, as published on this Graduate Bulletin Web site and on the Graduate School Web site, take precedence over individual program policies and guidelines. Graduate students should contact the Graduate School at any time regarding questions relating to graduate study at VCU.

The archived copies of current and past bulletins reflect all policies and procedures in effect at the beginning of the stated academic year. The online (html) Bulletins site is updated regularly to reflect changes that occur throughout the academic year.

University rules and procedures

Each member of the VCU community has certain responsibilities, rights and privileges. These are stated in some detail in the VCU Rules and Procedures [PDF], and all students are responsible for being familiar with provisions of this document. The rules and procedures are printed in the VCU Insider and also are available at the Office of Judicial Affairs and Academic Integrity. This document also provides for the process whereby disciplinary action, including separation from VCU, may be taken against a member of the university community as a result of behavior that is in violation of the prohibited conduct as stated in the VCU Rules and Procedures.

VCU recognizes that honesty, truth, and integrity are values central to its mission as an institution of higher education. Therefore, all students are subject to the VCU Honor System. All graduate students are responsible for being familiar with provisions of this document.

Graduate students at VCU have a right to appeal actions of an academic nature. If such action involves a course grade, the Grade Review Procedures as published in the Rules and Procedures should be followed. If such action involves computing, the Computer and Network Resources Use Policy should be followed.

In addition to those standards of conduct described in VCU Rules and Procedures and the VCU Honor System, students enrolled at the university may be dismissed from the academic programs in which they are enrolled for failure to meet prescribed academic program requirements. Students appealing terminations from their graduate degree programs/departments should first pursue appeals at the program/department and/or the school level. After receiving the program/department and/or school decision, students have the option of filing an appeal with the graduate dean in the process outlined in the Appeal Process for Students Terminated from VCU Graduate Degree Programs.

VCU seeks to foster insight, imagination, creativity, resourcefulness, diligence, honesty and responsibility as well as the education of the men and women enrolled in its graduate programs. Such an enterprise can take place only where the highest standards of academic integrity exist.

Academic dishonesty is the giving, taking or presenting of information or material by students with the intent of unethically or fraudulently aiding themselves or others on any work that is to be considered in the determination of a grade or the completion of academic requirements. Students in doubt regarding any matter related to the standards of academic integrity in a given course or on a given assignment should consult with the faculty member responsible for the course before presenting the work.

Effective bulletin (catalog)

The bulletin of record for all graduate students, both on- and off-campus, is the Graduate Bulletin in effect at the time of official admission to their degree programs (as specified in the official letter of admission from the Graduate Dean). The effective bulletin contains the official requirements that students must complete to earn their degrees.

The archived copies of current and past bulletins (catalogs) reflect all policies and procedures in effect at the beginning of the stated academic year. The online Bulletin is updated regularly to reflect changes that occur throughout the academic year.

Students who do not maintain continuous enrollment (as defined in the effective bulletin) must reapply for admission and will be subject to the requirements of the bulletin in effect at the time of readmission. Exception to this policy must be recommended by the appropriate graduate program director and school dean and approved by the dean of the Graduate School.

Degree requirements

The minimum course requirements, rules of admission to degree candidacy, language requirements, thesis or dissertation requirements, comprehensive examinations, transfer of credits, and the like are specified for each program in the individual program sections on this bulletin Web site. Additionally, many schools, programs and departments maintain Web sites and publish special brochures, student manuals and program guides that may be requested from the appropriate dean or program director.

In all cases, the official policies and procedures of the University Graduate Council, as published in the Graduate Bulletin and on the Graduate School Web site, are fully applicable to all graduate programs and graduate students, both on- and off-campus, and take precedence over individual program policies and guidelines. Graduate students should contact the Graduate School with questions regarding any discrepancies.

Advising program

Students are responsible for the proper completion of their academic programs. They must be familiar with the Graduate Bulletin, including general academic regulations promulgated by individual schools and departments.

The offices of the deans and department chairs, in cooperation with the advisers and faculty, endeavor to follow the academic progress of all students, and students are encouraged to seek counsel whenever there is a need. If advisers are unable to...
resolve problems satisfactorily, they will refer students to others as deemed appropriate and necessary.

In order to aid advising, students are responsible for maintaining current mailing addresses on file with the Office of Records and Registration, as well as with the schools and departments in which they are enrolled.

Students also are required to obtain an official VCU student e-mail account within one week of the beginning of the first semester of enrollment and are responsible for reading in a timely fashion university-related communications sent to their official VCU student e-mail accounts. Information on how to set up an account is available online at http://beech.vcu.edu/das/vmanweb/home.nsf/webcontent/studentemail?.

Exceptions

Exceptions to graduate policies must be approved by the dean of the Graduate School. Requests for exceptions to Graduate School policies are to be made in writing by students to their graduate advisers. The advisers will forward their recommendations, along with copies of student requests and supporting documentation, to the dean of the Graduate School, who represents the University Graduate Council.

Appeal process, students terminated from a VCU graduate program

A. Termination process

1. Termination is initiated at the program/department level by advisers/graduate program directors/department chairs via a special action form indicating the reason with relevant documentation attached. Reasons for termination may include but are not limited to:
   - academic (“D” or “F” in class, too many grades of “C,” as determined by the student’s academic program in conjunction with Graduate Council policy, GPA below 3.0, failure of comprehensive exams, lack of progress or unsuccessful defense of thesis/dissertation),
   - discontinuous enrollment,
   - exceeding time limit,
   - honor policy violation,
   - academic misconduct or professional misconduct.

2. Request for termination is forwarded to the school dean/dean’s designee, who reviews the action, signs the form and forwards it to the graduate dean.

3. The graduate dean/dean’s designee reviews the action, signs the form, notifies the Office of Records and Registration and sends a termination letter through certified mail to the student. This letter must include a statement of the student’s right to appeal and inform the student that appeals must be initiated at the program/department and/or school level within 14 days after receipt of the letter.

B. Appeals process

1. The student assumes the burden of proof in this appeal.

2. The student should initiate the appeal process at the program level according to the program/department and/or school’s appeals process. All program/department and/or school appeals processes should be exhausted prior to initiating an appeal to the graduate dean.

3. If all program/department and/or school appeal processes fail to resolve the termination issue, the student must provide the graduate dean with written notification of appeal and reasons.

4. The graduate dean provides the graduate program director and school/college dean with copies of the student’s request and asks the graduate program director/dean/department chair to provide the Graduate School with their response, including copies of correspondence and any other supporting documentation that led to the termination. The graduate program director and school dean must respond to the graduate dean’s request for information within 14 calendar days.

5. The graduate dean notifies the student in writing through certified mail of the decision within 14 calendar days of receiving the information from the graduate program director and the school/college dean.

6. The student may be allowed to register for courses with the understanding that he/she will be dropped retroactively if the termination is upheld. If the appeal is based on a grade appeal, the student may be allowed to register for courses for which the course in question is not a prerequisite.

Student load

Student load is the total number of credits for which students are enrolled in any semester. Degree-seeking students may be either full time or part time, dependent upon program rules. Students who are fully funded as VCU graduate assistants with tuition remission are classified as “full time” during any semester in which they enroll for nine or more credits (six during the summer if funded on a 12-month stipend). Departmental requirements vary; therefore, funded students should verify expected course loads with their graduate program directors.

The maximum number of credits for which students may enroll in any semester without special permission is 15. More than 15 credits is an overload. More than 12 credits may result in increased tuition. Permission to enroll for more than 15 credits may be granted upon the written recommendation of the adviser, through departmental governance procedures, to the dean of the Graduate School.

Each summer course is designed to provide the equivalent of one semester’s work. With careful scheduling, it is possible for students to earn as many as 15 credits during the summer if course work extends over the full summer semester calendar. Permission to enroll for more than 15 credits in the summer semester may be granted upon the written recommendation of the adviser through departmental governing procedures to the dean of the Graduate School.

Summer success is predicted on the academic standard of one credit per week. Six credits in five weeks or nine credits in eight weeks are considered a normal load, but VCU does not permit six credits in four weeks or nine credits in six weeks. Suggested scheduling combinations are printed in the Summer Schedule of Classes or are available online at http://www.vcu.edu/schedule.

Attendance and enrollment policies

Class attendance

Instructors are responsible for clearly informing students in writing of the attendance requirement for each course and the consequences of poor attendance. Students must abide by the requirements as announced in each separate class even though the requirements may vary widely among courses.

Enrollment

Any person engaged in graduate study at VCU must enroll each semester in which he/she is engaged in any form of study at VCU that involves use of university facilities, laboratories/studios and/or libraries, or who is supervised by or consults with a faculty member concerning graduate work on a project, work of art, thesis or dissertation.

Continuous enrollment for degree-seeking graduate students

Continuous enrollment – Pre-candidate

Once admitted to a degree program, a graduate student is expected to comply with minimum enrollment of one course per 12-month period from the beginning of his/her program.

Continuous enrollment – Candidate

A graduate student who has completed course requirements for a degree must register for at least one credit at VCU each fall and spring semester until the degree is awarded. Students must be enrolled during their graduation semesters.

Residence for Ph.D. programs

At many universities, doctoral students are required to maintain at least one to two years of continuous full-time enrollment or “residence.” At VCU, each doctoral program will establish its own residency requirements.
Change in registration
Once students have registered for classes, changes in registration must be made according to the procedures listed below. Whenever students make any changes in registration, they should keep copies of their new schedules as verification of the changes. Changes in registration may affect financial aid. Students are advised to consult with a financial aid counselor before making any changes to their enrollment status. See the “Financial Aid” section of this chapter for detailed information.

Cancellation of registration
To cancel registration, students must notify, in writing, the Office of Records and Registration before the end of the “Add-Drop” period, or drop all classes using the Web Registration System. Refunds are issued in accordance with procedures described under the refunds section of this chapter. For readmission guidelines, refer to the admissions section.

Auditing graduate classes
Class size permitting, students may register for courses on an audit basis. Auditing a course means students enroll in courses, but do not receive academic credit upon completion of the courses. Students who register on an audit basis are subject to attendance regulations of that class and may be administratively withdrawn by instructors for a violation of class requirements for audit students, before or after the normal withdrawal deadline as posted on the VCU Academic Calendar. Students who register for audit may be subject to other course requirements at the discretion of the instructors. Audit students are charged the regular rate of tuition and fees. An audit course is counted as part of students’ semester load in terms of classification as full-time students. Courses taken for audit, however, do not satisfy minimum enrollment requirements for students receiving graduate teaching or research assistantships, graduate fellowships, or university graduate scholarships. Students may register for audit only during add/drop and late registration periods as a new registration and not as a change from credit to audit. Changes in registration status from audit to credit or from credit to audit will not be approved after the last day of add/drop registration. The grade of AU is not included in the calculation of the GPA.

Leave of absence and withdrawal policies
Leave of absence. Graduate students may request leaves of absence from their programs through written appeals to their advisers. The advisers will forward the requests, following departmental governance procedures, along with their recommendations and any supporting documentation to the dean of the Graduate School who will respond for the university. Students who do not register for courses for more than one calendar year and who have not been granted approved leaves of absence by the graduate dean are out of compliance with continuous enrollment policy and must reapply for admission to VCU and to their graduate degree programs. Graduate students with approved leaves of absence are exempted from continuous enrollment requirements for the LOA period. Students should note that while leaves of absence temporarily suspend continuous enrollment requirements, they do not extend time limits for completion of degrees. (See policy on Exceptions.)

Withdrawal from classes. To withdraw officially from VCU courses, students must submit complete Official Withdrawal Forms to the Office of Records and Registration by the official withdrawal date as published in the official VCU Calendar. The Official Withdrawal Form is obtained from the Office of Records and Registration (Monroe Park Campus: Founders Hall, Room 104; MCV Campus: Sanger Hall, Room 1-055). Students may also withdraw on line via VCU E-services. Failure to complete this process may result in the assignment of failing grades in all or some of the courses.

A grade of withdrawn (“W”) will be recorded on the permanent student academic record for all courses from which students officially withdraw.

Health-related withdrawals. While graduate students are expected to work toward completion of their degrees without interruption, health-related problems may necessitate withdrawal from the university.

Some schools require a statement from a physician indicating the nature and severity of the condition, when a student should stop attending classes, and the estimated date of return to school.

In the event that a student’s health problem poses a danger to the student, to patients or to others with whom the student may come in contact, and the student is unable or refuses to initiate steps to withdraw as stated above, administrative withdrawal of the student may be made by the dean of the Graduate School upon consultation with the appropriate faculty and a qualified physician.

Because curricular and course content changes may occur and a student’s progress toward a degree may be affected adversely because of an extended absence, specific time periods may be imposed by individual schools with respect to the length of time allowed for absence from school. If there is a delay in return beyond the allotted time period without written consent of the dean of the Graduate School, the student may petition for return with advanced standing.

Some schools require that prior to return to school, the student must submit to the dean of the Graduate School a statement from a physician. This statement should document that the condition that necessitated the withdrawal has been corrected to a point where the student can complete successfully all curriculum requirements with reasonable accommodation including classroom, laboratory, clinical and fieldwork experience.

Immunization requirements
The commonwealth of Virginia and VCU require that all full-time students supply validated immunization records to University Student Health Services. This requirement must be completed prior to registering for second semester. Failure to meet these requirements will result in a hold placed on the student’s second semester registration. The hold can be removed only upon receipt of the students documented records.

The immunization record must be completed fully and accurately. There are two ways a student may fulfill all requirements:

1. Students may have their health care provider transfer the information from their medical records and sign the form.

or

2. Students may complete the top demographic section of the Certificate of Immunization and attach a copy of official documents from undergraduate institutions, military records, high school or other records that fulfill all requirements to the Certificate of Immunization.

A copy of the Certificate of Immunization, which details the necessary immunizations, is available on the student health Web site at: www.students.vcu.edu/health/docs/immunizations.pdf [PDF].

Students who cannot provide documented evidence of all required immunizations must see their health care provider, health department or Student Health Services to complete all requirements.

Change of graduate degree program
Students wishing to change to different graduate degree programs should obtain new application forms from the Graduate School Web site. Students will have to submit new applications to the new programs with all materials required of applicants to that program. The dean of the Graduate School will work with the administrators of the two programs to facilitate the admission process for eligible students.

Transfer credit
A maximum of 30 percent of the didactic hours required for a graduate degree or any graduate certificate program may be transferred from another VCU program or outside institution and, if not applied previously toward another degree, may be applied toward a degree. Acceptance of transfer credit is made at the school level and reviewed and approved by the Graduate School. Individual schools/programs may have more stringent requirements.

All transfer work must be at the A or B grade level from an accredited institution or university. “Credit” or “pass” grades can be accepted only if approved by petitioning the Graduate Advisory Committee or equivalent of the student’s school or college. Students must be in good standing both at VCU and at the institutions from which the credits were earned. Some programs will not accept credits earned as a nondegree-seeking graduate student for transfer. VCU will not accept credits that do not apply to a graduate degree at the offering institution for transfer, nor will it accept credits from unaccredited institutions for transfer.
Credit for military service, career or life experience

The Graduate School does not grant graduate-level credit for any type of military service or career or life experience unless it involves course work taken as part of an approved graduate program at an accredited college or university.

Degree candidacy

Effective fall 2007

A graduate student admitted to a program or track requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master’s or doctoral status according to the degree candidacy requirements of the student’s graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student’s faculty regarding the student’s academic achievements and the student’s readiness to proceed to the final research phase of the degree program.

Degree candidacy requirements vary from program to program and may include but are not limited to such milestones as successful completion of all or a portion of all required didactic course work, the passing of written and/or oral comprehensive examinations, the identification of the thesis/dissertation adviser and/or committee, and/or the successful defense of the thesis/dissertation prospectus.

Upon satisfactory completion of degree candidacy requirements, the graduate student must submit a Graduate School Notice of Admission to Master’s or Doctoral Degree Candidacy to his/her program director. The student’s signature acknowledges that he/she has read and understands the policies regarding research involving human or animal subjects (Information on human and animal subjects can be found online at www.orsp.vcu.edu/IRB-Home.htm and www.orsp.vcu.edu/IACUC-Home.htm) as well as continuous enrollment requirements. Both the program director and the school’s dean or dean’s designee must sign the form to confirm the student’s eligibility for admission to degree candidacy and forward it to the graduate dean for final approval and recording of admission to degree candidacy. The graduate dean will formally notify the student of admission to degree candidacy.

A graduate student approved for degree candidacy must register for at least one graduate credit hour at VCU each fall and spring semester until the degree is awarded. Students must be enrolled during their graduation semesters. Graduate students with approved leaves of absence are exempted from continuous enrollment requirements for the LOA period. Students should note that while a leave of absence temporarily suspends the continuous enrollment requirement, it does not extend the time limit for completion of the degree.

Thesis/dissertation examinations

The VCU Graduate School Thesis and Dissertation Manual, as developed by the University Graduate Council and VCU Libraries, serves as a guide for the preparation of the graduate theses and dissertations for graduate students in all programs within the university. The manual is available on the Graduate School Web site at www graduater.vcu.edu/pdfs/thesis.pdf.

General regulations applying to thesis/dissertation committees and competency examinations are as follows.

Graduate advisory committees shall be appointed for each master’s degree candidate for whom there is a requirement to produce a thesis or its equivalent in the form of a research project, performance, exhibit or other production. The committee will coordinate and supervise the preparation of the thesis or its equivalent. The committee shall have a minimum of three faculty members, one of whom should be from a discipline other than the discipline of the candidate. The chair of the committee will be designated as the candidate’s faculty adviser. Departments/program directors will appoint advisers for master’s degree candidates for whom a thesis or its equivalent is not required.

A graduate dissertation committee shall be appointed for each doctoral candidate. The committee will have a minimum of four faculty members, including a chair, who will serve as the candidate’s faculty adviser. At least two members must be from within the candidate’s discipline and at least one from another discipline. Upon satisfactory completion of all program requirements for admission to candidacy, doctoral matriculants will take written and/or oral comprehensive examinations administered by their major departments or schools. Successful completion of the examinations shall entitle students to advance to doctoral degree candidacy status. Candidates are then allowed to proceed with the research and preparation of their dissertations and any other doctoral degree requirements designated by their departments.

In the event of failure, students may be permitted to retake comprehensive examinations one time only. The re-examination requires the approval of the appropriate graduate program committee.

Grades of satisfactory (S), unsatisfactory (U) or fail (F) in thesis and dissertation courses

All thesis and dissertation credits are to be graded each semester as satisfactory (S), unsatisfactory (U) or fail (F). There is no limit to the number of these credits a student may take while pursuing completion of the degree. Receipt of the grade of U is formal notification to the student of unsatisfactory progress. A student who receives a final grade of F in the thesis or dissertation will be terminated from the graduate program. A grade of S or U is not included in the calculation of the GPA. A grade of I (incomplete) may not be assigned for a course approved for satisfactory, unsatisfactory or fail (S/U/F) grading.

Thesis/dissertation submission deadlines

All thesis/dissertation requirements must be completed no later than the Friday preceding the week before Commencement of the semester in which candidates plan to graduate, including:

• Final defense of thesis/dissertation.
• Signature sheet with all approval signatures, including the graduate dean’s and, if applicable, documentation of IRB or IACUC approval number.
• Submission of all required copies to VCU Libraries, with appropriate forms and fees, for binding and copywriting (if applicable), according to instructions in University Graduate Council’s Thesis/Dissertation Manual and/or VCU Libraries Electronic Thesis/Dissertation procedures and program/school handbooks; and submission of the Survey of Earned Doctorates to the graduate dean (doctoral students only).

Students should contact their graduate program directors regarding internal schedules for submission of copy, defense and approval.

Electronic theses and dissertations

Electronic Theses and Dissertations (ETDs) are digital representations of the traditional work completed by graduate students in partial fulfillment of requirements for graduate degrees. An ETD can be a simple textual document converted to a standard electronic format such as Adobe Portable Document Format (PDF) or a complex combination of images and formats.

Complete information about electronic theses and dissertations is available online at www.graduater.vcu.edu/community/thesis.html.

Satisfactory academic progress

Students must continue to make satisfactory progress toward their degrees. Unsatisfactory grades and unprofessional conduct are areas that may warrant review for possible termination from their programs.

Specifically, students may not present courses receiving less than a C for fulfilling degree requirements.

At the end of each semester, graduate faculty advisers and program directors will review the academic progress of all graduate students in their programs. The academic standing of any graduate students who receive multiple grades of C or grades of D or F will be reviewed for possible termination from their programs. Although the grade of U is not included in the calculation of the graduate GPA, graduate students who receive one or more grades of U will be considered for possible termination.

Time limit for completion of requirements and eligibility of courses

The time limit for a graduate degree will not extend beyond a period of six years for master’s degrees and eight years for doctoral degrees.

Course work completed before matriculation and applied toward the degree, including course work at VCU and that transferred from other institutions, will be evaluated by the program/department to determine whether it can be used to fulfill degree requirements. For course work that was taken more than eight years prior to the completion of the VCU degree, the program/department will evaluate the
course work for acceptability and report those courses deemed acceptable to the dean of the Graduate School. (See policy on Exceptions.)

Graduation requirements
Candidates for degrees are eligible for graduation upon completion of all academic requirements in effect at the time of the first registration, provided the students are continuously enrolled and provided the requirements are met within the time limit specified by the school or program. Students failing to satisfy the time requirement and who are readmitted to their programs shall satisfy requirements in effect at the time of readmission.

All degrees are conferred by the VCU Board of Visitors upon recommendation of the graduate faculty. Degrees are granted at the close of the semester or summer session in which students complete their work. Degrees will not be granted unless all financial obligations have been resolved with VCU’s accounting office. No degrees will be conferred unless students make formal application for graduation. Students must be enrolled at the time of application (i.e., the semester in which students graduate).

Graduation applications must be submitted by students to their advisers or deans no later than the dates indicated in the university’s academic calendars on the Web at www.vcu.edu/academiccalendars. Students should schedule conferences with their advisers well ahead of the deadline and should note that the application requires the approval of the adviser, the department chair or the school director of graduate studies, and the school dean. Credit is applicable toward only one degree unless students are admitted to a course of study that allows a defined number of shared courses. Graduate credit hours earned toward a VCU certificate may be applied one time to degree requirements for master’s or Ph.D. programs. Graduate credit hours earned toward a VCU certificate may be applied toward only one certificate. The determination of the acceptability of specific courses to be used for both the certificate and the graduate degree will be the responsibility of that masters or Ph.D. program or school.

Graduation checklist
The total number of semester credits required for graduation depends upon the degree program. Specific information may be found under degree program descriptions. In addition to the specific requirements listed by the department, the following graduation checklist for graduate students, advisers and program directors summarizes all general requirements for graduation as determined by the University Graduate Council.

• Candidates enrolled at time of application/reapplication to graduate (i.e., semester in which candidates plan to graduate).
• Overall graduate GPA is greater than or equal to 3.0.
• Graduate GPA based on all graduate course work attempted after acceptance into program.
• For repeated courses, both original grade and repeat grades included in calculation of graduate GPA.
• No more than six credit hours or 20 percent of total credit hours attempted (whichever greater) at C or below level (C, D, F).
• No course work approved for transfer below grade of B; no course work approved for transfer included in calculation of GPA.
• Graduate course work only (500 level or higher) may be applied to a graduate degree with at least one half of required course work designated exclusively for graduate students (600 or higher).
• All Incompletes (I) converted to letter grade by last day of class of semester in which candidate plans to graduate.
• All grades of Continued (CO), Progress (PR) and No Grade (NG) converted to letter grades by last day of class of semester in which candidate plans to graduate.
• All course work taken within prescribed time limits (master’s, six years; Ph.D., eight years with any extensions approved by Graduate School).
• All requirements for thesis/dissertation (if applicable) completed by the deadline published in the Academic Calendar of the semester in which candidate plans to graduate, including
  ◦ Signature sheet with all approval signatures, including graduate dean’s and, if applicable, documentation of IRB or IACUC approval number.
• Required copies submitted to VCU Libraries, with appropriate forms and fees, for binding, copyrighting (if applicable), etc., according to instructions in University Graduate Council’s Thesis/Dissertation Manual and/or VCU Libraries Electronic Thesis/Dissertation procedures and program/school handbooks. (Candidate should confirm with adviser/program director all internal schedules for submission of copy, defense and approval.)
• Submission of Survey of Earned Doctorates to graduate dean (doctoral students only). To complete the survey electronically, go to www.norc.uchicago.edu/sed

• Students must settle all financial obligations with VCU Student Accounting Department.

Application to graduate
At the beginning of each semester, all matriculated graduate students will receive an e-mail reminder from the Office of Records and Registration/Graduation Office to initiate the application to graduate process for the current semester.

The e-mail notification will be sent to the official VCU student e-mail address and will include submission deadlines and guidelines. (All graduate students in the School of Medicine are asked to complete a preliminary review before initiating the online E-services graduation checkout procedure and are referred to the School of Medicine guidelines or to their advisers/graduate program directors regarding application to graduate procedures.)

Students planning to graduate in the current semester should proceed:
• First go to the eServices Web site to complete the online portion of the graduation checkout procedure.
• The Graduation Forms Web site address to complete the Graduate School Application to Graduate according to the instructions provided for the completion and submission of documentation to advisers for review and approval www.vcu.edu/enroll/forms/graduation. (These forms are provided in PDF format so that students can complete the forms online and print them. Adobe Acrobat Reader is required.) A separate set of graduation forms must be completed and submitted for each program from which students intend to graduate.

The Graduate School Application to Graduate consists of:
• Instructions for students and advisers regarding submission of documentation and the approval process, including a checklist summarizing academic policies and requirements for graduation as determined by the University Graduate Council and articulated in the Graduate Studies at VCU section of the Graduate Bulletin.
• An approval sheet, requiring both preliminary and final reviews/approvals (and indicating the process by which advisers can notify Records and Registration/Graduation Office if students do not complete their programs of study by the end of the current semester).
• Directions for completing Commencement Program/Diploma Information. (This information must be submitted no later than the deadlines provided in the e-mail notification to students in order to ensure inclusion in the appropriate Commencement Programs.)
• An optional Graduation Worksheet. (Students should check with their advisers/graduate program directors to see if they are required to complete the optional graduation worksheet.)

Students are reminded to complete a final check of their academic records before they exit the university to ensure that all temporary grades have been converted, that the record accurately reflects their academic histories and that all degrees have been posted.

Detailed information about the application to graduate process for graduate students and guidelines for graduate program directors/advisors are available on the Graduate School Web site at www.graude.vcu.edu/forms.

Reapplying for graduation
Candidates who do not graduate at the end of the semester for which they have applied must reregister and reapply. Students must be enrolled at the time of application/reapplication (i.e., the semester in which the student graduates).
Commencement
Graduate students are encouraged to visit the Graduate School Web site for information about university Graduate School events and activities for May and December commencement ceremonies. Students also are encouraged to visit the VCU Commencement Web site.

Time limit for completion of requirements and eligibility of courses
The time limit for a graduate degree will not extend beyond a period of six years for master’s degrees and eight years for doctoral degrees. Course work completed before matriculation and applied toward the degree, including course work at VCU and that transferred from other institutions, will be evaluated by the program/department to determine whether it can be used to fulfill degree requirements. For course work that was taken more than eight years prior to the completion of the VCU degree, the program/department will evaluate the course work for acceptability and report those courses deemed acceptable to the dean of the Graduate School. (See policy on Exceptions.)

Grades
Grade reports
Final grade reports are accessible through eServices or may be obtained from the Office of Records and Registration.

Transcripts
Official transcripts of students’ academic records will be issued only by the Office of Records and Registration upon written request of the students.

Repeated courses
Students receiving grades below B shall repeat a course only upon the advice of their program directors. Both the original grade and the repeat grade shall be included in the calculation of the graduate GPA.

Grade review procedure
If a student thinks that a grade is inaccurate, the situation should be discussed with the faculty member. This will allow the faculty member to explain how the final grade was determined and, if an error is detected, to submit a change of grade. If the student still thinks that the grade was assigned unfairly, a written appeal should be submitted to the department chair. Upon receipt of the written appeal, the department chair shall provide the student with a copy and explanation of the Grade Review Procedure (published in the VCU Rules and Procedures [PDF]) and shall ensure that the requirements of the Grade Review Procedure are followed. If the department chair is unable to resolve the complaint, then the dean of the school in which the course was offered will form a grade review committee as described in the Grade Review Procedure policy and will submit its decision to the dean of the school. The decision communicated by the dean of the school in which the program resides is the final decision that will be distributed to the student, faculty member(s) and department chair.

In cases concerning grades awarded for the fall semester, the written appeal must be submitted to the department chair no later than 14 calendar days after the beginning of the following spring semester. In cases concerning grades awarded for the spring semester or summer sessions, the written appeal must be submitted no later than 14 calendar days after the beginning of the following fall semester.

Grading system
Work quality is measured by the four-point grade system with the following equivalents:

<table>
<thead>
<tr>
<th>Grade symbol and meaning</th>
<th>Grade-point value per semester credit</th>
</tr>
</thead>
<tbody>
<tr>
<td>A</td>
<td>4.0</td>
</tr>
<tr>
<td>B</td>
<td>3.0</td>
</tr>
<tr>
<td>C</td>
<td>2.0</td>
</tr>
<tr>
<td>D</td>
<td>1.0</td>
</tr>
</tbody>
</table>

Grade of audit (AU)
Class size permitting, students may register for courses on an audit basis. Auditing a course means students enroll in courses, but do not receive academic credit upon completion of the courses. Students who register on an audit basis are subject to attendance regulations of that class and may be administratively withdrawn by instructors for a violation of class requirements for audit students, before or after the normal withdrawal deadline as posted on the VCU Academic Calendar. Students who register for audit may be subject to other course requirements at the discretion of the instructors. Audit students are charged the regular rate of tuition and fees. An audit course is counted as part of students’ semester load in terms of classification as full-time students. Courses taken for audit, however, do not satisfy minimum enrollment requirements for students receiving graduate teaching or research assistantships, graduate fellowships or university graduate scholarships. Students may register for audit only during add/drop and late registration periods as a new registration and not as a change from credit to audit. Changes in registration status from audit to credit or from credit to audit will not be approved after the last day of add/drop registration. The grade of AU is not included in the calculation of the GPA.

Grade of continued (CO)
The grade of CO may be assigned as an interim grade for those courses that run over several grade reporting periods. The CO indicates that the course is not expected to be completed in a single semester and that students must reregister for the course. Upon completion of the course, a final grade will be assigned to the current semester, and the previous CO grade(s) will remain. This grade may be assigned only in courses approved for such grading. The grade of CO is not included in the calculation of the GPA.

Grade of incomplete (I)
If, because of circumstances beyond his or her control, a student is unable to meet all the requirements of a course by the end of a semester, the mark of incomplete (I) may be given. The awarding of a mark of I requires an understanding between instructor and student as to when and how the course will be completed. This understanding must be recorded on an Incomplete Grade Assignment Form that is submitted instead of a final course grade. The maximum time limit for submission of all course work necessary for removal of an incomplete is the end of the last day of classes of the next semester following the semester in which the incomplete was incurred (i.e., an incomplete awarded in the fall semester must be converted by the last day of classes in the spring semester, and an incomplete awarded in the spring or summer session must be converted by the last day of classes in the fall semester). At that time, an unremoved grade of incomplete is changed automatically to a failing grade. Individual departments and schools may have more stringent time limits. An extension of the time limit is possible, but must be

Specifically, students may not present courses receiving less than C for fulfilling degree requirements.

Refer to the grading explanations below for the use of the grades of “satisfactory” and “unsatisfactory” in relation to thesis/dissertation classes.

The number of grade points earned is computed by multiplying the grade-point value for the letter grade by the number of semester credits for the course. As an example, a student receiving an A (i.e., four grade points) in a three-credit course receives 12 grade points.

The grades of accepted transfer courses are not included in the computation of the VCU GPA.

Graduate-level credit is not granted for any type of military service or career or life experience unless it involves course work taken as part of an approved graduate program at an accredited college or university.

Graduate students are not designated as special honors graduates (i.e., cum laude, magna cum laude, summa cum laude) on transcripts or diplomas upon completion of their programs.

No degree credit for remedial work shall be awarded to graduate students.

Graduate students advised to take any level course for remedial work should be notified in writing that the course credit shall not apply to the degrees they are pursuing. Other bodies may rule later, should students wish to apply the credit to some other degree.

Students receiving grades below B shall repeat a course only upon the advice of their program directors. Both the original grade and the repeat grade shall be included in the calculation of the graduate GPA.

Grade reports
Final grade reports are accessible through eServices or may be obtained from the Office of Records and Registration.

Transcripts
Official transcripts of students’ academic records will be issued only by the Office of Records and Registration upon written request of the students.

Repeated courses
Students receiving grades below B shall repeat a course only upon the advice of their program directors. Both the original grade and the repeat grade shall be included in the calculation of the graduate GPA.

Grade review procedure
If a student thinks that a grade is inaccurate, the situation should be discussed with the faculty member. This will allow the faculty member to explain how the final grade was determined and, if an error is detected, to submit a change of grade. If the student still thinks that the grade was assigned unfairly, a written appeal should be submitted to the department chair. Upon receipt of the written appeal, the department chair shall provide the student with a copy and explanation of the Grade Review Procedure (published in the VCU Rules and Procedures [PDF]) and shall ensure that the requirements of the Grade Review Procedure are followed. If the department chair is unable to resolve the complaint, then the dean of the school in which the course was offered will form a grade review committee as described in the Grade Review Procedure policy and will submit its decision to the dean of the school. The decision communicated by the dean of the school in which the program resides is the final decision that will be distributed to the student, faculty member(s) and department chair.

In cases concerning grades awarded for the fall semester, the written appeal must be submitted to the department chair no later than 14 calendar days after the beginning of the following spring semester. In cases concerning grades awarded for the spring semester or summer sessions, the written appeal must be submitted no later than 14 calendar days after the beginning of the following fall semester.

Grading system
Work quality is measured by the four-point grade system with the following equivalents:

<table>
<thead>
<tr>
<th>Grade symbol and meaning</th>
<th>Grade-point value per semester credit</th>
</tr>
</thead>
<tbody>
<tr>
<td>A</td>
<td>4.0</td>
</tr>
<tr>
<td>B</td>
<td>3.0</td>
</tr>
<tr>
<td>C</td>
<td>2.0</td>
</tr>
<tr>
<td>D</td>
<td>1.0</td>
</tr>
</tbody>
</table>

Specifically, students may not present courses receiving less than C for fulfilling degree requirements.

Refer to the grading explanations below for the use of the grades of “satisfactory” and “unsatisfactory” in relation to thesis/dissertation classes.

The number of grade points earned is computed by multiplying the grade-point value for the letter grade by the number of semester credits for the course. As an example, a student receiving an A (i.e., four grade points) in a three-credit course receives 12 grade points.

The grades of accepted transfer courses are not included in the computation of the VCU GPA.

Graduate-level credit is not granted for any type of military service or career or life experience unless it involves course work taken as part of an approved graduate program at an accredited college or university.

Graduate students are not designated as special honors graduates (i.e., cum laude, magna cum laude, summa cum laude) on transcripts or diplomas upon completion of their programs.

No degree credit for remedial work shall be awarded to graduate students.

Graduate students advised to take any level course for remedial work should be notified in writing that the course credit shall not apply to the degrees they are pursuing. Other bodies may rule later, should students wish to apply the credit to some other degree.

Grade of audit (AU)
Class size permitting, students may register for courses on an audit basis. Auditing a course means students enroll in courses, but do not receive academic credit upon completion of the courses. Students who register on an audit basis are subject to attendance regulations of that class and may be administratively withdrawn by instructors for a violation of class requirements for audit students, before or after the normal withdrawal deadline as posted on the VCU Academic Calendar. Students who register for audit may be subject to other course requirements at the discretion of the instructors. Audit students are charged the regular rate of tuition and fees. An audit course is counted as part of students’ semester load in terms of classification as full-time students. Courses taken for audit, however, do not satisfy minimum enrollment requirements for students receiving graduate teaching or research assistantships, graduate fellowships or university graduate scholarships. Students may register for audit only during add/drop and late registration periods as a new registration and not as a change from credit to audit. Changes in registration status from audit to credit or from credit to audit will not be approved after the last day of add/drop registration. The grade of AU is not included in the calculation of the GPA.

Grade of continued (CO)
The grade of CO may be assigned as an interim grade for those courses that run over several grade reporting periods. The CO indicates that the course is not expected to be completed in a single semester and that students must reregister for the course. Upon completion of the course, a final grade will be assigned to the current semester, and the previous CO grade(s) will remain. This grade may be assigned only in courses approved for such grading. The grade of CO is not included in the calculation of the GPA.

Grade of incomplete (I)
If, because of circumstances beyond his or her control, a student is unable to meet all the requirements of a course by the end of a semester, the mark of incomplete (I) may be given. The awarding of a mark of I requires an understanding between instructor and student as to when and how the course will be completed. This understanding must be recorded on an Incomplete Grade Assignment Form that is submitted instead of a final course grade. The maximum time limit for submission of all course work necessary for removal of an incomplete is the end of the last day of classes of the next semester following the semester in which the incomplete was incurred (i.e., an incomplete awarded in the fall semester must be converted by the last day of classes in the spring semester, and an incomplete awarded in the spring or summer session must be converted by the last day of classes in the fall semester). At that time, an unremoved grade of incomplete is changed automatically to a failing grade. Individual departments and schools may have more stringent time limits. An extension of the time limit is possible, but must be
approved, prior to the expiration date stated above, by the instructor and the dean of the school through which the course is offered. Written approval indicating the new time limit must be filed with the dean of the Graduate School. The temporary grade of I is not included in the calculation of the GPA.

Grade of pass (P)
This grade is awarded for certain courses to denote satisfactory completion of requirements. The grade of P is not included in the calculation of the GPA.

Grade of progress (PR)
The mark of PR may be assigned only in courses approved for such grading. Unlike the mark of I, PR will not automatically be changed to a failing grade at the end of the succeeding semester. The grade of PR is not included in the calculation of the GPA.

Grades of satisfactory (S), unsatisfactory (U) or fail (F) in thesis and dissertation courses
All thesis and dissertation credits are to be graded each semester as satisfactory (S), unsatisfactory (U) or fail (F). There is no limit to the number of these credits a student may take while pursuing completion of the degree. Receipt of the grade of U is formal notification to the student of unsatisfactory progress. A student who receives a final grade of F in the thesis or dissertation will be terminated from the graduate program. A grade of S or U is not included in the calculation of the GPA. A grade of incomplete (I) may not be assigned for a course approved for satisfactory, unsatisfactory or fail grading.

Grade of withdrawal (W)
The grade of W indicates that the student has officially withdrawn from a course or has been administratively withdrawn for nonattendance. No student who has officially withdrawn from a course or who has been administratively withdrawn for nonattendance may attend subsequent meetings of the course.

Course listings

Identification of symbols
I A course offered in the first semester
II A course offered in the second semester
I, II A course offered in each semester
I and II A course continued through two semesters
S A course offered in summer sessions

Course interpretation
A single number listing for a course, such as MGMT 648, indicates that it is a one-semester course and may be offered each semester or only one semester each year. Courses listed with a double number, such as THEA 603, 604 and designated as summer courses, consist of two one-semester courses, either semester of which may be taken without the other.

Courses listed with a double number, such as APPM 575-576, are designated as continuous courses and consist of two one-semester courses, the first of which can be taken without the second, but the second of which can-not be taken without the successful completion of the first.

The university reserves the right to withdraw any course or program.

Course numbering
All schools and programs within VCU use the following course numbering system. All course numbers consist of three digits (XXX). The first digit relates to the course level as follows:

0XX noncredit courses
Courses offered for students to make up deficiencies in previous training or to improve certain basic skills.

1XX and 2XX undergraduate, lower level
Courses with these numbers are offered primarily for undergraduate students and may not be used for graduate credit, although graduate students may be required to register for courses at this level to gain a necessary foundation for other course work.

3XX and 4XX undergraduate, upper level
Courses offered for advanced undergraduates and usually constitute the major portion of specific program work leading to the baccalaureate degree. On occasion, graduate students will be advised by their graduate advisers to enroll in prerequisite 4XX courses. Graduate programs can require that 400-level courses be taken, but credit hours in these courses cannot count toward the graduate degree or in the graduate GPA (effective fall 2004).

5XX introductory graduate courses
Graduate students enroll for credit in these courses through the normal graduate advising system. Departments may limit the number of 500-level courses applicable to a graduate degree program. Advanced undergraduates may enroll in these courses for credit with consent of the offering department. Credit is applicable toward only one degree unless a student is admitted to a course of study that allows a defined number of shared courses.

5XX professional graduate courses
First year, first professional (medicine, dentistry, pharmacy and physical therapy) courses normally open to students enrolled in the M.D., D.D.S., Pharm.D. and D.P.T. programs. Certain courses of this group may be designated by the department and approved by the University Graduate Council for graduate credit.

6XX, 7XX and 8XX graduate courses
Graduate students enroll for credit in these courses through the normal graduate advising system. Credit is applicable toward only one degree unless a student is admitted to a course of study that allows a defined number of shared courses.

6XX and 7XX professional graduate courses
6XX Second year, first professional (medicine, dentistry, pharmacy and physical therapy [second and third year]) courses normally open only to students enrolled in the M.D., D.D.S., Pharm.D. and D.P.T. programs. Certain courses of this group may be designated by the department and approved by the Graduate Council for graduate credit. 7XX Third and fourth year, first professional (medicine, dentistry and pharmacy) courses normally open only to students enrolled in the M.D., D.D.S. and Pharm.D. programs. Certain courses of this group may be designated by the department and approved by the Graduate Council for graduate credit.

Graduate tuition and student fees
Students must pay all applicable tuition, housing and dining charges, and other fees when due, as described in this section. Students who fail to pay these charges on time may be assessed a late payment fee. The university reserves the right to revise or alter all tuition and fees, regulations pertaining to student fees, and collection procedures at any time. In addition to expenses billed by the university, students should make allowances for books, clothing, supplies, travel and other out-of-pocket costs when figuring their total yearly expenses at the university.

Student financial responsibilities
Students who enroll are responsible for:
- full payment of tuition and fees generated from their registration.
- full payment of all charges for housing and dining services, and other applicable miscellaneous charges.
- keeping a current permanent mailing address on file with the Office of Records and Registration. Failure to receive an invoice because of an incorrect address does not relieve responsibility for timely payments.
- establishing an official VCU e-mail address and reading their e-mail on a regular basis, since e-mail will be used by faculty and university offices to deliver important communications.

Full-time and part-time graduate study

Graduate students registered for nine to 15 credit hours are considered full time and are charged a flat rate for tuition and fees. Graduate students registered for more than 15 credit hours during any semester will be charged an overload tuition fee on a per-credit-hour basis above the full-time tuition rate. Graduate students registered for fewer than nine credit hours are charged a per-credit-hour rate. Graduate students fully funded as graduate assistants or graduate fellows with tuition remission must register for at least nine credit hours per semester (six credit hours during the summer if funded on a 12-month stipend). Departmental requirements may vary; therefore, students should verify expected course loads with their graduate program directors.

Special students who hold bachelor’s degrees are classified as DHG (degree-holder graduate) if they enroll in one or more graduate courses. DHG students are charged by the level of the course unless they enroll for nine or more credits, at which point they are charged at the full-time graduate rate.

Tuition and fee schedule
Tuition and fees are categorized and described on the student accounting Web site at www.vcu.edu/enroll/SA/tuition. Questions regarding tuition and fees may be directed to the Student Accounting Department at (804) 828-2228, or by e-mailing
Students dropping/withdrawing from courses through the first week of class may be charged only for tuition and fees. Students withdrawing from courses through the third week of class may be charged other costs attributable to non-resident students related to the financing of buildings and equipment.

**Technology fee**
The technology fee is charged to all undergraduate, graduate and professional students in all programs. Full-time students pay a flat rate. Part-time students pay a per-credit-hour rate. The fee is used to provide for students’ technological needs and to support university-wide technological initiatives.

**Off-campus fees**
The university fee, the student activity fee, the student government association fee (except School of Social Work) and the student health fee are not charged to students taking off-campus classes.

**Capital Outlay Fee**
This fee is charged to all full-time and part-time non-resident, on-campus students. The fee is mandated by the General Assembly to reimburse the State for debt service costs attributable to non-resident students related to the financing of buildings and equipment.

**Special fee charges**
Because of specialized programs, various schools and departments may charge each student additional fees to cover special materials, equipment breakage and other costs. For specific information about special fees, refer to the Student Accounting Department Web site or to the specific school or department section in this bulletin.

**Student billing**
The Student Accounting Department issues bills to students showing charges for the following fees: tuition, student activity fee, student government association fee, technology fee, university fee, capital outlay fee, private music lessons, school major fees, lab fees, special course fees, instructional support fees, dental kits, disability insurance, housing and dining services, communication fees, student health fee and study abroad fees.

Tuition and fees for preregistered students, along with charges for housing and dining services where applicable, are due by the beginning of each semester. All other students will be billed after the registration period and should pay upon receipt of the invoice.

Students who have sufficient financial aid to cover their charges will not be sent bills. Students with current charges of $100 or more are eligible to participate in the university’s Installment Payment Plan, offered during the fall and spring semesters. The Installment Payment Plan distributes the cost of tuition, fees, room and board, and communications fee for the semester into four equal installments. The fee per semester is $25, paid with the first installment. An application and information about how to sign up for the payment plan will be included with the bill.

**Drop vs. withdraw**
Drop charges are removed to indicate that the student never attended the class. The student is not eligible to receive financial aid, and any financial aid already credited to the student’s account based on the original course registration will be removed from the student’s account, which may create a balance due to the university.

Withdraw results in the academic grade of W. Charges are assessed and adjusted according to the University Refund Policy. Students may owe a balance to the university.

**Refund of tuition and fees**
The official university tuition and fee policy, applicable for the fall and spring semesters only (excluding short courses), is outlined below. Refunds are calculated on a course-by-course (per-credit-hour) basis, disregarding the full-time cap amounts. Students who are enrolled full-time and withdraw from courses may not receive a refund.

- Students dropping/withdrawing from courses through the first week of class will be entitled to a 100 percent refund of tuition and fees.
- Students withdrawing from courses through the second week of class may be entitled to an 80 percent refund of tuition and the university fee.
- Students withdrawing from courses through the third week of class may be entitled to a 60 percent refund of tuition and the university fee.
- Students withdrawing from courses through the fourth week of class may be entitled to a 40 percent refund of tuition and the university fee.
- Students withdrawing from courses after the fourth week of class are not entitled to receive a refund of tuition and fees.

Students in off-campus courses are subject to the same refund policy as all other university students if the class is scheduled on the regular semester schedule. If the off-campus course is shorter or longer than the academic semester, the refund dates are adjusted accordingly at the request of the Off-campus Programs Office. The refund policy and deadlines of the English Language Program (ELP) are different from the university’s refund policy for academic courses. Details of the policy may be obtained from the English Language Program Office.

A full refund for Holiday Intersession will be granted if the course is dropped before midnight on the day of the first class meeting. Partial refunds are not granted.

A full refund for summer tuition and applicable fees will be granted if the course is dropped no later than the day following the first day of a given class. (This policy also is applicable if the class does not meet on two consecutive days.) Students reducing their academic course loads to fewer than full time (12 credits for undergraduates and nine credits for graduates) before the end of the last day to drop a course will be entitled to a refund of tuition and applicable fees reflecting the reduced course load. Partial refunds are not granted for the summer session. This same refund policy also applies to short courses offered during the fall and spring semesters.

Students who are financial aid recipients and withdraw from all courses prior to completing 60 percent of the semester are subject to the Federal Return of Title IV Funds Policy. For more details see Federal Financial Aid Refund Policy.

Refunds will be computed based on the actual withdrawal date certified by the Office of Records and Registration. Refunds will not be made to students who do not attend classes and have not completed the required withdrawal procedure. Refund processing may take approximately two to three weeks. Exceptions to this refund policy are made only in rare instances. Written application for an exception must be filed in the Student Accounting Department to the Refund Appeals Committee within three years.

Refer to the Residential Housing contract and Dining Services’ “Terms and Conditions” for housing and dining services refunds.
Requests for refunds that are not generated from the overpayment of financial aid should be made in writing to: VCU Student Accounting Department, P.O. Box 843036, Richmond, VA 23284-3036. Refund request forms are available at the Student Services Centers, 827 W. Franklin St., Room 104 or 1101 E. Marshall St., Room 1-055.

In accordance with credit card regulations, the university will refund any credit balance that may result on a student’s account as the outcome of a credit card payment back to the credit card account. The remaining credit balance, if any, will be refunded to the student.

Students are responsible for paying any increase in charges that may occur after the generation of any refund.

**Outstanding charges**

Students who fail to meet payments when due will be assessed late payment penalties and will be denied registration for future classes until they have paid all accrued amounts owed. Students with balances owed to the university will not be issued degrees, official transcripts of grades or graduate reports until all charges are paid in full.

Any communication disputing an amount owed, including an instrument tendered as full satisfaction of a debt, must be submitted to the Director of Student Accounting, Student Accounting Department, Virginia Commonwealth University, P.O. Box 843036, Richmond, VA 23284-3036.

Pursuant to Section 2.2-4805 et seq., of the Code of Virginia, and in accordance with rules and regulations promulgated by the State Comptroller and Attorney General of the commonwealth of Virginia, VCU will charge interest, costs and fees on all accounts past due.

VCU is participating in the Virginia Set-off Debt Collection Act of 1981. Under the provisions of this act, a Virginia individual income tax refund will be subject to the university’s claim for unpaid balances of tuition and fees.

A student who pays a past due balance with a dishonored check may be subject to having his or her current and/or future registration cancelled. A charge is levied for all dishonored checks.

**Defense crisis tuition relief, refund and reinstatement guidelines**

These guidelines apply to any operation, including a defense crisis, in which the president of the United States declares a sudden mobilization that includes members of the Virginia National Guard or the active or reserve forces of the U.S. Armed Forces who are students enrolled at VCU. Students are offered the following enrollment secession options:

1. **Drop all courses before the end of the add/drop period and receive a full refund of all funds paid the university. Students will be asked to sign the drop request form with the registrar indicating that they are not receiving a financial aid refund. (This option might best meet the needs of students who are called to active duty service during the first week of school and did not receive a financial aid refund check or direct deposit.)**

2. **Receive a grade of Incomplete (IM – incomplete military) in one or all courses. Students residing in university housing will be released from their housing and dining contracts and will receive a prorated refund of these charges. Students who chose to take a grade of IM will not have tuition and fees reduced for these courses because credits will still be earned for the semester. Students will have 12 months from the date that they leave the university to complete the course work and earn a course grade. (This option might best meet the needs of students who have essentially completed all course work in a class for the semester, but have yet to turn in a final project, an exam or other materials. It should be agreed upon between the instructor and the student that the remaining course work can reasonably be completed during the upcoming 12-month period.)**

3. **Accept administrative withdrawal (WM – withdrawal military) from all courses as of the effective date of the orders to active duty. If this option is elected, a full refund of all tuition, fees and prorated room/dining charges will be made. If a student received financial aid, the amount recovered to the financial aid accounts will follow Title IV guidelines. (This option might best meet the needs of students who are called to national service in the middle of a semester and have not completed 90 percent of their class requirements. This option also might best meet the needs of students who are leaving the university during the first week of class and received a financial aid refund check or direct deposit as a result of their financial aid.)**

**Leaving the university**

To initiate this process, the student must provide the university registrar with a copy of his/her active duty orders in addition to a printed copy of his/her course registration for that semester and indicate Option 1, 2 or 3 for each course. The university registrar will take the appropriate enrollment action, post the appropriate grades and send a copy of the orders and a copy of the student course request statement to the director of financial aid and the director of student accounting.

**Returning to the university**

If the student returns within one year of completing their national emergency service requirement, the student may return to the university in the same program of studies without reapplying for admission. The student should begin the re-enrollment process by writing to the director of admissions regarding their intent to re-enroll.

**Tuition determination and student classification**

Tuition is determined by the number of credit hours a student is taking, the student’s residency classification, course of study and classification level.

**In-state residency**

Eligibility for in-state tuition benefits is determined by Section 23-7.4 of the Code of Virginia. Refer to the Determination of student classification for in-state tuition purposes in the About VCU’s section of this bulletin for the complete code.

All applicants to VCU who want to be classified as Virginia residents must complete the Application forVirginia In-state Tuition Rates included in the graduate application. The residency determination of the applicant will be conveyed at the time of admission. New students who have been classified initially as non-Virginians for tuition purposes may request a review of the initial residency determination by contacting Records and Registration/Attendance, (804) 828-0366. The residency officer may request that the applicant complete a Student Supplemental Application for Virginia In-state Tuition Rates and submit supporting documents for additional clarification. Continuing students who want a change of residency status to in-state tuition rates must submit the supplemental application along with supporting documentation. Requests and applications for a second review must be submitted to the residency officer by the last day of add/drop week for each semester; however, it is strongly recommended that applications be submitted by the appropriate deadline: fall semester, Aug. 1; spring semester, Dec. 1; summer session, May 1.

Students will be notified by mail of decisions regarding residency status. The Office of Financial Aid and the Student Accounting Department also will receive official notification of residency decisions. Any denial for a change in residency status will include procedures for appeal of the intermediate decision. Students who submit fraudulent applications, falsify documentation or conceal information will be subject to reclassification, payment of all nonresident fees owed and university discipline.

**Financing graduate school**

Current information on financial aid programs, policies and procedures are available on the VCU Web site at www.vcu.edu/enroll/finaid. To obtain printed materials or additional information, call or visit the appropriate financial aid office listed.

Graduate assistantships and fellowships
University graduate teaching and research assistantships and fellowships are awarded to continuing and newly admitted graduate students. Eligibility is based on a variety of criteria. Special rules, contained in the VCU Graduate School Policies and Procedures Statement on Graduate Fellowships and Assistantships, apply to graduate assistants. Such awards must be coordinated with any other financial aid. Any stipend support is reported to the Internal Revenue Service and is subject to IRS rules. Refer to the Graduate School Web site (www.guse.vcu.edu/community/financing) for a copy of the policy statement. Graduate program directors and prospective graduate assistants should agree upon the specific conditions of employment before finalizing appointments.

Additional opportunities for involvement in outside activities may arise in the course of the training period, some of which may provide for additional/ supplementary compensation. Involvement and/or participation in such opportunities may assist the department in maintaining the research infrastructure, provide additional experience in instructional activity, assist other units of the university in the delivery of programs consistent with the missions of the institution, involve participation in university organizations and so forth. Such activities may include those for which supplementary compensation is provided. While such activities have the potential for enriching the development of the individual graduate student, they also hold the potential for interfering with the graduate students responsibilities to his/her department or program and her/his timely progress toward the completion of her/his educational degree requirements.

Therefore, graduate students must consult with their advisers prior to undertaking additional activities that may detract, or which have the potential for detracting, from their timely progress to degree completion. Advisers are encouraged to provide/encourage opportunities which broaden the training experience for students in preparation for the wide variety of career opportunities now available. The graduate program director should also be made aware of any such activities to ensure that completion of degree requirements is not compromised.

Inquiry about such awards should be made directly to the school or department in which the student intends to enroll. Students in the process of applying for admission should indicate their interest in such support. Some programs include a separate application for support with the application for admission. Refer to the individual chapters in this Bulletin, program Web sites and the Graduate School Web site (www.guse.vcu.edu/community/financing) for additional information on graduate student support and funding opportunities.

Financial aid

eServices – online records access
Students are encouraged to use eServices, a password-protected service for viewing VCU student records online, to check the status of their financial aid application and award package. Students also may register for classes, print bills and more. The eServices Web site is located at www.eservices.vcu.edu.

E-mail – official method of communication
Students are required to obtain an official VCU student e-mail account within one week of the beginning of their first semester of enrollment. Students are responsible for reading in a timely fashion university-related communications sent to their official VCU student e-mail account. The Office of Financial Aid uses e-mail to provide financial aid information, to request documentation to support financial aid application data and to provide financial aid application status and award information. Information on how to set up an account is available online (go to the “Academic” section of “Computer Accounts” at www.vcu.edu/it/computer_accounts.html).

Identification requirements
Students must provide picture identification, preferably a VCUCard, for in-person access to financial aid records. For the student’s protection, information provided over the telephone and e-mail may be limited if the financial aid staff member is not confident of the student’s identity.

Eligibility for financial aid
Most students are eligible for some type of financial aid regardless of family financial circumstances. Basically, to receive aid from any of the federal or state student aid programs, students must:

- Submit a Free Application for Federal Student Aid (FAFSA) or Renewal FAFSA designating VCU (school code 003735) to receive FAFSA results.
- Demonstrate financial need, except for some loan programs.
- Have a high school diploma or a General Education Development (GED) Certificate.
- Be enrolled or accepted for enrollment to an eligible degree or certificate program.
- Be enrolled at least half time (five or more graduate credit hours).
- Be a U.S. citizen or eligible noncitizen.
- Have a valid Social Security number (unless from the Republic of the Marshall Islands, the Federated States of Micronesia or the Republic of Palau).
- Meet Satisfactory Academic Progress (SAP) standards as defined by the VCU Office of Financial Aid (the full VCU SAP policy is available on the Web at www.vcu.edu/financialaid).
- Certify that federal and state financial aid will be used for educational purposes only.
- Not be in default on a federal student loan and not owe money on a federal student grant.
- Comply with the Selective Service registration, if required.
- Not be convicted under federal or state law of sale or possession of illegal drugs.

Detailed information can be found in the federal Student Guide, available in print form from the VCU Office of Financial Aid or electronically (http://studentaid.ed.gov/students/publications/student_guide/index.html) and on the VCU Office of Financial Aid Web site (www.vcu.edu/financialaid).

Applying for financial aid
The financial aid application process for the academic year begins Jan. 1. All students are encouraged to complete and submit the FAFSA as soon as possible after Jan. 1, designating VCU (school code 003735) to receive the results. In order to reduce problems, errors and omissions on the FAFSA, students are encouraged to apply electronically using FAFSA on the Web (available online at www.fafsa.ed.gov). Once the FAFSA is filed, the federal processor will send the student a Student Aid Report (SAR) or electronic SAR Acknowledgement, and also will electronically send the information to the VCU Office of Financial Aid, if VCU was listed as a school to receive the data. If additional information is needed to complete processing of the application, the VCU Office of Financial Aid will send the student a request for additional information. Responding promptly to such requests will ensure timely processing of the application. Once the review of FAFSA data has been completed, the Office of Financial Aid will send the student a Financial Aid Award Notification.

Please note that health profession students (dentistry, medicine, nursing or pharmacy) must provide both student and parental information on the FAFSA to apply and receive consideration for Title VII grants and loans from the Department of Health and Human Services.

Priority filing dates
The VCU Office of Financial Aid recommends electronically filing the FAFSA by March 1*. Students should complete the FAFSA using data from their completed tax returns. If necessary, they may use estimated tax return data in order to meet the VCU priority filing date but should be prepared to submit a copy of their completed tax returns and W2 forms to VCU as soon as possible. Students will receive their Financial Aid Award Notification after their FAFSA application data has been verified. If students have not applied for financial aid in a timely manner, they may want to participate in the VCU Installment Payment Plan, which budgets each semester’s bill over four payments. Information about this plan can be found on the Student Accounting Department’s Web site (www.vcu.edu/enroll/sa/payment/pp.html).

* Students who do not have access to the Web may apply using the paper FAFSA, available through VCU, high schools, colleges and most public libraries. Those students completing a paper application should mail it to the federal processor by Feb. 1.

Summer studies
Limited financial aid may be available during the summer semester. Students applying for the summer semester must file the FAFSA by March 1. Students also should complete a VCU summer aid application, available on the Financial Aid Web site under “Downloadable Forms”.

Students interested in financial aid for the summer semester should obtain a VCU Summer Studies Schedule of Classes (available in March) for more details.

Study abroad
Financial assistance is available to eligible students enrolled in approved study abroad programs. All study abroad programs must be coordinated through the Office of International Education at (804) 828-8471. Students should work with a financial aid counselor to coordinate aid for their study abroad program.

Information about financial aid and study abroad is available online at www.vcu.edu/oie/cao/fia/aid_scholarships.

Quality assurance
To ensure that information provided on the FAFSA is accurate, a student’s application may be selected for review at any time during an enrollment period, and the student will be requested to provide documentation that supports the information. By signing the FAFSA, the student (and the student’s parents or spouse, if applicable) agreed to furnish such documentation. If the documentation is not provided when requested, financial aid awards will be canceled and any funds already disbursed may need to be repaid.

University bill
The Student Accounting Department sends bills for tuition, fees and other university charges to students whose financial aid will not cover their university charges. When financial aid awards (grants, scholarships and loans) are not enough to pay university charges, the remaining balance must be paid from personal funds, credit card or the VCU Installment Payment Plan. Federal work-study awards will not be deducted from university charges because those funds are paid directly to the student, based on hours worked. Any outstanding balance owed will hold a student from registration for courses.

Financial aid appeals
Financial aid eligibility decisions are made using federal, state and institutional regulations and policies. Students may appeal their eligibility if special circumstances warrant a review. Reasons for an appeal might include one of the following documented unusual circumstances:

- Loss or reduction of employment earnings.
- Disability or death of parent or spouse.
- Separation or divorce.
- Loss or reduction of untaxed income.
- Losses due to a natural disaster.
- Unusually high educational program costs.
- Unusual medical expenses.
- Dependent and child care expenses.

Any financial aid staff member can advise a student about the procedures on how to file an appeal.

Federal financial aid refund policy
Students who receive federal Title IV grant or loan assistance and withdraw from VCU before completing 60 percent of the semester (as measured in calendar days) must have their eligibility recalculated based on the federal Return of Title IV Funds formula. This federal formula specifies that a student’s financial aid eligibility must be recalculated based on the aid the student has “earned” (based on the number of days that the student was enrolled or attending VCU prior to withdrawal). Any unearned aid (for the period of enrollment that the student did not complete from the date of withdrawal to the end of the semester) must be returned to the appropriate Title IV programs from which the student was awarded.

For VCU students who withdraw prior to completing 60 percent of the semester, they will have to return or repay all or a portion of the aid funds that had been disbursed to their VCU account. As a result, students who withdraw prior to completing 60 percent of the semester may be responsible for all or a portion of their tuition/fee bill that was previously paid by financial aid sources.

Examples are available online (go to www.vcu.edu/enroll/finaid/links and click on “Financial aid implications if you withdraw from VCU”).

Graduate students in undergraduate courses
Students who are classified as graduate students will be eligible for federal financial aid only if they are enrolled at least half time in courses that can be applied toward their graduate degree. The Office of Financial Aid will identify all graduate students who have applied for financial aid but have registered for less than half-time graduate course work in any given semester. If the undergraduate course work for which the student has registered is considered preparatory to the graduate degree, documentation must be provided by the student’s adviser or program representative to verify which undergraduate courses are required. In these cases, the student will be eligible for federal financial aid, but it will be based on the fifth-year undergraduate loan limits. Students who have been admitted to a dual degree program can take any amount of required undergraduate coursework and will still be eligible for graduate loan limits.

Satisfactory Academic Progress for financial aid purposes
To be eligible to receive financial aid at VCU, students must make Satisfactory Academic Progress. SAP is a combination of qualitative and quantitative components. SAP is measured by:

- GPA. Generally, graduate students are expected to maintain at least a 3.0 GPA as specified by their departments.
- Completion rate. The completion rate is measured by the number of credit hours earned divided by the number of credit hours attempted. All students must successfully complete at least 67 percent of all credit hours attempted (withdrawals, incompletes and repeated courses also are considered attempted credit hours).

The Office of Financial Aid will perform a periodic SAP review for students who receive or apply for financial aid. The reviews are typically performed at the end of the spring semester and must be completed at least once per academic year. Students will be alerted with warning letters, whenever possible, to provide them with notice that their financial aid may be in danger of being suspended. When students fail to meet SAP requirements, they will receive suspension letters indicating that they are ineligible to receive further financial aid. Students whose eligibility for financial aid has been suspended may submit an appeal if mitigating circumstances prevented the student from maintaining SAP.

For more detailed information about the VCU Satisfactory Academic Progress policy, visit the Office of Financial Aid Web site (www.vcu.edu/enroll/finaid).

Types of financial aid
There are three basic types of financial aid: loans, grants and work-study. Each type has different features and advantages.

Loans
In terms of total dollars available, long-term federal loan programs provide the most dollars. Federal loans must be repaid after the grace period and/or deferment
periods have expired. Students must generally remain enrolled at least half time (five credit hours for graduate students). Multiple repayment plans may be available for most federal loans. Selected loan programs include:

- Federal Direct Loan (subsidized and unsubsidized)
- Health Professions Student Loan
- Loan for Disadvantaged Students
- Nursing Student Loan

**Grants**

Contact individual academic departments for information about grant or scholarship programs.

**Work-study**

Work-study is a form of financial aid that pays wages for work performed through employment. Work-study positions are located on-campus and in approved off-campus locations. Hourly wages will vary depending on skills and experience. Job listings are posted online at www.students.vcu.edu/careers. When interviewing for work-study positions, students should take copies of their Financial Aid Award Notifications to show prospective employers. Graduate students usually work 15 to 25 hours per week.

**Veteran and reservist educational benefits**

Available veteran and reservist educational assistance programs include:

- Montgomery GI Bill – Active Duty (Chapter 30)
- Vocational Rehabilitation (Voc Rehab, Chapter 31)
- Veterans Education Assistance Program (VEAP, Chapter 32)
- Survivors’ and Dependents Educational Assistance Program (DEA, Chapter 35)
- Montgomery GI Bill – Selected Reserves (Chapter 1606)
- Tutorial Assistance Program
- VA Work-Study Program
- Virginia War Orphans Education Program (WOE)
- Diplomatic Security and Antiterrorism Assistance

Detailed information about eligibility for these programs is available on the Web (www.vcu.edu/enroll/vets_benefits). To obtain printed material, contact:

Veterans Affairs Office
Founders Hall, Room 103
827 West Franklin Street
Richmond, Virginia 23284-2520
(804) 828-6166
Fax (804) 828-8121
E-mail: jmchambe@vcu.edu

Eligible veterans must comply with the following requirements to receive educational benefits as students.

1. The veteran must apply or be accepted into a degree- or certificate-seeking program.
2. The veteran must request certification after registering for courses each semester and each summer session from the Veterans Affairs Office.
3. The veteran may be eligible to use benefits for only those courses applied toward a degree or certificate program.
4. The veteran is not eligible to use benefits for courses taken on an audit basis. If repeating a course or taking a course with no credits, the veteran must notify the Veterans Affairs Office.
5. The veteran is responsible for ensuring that transcripts are evaluated for transfer credits to be accepted by VCU. The veteran must submit this information to the Veterans Affairs Office for transmittal to the Veteran’s Administration Regional Office.
6. The veteran must notify the Veterans Affairs Office if planning to drop or withdraw from classes or stop attending VCU.

**Virginia War Orphans Education Program**

The Virginia War Orphans Education Program provides educational assistance for children of certain veterans or service personnel. Applications are available at the VCU Veterans Affairs Office. Students should begin the application process at least four months before beginning studies at VCU.

Eligibility for this assistance is contingent upon the following:

1. The applicant must be no less than 16 and no more than 25 years old.
2. One of the applicant’s parents must have served in the U.S. Armed Forces and must be permanently or totally disabled due to war or other armed conflict.
3. One of the applicant’s parents died as a result of war or other armed conflict.
4. One of the applicant’s parents is listed as a prisoner of war or missing in action.
5. The applicant’s parent, on which eligibility is based, has been a resident of Virginia at the time of entry into active military duty.
6. The applicant’s parent, on which eligibility is based, has been a resident of Virginia for at least 10 consecutive years immediately before date of application.
7. The surviving parent has been a resident of Virginia for at least 10 years prior to marrying the deceased parent, or must have been a resident of Virginia for at least 10 consecutive years immediately prior to the date on which the application was submitted by or on behalf of such child for admission to any educational or training institution in Virginia.

Those eligible for the Virginia War Orphans Education Program are entitled to a tuition-free education at state-supported educational or training institutions on an annual basis. (Summer school also may be included in the annual certification of students.) Eligible students can use this benefit to pursue any vocational, technical, undergraduate or graduate program of instruction. Generally, programs listed in the academic catalogues of state-supported institutions are acceptable provided they have a clearly defined educational objective, i.e., certificate, diploma or degree.

**Preparing Future Faculty Program**

The Graduate School at VCU is committed to providing graduate students with ongoing opportunities for academic and professional development. Working with graduate faculty and academic graduate program directors, and with academic and administrative support from across the university, the Graduate School strives to identify, support and sponsor initiatives that will prepare the next generation of the professoriate.

In conjunction with the Center for Teaching Excellence, the Graduate School sponsors the Preparing Future Faculty Program for graduate students interested in pursuing careers in higher education. Complete information about the program is available on the Graduate School Web site at www.graduate.vcu.edu/programs/pff.

**Graduate School Mentorship Program**

The Graduate School Mentorship Program matches undergraduate and graduate students in mentoring relationships. The goals of the program are twofold: first, to expose undergraduate students to the graduate experience as they consider options and make decisions about post-baccalaureate study and as they transition from undergraduate to graduate student status, and secondly, to provide graduate students with the opportunity to develop mentoring skills as they share their own personal experiences with the undergraduate participants in the program.

Complete information about the program is available on the Graduate School Web site at www.vcu.edu/graduate/es/mentoring.html.

**Off-campus graduate instruction**

VCU is dedicated to serving the needs of Virginians by providing off-campus graduate credit instruction when and where it is needed. Courses are offered in response to an expression of need from various locales and groups.

Off-campus instruction features the same course work available on campus, and most off-campus courses are fully degree-applicable within the admission standards of the Graduate School. The official policies and procedures of the University Graduate Council, as published on this Graduate Bulletin Web site and
on the Graduate School Web site, are fully applicable to all off-campus graduate programs and graduate students.

Tuition for most off-campus classes is the same as other university classes; however, students in off-campus credit classes are not charged university or activity fees.

For additional information on off-campus credit instruction, contact Edward Howard, director of continuing studies, Division of Community Engagement, 920 W. Franklin St., Richmond, VA 23284-3062, telephone (804) 828-8819, or visit the Division of Community Engagement Web site at www.community.vcu.edu.

Interdisciplinary Studies, Master of (M.I.S.)

The Master of Interdisciplinary Studies (M.I.S.) degree program provides an opportunity for the highly motivated student to pursue a unique course of study that combines graduate course work in a learner-centered approach to graduate education. The student is an active participant in proposing a curriculum that supports an individualized and scholastically rigorous academic goal in a clearly defined, multidisciplinary program. To expand the program’s range of options and interdisciplinary perspectives, the program allows for cooperative ventures with other approved colleges and universities.

M.I.S. programs of study

Opportunities for interdisciplinary study in the M.I.S. degree program currently include the following options. Please read all general M.I.S. information before proceeding to the individual program links provided in the menu to the right.

- Individual programs of study (developed with director of the M.I.S. program)
- Interdisciplinary Arts/Off-campus program with a focus in studio art
- Mathematics and Science Leadership/K-8 Mathematics Specialist track

Application for admission to all M.I.S. programs of study

Applicants to all M.I.S. programs of study must complete the VCU Graduate School Application to Graduate Study (www.vcu.edu/graduate/ps/apply_options.html). Completed applications and all supporting documentation must be submitted to the VCU Graduate School according to the instructions provided on the Graduate School Web site.

Students should refer to the Admissions Requirements Summary charts at the beginning of this section for a summary of current contact information, semesters of entry, application deadlines, testing requirements, and special or supplementary requirements for each M.I.S. program of study.

Admission criteria for all M.I.S. programs of study

General admission requirements to the Graduate School and all M.I.S. programs of study include:

- Graduation from an accredited college or university or its equivalent.
- A 2.8 cumulative GPA for at least the last two years (or last 60 hours) of undergraduate work.
- Satisfactory scores from a current (fewer than five years old) standardized test commonly used and deemed appropriate by the relevant discipline.
- Three letters of recommendation.
- Applicant’s written statement of intent for pursuing graduate studies.
- Completion of a proposed curriculum plan outlining the applicant’s specific course of study. When finalized, this plan is the official statement of the student’s program requirements for completion of the M.I.S. degree.

General M.I.S. program requirements for all M.I.S. programs of study

The initial curriculum plan proposed at the time of application must be finalized with the program director or track coordinator by the end of the first semester of study. Any subsequent changes in the curriculum plan must be made with the program director or track coordinator’s approval.

In addition to any admission or individual course prerequisites, students enrolled in M.I.S. programs of study must complete a minimum of 39 graduate semester credits, including:

- At least nine, and not more than 15, graduate semester credits in each of at least two disciplines. No more than 15 credits in any one discipline (exclusive of directed research, independent study, special project or thesis requirements) may be applied toward the degree.
- A minimum of three credits in a research methods course relevant to the final research project.
- Three to six graduate credits of approved directed research, independent study, special project or thesis work. Formal approval for the final research project must be obtained from the director or track coordinator before the student begins the final project.
- Up to six semester hours of graduate course work (nine from Virginia State University) for transfer from other accredited institutions with the approval of director or track coordinator. (See Mathematics and Science Leadership/K-8 Mathematics Specialist track section for information regarding transfer course work.)
- At least 50 percent of the course work taken at the 600 level or higher.
- Elective course work approved by the program director or track coordinator as part of the official curriculum plan.
- A maximum of six hours taken as a nondegree-seeking student before admission to the program.

Graduation requirements for all M.I.S. programs of study

Candidates for degrees are eligible for graduation upon completion of all academic requirements in effect at the time of the first registration in the program, provided they are continuously enrolled and provided the requirements are met within the time limit specified by the Graduate School. Students failing to satisfy the time requirement and who are readmitted to a program shall satisfy requirements in effect at the time of reacceptance into the program.

All graduate students are subject to the admission and academic standards that govern graduate study at VCU as determined by the University Graduate Council and as articulated in the Graduate Studies at VCU section of this bulletin. A checklist summarizing academic policies and requirements for graduation is provided under the General Academic Regulations heading of the Graduate Studies at VCU section. Additional instructions and guidelines for applying to graduate, is available on the VCU Graduate School Web site www.vcu.edu/graduate/es/graduation.html.

Additional track-specific admission requirements

In addition to the Graduate School’s general requirements for admission and academic standing, and general M.I.S. admission criteria and program requirements, applicants to M.I.S. programs must complete any track-specific requirements as indicated on the following Web sites:

- Individual programs of study (developed with director of the M.I.S. program)
- Interdisciplinary Arts/Off-campus program with a focus in studio art
- Mathematics and Science Leadership/K-8 Mathematics Specialist track

Special requirements:
See the M.I.S. Web site for essay instructions and curriculum planning form to be submitted with application.

The Master of Interdisciplinary Studies degree program provides an opportunity for the highly motivated student to develop an individualized program of study that combines graduate course work in two or more selected disciplines. This opportunity is available for graduate students who wish to pursue a clearly defined, multidisciplinary program that does not duplicate an existing professional curriculum or specialization in a traditional program.

Admission requirements

In addition to the general VCU Graduate School requirements and the general requirements for admission to the M.I.S. program, applicants who are proposing an individualized course of study must:

• Submit satisfactory scores on the GRE from a current test (fewer than five years old). Substitutions of other standardized test scores may be made on a case-by-case basis, depending upon the focus areas identified in the curriculum proposal and the approval of all members of the admission committee.

• Articulate in the written statement of intent the applicant’s academic goal and how the M.I.S. degree program will facilitate the achievement of that goal. In some cases, applicants may want to address how a more traditional program does not meet their specific academic goals.

• Complete a preliminary curriculum proposal form identifying the specific course work that will support the academic goal articulated in the written statement of intent. This form is available on the Master of Interdisciplinary Studies Web site at www.vcu.edu/graduate/pb/master_inter.html. Students who are interested in working toward a degree are encouraged to apply to the program as early as possible, since a maximum of six credit hours taken as a nondegree-seeking student may be counted toward the degree.

Members of the admission committee include the directors of graduate study of the two focus areas identified in the curriculum proposal and the director of the M.I.S. program. To facilitate the application process, M.I.S. applicants who are proposing individualized programs of study are strongly encouraged to schedule preliminary advising interviews with the director of the M.I.S. program to discuss their academic goals and curricular proposals.

Program requirements

In addition to the general M.I.S. degree requirements, students who are admitted to individual M.I.S. programs of study must:

• Obtain approval for all transfer and elective course work as part of the formal advising process for developing and/or changing the approved curriculum plan.

• Complete a minimum of three graduate credits in a research methods course relevant to the final research project before beginning the final research project;

• Complete three to six graduate credits as part of the final research project in the form of an approved directed research, independent study, special project or thesis. A student who chooses the thesis option must identify a thesis adviser and committee before beginning formal work on the thesis. The student will follow the thesis guidelines of the school/program of the thesis adviser, as well as the general guidelines for completion of theses/dissertations as prescribed by the Graduate School. The University Graduate Council and VCU Libraries www.vcu.edu/graduate/es/thesis.html. A student who chooses the directed research option must obtain formal approval for the final research project. Before beginning formal work on the thesis or the final directed research project, the student must submit to the director of the M.I.S. program a copy of the proposed project, along with a signed copy of the Final Project Proposal Approval form (available on the M.I.S. Web site at www.vcu.edu/graduate/pb/master_inter.html).
admission to the M.I.S program, applicants to the M.I.S. Interdisciplinary Arts program must:

- Have taken a minimum of 36 undergraduate and/or graduate studio credits.
- In lieu of a standardized test, prepare a minimum of 10 slides, demonstrating excellence in at least one discipline, but preferably in more than one.
- Articulate in the written letter of intent interest in working in at least two disciplines in order to explore interdisciplinary potential in the arts.

Many students prefer to take a course before deciding to apply to the M.I.S. degree program. Students who are interested in working toward a degree are encouraged to apply to the program as early as possible, however, since a maximum of six credit hours taken as a nondegree-seeking student may be counted toward the degree.

Program requirements

In addition to the general M.I.S. degree requirements, the Interdisciplinary Arts track requires the completion of 39 graduate semester credit hours as follows:

- At least nine and no more than 15 semester hours in each of two focus areas.
- From three to 15 semester hours of art electives, either studio or art education, outside the two chosen focus areas.
- Six semester hours of an approved final project, resulting in a graduate exhibition and written documentation.

Students should refer to the M.I.S. Interdisciplinary Arts Web site for a detailed description of program requirements, including focus areas and elective options, final project information, continuous enrollment requirements, and the Master of Interdisciplinary Studies in Interdisciplinary Arts guidelines booklet www.vcu.edu/ocp/programs/gradart/mis_art.html.

#### Admission requirements summary

**Special requirements:**
- At least three years of successful K-8 mathematics and/or science teaching experience
- Three recommendations: at least one from an immediate supervisor or principal and at least one that addresses leadership potential
- Interview to develop program of study – program director will contact after initial review of application
- See Web site for detailed discussion of program

The Mathematics and Science Leadership/K-8 mathematics specialist track in the Master of Interdisciplinary Studies program is designed for in-service teachers of mathematics for kindergarten through eighth grades. In designing their individual programs, students, in conjunction with their advisers, may select courses offered by VCU mathematics, science and education departments and courses offered by other collaborating Virginia colleges and universities. The Graduate School, the College of Humanities and Sciences, the School of Education and the departments of Mathematics and Applied Mathematics and Teacher Education administer the program.

### Admission requirements

In addition to the general VCU Graduate School requirements for admission and the overall requirements for admission to the M.I.S program, applicants to the Mathematics and Science Leadership/K-8 mathematics specialist track must:

- Submit satisfactory scores on either the GRE or MAT from a current test (fewer than five years old). Provisional admission may be granted pending fulfillment of this requirement.

- Provide three letters of recommendation, at least one of which must be submitted from an immediate supervisor or principal and at least one of which must address the applicant’s potential for leadership.

- Provide evidence in the written statement of intent of at least three years of experience in teaching mathematics and/or science for kindergarten through eighth grades.

Upon review of the application and all supporting documentation, the Mathematics/Science Leadership program coordinator will contact applicants to schedule interviews to develop programs of study that will detail specific courses to be taken and the institutions offering those courses.

### Program description

Candidates must complete all of the general program requirements of the M.I.S. program. In addition:

- Both of the discipline focus areas are required to be in mathematics, one of the sciences or mathematics/science education.
- In designing their individual programs, students in the mathematics specialist track typically include the following courses: MATH 661, 662, 663, 664 and 665.
- At least 18 of the 39 credits, including the final project, must be granted by VCU. Up to six transfer credits may be approved, and the remainder of the credits must be from consortium partners as approved by the students’ advisers, the VCU Graduate School, and the Mathematics and Science Leadership Advisory Committee.
- The final project must be supervised by a VCU graduate faculty member, may be in mathematics, science or education, and must include an indication of the relationship of the subject of the project to teaching at the kindergarten-through-eighth-grade level.
Graduate and Professional Programs Bulletin

Professional study
The following professional degree programs are administered by the individual health sciences schools. Professional licensure requirements, the accreditation agencies for each professional program and the curriculum committees of the individual health sciences schools determine the program requirements.

The Professional Studies Bulletin documents the official admission and academic rules and regulations that govern education in the professional degree programs at the university. In-depth descriptions of each professional degree program are provided in the individual school and program pages of this bulletin. The bulletin Web site also provides program updates that occur throughout the academic year.

Major coordination of professional programs is performed by the University Graduate Council, chaired by the dean of the Graduate School. The purpose of the Graduate Council is to promote excellence in all graduate programs. While the Graduate Council performs the functions of review and coordination, the departments and schools are responsible for support and management of professional programs.

It is the responsibility of all professional students to be familiar with the Professional Studies Bulletin of record (the bulletin in effect at the time of official admission), as well as the academic regulations in individual school and department publications and on program Web sites. Students enrolled in professional degree programs should contact their dean’s office at any time regarding questions relating to professional programs study at VCU.

## Professional programs admissions

For information about admission to MCV Campus professional programs, refer to the professional sections of the schools of Allied Health Professions, Dentistry, Medicine and Pharmacy.

### General admission requirements and procedures

The Board of Visitors, the administration and the faculty of VCU are committed to a policy of equal opportunity in education and employment without regard to age, race, color, national origin, gender, religion, sexual orientation, veteran’s status, political affiliation or disability.

### Admission requirements

Admission requirements, entrance examinations and application materials for first professional programs may be obtained by contacting the appropriate admissions office. Other detailed information including financial aid opportunities, procedures for international students, regulations and procedures, academic, curricula, and degree requirements are included in the section describing each professional program.

### Admission through VCU’s Honors College

VCU undergraduate students who are members of The Honors College may apply to The Honors College Guaranteed Admission Program either before matriculation at VCU or early in their undergraduate studies. (The specific deadline for applying is set by the Program.) Honors students in the Guaranteed Admission Program may enter the professional program to which they have applied, provided they satisfy all of the requirements of the GA Program.

To be accepted in The Honors College GA Program, a student must submit a completed application form with at least two letters of recommendation and be accepted by the university, by The Honors College and by the admissions committee of the program the student wishes to enter. The admissions committee may require an interview. Final notification of guaranteed admission is made by The Honors College. For additional information, refer to the Honors College section of the Undergraduate Bulletin.

The following professional programs participate in The Honors College Guaranteed Admission Program:
- Doctor of Dental Surgery
- Doctor of Medicine
- Doctor of Occupational Therapy
- Doctor of Pharmacy
- Doctor of Physical Therapy
- Doctor of Pharmacy
- Doctor of Physical Therapy

### International students

International students should refer to the appropriate professional program’s chapter for information regarding international student admission guidelines.

## Professional programs financial aid

Current information on financial aid programs, policies and procedures are available on the VCU Web site at www.vcu.edu/enroll/finaid.

To obtain printed materials or additional information, call or visit the appropriate financial aid office.

### eServices – online records access

Students are encouraged to use the eServices Web site, a password-protected service for viewing VCU student records online, to check the status of their financial aid application and award package. Students also may register for classes, print bills and more. The eServices Web site is located at www.eservices.vcu.edu.

### E-mail – official method of communication

Students are required to obtain an official VCU student e-mail account within one week of the beginning of their first semester of enrollment. Students are responsible for reading in a timely fashion university-related communications sent to their official VCU student e-mail account. The Office of Financial Aid uses e-mail to provide financial aid information, to request documentation to support financial aid application data, and to provide financial aid application status and award information. Information on how to set up an account is available online (go to the “Academic” section of “Computer Accounts” at www.vcu.edu/it/computer_accounts.html).

### Identification requirements

Students must provide picture identification, preferably a VCUCard, for in-person access to financial aid records. For the student’s protection, information provided over the telephone and e-mail may be limited if the financial aid staff member is not confident of the student’s identity.

### Eligibility for financial aid

Most students are eligible for some type of financial aid regardless of family financial circumstances. Basically, to receive aid from any of the federal or state student aid programs, students must:
- Submit a Free Application for Federal Student Aid (FAFSA) or Renewal FAFSA designating VCU (school code 003735) to receive FAFSA results.
- Demonstrate financial need, except for some loan programs.
Have a high school diploma or a General Education Development (GED) Certificate.

Be enrolled or accepted for enrollment to an eligible degree or certificate program.

Be enrolled at least half time (five or more graduate credit hours).

Be a U.S. citizen or eligible noncitizen.

Have a valid Social Security number (unless from the Republic of the Marshall Islands, the Federated States of Micronesia or the Republic of Palau).

Meet Satisfactory Academic Progress (SAP) standards as defined by the VCU Office of Financial Aid (the full VCU SAP policy is available online at www.vcu.edu/enroll/finaid/prog).

Certify that federal and state financial aid will be used for educational purposes only.

Not be in default on a federal student loan and not owe money on a federal student grant.

Comply with the Selective Service registration, if required.

Not be convicted under federal or state law of sale or possession of illegal drugs.

Applying for financial aid

The financial aid application process for the academic year begins Jan. 1. All students are encouraged to complete and submit the FAFSA as soon as possible after Jan. 1, designating VCU (school code 003735) to receive the results. In order to reduce problems, errors and omissions on the FAFSA, students are encouraged to apply electronically using FAFSA on the Web (available online at www.fafsa.ed.gov/). Once the FAFSA is filed, the federal processor will send the student a Student Aid Report (SAR) or electronic SAR Acknowledgement, and also will electronically send the information to the VCU Office of Financial Aid, if VCU was listed as a school to receive the data. If additional information is needed to complete processing of the application, the VCU Office of Financial Aid will send the student a request for additional information. Responding promptly to such requests will ensure timely processing of the application. Once the review of FAFSA data has been completed, the Office of Financial Aid will send the student a Financial Aid Notification.

Please note that health profession students (dentistry, medicine, nursing or pharmacy) must provide both student and parental information on the FAFSA to receive and apply for Title VII grants and loans from the Department of Health and Human Services.

Priority filing dates

The VCU Office of Financial Aid recommends electronically filing the FAFSA by March 1*. Students should complete the FAFSA using data from their completed tax returns. If necessary, they may use estimated tax return data in order to meet the VCU priority filing date but should be prepared to submit a copy of their completed tax returns and W2 forms to VCU as soon as possible. Students will receive their Financial Aid Notification after their FAFSA application data has been verified. If students have not applied for financial aid in a timely manner, they may want to participate in the VCU Installment Payment Plan, which budgets each semester’s bill over four payments. Information about this plan can be found on the Student Accounting Department’s Web site (www.vcu.edu/enroll/sa/payment/ipp.html).

* Students who do not have access to the Web may apply using the paper FAFSA, available through VCU, high schools, colleges and most public libraries. Those students completing a paper application should mail it to the federal processor by Feb. 1.

Summer studies

Limited financial aid may be available during the summer semester. Students applying for the summer semester must file the FAFSA for the academic year preceding the summer semester. Students also should complete a VCU summer aid application, available on the Financial Aid Web site under “Downloadable Forms”.

Students interested in financial aid for the summer semester should obtain a VCU Summer Studies Schedule of Classes (available in March) for more details.

Study abroad

Financial assistance is available to eligible students enrolled in approved study abroad programs. All study abroad programs must be coordinated through the Office of International Education at (804) 828-8471. Students should work with a financial aid counselor to coordinate aid for their study abroad program. Information about financial aid and study abroad is available online at www.vcu.edu/oie/eao/fin_aid_scholarships/.

Quality assurance

To ensure that information provided on the FAFSA is accurate, a student’s application may be selected for review at any time during an enrollment period, and the student will be requested to provide documentation that supports the information. By signing the FAFSA, the student (and the student’s parents or spouse, if applicable) agreed to furnish such documentation. If the documentation is not provided when requested, financial aid awards will be canceled and any funds already disbursed may need to be repaid.

University bill

The Student Accounting Department sends bills for tuition, fees and other university charges to students whose financial aid will not cover their university charges. When financial aid awards (grants, scholarships and loans) are not enough to pay university charges, the remaining balance must be paid from personal funds, credit card or the VCU Installment Payment Plan. Federal Work-Study awards will not be deducted from university charges because those funds are paid directly to the student, based on hours worked. Any outstanding balance owed will hold a student from registration for courses.

Financial aid appeals

Financial aid eligibility decisions are made using federal, state and institutional regulations and policies. Students may appeal their calculated contribution if special circumstances warrant a review. Reasons for an appeal might include one of the following documented unusual circumstances:

- Loss or reduction of employment earnings.
- Disability or death of parent or spouse.
- Separation or divorce.
- Loss or reduction of untaxed income.
- Losses due to a natural disaster.
- Unusually high educational program costs.
- Unusual medical expenses.
- Dependent and child care expenses.

Any financial aid staff member can advise a student about the procedures on how to file an appeal.

Federal financial aid refund policy

Students who receive federal Title IV grant or loan assistance and withdraw from VCU before completing 60 percent of the semester (as measured in calendar days) must have their eligibility recalculated based on the federal Return of Title IV Funds formula. This federal formula specifies that a student’s financial aid eligibility must be recalculated based on the aid the student has “earned” (based on the number of days that the student was enrolled or attending VCU prior to withdrawal). Any unearned aid (for the period of enrollment that the student did not complete from the date of withdrawal to the end of the semester) must be returned to the appropriate Title IV programs from which the student was awarded.

For VCU students who withdraw prior to completing 60 percent of the semester, they will have to return or repay all or a portion of the aid funds that had been disbursed to their VCU account. As a result, students who withdraw prior to completing 60 percent of the semester may be responsible for all or a portion of their tuition/fee bill that was previously paid by financial aid sources.
Examples are available online (go to www.vcu.edu/enroll/finaid/links and click on “Financial aid implications if you withdraw from VCU”).

**Satisfactory Academic Progress**

To be eligible to receive financial aid at VCU, students must make Satisfactory Academic Progress (SAP). SAP is a combination of qualitative and quantitative components and is measured by completion rate. The completion rate is the number of credit hours earned divided by the number of credit hours attempted. All students must successfully complete at least 67 percent of all credit hours attempted (withdrawals, incompletes and repeated courses also are considered attempted credit hours).

The Office of Financial Aid will perform a periodic SAP review for students who receive or apply for financial aid. The reviews are typically performed at the end of the spring semester and must be completed at least once per academic year. Students will be alerted with warning letters, whenever possible, to provide them with notice that their financial aid may be in danger of being suspended. When students fail to meet SAP requirements, they will receive suspension letters indicating that they are ineligible to receive further financial aid. Students whose eligibility for financial aid has been suspended may submit an appeal if mitigating circumstances prevented the student from maintaining SAP.

For more detailed information about the VCU Satisfactory Academic Progress policy, visit the Office of Financial Aid Web site (www.vcu.edu/enroll/finaid/progress).

**Types of financial aid**

There are three basic types of financial aid: loans, grants and work-study. Each type has different features and advantages.

**Loans**

In terms of total dollars available, long-term federal loan programs provide the most dollars. Federal loans must be repaid after the grace period and/or deferment periods have expired. Students must generally remain enrolled at least half-time (five credit hours for graduate students). Multiple repayment plans may be available for most federal loans. Selected loan programs include:

- Federal Direct Loan (subsidized and unsubsidized)
- Health Professions Student Loan
- Loan for Disadvantaged Students
- Nursing Student Loan
- Primary Care Loan

**Grants**

Contact individual academic departments for information about grant or scholarship programs.

**Work-study**

Work-study is a form of financial aid that pays wages for work performed through employment. Work-study positions are located on campus and in approved off-campus locations. Hourly wages will vary depending on skills and experience. Job listings are posted to the Career Center’s Web site (www.students.vcu.edu/careers). When interviewing for work-study positions, students should take copies of their Financial Aid Notifications to show prospective employers.

**Veteran and reservist educational benefits**

Available veteran and reservist educational assistance programs include:

- Montgomery GI Bill – Active Duty (Chapter 30)
- Vocational Rehabilitation (Voc Rehab, Chapter 31)
- Veterans Education Assistance Program (VEAP, Chapter 32)
- Survivors’ and Dependents Educational Assistance Program (DEA, Chapter 35)
- Montgomery GI Bill – Selected Reserves (Chapter 1606)
- Tutorial Assistance Program
- VA Work-Study Program
- Virginia War Orphans Education Program (WOE)
- Diplomatic Security and Antiterrorism Assistance

Detailed information about eligibility for these programs is available on the Web (www.vcu.edu/enroll/vets_benefits). To obtain printed material, contact:

Veterans Affairs Office
Founders Hall, Room 103
827 West Franklin Street,
P.O. Box 842520
Richmond, Virginia 23284-2520
(804) 828-8166
Fax (804) 828-8121
E-mail: jmchoambl@vcu.edu

Eligible veterans must comply with the following requirements to receive educational benefits as students:

1. The veteran must apply or be accepted into a degree- or certificate-seeking program.
2. The veteran must request certification after registering for courses each semester and each summer session from the Veterans Affairs Office.
3. The veteran may be eligible to use benefits for only those courses applied toward a degree or certificate program.
4. The veteran is not eligible to use benefits for courses taken on an audit basis. If repeating a course or taking a course with no credits, the veteran must notify the Veterans Affairs Office.
5. The veteran is responsible for ensuring that transcripts are evaluated for transfer credits to be accepted by VCU. The veteran must submit this information to the Veterans Affairs Office for transmittal to the Veteran’s Administration Regional Office.
6. The veteran must notify the Veterans Affairs Office if planning to drop or withdraw from classes or stop attending VCU.

**Virginia War Orphans Education Program**

The Virginia War Orphans Education Program provides educational assistance for children of certain veterans or service personnel. Applications are available at the VCU Veterans Affairs Office. Students should begin the application process at least four months before beginning studies at VCU.

Eligibility for this assistance is contingent upon the following:

1. The applicant must be no less than 16 and no more than 25 years old,
2. One of the applicant’s parents must have served in the U.S. Armed Forces and must be permanently or totally disabled due to war or other armed conflict, or
3. One of the applicant’s parents died as a result of war or other armed conflict, or
4. One of the applicant’s parents is listed as a prisoner of war or missing in action, or
5. The applicant’s parent, on which eligibility is based, has been a resident of Virginia at the time of entry into active military duty, or
6. The applicant’s parent, on which eligibility is based, has been a resident of Virginia for at least 10 consecutive years immediately before date of application, or
7. The surviving parent has been a resident of Virginia for at least 10 years prior to marrying the deceased parent, or must have been a resident of Virginia for at least 10 consecutive years immediately prior to the date on which the application was submitted by or on behalf of such child for admission to any educational or training institution in Virginia.

Those eligible for the Virginia War Orphans Education Program are entitled to a tuition-free education at state-supported educational or training institutions on an annual basis. (Summer school also may be included in the annual certification of students.) Eligible students can use this benefit to pursue any vocational, technical, undergraduate or graduate program of instruction. Generally, programs listed in the academic catalogues of state-supported institutions are acceptable provided they have a clearly defined educational objective, i.e., certificate, diploma or degree.
Professional programs tuition and student fees

Students must pay all applicable tuition, room, board and other fees when due, as described in this section. Students who fail to pay these charges on time may be assessed a late payment fee. The university reserves the right to revise or alter all tuition and fees, regulations pertaining to student fees, and collection procedures at any time. In addition to expenses billed by the university, students should make allowances for books, clothing, supplies, travel and other out-of-pocket costs when figuring their total yearly expenses at the university.

Student financial responsibilities

Students who enroll:
- are responsible for full payment of tuition and fees generated from their registration.
- are responsible for full payment of all room, board and other applicable miscellaneous charges.
- are responsible for keeping a current permanent mailing address on file with the Office of Records and Registration. Failure to receive an invoice because of an incorrect address does not relieve responsibility for timely payments.
- are responsible for establishing an official VCU e-mail address and reading their e-mail on a regular basis, since e-mail will be used by faculty and university offices to deliver important communications.

Tuition and fees are categorized and described on the Student Accounting Web site at www.vcu.edu/enroll/sa/tuition. All charges are subject to change by decision of the Board of Visitors.

Tuition and fee schedule

Tuition and fees are categorized and described on the student accounting Web site at www.vcu.edu/enroll/sa/tuition. Questions regarding tuition and fees may be directed to the Student Accounting Department at (804) 828-2228, or by e-mailing stuacctg@vcu.edu. All charges are subject to change by decision of the Board of Visitors.

University fee

This fee is used by the university to support student facilities, campus development, intercollegiate athletics and other programs. Full-time students pay a flat-rate university fee each semester. Part-time students pay this fee on a per-credit basis.

Student activity fee

This fee is used to support social, cultural and other student activities on the Monroe Park Campus. These activities include concerts, plays, student organizations and publications. Full-time students on the Monroe Park Campus pay a flat-rate student activity fee, while part-time students on the same campus pay this fee on a per-credit basis. Students on the MCV Campus are not charged this fee.

Student Government Association fee

This fee is used to support social, cultural and other student activities on the MCV Campus. The fee is charged to all full-time and part-time MCV Campus students. Monroe Park Campus students are not charged this fee.

Student health fee

All full-time students on both campuses must pay the student health fee. Part-time students may participate in the University Student Health Services on an elective basis by paying the student health fee. The University Student Health Services offers unlimited office visits for the diagnosis and treatment of acute and chronic illnesses. The fee does not cover accidental injury and hospitalization. The fee is used to cover operating costs for the University Student Health Services.

Technology fee

The technology fee is charged to all undergraduate, graduate and professional students in all programs. Full-time students pay a flat rate. Part-time students pay a per-credit-hour rate. The fee is used to provide for students’ technological needs and to support university-wide technological initiatives.

Off-campus fees

The university fee, the student activity fee, the student government association fee (except School of Social Work) and the student health fee are not charged to students taking off-campus classes.

Capital Outlay Fee

This fee is charged to all full-time and part-time non-resident, on-campus students. The fee is mandated by the General Assembly to reimburse the State for debt service costs attributable to non-resident students related to the financing of buildings and equipment.

Special fee charges

Because of specialized programs, various schools and departments may charge each student additional fees to cover special materials, equipment breakage and other costs. For specific information about special fees, refer to the Student Accounting Department Web site or to the specific school or department section in this bulletin.

Student billing

The Student Accounting Department issues bills to students showing charges for the following fees: tuition, student activity fee, student government association fee, technology fee, university fee, capital outlay fee, private music lessons, school major fees, lab fees, special course fees, instructional support fees, dental kits, disability insurance, housing and dining services, communication fees, student health fee and study abroad fees.

Tuition and fees for preregistered students, along with charges for housing and dining services where applicable, are due by the beginning of each semester. All other students will be billed after the registration period and should pay upon receipt of the invoice.

Students who have sufficient financial aid to cover their charges will not be sent bills. Students with current charges of $100 or more are eligible to participate in the university’s Installment Payment Plan, offered during the fall and spring semesters. The Installment Payment Plan distributes the cost of tuition, fees, room and board, and communications fee for the semester into four equal installments. The fee per semester is $25, paid with the first installment. An application and information about how to sign up for the payment plan will be included with the bill.

Drop vs. withdraw

Drop charges are removed to indicate that the student never attended the class. The student is not eligible to receive financial aid, and any financial aid already credited to the student’s account based on the original course registration will be removed from the student’s account, which may create a balance due to the university.

Withdraw results in the academic grade of “W.” Charges are assessed and adjusted according to the University Refund Policy. Students may owe a balance to the university.

Refund of tuition and fees

The official university tuition and fee policy, applicable for the fall and spring semesters only (excluding short courses), is outlined below. Refunds are calculated on a course-by-course (per-credit-hour) basis, disregarding the full-time cap amounts. Students who are enrolled full-time and withdraw from courses may not receive a refund.

- Students dropping/withdrawing from courses through the first week of class will be entitled to a 100 percent refund of tuition and fees.
- Students withdrawing from courses through the second week of class may be entitled to an 80 percent refund of tuition and the university fee.
- Students withdrawing from courses through the third week of class may be entitled to a 60 percent refund of tuition and the university fee.
- Students withdrawing from courses through the fourth week of class may be entitled to a 40 percent refund of tuition and the university fee.
- Students withdrawing from courses after the fourth week of class are not entitled to receive a refund of tuition and fees.
Students in off-campus courses are subject to the same refund policy as all other university students if the class is scheduled on the regular semester schedule. If the off-campus course is shorter or longer than the academic semester, the refund dates are adjusted accordingly at the request of the Off-campus Programs Office.

The refund policy and deadlines of the English Language Program (ELP) are different from the university’s refund policy for academic courses. Details of the policy may be obtained from the English Language Program Office.

A full refund for Holiday Intersession will be granted if the course is dropped before 4:30 p.m. on the day of the first class meeting. Partial refunds are not granted.

A full refund for summer tuition and applicable fees will be granted if the course is dropped no later than the day following the first day of a given class. (This policy also is applicable if the class does not meet on two consecutive days.) Students reducing their academic course loads to fewer than full time (12 credits for undergraduates and nine credits for graduates) before the end of the last day to drop a course will be entitled to a refund of tuition and applicable fees reflecting the reduced course load. Partial refunds are not granted for the summer session. This same refund policy also applies to short courses offered during the fall and spring semesters.

Students who are financial aid recipients and withdraw from all courses prior to completing 60 percent of the semester are subject to the Federal Return of Title IV Funds Policy. For more details see Federal Financial Aid Refund Policy.

Refunds will be computed based on the actual withdrawal date certified by the Office of Records and Registration. Refunds will not be made to students who do not attend classes and have not completed the required withdrawal procedure. Refund processing may take approximately two to three weeks. Exceptions to this refund policy are made only in rare instances. Written application for an exception must be filed in the Student Accounting Department to the Refund Appeals Committee within three years.

Refer to the Residential Housing contract and Dining Services’ “Terms and Conditions” for housing and dining services refunds.

Requests for refunds that are not generated from the overpayment of financial aid should be made in writing to: VCU Student Accounting Department, P.O. Box 843036, Richmond, VA 23284-3036. Refund request forms are available at the Student Services Centers, 827 W. Franklin St., Room 104 or 1101 E. Marshall St., Room 1-055.

In accordance with credit card regulations, the university will refund any credit balance that may result on a student’s account as the outcome of a credit card payment back to the credit card account. The remaining credit balance, if any, will be refunded to the student.

Students are responsible for paying any increase in charges that may occur after the generation of any refund.

Outstanding charges

Students who fail to meet payments when due will be assessed late payment penalties and will be denied registration for future classes until they have paid all accrued amounts owed. Students with balances owed to the university will not be issued degrees, official transcripts of grades or graduate reports until all charges are paid in full.

Any communication disputing an amount owed, including an instrument tendered as full satisfaction of a debt, must be submitted to the Director of Student Accounting, Student Accounting Department, Virginia Commonwealth University, P.O. Box 843036, Richmond, VA 23284-3036.

Pursuant to Section 2.2-4805 et seq., of the Code of Virginia, and in accordance with rules and regulations promulgated by the State Comptroller and Attorney General of the commonwealth of Virginia, VCU will charge interest, costs and fees on all accounts past due.

VCU is participating in the Virginia Set-off Debt Collection Act of 1981. Under the provisions of this act, a Virginia individual income tax refund will be subject to the university’s claim for unpaid balances of tuition and fees.

A student who pays a past due balance with a dishonored check may be subject to having his or her current and/or future registration cancelled. A charge is levied for all dishonored checks.

Defense crisis tuition relief, refund and reinstatement guidelines

These guidelines apply to any operation, including a defense crisis, in which the president of the United States declares a sudden mobilization that includes members of the Virginia National Guard or the active or reserve forces of the U.S. Armed Forces who are students enrolled at VCU. Students are offered the following enrollment secession options:

1. Drop all courses before the end of the add/drop period and receive a full refund of all funds paid the university. Students will be asked to sign the drop request form with the registrar indicating that they are not receiving a financial aid refund. (This option might best meet the needs of students who are called to active duty service during the first week of school and did not receive a financial aid refund check or direct deposit.)

2. Receive a grade of Incomplete (IM – incomplete military) in one or all courses. Students residing in university housing will be released from their housing and dining contracts and will receive a prorated refund of these charges. Students who chose to take a grade of IM will not have tuition and fees reduced for these courses because credits will still be earned for the semester. Students will have 12 months from the date that they leave the university to complete the course work and earn a course grade. (This option might best meet the needs of students who have essentially completed all course work in a class for the semester, but have yet to turn in a final project, an exam or other materials. It should be agreed upon between the instructor and the student that the remaining course work can reasonably be completed during the upcoming 12-month period.)

3. Accept administrative withdrawal (WM – withdrawal military) from all courses as of the effective date of the orders to active duty. If this option is elected, a full refund of all tuition, fees and prorated room/dining charges will be made. If a student received financial aid, the amount recovered to the financial aid accounts will follow Title IV guidelines. (This option might best meet the needs of students who are called to national service in the middle of a semester and have not completed 90 percent of their class requirements. This option also might best meet the needs of students who are leaving the university during the first week of class and received a financial aid refund check or direct deposit as a result of their financial aid.)

Leaving the university

To initiate this process, the student must provide the university registrar with a copy of his/her active duty orders in addition to a printed copy of his/her course registration for that semester and indicate Option 1, 2 or 3 for each course. The university registrar will take the appropriate enrollment action, post the appropriate grades and send a copy of the orders and a copy of the student course request statement to the director of financial aid and the director of student accounting.

Returning to the university

If the student returns within one year of completing their national emergency service requirement, the student may return to the university in the same program of studies without reapplying for admission. The student should begin the re-enrollment process by writing to the director of admissions regarding their intent to re-enroll.

Tuition determination and student classification

Tuition is determined by the number of credit hours a student is taking, the student’s residency classification, course of study and classification level.

In-state residency

Eligibility for in-state tuition benefits is determined by Section 23-7.4 of the Code of Virginia. Refer to the Determination of student classification for in-state tuition purposes in the About VCU section of this bulletin for the complete code.

All applicants to VCU who want to be classified as Virginia residents must complete the Application for Virginia In-state Tuition Rates and submit supporting documents for additional clarification. Continuing students who want a change of residency status to in-state tuition rates must submit the supplemental...
application along with supporting documentation. Requests and applications for a second review must be submitted to the residency officer by the last day of add/drop week for each semester; however, it is strongly recommended that applications be submitted by the appropriate deadline: fall semester, Aug. 1; spring semester, Dec. 1; summer session, May 1.

Students will be notified by mail of decisions regarding residency status. The Office of Financial Aid and the Student Accounting Department also will receive official notification of residency decisions. Any denial for a change in residency status will include procedures for appeal of the intermediate decision. Students who submit fraudulent applications, falsify documentation or conceal information will be subject to reclassification, payment of all nonresident fees owed and university discipline.

Professional programs general academic regulations

The bulletin of record for a professional student is the Professional Programs Bulletin in effect at the time of the student’s official admission to the degree program (as specified in the student’s official letter of admission). The effective bulletin contains the official requirements that the student must complete to earn the degree. A student who does not maintain continuous enrollment must reapply to the program and will be subject to the requirements of the bulletin in effect at the time of readmission. Exception to this policy must be approved by the student’s dean or dean designee.

Course interpretation

A single number listing for a course, such as MGMT 648, indicates that it is a one-semester course and may be offered each semester or only one semester each year. Courses listed with a double number, such as THEA 603, 604 and designated as semester courses, consist of two one-semester courses, either semester of which may be taken without the other. Courses listed with a double number, such as APPM 575-576, are designated as continuous courses and consist of two one-semester courses, the first of which can be taken without the second, but the second of which cannot be taken without the successful completion of the first. The university reserves the right to withdraw any course or program.

Course numbering

All schools and programs within VCU use the following course numbering system. All course numbers consist of three digits (XXX). The first digit relates to the course level as follows:

0XX noncredit courses

Courses offered for students to make up deficiencies in previous training or to improve certain basic skills.

1XX and 2XX undergraduate, lower level

Courses with these numbers are offered primarily for undergraduate students and may not be used for graduate credit, although graduate students may be required to register for courses at this level to gain a necessary foundation for other course work.

3XX and 4XX undergraduate, upper level

Courses offered for advanced undergraduates and that usually constitute the major portion of specific program work leading to the baccalaureate degree. On occasion, graduate students will be advised by their graduate advisers to enroll in prerequisite 4XX courses. Graduate programs can require that 400-level courses be taken, but credit hours in these courses cannot count toward the graduate degree or in the graduate GPA (effective fall 2004).

5XX introductory graduate courses

Graduate students enroll for credit in these courses through the normal graduate advising system. Departments may limit the number of 500-level courses applicable to a graduate degree program. Advanced undergraduates may enroll in these courses for credit with consent of the offering department. Credit is applicable toward only one degree unless a student is admitted to a course of study that allows a defined number of shared courses.

5XX professional graduate courses

First year, first professional (medicine, dentistry, pharmacy and physical therapy) courses normally open to students enrolled in the M.D., D.D.S., Pharm.D. and D.P.T. programs. Certain courses of this group may be designated by the department and approved by the University Graduate Council for graduate credit.

6XX, 7XX and 8XX graduate courses

Graduate students enroll for credit in these courses through the normal graduate advising system. Credit is applicable toward only one degree unless a student is admitted to a course of study that allows a defined number of shared courses.

6XX and 7XX professional graduate courses

6XX Second year, first professional (medicine, dentistry, pharmacy and physical therapy [second and third year]) courses normally open only to students enrolled in the M.D., D.D.S., Pharm.D. and D.P.T. programs. Certain courses of this group may be designated by the department and approved by the Graduate Council for graduate credit.

7XX Third and fourth year, first professional (medicine, dentistry and pharmacy) courses normally open only to students enrolled in the M.D., D.D.S. and Pharm.D. programs. Certain courses of this group may be designated by the department and approved by the Graduate Council for graduate credit.

Grade review procedure

If a student thinks that a grade is inaccurate, the situation should be discussed with the faculty member. This will allow the faculty member to explain how the final grade was determined and, if an error is detected, to submit a change of grade. If the student still thinks that the grade was assigned unfairly, a written appeal should be submitted to the department chair. Upon receipt of the written appeal, the department chair shall provide the student with a copy and explanation of the Grade Review Procedure and shall ensure that the requirements of the Grade Review Procedure are followed.

If the department chair is unable to resolve the complaint, then the dean of the school in which the course was offered will form a grade review committee as described in the Grade Review Procedure policy and will submit its decision to the dean of the school. The decision communicated by the dean of the school in which the program resides is the final decision and will be distributed to the student, faculty member(s) and department chair.

In cases concerning grades awarded for the fall semester, the written appeal must be submitted to the department chair no later than 30 calendar days after the beginning of the following spring semester. In cases concerning grades awarded for the spring semester or summer sessions, the written appeal must be submitted no later than 30 calendar days after the beginning of the following fall semester.

Grading system

Work quality is measured by the four-point grade system with the following equivalents:

<table>
<thead>
<tr>
<th>Grade symbol and meaning</th>
<th>Grade-point value per semester credit</th>
</tr>
</thead>
<tbody>
<tr>
<td>A</td>
<td>4.0</td>
</tr>
<tr>
<td>B</td>
<td>3.0</td>
</tr>
<tr>
<td>C</td>
<td>2.0</td>
</tr>
<tr>
<td>D</td>
<td>1.0</td>
</tr>
<tr>
<td>F</td>
<td>0.0</td>
</tr>
</tbody>
</table>
Grade of progress (PR)
The mark of “PR” may be assigned only in courses approved for such grading. Unlike the mark of “I,” “PR” will not automatically be changed to a failing grade at the end of the succeeding semester.

Grades of satisfactory (S), unsatisfactory (U) or fail (F) in research, thesis and dissertation courses
All research, thesis, and dissertation credits taken as part of the final project (thesis/dissertation/project) for awarding a graduate degree are to be graded each semester as “S,” “U” or “F.” There is no limit to the number of these credits a student may take while pursuing completion of the degree as long as the student receives a grade of “S” for each credit. An individual department may terminate a student who does not progress satisfactorily as indicated by a “U” grade in research, thesis/dissertation/project course work. A student who receives a final grade of “F” in the thesis or dissertation will be terminated from the graduate program.

Grade of withdrawn (W)
The grade of “W” indicates that the student has officially withdrawn from a course or has been administratively withdrawn for nonattendance. No student who has officially withdrawn from a course or who has been administratively withdrawn for nonattendance may attend subsequent meetings of the course.

Immunization requirements
The commonwealth of Virginia and VCU require that all full-time students supply validated immunization records to University Student Health Services. This requirement must be completed prior to registering for second semester. Failure to meet these requirements will result in a hold placed on the student's second semester registration. The hold can be removed only upon receipt of the students documented records.

The immunization record must be completed fully and accurately. There are two ways a student may fulfill all requirements:
1. Students may have their health care provider transfer the information from their medical records and sign the form.
or
2. Students may complete the top demographic section of the Certificate of Immunization and attach a copy of official documents from undergraduate institutions, military records, high school or other records that fulfill all requirements to the Certificate of Immunization.

A copy of the Certificate of Immunization, which details the necessary immunizations, is available on the student health Web site at: www.students.vcu.edu/health/docs/immunizations.pdf [PDF].

Students who cannot provide documented evidence of all required immunizations must see their health care provider, health department or Student Health Services to complete all requirements.

MCV Campus programs
Warning, probation and suspension are defined by the program of study. Consult program adviser for further details.

University rules and procedures
Each member of the VCU community has certain responsibilities, rights and privileges. These are stated in some detail in the VCU Rules and Procedures, and all students are responsible for being familiar with provisions of this document. The rules and procedures are printed in the VCU Insider and also are available at the Office of Judicial Affairs and Academic Integrity. This document also provides for the process whereby disciplinary action, including separation from VCU, may be taken against a member of the university community as a result of behavior that is in violation of the prohibited conduct as stated in the VCU Rules and Procedures.

Students at VCU have a right to appeal actions of an academic nature. If such action involves a course grade, the Grade Review Procedures should be followed. If such action involves computing, the Computer Ethics Policy should be followed. If such action involves dishonesty, the Academic Integrity Policy for Monroe Park Campus students should be followed.
All students enrolled in courses on the MCV Campus are subject to the VCU Honor System. Copies of the Honor Code are available in Office of Records and Registration, Sanger Hall, Room 1-055, and the Office of the Associate Dean of Student Affairs, MCV Campus, Hunton Student Center, Room 205.

In addition to those standards of conduct described in VCU Rules and Procedures and the MCV Campus Honor Code, which applies to all students enrolled on the MCV Campus, a student enrolled at the university may be dismissed from the school in which enrolled for failure to meet prescribed academic program requirements. Students appealing termination from a graduate program/department should first pursue appeals at the department and/or the school level. After receiving a decision from the department and/or school, a student has the option of filing an appeal with the dean.

VCU seeks to foster insight, imagination, creativity, resourcefulness, diligence, honesty and responsibility as well as the education of the men and women enrolled in its graduate programs. Such an enterprise can take place only where the highest standards of academic integrity exist.

Academic dishonesty is the giving, taking or presenting of information or material by students with the intent of unethically or fraudulently aiding themselves or others on any work that is to be considered in the determination of a grade or the completion of academic requirements. Students in doubt regarding any matter related to the standards of academic integrity in a given course or on a given assignment should consult with the faculty member responsible for the course before presenting the work.

Withdrawal policies

Leave of absence

Students may request a leave of absence from a program through written appeal to their advisers. The adviser will forward the request, following departmental governance procedures, along with a recommendation to the dean, who will respond for the university. Students who do not register for courses for more than one calendar year and who have not been granted a leave of absence must reapply for admission to VCU and to the degree program.

Withdrawal from the university

To withdraw officially from VCU, a student must submit a complete Official Withdrawal Form to Records and Registration before the end of the 10th week of classes. The Official Withdrawal Form is obtained from Founders Hall, Room 104, or Sanger Hall, Room 1-055. Failure to complete this form may result in the assignment of failing grades in all or some of the courses. The student’s permanent academic record will indicate a grade of withdrawn (“W”) for all courses in which the student was enrolled.

Health-related withdrawals

While students are expected to work toward completion of their degrees without interruption, health-related problems may necessitate withdrawal from the university.

- Some schools require a statement from a physician indicating the nature and severity of the condition, when a student should stop attending classes, and the estimated date of return to school.
- In the event that a student’s health problem poses a danger to the student, to patients or to others with whom the student may come in contact and the student is unable or refuses to initiate steps to withdraw as stated above, administrative withdrawal of the student may be made by the dean upon consultation with the appropriate faculty and a qualified physician.
- Because curricular and course content changes may occur and a student’s progress toward a degree may be affected adversely because of an extended absence, specific time periods may be imposed by individual schools with respect to the length of time allowed for absence from school. If there is a delay in return beyond the allotted time period without written consent of the dean, the student may petition for return with advanced standing.
- Some schools require that prior to return to school, the student must submit to the dean a statement from a physician. This statement should document that the condition that necessitated the withdrawal has been corrected to a point where the student can complete successfully all curriculum requirements with reasonable accommodation including classroom, laboratory, clinical and fieldwork experience.

Dietetic internship

A postbaccalaureate, accredited dietetic internship is offered through the VCU Health System’s MCV Hospitals. Qualified applicants must have completed an undergraduate or graduate program in dietetics. For additional information contact the Dietetic Internship Director, MCV Hospitals, Virginia Commonwealth University Health System, P.O. Box 980294, Richmond, VA 23298-0294; or phone (804) 828-9108; e-mail Ann Robbins at ar Robbins@mcvh-vcu.edu; or visit the Web site at www.vcuhealth.org/dietetic.
Office of Continuing Studies, Summer Studies, and Special Programs

The university provides numerous opportunities for adult education, off-campus instruction and professional development through the Office of Continuing Studies, Summer Studies, and Special Programs. Continuing studies programs offer the same course work and academic credit as traditional university courses and are fully degree-applicable within the normal standards of VCU’s college and schools.

The office attempts to address the educational and professional training needs of the community by providing flexible, cost-effective instruction that returns valued and needed knowledge into the community.

Program examples include the Especially for Nonprofit Organizations certificate program, profession-specific and introductory Spanish courses, specialization and recertification programs for teachers, off-campus degree programs including the R.N. to B.S.N. program, the NOVA M.S.W. program, and advanced-study courses for gifted high school students.

For more information, call (804) 828-8819 or visit www.community.vcu.edu.

Winter Intersession
Summer Studies
Off-Campus Graduate Art
Master of Interdisciplinary Studies in Interdisciplinary Art
Especially for Nonprofit Organizations

Off-Campus Graduate Art

Since 1993, VCU has offered off-campus graduate art classes in locations from the Washington, D.C., area to Tidewater. Classes are open to all qualified students (persons with undergraduate degrees in art or equivalent experience), but are particularly designed for art teachers interested in license renewal, a graduate degree program or personal enrichment. During the fall and spring semesters, classes meet one evening per week, usually from 4:30 to 8:30 p.m. In the summer semester, classes are scheduled for 10 all-day workshops over a two- or three-week period. A degree program, the Master of Interdisciplinary Studies in Interdisciplinary Art, is offered, but students need not be in a degree program in order to take classes. For more information, call (804) 828-6931 or visit www.community.vcu.edu.

Master of Interdisciplinary Studies in Interdisciplinary Art

The Master of Interdisciplinary Studies in Interdisciplinary Art degree is jointly administered by the School of the Arts and the Division of Community Engagement. It is not the equivalent of a Master of Fine Arts degree, but is an additional option for qualified persons, especially art teachers, who are interested in studio art classes. Classes are offered in public school art rooms from Fairfax County to Virginia Beach, in the late afternoon during the regular school year and in all-day workshops during the summer. The M.I.S. degree requires the completion of 39 graduate credits, including at least nine and no more than 15 credits in each of two focus areas. Focus areas include, but are not limited to, crafts, computers and the arts, mixed media, painting, photography, printmaking, drawing, and sculpture. In addition, the student must complete from three to 15 credits of art electives and six credits of an approved final project, including a graduate exhibition and a final paper. For more information, call (804) 828-6931 or visit www.community.vcu.edu.

Especially for Nonprofit Organizations

Since 1997 the university has been a leading partner in a community collaborative that sponsors the Especially for Nonprofit Organizations Program. In addition to being a sponsoring partner, VCU also manages the program, which provides educational and networking opportunities as well as capacity-building for the vast network of nonprofit organizations in the greater-Richmond area. The program is open to any paid or volunteer staff member of a nonprofit organization and offers the chance to earn both academic credit and a certificate of achievement in Nonprofit Management (after 12 courses). Classes usually meet for two days, one week apart, from 9 a.m. to 3 p.m., throughout the city of Richmond. An annual conference and certificate awards ceremony are held each fall. Class and conference topics include, but are not limited to, strategic management, communications, legal issues for nonprofits, and technology skills. For more information, call (804) 827-0246 or visit www.community.vcu.edu.
Office of VCU Community Solutions
The primary mission of VCU Community Solutions is to connect the university with the community to create opportunities for social change. Campus and community partners create a unique synergy of collaborative research, teaching and service. An interdisciplinary team of faculty and community partners is responsible for the generation and implementation of community-based projects. Students become involved through service-learning courses and participation on community-based research teams. For more information, call (804) 828-8824 or visit www.community.vcu.edu.

Service-Learning
Service-learning integrates community service with traditional academic courses in order to enhance academic learning, facilitate the development of students into responsible citizens and meet community-identified needs. Each student participates in an organized community service project that directly relates to the subject matter of the course and which meets community-identified needs. The students then participate in reflection activities, which are facilitated in such a way so as to increase their understanding and application of course content and enhance their sense of civic responsibility. The community organization defines the service need and the students learn and grow from their service through reflection on their experience. A listing of service-learning courses is provided in the Schedule of Classes each semester. For more information, call (804) 827-8215 or visit www.community.vcu.edu.

VCU America Reads Program
The VCU America Reads Program places college work-study students in local elementary schools to provide comprehensive reading support to students who are below grade level in reading. The program works in partnership with Richmond City Schools as well as schools in the surrounding counties to identify elementary school children who are in need of extra assistance. Reading support is provided at partner schools during the normal school day as well as during academically focused after-school programs. Program applications are available throughout the year at the following locations:

- Community Programs Office located at 1103 W. Marshall St.
- Division of Community Engagement located at 920 W. Franklin St.
- VCU Career Center and Student Activities Center located in the University Student Commons, 907 Floyd Ave.
- VCU Office of Financial Aid located at 901 W. Franklin St.

For more information, call (804) 828-8850 or visit www.community.vcu.edu. Applications may also be downloaded at the America Reads Web site at www.ed.gov/its/americareads or they can be mailed upon request by calling (804) 828-8850.

VCU AmeriCorps
Established in 1995, the AmeriCorps program at VCU has an educational focus with the goal of helping improve the literacy skills of local children and families. Reading by third grade has been identified by the Richmond community as a critical preventive strategy in addressing the health and safety needs of children in the metro area. VCU AmeriCorps members address this need by providing comprehensive reading support to elementary school students who are struggling academically. Members also enhance family literacy skills and parent involvement at partner schools by lending support to existing services as well as developing new programs to meet specific needs. Applications are available beginning in March at the following locations:

- Community Programs Office located at 1103 W. Marshall St.
- Division of Community Engagement located at 920 W. Franklin St.
- VCU Career Center and Student Activities Center located in the University Student Commons, 907 Floyd Ave.
- VCU Office of Financial Aid located at 901 W. Franklin St.

For more information, call (804) 828-8850 or visit www.community.vcu.edu. Applications can also be downloaded at the AmeriCorps Web site at www.americorps.org, or applications can be mailed upon request by calling (804) 828-8850.

Carver-VCU Partnership
In the spirit that partnerships, not fences, promote safe and nurturing communities, VCU has created a partnership with its northern-boundary neighbor, the Carver community. The Carver-VCU Partnership strives to create a shared urban community with a commitment to improving the neighborhood’s quality of life including its health, community development, youth development, and safety while extending the experience of the community into the classroom and the university. For more information, call (804) 827-1904 or visit www.community.vcu.edu.

Community Service Associates Program
The Community Service Associates Program provides opportunities for faculty members to assist with projects of neighborhood groups, civic associations, governmental or professional organizations, and nonprofit agencies. Each project is individually designed to be of mutual benefit to the agency and the faculty member. As an associate, the faculty member brings expertise to bear on a problem or issue of importance to the community while concurrently receiving the benefits of “hands-on” experience. Although the primary focus of this program is on community service, experience and perspective gained by associates often translate into enhanced teaching and scholarship. Funding is available to support faculty time. For more information, call (804) 828-8824 or visit www.community.vcu.edu.

Graduate and Professional Programs Bulletin 2008-09
The Office of the Associate Vice Provost and Dean of Student Affairs is actively involved in understanding the needs of students, improving the quality of student life, supporting student success, promoting leadership development, and disseminating important information for students. The office provides services and support to students through a wide range of programs, activities and resources. The office assists students in solving problems and advocates for students when appropriate. The office provides information and referral to students, faculty, staff and parents on a variety of student-related issues. The office provides oversight for the administration of the university’s disciplinary procedures and the honor system.

The dean sits on a number of university committees, participates in orientation activities, provides supervision for several departments of the Division of Student Affairs and Enrollment Services and serves as a key administrator for several major policy statements of the university including the VCU Honor System. Students, parents of students and staff who have issues they wish to discuss or who are interested in various programs and opportunities should visit the dean's office, located in the Sitterding House, 901 Floyd Ave., P.O. Box 843017, Richmond, VA 23284-3017; telephone: (804) 828-8940; e-mail: vcudean@vcu.edu.

### Office of the Associate Vice Provost for Student Affairs and Enrollment Services

**Delores Taylor** Associate Vice Provost for Enrollment Services

The Office of the Associate Vice Provost for Student Affairs and Enrollment Services provides leadership in the development and implementation of the university’s enrollment plans, policies, related service programs, leadership and coordination in marketing and undergraduate student recruitment, coordination in enrollment and recruitment initiatives with the individual schools, college, graduate school and international education.

The associate vice provost has planning, policy and administrative oversight responsibilities for a wide range of academic and student services provided by the offices of Undergraduate Admissions, Financial Aid, Records and Registration, and Student Accounting. Functions and services provided by the various enrollment services units are described in this section and in the "Admission to the University," "Tuition, fees and expenses," and "Academic Regulations" sections of this bulletin.

The Office of the Associate Vice Provost for Enrollment Services is located in the Sitterding House, 901 Floyd Ave., P.O. Box 843017, Richmond, VA 23284-3017; telephone: (804) 827-8737; e-mail: wglee@vcu.edu.

### Office of the Assistant Vice Provost for Student Affairs and Enrollment Services

**Charles Klink** Assistant Vice Provost for Student Affairs

The Office of the Assistant Vice Provost for Student Affairs and Enrollment Services provides assistance to the vice provost for student affairs in the overall administration of the Division of Student Affairs and Enrollment Services. This office is actively involved in understanding students and their needs, improving the quality of student life, and collecting and disseminating information important to students and to the university.

The assistant vice provost serves as the division ombudsman in addressing and resolving student issues and concerns inhibiting success at the university, provides leadership for assessment and professional development activities for the division, and oversees a number of initiatives focused on utilizing external and internal resources to support and recognize student success. The assistant vice provost provides supervision for several departments in the Division including the University Career Center, Disability Support Services, University Counseling Services and Student Media.

The Office of the Assistant Vice Provost for Student Affairs and Enrollment Services is located in the Sitterding House at 901 Floyd Ave., P.O. Box 843017, Richmond, VA 23284-3017; telephone: (804) 828-7525; e-mail: cjklink@vcu.edu.

### Office of the Associate Dean of Student Affairs, MCV Campus

**Napoleon Peoples** Interim Associate Dean of Student Affairs, MCV Campus

Students, parents of students and staff who have issues they wish to discuss or who are interested in various programs and opportunities should visit the dean’s office, located in the Sitterding House, 901 Floyd Ave., P.O. Box 843017, Richmond, VA 23284-3017; telephone: (804) 828-8940; e-mail: vcudean@vcu.edu.
The Office of the Associate Dean works closely with the Office of the Associate Vice Provost and Dean of Student Affairs in serving as a resource for students, parents, faculty and staff. The associate dean serves as the primary liaison between the organized student body on the Monroe Park and the university, providing coordination and leadership for student affairs and related staff.

The associate dean serves as the faculty adviser to the MCV Campus Student Government Association. The associate dean represents the Division of Student Affairs and Enrollment Services on several university-wide committees and also participates in the general orientation sessions for each school on the MCV Campus. The associate dean maintains an open-door policy and will advise students, parents, faculty and staff on university-related issues or procedures.

The associate dean’s office is located in the Hunton Student Center, Suite 205, 110 East Broad Street, P.O. Box 980004; telephone: (804) 828-0525; e-mail: npeoples@vcu.edu.

**University Student Commons and Activities**

Timothy L. Reed  
Director  
www.usca.vcu.edu

The facilities, services and programs of University Student Commons and Activities (USC&A) are designed and implemented to bring together all members of the Virginia Commonwealth University community — students, faculty, staff, alumni and guests — thereby contributing to intellectual, emotional and social growth through informal interaction.

Facilities  
Programs  
Services

**Facilities**

USC&A manages three student centers on the Monroe Park and MCV Campuses of VCU.

The University Student Commons is the main student-life facility for the Monroe Park Campus. The Commons, located in the heart of VCU’s Monroe Park Campus, is a great place to meet friends, host an event, get involved, or study. The Park Place Food Court, Commons Café and Commons Convention provide a wide variety of dining options. Break Point, located in the Lower Level of the Commons, is the university’s game room with pool tables, arcades and Thunder Bowl. The Commons is home to the Student Organization Center, Off-campus Student Services, University Career Center, University Counseling Services, Disability Support Services, the Office of Multicultural Student Affairs, and the Student Government Association.

The Hunton Student Center and the Jonath L. Larrick Student Center are both located on the MCV Campus. Hunton Student Center is a great place to study or grab a bite to eat between classes. The renovated 1841 church building has a state-of-the-art learning center, managed by VCU Libraries, along with spacious study areas on two floors including private group-study rooms. Also located in Hunton are the offices for the Associate Dean of Students, MCV Student Government Association, the Hideaway Café, and a student recreation area. Larrick is a multipurpose room used for dances, lectures, receptions, and other functions. The first floor of Larrick Student Center also serves as a student dining facility.

Information centers can be found at both the Commons and Hunton Student Center. A complete list of services and programs that these facilities offer is available online at www.usca.vcu.edu.

**Programs**

USC&A offers a wide variety of programs and leadership opportunities for students on both the Monroe Park Campus and MCV Campus. The following programming offices are included in the USC&A: Monroe Park Campus and MCV Campus Programs Office, Fraternity and Sorority Life; Leadership Development, Student Organization Services, and Volunteer Services. Through these offices, several university traditions and major events are coordinated. These events include: Welcome Week, Student Organization-Volunteer Organization Fair, Jazz on the Green, Fraternity and Sorority Recruitment, RamMadness, Fall Fest, Homecoming, Speak from the Heart Speaker Series, Greek Week, STRUT Fashion Show, Student Organization Awards Ceremony, Saturday Volunteer Specials, and Leadership and Service.

Students are encouraged to participate in these university traditions along with participating in other programs and events offered during the week and weekends. A complete listing of programs and events is available online at www.usca.vcu.edu.

Back to top

**Services**

USC&A offers a wide variety of services for students and the entire VCU community including Information Services, Off Campus Student Services, Student Organization Services, and Volunteer Services.

Information Services staff provide campus directions and information about programs or events. More information can be obtained by calling (804) 828-1981 or visiting the Web at www.usca.vcu.edu/information.

Off Campus Student Services offer a variety of ways to assist and educate those who drive, ride, walk or bus to campus. OCSS provides a Web-based housing search system, ride-share assistance, a care emergency tool kit for check-out, bicycle registration, educational programs and coin operated rental lockers. More information on Off Campus Student Services is available online at www.usca.vcu.edu/offcampus.

The Student Organization Service Center offers mail boxes, computer work stations, storage, work rooms, financial assistance for student organizations, general planning, and advising for all student organizations. SOSC staff assist students in identifying student organizations of interest. Volunteer Services provides information on opportunities to serve the greater Richmond community through volunteer experience. More information on volunteer opportunities is available online at www.usca.vcu.edu/studentorgs/volunteer.htm.

**University Career Center**

Susan Story  
Director  
www.students.vcu.edu/careers

The University Career Center assists students and recent alumni to identify and achieve their career goals. Career Center staff work with students to help them explore career options, decide on career directions and develop sound strategies for realizing their career goals.

The Career Center offers a career library of more than 600 books and publications. Students have access to employer literature, recruiting brochures, graduate and professional school publications, and five online computers. Career counseling sessions are offered by appointment using assessment tools such as the Strong Interest Inventory, the Self-Directed Search and the Myers-Briggs Type Indicator. Students may receive assistance with resume development, job search skills and interviewing techniques.

The Career Center maintains job postings of full-time, part-time, internship and co-op positions for students who are eligible. These postings may be accessed 24 hours a day through an account with the Career Center. Both on- and off-campus work-study positions for eligible students can be viewed online at www.students.vcu.edu/careers.

The Career Center also offers a comprehensive Cooperative Education Program that blends traditional academics with paid work assignments in industry, business, government and nonprofit organizations. For additional information, including eligibility, go to www.students.vcu.edu/careers and the "Co-op" link.

Graduating students use the Career Center to interview with business, industry, government and education representatives who visit the campus to recruit prospective graduates for permanent positions in their respective organizations. Students are encouraged to sign up as participants in the Career Center’s Web-based resume referral system called e Recruiting in order to be referred to employers and have access to job listings.

The University Career Center is located in the Student Commons, Room 143, 907 Floyd Ave., P.O. Box 8432007, Richmond, VA 23284-2007; telephone: (804) 828-1645.

**University Counseling Services**

Jihad Aziz  
Director  
www.students.vcu.edu/counseling
University Counseling Services provides psychological services to the university community. The mission of UCS is to create an environment that fosters student growth, development and psychological well-being.

Members of UCS’ professional staff include clinical psychologists, licensed clinical social workers, a consulting psychiatrist, psychology and social work interns, and advanced graduate students. UCS provides free brief psychotherapy to currently enrolled students as available. UCS adheres to professional, legal and ethical guidelines established by professional organizations and state law to protect student confidentiality.

University Counseling Services include:

- **Counseling and psychotherapy.** Individual and couples work is designed to deal with personal and interpersonal issues.
- **Group counseling.** Ongoing psychotherapy groups focus on personal and social concerns.
- **Psychiatric services.** Limited services include medical evaluation, diagnosis and treatment with psychotropic medication.
- **Crisis services.** Walk-in crisis services during office hours (828-6200) and on-call crisis services after hours and on weekends (828-1234).
- **Consultation and outreach.** Presentations, workshops and staff consultation are available to student organizations, academic departments and other groups on issues relevant to each group’s needs.
- **Safe zone.** Workshops for faculty and staff designed to reduce homophobia and heterosexism.

UCS has office locations on both campuses. The Monroe Park Campus office is located in University Student Commons, Room 238, 907 Floyd Ave., P.O. Box 842525, Richmond, VA 23284-2525; telephone: (804) 828-6200. The MCV Campus office is located in the basement of Grant House, 1008 E. Clay St., P.O. Box 980238, Richmond, VA 23298-0238; telephone: (804) 826-3964.

---

**University Student Health Services**

Margaret Roberson  
Director  
www.students.vcu.edu/health

University Student Health Services offers quality primary health care for treatment of acute and chronic illness. In addition to diagnosis and treatment, the service emphasizes prevention of illness through screening, counseling and health promotion/public health programs. All full-time undergraduate and graduate students are required to pay the student health fee each semester. Part-time students enrolled in at least three credit hours have the option of paying the health fee. The summer fee is optional for all students who will be enrolled the following fall semester.

USHS professional staff includes physicians, psychiatrists, physician assistants, nurse practitioners, registered nurses, pharmacists, health educators and licensed clinical social workers. Services offered include primary care clinics, allergy clinics (administration of allergy injections ordered and supplied by outside physicians), women's clinics, pharmacy and laboratory services, immunization services, health education/public health programs and an after-hours phone triage service provided for urgent medical advice and referral.

USHS has office locations on both campuses. The Monroe Park Campus office is located in the Sports Medicine Building, 1300 W. Broad St., Suite 2200, P.O. Box 842022, Richmond, VA 23284-2022; telephone: (804) 828-8828; fax: (804) 828-1093. The MCV Campus office is located in the VMI Building, 1000 E. Marshall St., Room 305, P.O. Box 980201, Richmond, VA 23298-0201; telephone: (804) 828-9220.

Immunization requirements

Health insurance

The Wellness Resource Center (previously the Office of Health Promotion)

Alcohol and other drug prevention education

Smoking cessation

Nutrition, eating disorders and body image

Sexual assault and domestic violence

Stress management

Sexual health

Immunization requirements

Virginia law requires all full-time students to submit an official certification of immunization to USHS prior to registration. These immunization requirements, along with the necessary forms, can be found at www.students.vcu.edu/health/immunization and in the Handbook for Admitted Students.

All students regardless of enrollment status, whose birth country is not the U.S. or Canada, are required to complete the tuberculosis screening in the U.S. within the last year.

Students enrolled in health career programs may be required to submit additional immunization information and should contact their school for additional requirements.

---

**Health insurance**

The university is not responsible for accidents occurring to students in connection with class, laboratory, shop, fieldwork, athletics, student activities, travel or any other activity.

The university offers its students an approved insurance plan providing substantial benefits at group rates. The insurance extends for a 12-month period beginning in August, or from the beginning of the second semester to the next August, and includes coverage for accidents, hospitalization, medical, surgical and other benefits for illnesses. Married students may enroll spouses and children. The university strongly recommends that all students enroll in student group health insurance.

Complete information about enrolling is available from USHS and on the Web at www.students.vcu.edu/health/insurance.

---

**The Wellness Resource Center (previously the Office of Health Promotion)**

(804) 828-9355

The Wellness Resource Center is engaged in the science of empowering all students to move toward optimal health — a balance of physical, emotional, social, intellectual and spiritual health. The center’s staff is committed to helping VCU students learn more about health through individual sessions, group presentations and awareness events. Most services are free to VCU students. There are many volunteer opportunities for students at the center, including several peer health educator groups.

**Alcohol and other drug prevention education**

(804) 828-2086

If you are concerned about your use or someone else's use, please feel free to call our office for resource information. Education programming is available upon request. A free online anonymous self-assessment is available at www.students.vcu.edu/health (code word is vcurams).

**Smoking cessation**

(804) 828-7815

Free Quit Kits, information and individual appointments are available to help students quit tobacco use. Browse www.smokefreevcu.org for additional information and resources.

**Nutrition, eating disorders and body image**

(804) 827-0231

Education on healthy eating or eating disorder recovery is available through confidential individual nutrition sessions. Programs on nutrition, body image and eating disorders are available to student groups and classes.

**Sexual assault and domestic violence**

(804) 828-2085

Confidential services are available for students with concerns surrounding sexual assault, stalking, sexual harassment and relationship violence. Staff help students identify needs (medical, legal, counseling, academic) and refer to appropriate campus and/or community resources.

**Stress management**

(804) 828-0231

Individual stress management consultations are available. Stress management workshops are available upon request to student groups and classes.

**Sexual health**

(804) 828-9355
Education concerning sexually transmitted infections, including HIV, and contraception is provided to individual students or student groups as requested.

Residential Life and Housing
Rachel Maddux
Director
www.housing.vcu.edu

VCU’s diverse on-campus housing options are designed to meet the needs of any student who chooses to experience residential living. The VCU Residential Life and Housing Office operates a variety of 9- and 12-month living facilities, including traditional residential rooms, suite- and apartment-style buildings, and high-rise residence halls. Approximately 4,700 students choose to live on campus each year.

Residential life at VCU offers many rewards and provides students with the opportunity to gain personal experiences that supplement and complement the formal education gained in classrooms and laboratories. The Residential Life and Housing program offers students the chance to make new friends, meet like-minded academic peers, and develop leadership skills through participation in social, academic, governmental and judicial organizations.

The staff of the VCU Residential Life and Housing Office is dedicated to providing community living situations that support each student’s academic, personal and extracurricular pursuits, and its goal is to offer a sense of belonging for every residential student. Each residence hall is staffed with a coordinator of residence education, a housing manager, at least one resident director, and many in-house resident and community assistants.

New freshman students who submit a housing application by June 1 are guaranteed residential housing. Housing contracts for freshman residence halls are based on the nine-month academic calendar; housing contracts for residence facilities specified for upperclassmen are a combination of 9- and 12-month agreements. Single-semester contracts are available only to new students who enter the university in the spring semester. (See Room fees and housing costs section in “Tuition, fees and expenses.”)

All residence hall rooms are furnished and are wired for Internet, cable and telephone service. For detailed information regarding all VCU residence halls, including features and furnishings, visit the Residential Life and Housing Web site at www.housing.vcu.edu, or contact the Central Housing Office, Gladding Residence Center Room 159, 711 W. Main St., P.O. Box 842517, Richmond, VA 23284-2517; telephone: (804) 828-7666.

Recreational Sports
Tom Diehl
Director
www.recsports.vcu.edu

Recreational Sports provides a variety of programs, services and facilities designed to meet the leisure and health needs of the VCU community. All currently enrolled students with valid identification are eligible to use all facilities. VCU and VCUHS staff, VCU faculty, alumni, retirees and selected contract employees are also eligible to join as members; details and fees are available in the membership section of the Recreational Sports Web site.

Recreational sports programs
Informal recreation
Available at all facilities and includes drop-in use of the fitness centers, gymnasiums, swimming pools and court space.

Intramural sports
Leagues and tournaments offered throughout the year at various skill levels, as well as men’s, women’s and coeducational divisions. Sports include basketball, flag football, softball, racquet sports, volleyball, soccer, ultimate Frisbee and dodgeball.

Fitness/wellness programs
Programs include group exercise classes (indoor cycling, Pilates, step aerobics, yoga), personal fitness training services, fitness incentive programs, fitness workshops and certifications.

Outdoor Adventure Program
The OAP provides reasonably priced outdoor recreational trips. Activities such as camping, kayaking, climbing, cross-country skiing and more are offered throughout the year and facilitated by experienced trip leaders. For those planning their own outdoor activities, the Outing Rental Center offers equipment such as canoes, tents, backpacks, sleeping bags and trail guides at nominal cost. For additional information, call (804) 828-6004.

Sport clubs
Clubs give students the opportunity to train and compete against other colleges in a variety of sports. Clubs vary in focus and programming as student members manage the operation of the club and decide on club activities.

Aquatics programs
Programs are held at both pools. Members can take advantage of learn-to-swim programs for adults and children, water exercise and incentive programs, and certification programs. Pools are available for group rental.

Special events
Special events are provided throughout the year including the Turkey Trot 5K, VCU Spring Challenge and golf tournaments.

Recreational Sports facilities
Recreational Sports operates five facilities encompassing two fitness centers, one wellness center, basketball/volleyball/badminton courts, racquetball and squash courts, lighted outdoor basketball courts, two swimming pools, a lighted, artificial-turf field and a tennis center. All fitness centers feature Broadcast Vision. Wellness centers offer resources on health, wellness and nutrition.

Facilities include:
- The Stuart C. Siegel Center, (804) 827-1100.
- The Cary Street Recreation Complex (currently under renovation/construction), (804) 828-6219.
- The Outing Rental Center, (804) 828-6004.
- MCV Campus Recreation and Aquatic Center, (804) 828-6100.
- The Franklin Street Pool, (804) 827-1100.
- The Thalhimner Tennis Center, (804) 828-1458.

Student media
Greg Weatherford
Student Media Director

Student Media encourages involvement of students in variety of student publication and broadcasting opportunities including: The Commonwealth Times (independent student press of VCU), The Vine (news-features magazine), Poictesme (literary fiction journal), Amendment (literary journal), and WVCW (radio station). All media are student run enterprises.

The Student Media Center is home to these student publications and the radio station. The center is located at 817 W. Broad St., P.O. Box 842010, Richmond, VA 23284-2010; telephone: (804) 828-1058.

Student and university governance
The University Council, an advisory board to the university president, is the highest internal governance body at VCU. The council is made up of 27 faculty members, 10 students, 10 administrators, 10 classified staff members and four subcommittees: the Committee on Student Affairs, the Committee on Academic Affairs, the Committee on Faculty Affairs and the Committee on Classified Staff Affairs.

The Student Governance structure includes the Monroe Park Campus Student Government Association, the MCV Campus Student Government Association, the Programming Commission and the Student Media Commission.

The Monroe Park Campus Student Government Association is an elected body of students from the Monroe Park Campus who are organized into standing committees: steering, appointments, appropriations, elections, human relations,
legislative issues, publicity and student services. Non-elected, at-large members are encouraged to join most of these committees. All meetings of the senate are open to the public.

The MCV Campus Student Government Association representatives are elected from each class in each of the health science schools on the basis of one representative per 40 students. MCV Campus SGA meetings are held monthly from September through April and are open to all MCV Campus students. The Association sponsors several social functions including the MCV Campus Winter Ball and study breaks.

Additional information about the Monroe Park Campus and MCV Campus Student Government Associations may be found at www.vcu.edu/sga.

The Programming Commission coordinates programs and events planned by student organizations that specialize in major event planning. Members of the Programming Commission include: Activities Programming Board, Fall Block Step Show Planning Committee, Homecoming Planning Committee, and the InterCultural Festival Planning Committee.

The UCSC administrative office is located in University Student Commons, Room 104, 907 Floyd Ave., P.O. Box 842032, Richmond, VA 23284-2032; telephone: (804) 828-6500.

**Office of Judicial Affairs and Academic Integrity**

**Karen Belanger**

Director

The Office of Judicial Affairs supports the educational mission of the university by educating students about appropriate behavior and fostering a community supporting academic success. The office takes the lead in the enforcement of university policies, as outlined in the “Virginia Commonwealth University Rules and Procedures” and published along with the VCU Insider Student Handbook and Resource Guide, providing a fair and impartial process for the adjudication of matters of student discipline. The Office of Judicial Affairs works in conjunction with university offices to administer the policies for Residence Hall Students and Student Off-campus Conduct, the VCU Alcohol and Drug Policy, the Student Sexual Misconduct Policy, and the Computer and Network Resources Use Policy. The VCU Insider Student Handbook and Resource Guide and the Rules and Procedures are available online at www.students.vcu.edu/rg.

The Office of Judicial Affairs is located in University Student Commons, Suite 106, P.O. Box 843071; telephone: (804) 828-1963.

**University policies and procedures**

A number of policies and regulations at VCU affect students, and many of these are printed in the general information chapters of this bulletin. Three policy documents are of particular interest to students.

The VCU Rules and Procedures document outlines the rights, responsibilities and privileges of each member of the university community and describes cases when disciplinary action, including separation from the university, may be taken against a member of this community as a result of prohibited behavior as outlined in this document. The VCU Honor System defines academic dishonesty and provides a procedure for judging alleged violators of academic integrity. The Grade Review Procedure outlines the process whereby students may appeal grades that they feel have been assigned unfairly.

Each student is responsible for being familiar with the provisions of all university policies and regulations. The three policy documents described above are printed in full along with the VCU Insider Student Handbook and Resource Guide, which is made available on the Web at www.students.vcu.edu/rg.

**VCU Honor System**

VCU recognizes that honesty, truth and integrity are values central to its mission as an institution of higher learning.

The VCU Honor System describes the responsibilities of students, faculty and administration in upholding academic integrity, while respecting the rights of individuals to the due process offered by administrative hearings and appeals. All people enrolled in any course or program at VCU and all people supervising the learning of any student are responsible for acting in accordance with the provisions of the VCU Honor System.

The honor system gives definitions and illustrative examples of five acts which are violations of the policy, namely: cheating, plagiarism, facilitating academic dishonesty, stealing and lying. There are six penalties for students found guilty of these honor system violations. They are honor probation, assignment of grades, suspension, expulsion, revocation and other relevant sanctions.

**Office of Multicultural Student Affairs**

**Beverly Walker**

Interim Director

www.omsa.vcu.edu

The Office of Multicultural Student Affairs is a resource for students, faculty and staff. The primary mission of OMSA is to assist traditionally underserved and/or underrepresented student populations (race, ethnicity, sexual orientation, gender) through advising, support, program development, retention efforts and promoting an appreciation of diversity throughout the campus community.

OMSA service and program components include diversity training, leadership development, referral services, cultural programming, discussion groups, collaboration and partnership development, multicultural resources and scholarship information.

The staff members of OMSA are dedicated to serving as advocates for multicultural students' concerns and interests while providing advice to a wide array of multicultural groups.

All students are urged to visit the Office of Multicultural Student Affairs located in the University Student Commons, 907 Floyd Ave., Room 215, P.O. Box 843080, Richmond, VA 23284-3080; telephone: (804) 828-6672.

**Health Careers/Education and Special Services for Students, MCV Campus**

**Cheryl Chesney-Walker**

Executive Director

www.vchealth.org/vp/sassdss

This support is a personal service, located administratively under the Office of the Vice President for Health Sciences, designed to help individuals find ways to deal with the demands imposed by the health sciences curricula and to help them become effective and efficient learners. Students meet with the director for an assessment of their learning needs. The director then offers suggestions and strategies for dealing with their concerns.

Student Support Services activities include counseling for academic self-concept issues, anxiety reduction and learning strategies such as analyzing and organizing information, study methods, time management, test-taking skills and writing skills. Limited screening for learning disabilities and attention deficits is available. Students are referred to other sources for formal evaluation if disabilities are suspected.

Services for students with disabilities for the MCV Campus are provided by this office. For further information, refer to the Disability Support Services listing in this bulletin.

The HC/E&SSS office is located in the VMI Building, 1000 E. Marshall St., Room 202, P.O. Box 980124, Richmond, VA 23298-0124; telephone: (804) 828-9782 or TDD (804) 828-4608.

**Disability Support Services**

**Joyce Knight**

Coordinator

www.students.vcu.edu/dss

VCU is committed to providing students with disabilities equal opportunities to benefit from all programs, services and activities offered.

Disability Support Services provides:

- Support services including, but not limited to, advocacy, adapted materials, alternative testing, academic and career advising.
- Recommendations for appropriate academic adjustments including exam modifications, classroom accommodations, and auxiliary aids supported by recent documentation.
• Assistance to the VCU community in complying with the provisions of the Americans with Disabilities Act and Section 504 of the Rehabilitation Act of 1974.

• Liaison services between faculty and students with disabilities.

• Technical assistance to university departments.

• Current and accurate information regarding disability-related products, programs and services to current and prospective students, faculty and staff.

• Consultation with secondary schools, special educators, rehabilitation or high school counselors, parents and prospective students concerning university services for students with disabilities.

• A welcoming place for students to meet, share, study, and obtain information concerning disability related issues and opportunities.

Students with disabilities are responsible for self-identification prior to requesting services/accommodations. Students are strongly encouraged to request accommodations at least four weeks prior to the first day of classes; however, students may request accommodations at any time during enrollment at VCU. For additional information visit www.students.vcu.edu/dss.

The Disability Support Services office is located in the Student Commons, Room 102, PO Box 842529, Richmond, VA 23284-2253; telephone/TDD: (804) 828-2253; fax: (804) 828-1944.

Division of Student Affairs courses

Descriptions for all courses offered by the university may be accessed through the online courses database at www.pubapps.vcu.edu/vcucourses. You may search by unit, subject or keyword, as well as by degree level.

Follow this link to cooperative education (COOP) courses
Independent study abroad is for students who wish to study in a field not covered by any of the above study-abroad options. Students may elect to participate in a program offered by another university or organization. VCU Education Abroad will assist students in identifying and applying to the program, maintaining their VCU status while away, and securing financial aid where appropriate. All programs must be approved by VCU.

Except for summer programs offered for VCU credit, all credit received through study abroad will appear on the students’ transcripts as transfer credit. Students must earn the equivalent of a “C” or higher for credit to be awarded. Grades are not calculated into the GPA, unless a student is attempting to graduate with honors.

English Language Program

Nancy A. Beasley
Director

The English Language Program offers an intensive university-preparation language program for nonnative speakers of English and serves international students, U.S. citizens, permanent residents and refugees.

Core courses are offered at 10 levels of instruction – beginning through advanced – in five eight-week sessions per year. Core courses include: writing and grammar, reading and vocabulary, listening, speaking and pronunciation. Additional elective courses in American language and culture, as well as extracurricular learning opportunities, such as conversation partners and cultural/educational activities, are available to students.

Admission to the ELP may be recommended by the VCU Office of Undergraduate Admissions and International Admissions Office at the time of the application review. Students who want only English-as-a-second-language courses may apply directly to the program.

Placement in the ELP is based on the results of the English Language Placement Examination, a three-hour test in four parts: listening, reading, writing and oral interview. Students receive their test results by meeting individually with an adviser, who makes recommendations, answers questions and registers students in the appropriate ELP course(s).

Program offerings

VCU Summer Study Abroad

Each year faculty members lead short-term summer study with intensive instruction in an international context. Students may elect courses ranging from an intensive foreign language experience to art, business, and humanities programs. New programs are created each year in countries as diverse as Barbados, Spain, Guatemala, Peru, Italy, Germany, Mexico, France and China.

Education Abroad

Jasmine Phillips
Director

Founded in the belief that an international and multicultural perspective is invaluable to university students today, VCU Education Abroad encourages students from all majors and fields of interest to include study abroad and international exchange as part of their educational career. The benefits of education abroad are many. Students will learn to understand and function in different cultures, thereby developing a broader understanding of the ways the world works; increase knowledge of and facility in a foreign language; understand differences in educational styles and systems; and increase employment marketability upon graduation.

To accomplish these goals successfully, students are encouraged to study in another cultural setting for a summer, semester or full academic year as part of their degree program. VCU Education Abroad was established to assist students in accomplishing these goals by providing information, advising and by administering study abroad programs. VCU offers the programs listed below to encourage students to participate in overseas and external study.

Participants must be in good standing with the university with two full semesters of consecutive, successful full-time enrollment prior to participation. Please note that individual program requirements may vary.

International Admissions

Blair W. Brown
Director

VCU encourages qualified international students to seek admission to the university through the International Admissions Office. For complete information and application materials, students should write, fax, e-mail or download the application from the Web and contact International Admissions, Virginia Commonwealth University, 916 W. Franklin St., P.O. Box 843043, Richmond, VA 23284-3043, USA; call (804) 828-6016, e-mail vcuia@vcu.edu or access the Web at www.vcu.edu/oie/ia/welcome.html.

Applicants must complete the International Application for Undergraduate Admission form and submit academic records that demonstrate successful completion of secondary school education — usually 12 years of pre-university study in their own country.

As required by U.S. regulations and by VCU admission policies, nonimmigrant applicants must demonstrate satisfactory academic achievement, adequate English proficiency, and the ability to finance all educational and living expenses.
Applicants can refer to the freshman admission guidelines, transfer admission guidelines and admission procedures in the “Admission to the University” section of this bulletin for specific program requirements.

VCU is unable to provide financial support for international undergraduate students. Therefore, an applicant who needs a student visa must present documented evidence of available financial support to cover living and educational expenses while studying at VCU.

**English language proficiency requirements**

To ensure maximum benefits from academic study at VCU, all nonnative English-speaking applicants, regardless of immigration status, must provide evidence of English language proficiency before admission and/or before enrollment in the university. English language proficiency is evaluated on factors such as amount and type of formal American education, TOEFL scores and Scholastic Aptitude Test scores.

In general, VCU requires a minimum score of 550 (paper-based), 213 (computer-based) or 80 (Internet based) on TOEFL for admission for undergraduate students. The university reserves the right to require additional testing and study in the VCU English Language Program prior to full-time enrollment in university courses.

**Nonimmigrants (students with temporary U.S. visas)**

Because of time constraints involved in processing international applications and obtaining visas, prospective international undergraduate applicants should submit all required admission and financial credentials at least three months before they plan to enroll. Applicants who are unable to meet the document submission deadline may not have time to obtain the necessary visa for study at VCU.

Proof of current visa type must be submitted to the International Admissions office before enrollment, unless the applicant is requesting an F-1 or J-1 visa. Students possessing F-1 or J-1 visas admitted to VCU must submit copies of all immigration documents to the VCU International Student Adviser before enrolling in classes.

**Immigrants (permanent residents, refugees and asylees)**

Since immigrant applicants usually are in the U.S. at the time an application is submitted, these students must meet the same application deadlines as American citizens. Immigrants should submit their applications to the Office of Undergraduate Admissions. If educated in the U.S., immigrant applicants are considered under the same academic policies applicable to U.S. citizens. If educated outside this country, the same academic records are required as those for nonimmigrant applicants.

VCU requires detailed information about U.S. immigration status. Proof of permanent residency or of refugee and asylee status must be submitted with the admission application.

---

**International Student Recruitment**

**Ian P. Little**  
Director

Empowered by presidential initiatives and strong institutional commitment to internationalize Virginia Commonwealth University, the Office of International Education recruitment staff has embarked upon a proven in-depth international student and scholar recruiting effort. The four-year-old recruiting initiative has been successful, resulting in a 67 percent increase in the university’s international student enrollment from 640 students in 2004 to more than 1,100 in the fall of 2006.

VCU representatives travel overseas to attend educational fairs, and visit secondary schools and advanced degree institutions to recruit highly qualified undergraduate and graduate students for all disciplines. The quality and scope of majors in VCU’s liberal arts college and 15 schools, as well as the welcoming nature of the international admissions policy, make VCU a strong and attractive choice for American education for many students. OIE international recruiting also engages students via the VCU Web sites and other electronic and media outlets. Ongoing contacts with school and university counselors and private education admissions are a priority.

Focus for travel has been to the emerging international student markets in the areas of the Middle East and Gulf regions, the Far East and Pacific Rim countries, southern Asia and Latin America. The office also takes advantage of the university’s close proximity to Washington, D.C., to visit and contact embassy educational ministries for access to scholarship students. The international recruiting of the Office of International Education plays a vital role in diversifying and enhancing the international community at VCU and in the greater-Richmond area.

---

**International Student and Scholar Services**

**Pamela O. Haney**  
Director

**Robert A. Wood**  
Coordinator of Student and Scholar Services and Associate Director of International Recruitment

International students face many challenges when entering a new country. OIE’s International Student and Scholar Services offers assistance and guidance to students as they adjust to a different culture and pursue their educational goals. Student and Scholar coordinators help with pre- and post-arrival concerns, such as airport pick-ups, housing, banking, health insurance and other orientation activities.

Support continues throughout an international student’s stay at VCU. The Student and Scholar Services staff assists, advises and referrs students with nonacademic issues, including personal, legal, health and cultural. Academic and immigration matters are referred to appropriate advisers. The coordinators also confer with VCU faculty, staff and university officials regarding student concerns.

A student’s American experience extends beyond the classroom. Student and Scholar Services offers educational, cultural and social activities that promote international understanding and community. The weekly International Student Coffee Hour is a casual gathering where students meet and make friends, practice spoken English and learn about upcoming VCU activities. Students are encouraged to participate in other monthly OIE-sponsored activities, such as camping, skiing, visiting historical sites and tours of Washington, D.C., or New York City.

OIE also recognizes the importance of a support network, particularly when students are far from family and friends. In addition to the International Student Coffee Hour and monthly activities, Student and Scholar Services also provides opportunities for students to develop relationships with those in the VCU and Richmond communities. American volunteers extend the hand of friendship as conversation partners, friendship partners and hosts for holiday visits.

For information or assistance, please contact International Student and Scholar Services, Office of International Education, 916 W. Franklin St., at (804) 828-0808, by fax at (804) 828-2552, or by e-mail at rawood@vcu.edu or pohaney@vcu.edu.
